Eight Hundred Kegs of
Powder Shake Charleston

Charleston, S. C., April 13—Eight hundred kegs of powder, stored in a building a quarter of a mile south of the Charleston general ordinance depot and ten miles from here, exploded shortly before noon today.

The cause of the explosion is not known. The shock of the blast was felt for many miles around, and many people of Charleston were panic stricken, thinking that it was an earthquake.

ANNUAL MEETING
OF PRESBYTERIANS
HELD WEDNESDAY

Services of Pastor Approved
by Congregation Granting
Substantial Salary In-
crease.

The annual meeting of the First Presbyterian church congregation held in the church last night proved to be the most enjoyable as well as the most successful in the history of the church.

The next big social feature on the Pythian program will be a Coronado Pyre Smoker to be held in Castle Hall Friday evening.

That the purchase of Rev. Harry W. Smith had been a magnificent success is the opinion of the people of this city.

Departmental reports were submitted to the board of trustees by the various departments of the church.

The report of the Sunday school work showed a creditable record for the year.

The report of the church members showed a steady increase in the number of members.

The report of the church treasury showed a surplus of funds.

The report of the church social work showed a successful year.

The report of the church evangelism showed a successful year.

The report of the church education showed a successful year.

The report of the church music showed a successful year.

The report of the church prayer showed a successful year.

The report of the church service showed a successful year.

The report of the church fellowship showed a successful year.

The report of the church witness showed a successful year.

Former Petrograd
District Attorney
Arrested In U. S.

NEW YORK, April 13—While deputy sheriffs were hunting about the city today for General Gregorie Semino, the former leader of the Cossacks, who furnished him aid, George W. Karavsky, formerly the district attorney of Petrograd, was arrested at the corner of Broadway and Chambers street, charged with carrying a pistol without a permit.

Karavsky later produced a regular permit to carry a pistol and was released.

AN ESCANABA BOY'S
IDEA OF HEAVEN IS
WIERD CONCEPTION

Thinks It's Approximation
Found in Detroit Where
Smoky Scappers and
Burlesque Queens
Reign.

If you really want to get the idea of heaven, you should go to Detroit.

The idea of heaven is a weird conception, according to a young boy from Escanaba.

The boy, who is a member of the Escanaba Pythian lodge, has a weird idea of heaven.

RUSSIANS BALK
AT CONFERENCE
IN GENOA, ITALY
Won't Accept the Six-
Tribunal Clause of
Allied Program.

GENOA, Italy, April 12.—The Russians balk at the financial guarantees demanded in the program prepared by the allied experts.

The Russian consider the tribunal clause as an infringement upon Russian sovereignty.

English Delegates Confer.
LONDON, April 12.—Premier Lloyd George, Foreign Minister Chamberlain and M. Barlett, heads of the British, Italian and French governments at the Genoa economic conference are holding an important meeting today.

GIRL CLAIMS
SHE'S DRUGGED
WHILE ON TRAIN

Arrives in New York
in Unconscious Con-
dition.

NEW YORK, April 12.—Found lying on the sidewalk on West End avenue early today, Miss Ruth Kennedy of Milwaukee and Cleveland told the police she had been struck by two strange men while on an east bound train from Ashtabula, Ohio.

The young woman said she formerly lived in Milwaukee and conducted a beauty parlor in Cleveland. She became disoriented and, decided to come east. On Monday she boarded a train at Buffalo. She became ill, she declared, on the train and was given something to drink by one of the two men. They took her from the train and gave her another drink, after which she became unconscious.

The police took her to a hospital.

THE WEATHER
For Escanaba and Vicinity—Cloudy tonight and Friday; continued cold.

Three Boys Held in
Connection With the
Drowning of Friend

DETROIT, Mich., April 12.—Three boys ranging in age from 11 to 17 years, are held here pending investigation of charges that they threw Louis Darden, aged 10, into Conners creek on the east side, after stripping him of his clothing.

Young Darden's clothing was found on the creek bank yesterday but his body has not been discovered as yet.

Progress Is Made
In Reforestation
During Past Year

NEW YORK, April 12.—Reforestation to provide for a continual supply of raw material has been making progress in the last year, D. W. Sisson, chairman of the American Paper and Pulp Association forestry committee reported today at the annual convention.

He said that the congressional committee had voted an entire week of intensive study of the nation's forestry product and had been urged to enact measures which would start a new growth on the 81,900,000 timberless acres of land in the country.

He said that the congressional committee was hopeful, he added, for enactment of legislation in the present congress.

New Orleans is to use poison gas in an effort to exterminate rats.

DR. MEDBURY TALKS
HERE THIS EVENING

Brilliant Orator to Deliver Fa-
mous Lecture "The Man
of Now" at the High
School.

Dr. Charles S. Medbury, who appears here under the auspices of the Escanaba Community Educational Bureau at the High School auditorium tonight, at 8:15 o'clock, comes with the reputation of being one of the most brilliant orators on the American platform today.

Two characteristic personal comments on him and his lecture follow:

"He opened up the new era into which our lives had been carried, put personal responsibility home to each of us, and made duty sweet, sacrifice attractive, and life itself secondary to doing nobly. Such a message cannot be reported. Only those who thrilled and suffered and were exalted to new ideals by his words can know the power of Doctor Medbury in his message, 'The Man of Now.'"—Macon, Ill., Daily Chronicle.

"His subject concerned the new tasks which are presented to the people of the United States and the world. Doctor Medbury is a wonderful thinker and speaker. He is too large to deal with trifling things and is thoroughly a constructionist and forward-looking man."—Keota, Ia., Eagle.

Mine Workers Claim
Big Gains Made in
Non-Union Fields

INDIANAPOLIS, April 12.—Continued gains in the non-union coal fields were claimed today by the union mine workers, for the nation wide suspension of work in the coal industry. It was announced that there are now 665,000 miners participating in the walk-out.

Though she is dead and blind, 16-year-old Wileta Huggins of the Wisconsin State School for Blind, is able to "see" colors with her nose and take a telephone message with her fingers.

BARBEAU WINS
LAW SUIT ON
UNIQUE POINT

Court Holds Owner of
Car Not Responsible
for Damages.

A personal injury case went to trial in the circuit court this morning, in which Peter Sumpston, whose damages for injuries sustained when a horse owned by the late Stephen C. Kooker bit last winter, William S. Black and J. Earl Moore, are named as the defendants. The case was still in progress at press time this afternoon.

A nice point of law occupied much attention in circuit court yesterday during the trial of a damage case of William Jennings Bryan against Andrew Barbeau, of Rapid River. Bryan claimed damages by reasons of injuries sustained when he was run down by an automobile owned by Barbeau. It developed that Mr. Barbeau had permitted his son to take the car and that the son had allowed a friend of his to drive it, and it was during this time that the accident occurred. It also appeared that the plaintiff was guilty of some negligence himself.

The arguments had to do with whether or not the owner of a car was responsible for damages done while the car was being operated by someone not a member of his family. The court, after hearing local arguments, took the case from the jury, and directed a verdict for the defendant, on the ground that the owner of the car could not be legally held responsible for damages unless the car was operated by himself or some member of his family.

Confidence Masters
To Confer Degree in
Masonic Fraternity

The Confidence Masters degree of the Masonic lodge will be exemplified on a number of candidates Friday evening at 7:30 o'clock. It is desired that all candidates appear at that time as this will be the last time this degree will be exemplified until next winter.

RINK OPEN TONIGHT
The Coliseum rink will be open for skating this evening and will open as usual Saturday afternoon for the benefit of the children skaters. Manager Flath stated today he intended closing the rink on April 20th.

Special Services
Begin at 7 O'clock
The special service at the First Methodist church this evening will begin at 7 o'clock and close at 8 o'clock, so that people can attend this and the lecture by Dr. Medbury.

Every Little Dance Frock Has a Cape All Its Own

FROCK AND MATCHING CAPE

cape matches in color and material, carrying out the rosette motif all around the bottom, boasting five in number. This is a good flapper model.

Below in the small sketch is a suggestion for a taffeta hooded cape, with hood and scarf ends edged with silver-peccod taffeta frilling. This is a model that can be made up to match the taffeta frock already in the wardrobe.

In the photo above is a novel wrap of orchid taffeta shot with pink, and orchid net. The net is silver edged, and cascades down the front in no less than nine ruffles! And beyond this fluffy trim are five taffeta folds that might turn into ruffles themselves if they were urged a bit more vigorously. Verily a cape that would delight the heart of Paris. It is worn by Leslie Jean, a young woman in Paramount pictures, who supports Thomas Meighan in his latest Paramount picture, "The Bachelor Daddie," and was selected by her to match the evening gown which is a beautiful orchid net.

WHEN one selects a dance frock for the coming summer evenings, the matter does not end there. A cape to match it must be chosen as well, for fashion has decreed that a cape of the same material, or trim, as the frock, must accompany it.

In the upper sketches, the one to the left shows a frock and its matching cape. The frock is of

praline taffeta, "praline" being the newest shade of mauve-pink. It is a simple model with the youthful broad shoulder, just the thing for the young girl's coming spring school dances, class parties, and May dances. The bodice is draped across the waist precisely as the latest models from Paris are. Two panels on either side flaunt enormous rosettes of self-material, frayed at the edges. The

ROY CHENEY WILL BE NEW PRINCIPAL AT HIGH SCHOOL

New Man Comes to Escanaba With High Recommendations and Is Considered Capable Man.

Announcement is made by the board of education of the employment of Roy Cheney, of Mt. Pleasant, Mich., as principal of the high school to succeed C. C. Strickland, whose resignation was tendered the board some time ago.

If you have Goiter or Swollen Glands, we have a remedy. Staffeld Brothers, 15 Merrill Bldg., Saginaw, Michigan. 110

The rank of title of admiral did not exist in the United States navy until 1866, when it was created by congress and conferred on David G. Farragut.

Healing Cream Stops Catarrh

Clogged Air Passages Open at Once—Nose and Throat Clear.

If your nostrils are clogged and your head stuffed because of catarrh or a cold, use Ely's Cream Balm at any drug store. Apply a little of this pure, antiseptic, germ destroying cream into your nostrils and let it penetrate through every air passage of your head and membranes. Instant relief.

How good it feels. Your head is clear. Your nostrils are open. You breathe freely. No more hawking or sneezing. Head colds and catarrh yield like magic. Don't stay stuffed up, choked up and miserable. Relief is sure.

Supt. Olds has carefully investigated the qualifications of Mr. Cheney and feels that Escanaba is to be congratulated upon its good fortune in securing his services. He is at present principal of the high school in the lower Michigan town and has a splendid record of accomplishment.

Mr. Cheney has been in public school work for several years. He is a graduate of Alma College, Central State Normal and the University of Michigan and in addition to other high recommendations, is given most flattering commendation by professors of the state university.

He is a married man and has one daughter. It is expected the high school will continue along its usual high grade lines under his supervision.

CLAIM MICHIGAN WATER DIVERTED WITHOUT RIGHT

Has Been Going On for Twenty-Two Years Without the Sanction of Congress.

MADISON, Wis., April 13—Water needed to maintain the normal level of Lake Michigan so that navigation will be unhampered at important Wisconsin ports as being illegally diverted into the Chicago drainage canal, Attorney General William J. Morgan, of Wisconsin, will allege in an action he plans to commence early in May before U. S. Supreme court to restrain the state of Illinois and the sanitary draining district of Chicago from longer using the lake water to carry off its waste.

For 22 years this diversion of Lake Michigan water has been going on without sanction of congress, according to R. M. Hoyt, deputy attorney general, who will prosecute the action. During the last few years it has increased to such an extent that now 10,000 cubic feet are being taken each second, lowering the level of the lake six inches, according to recent estimates of army engineers.

As a result, it is to be claimed the depth of water in lake ports has been lowered to such an extent that extensive dredging has been necessitated to prevent hindrance to navigation. Abandonment of certain docks in Wisconsin ports has even been contemplated due to the fall in the level of the lake, the attorney general will argue.

To Avoid Epidemics

Chicago has contended that it has been necessary to divert the lake water to avoid epidemics, a claim which Wisconsin will argue is unfounded on the ground that the open ditch method of disposing of waste is antiquated, it is asserted, as recognized by other lake cities which have made large expenditures to construct plants for treating their refuse.

It was in 1893 that Russell Alger, then secretary of war, authorized the sanitary drainage district of Chicago to divert 5,000 cubic feet of water per second from Lake Michigan on condition the whole matter was referred to congress. Two years later Elisha Root, secretary of war, reduced the amount to 4,167 feet a second, without referring the matter to congress.

As the sanitary district has grown, Mr. Hoyt says that the amount of water used has increased until now nearly 10,000 cubic feet a second is diverted.

Suit was commenced before Judge Keneaw Mountain Landis in U. S. District court to restrain the use of

the 4,167 feet of water and two years ago he announced he would enter an injunction, according to Mr. Hoyt, but the restraining order has never been issued.

Wisconsin's Position

Wisconsin takes the position that the district is authorized to take no water from the lake in any form for use in its drainage canal. At present the lake water is being sent down the canal 26 miles where it goes into the Illinois river and from there to the Mississippi.

Further effect of the diversion of the lake water is said to be changing the direction of the current in the Chicago river, which now flows away from Lake Michigan instead of into it, as was the case before the canal was built.

Michigan and Ohio probably will be invited to join in the action to be commenced by Wisconsin on the ground that their ports are equally affected by the lowering of the lake's level caused by the Chicago drainage canal. Canada also is said to be affected.

For the last year the attorney general has been gathering data on which to base his case. All necessary arrangements are said to have been completed and the argument prepared, so that a bill can be filed with the U. S. Supreme court early in May.

The Grand Bazaar in Stamboul is said to be lighted by electricity.

Popularity Ever Increasing

The Pure Deliciousness of "SALADA"

Natural Leaf Green Tea is recognized, as the tremendous increase in the demand for it shows.

NEW ISSUE

\$300,000

Escanaba Power & Traction Co.

General and Refunding 6% Gold Bonds Series "B"

Dated April 1, 1920 Interest payable April 1 and October 1, Due April 1, 1942

Redeemable as a whole or in part on any interest payment date at the option of the Company on thirty days' notice at 105 and interest. Principal and interest payable at the office of the Trustee, The Michigan Trust Company, Grand Rapids, Mich. Company agrees to pay interest without deduction for Normal Federal Income Tax up to two per cent. Denominations of \$1,000, \$500 and \$100.

The Michigan Trust Company, Grand Rapids, Michigan, Trustee AUTHORIZED BY MICHIGAN PUBLIC UTILITIES COMMISSION

PROPERTY: The Company, owning three hydroelectric power plants on the Escanaba River developing about 7,500 horse power, furnishes electric power for the lighting of Escanaba and Gladstone, and also furnishes power to various industrial plants. The Company also operates the Street Railway system of about five miles in the City of Escanaba with an interurban line of eleven miles to Gladstone and Groos, a total operated mileage of about sixteen miles.

Under the terms of an advantageous contract with the Escanaba Paper Company the Power & Traction Company has the use of a new and modern steam plant with a developed capacity of 2,000 horse power.

VALUATION: The valuation of the plant and property of the Escanaba Power and Traction Company submitted by the company in June, 1917, under testimony before the Michigan Public Utilities Commission, was placed at a total of \$1,548,600 since which time there has been invested in the property for betterments and improvements, an additional \$237,489.46, and from the proceeds of this issue a further \$70,000 is being expended, giving a total value of \$1,856,089.46 against a total funded debt of \$1,009,000 bonds outstanding in the hands of the public.

PURPOSE: These bonds are to be issued in connection with the refunding of \$200,000 7% Serial Notes which have been called for redemption on May 1, 1922, and the remainder of the proceeds will be used to increase the output of No. 1 and No. 2 Dams, there being a good market in Escanaba and Gladstone for the additional power.

EARNINGS: Net earnings for the year 1921, after deducting Taxes and liberal maintenance were \$111,095.90, against interest charges of \$49,950.00. On the basis of the bonds now outstanding, including the above issue, the total interest charges for 1922 will amount to \$53,450.

FOR EACH OF THE PAST TWELVE YEARS THE NET EARNINGS OF THIS PROPERTY AFTER TAXES AND LIBERAL MAINTENANCE HAS EXCEEDED TWICE THE INTEREST CHARGES.

SINKING FUND: The Company agrees to pay to the Trustee each year commencing January 1, 1923, a sum equal to 1% of the principal amount of all outstanding bonds under this mortgage, such funds to be used in the purchase of the mortgage bonds of the Company at not more than 105 and interest, or such other securities as are satisfactory to the Trustee.

Legal proceedings in connection with this issue will be passed upon by Messrs. Miller, Mack & Fairchild, Milwaukee, Wisconsin

The above Bonds are offered when, as if issued and received by us, but subject to approval of counsel.

Price 94½ and Interest, to Yield about 6.50%

Meeting Severe Tests of Service

THE dominating idea which has sustained those guiding the activities of the Standard Oil Company (Indiana) is expressed in a series of products which have met successfully the severe test of sustained service.

The Directors of this Company, realizing that petroleum products are essential to the welfare of the community, are striving constantly to achieve an ideal of practical perfection in every product manufactured and sold by this Company.

The result is, that wherever strains are severest, wherever the need is most intense, there will be found products, devised by the experts of the Standard Oil Company (Indiana), to meet the conditions and relieve the situation.

As an example of a product, which bears up under rather spectacular service tests, take Fortnite Long Time Burner Oil for railway signal lamps. Every traveler on a railroad realizes the vital importance of dependable signals. This dependability rests to a large degree upon the quality of oil used in the lamps. It has been found that wherever conditions are particularly severe Fortnite Long Time Burner Oil has delivered highly satisfactory service.

The same ideal of perfection applies to every one of the long list of petroleum-products manufactured by this Company, whether the demand for them be large or small. Each of these products has a record of reliability. Each is made to meet the highest standard of quality and this quality is maintained.

This ideal of service to meet severe tests is one basis upon which to estimate the value to the community of the service rendered by this Company.

Standard Oil Company (Indiana)

"Let's Make Escanaba A Better City"

HASTY AMERICANS.

In his address before the State Dental Society, President Burton returned to a theme he has discussed so often since he began his duties at the University of Michigan, that one must believe he regards it as of the greatest importance.

Dr. Burton has found that this is a superficial country. In the educational system and outside also, he thinks there is a sad lack of accuracy and thoroughness. Instead of deliberation, he finds haste and a rush to get things done whether they are done well or not.

Similar criticisms of American students have been heard abroad. The American scholars at Oxford have made a good showing there, but they have been criticised for appearing at that university without the thorough preparation they ought to have.

If these criticisms are well founded there must be an underlying cause. It cannot be racial, for every race is represented here and while attempts have been made to ascribe American peculiarities to climate, the theory is far from satisfactory when one remembers that the United States can match climates as various as those of England and the Sahara desert.

Possibly American haste to get at the thing to be done without giving much consideration to education or any other kind of preparation is due to habits acquired throughout the many years when easy opportunity cried out to be embraced. Free land, rapidly growing cities, gold strikes, oil strikes and innumerable projects looking to sudden riches through national development constantly beckoned the young American to start on the run and get his share before somebody else arrived.

The days when haste to get there first was a way to make a fortune in this country have gone, but the habit that was then engendered may still persist. If that is so, correction will come in due time from bitter experience.

ENGLISH IN THE PHILIPPINES.

A recent dispatch from Manila says a number of candidates for public office in the Philippines are using the English language in their speeches.

When the American occupation began, the islands had been for centuries under Spanish rule but the Spanish language was used only by the few who enjoyed special advantages, while the native languages were many and mutually unintelligible. There are now eight languages each spoken in the islands by not less than half a million people, and seventy dialects used locally. Common action is almost impossible with such a confusion of tongues, but under the influence of American school teachers the barriers to inter-communication have begun to break down through the figures just given show that there is a long task of education yet to be performed before one language will prevail, and there is reason to fear that it will never be accomplished without continued American support.

Indeed the investigation made by General Wood and W. Cameron Forbes reveals the fact that the early progress made in spreading English is in danger of dying out. There is a great shortage of English-speaking teachers in the islands, many who attempt to teach English understand the language very imperfectly and against the degenerating influence of these incompetent instructors there stand only about 300 American teachers in a school system which tries to care for close to 1,000,000 children. Many Americans are needed. Yet those who are keen for the rapid Filipinization of the islands and the expulsion of Americans from controlling places, are advocating a policy which will be likely to result in the loss of what has been gained toward the establishment of a common language.

MEXICAN FINANCES.

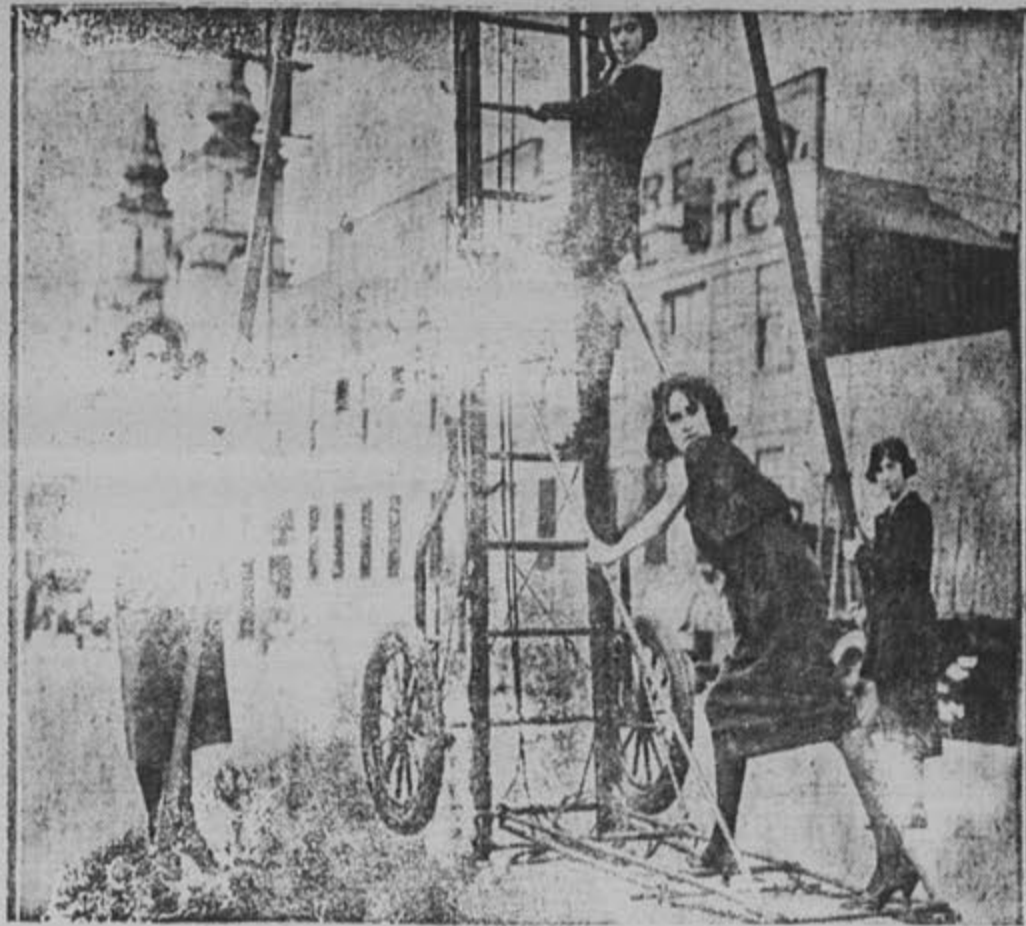

The Mexican government announces that it will take up the subject of its debts with an international committee of bankers in New York next month when it is expected arrangements will be made to restore Mexican credit.

At the time when the disturbances in Mexico were at their worst, people wondered whether the government would ever right itself and resume its place as a nation that could be trusted to do business in the world at large. Since then other nations more powerful and richer than Mexico ever was, have become so badly involved financially that its plight seems but a small matter in comparison. Nobody now thinks of Mexico as a nation headed for bankruptcy and certainly the \$222,000,000 which is owed directly by the government is not too great a burden for the country to carry. Moreover the default in interest payments which went so far to discredit Mexico does not look so grave as it did before all of the most powerful nations, except the United States, began to ask for time in which to meet overdue interest.

There does not seem to be any reason why the Obregon government cannot reach a satisfactory arrangement at the New York conference, and, assuming that things go well thereafter, Mexico may ultimately find herself numbered among the sound nations in the financial world instead of being thoroughly discredited as it was only a few years ago.

A French journalist 101 years of age claims to be the oldest newspaper man in the world but "Old Subscriber" began writing for the papers long before his time.

When President Harding cleared out the Bureau of engraving and printing he must have felt as though he were back at the old job.

SAN FRANCISCO FIREMAN INVENTS QUICK RAISING LADDER—Tests are being made by a new quick raising ladder which is mounted on a patented wheel base and can be raised by two men in fifteen seconds. It takes 25 men to handle the regular fire ladder. The ladder is 55 feet, extended, can be hooked under a fire truck or carried on a Ford. In tests made four girls handled the ladder which weighed 375 pounds, with ease. Photo shows one girl balancing the ladder.

HOW THE FIRST LOCK WAS MADE

Development of Present Day Key Tells Interesting Story of Pioneer Days.

The modern lock is a development of the horizontal bar placed across the inside of the door. This was a good substitute for a lock when one remained inside, and to adjust it so that it would fall into place when the door was closed from the outside, was comparatively simple, but to lift the bar from the outside when one wished to enter was the problem. This was accomplished by fitting a hole into the door post, through which something designed to lift the bar was inserted. This was the first key hole and the instrument used in lifting the bar was the first key, says the Brooklyn Daily Eagle.

The simplest idea for preventing the bar from sliding was to bore a hole in the top of the bar which would also penetrate the staple on which it rested, and drop a peg into the hole through the staple. The unlocking problem could be accomplished by any instrument which would lift the peg and permit the bar to slide back. Then a series of pegs were used, all of which had to be lifted, unlocking would be made difficult. In our modern locks, the pegs have simply been replaced by "tumblers" on which the keys act in the same way. The key originally had wooden pegs fastened to correspond with the pegs holding the bar in place on the inside, and these pins developed into the notches which are on our modern keys. As there were no pockets in those days, the other end of the key was made into a ring and worn on the finger. That is why the keys of today usually have a ring at the end—just a relic of the past.

ARREST OF JUDGE AS SPEEDER ONLY "JOKE"

(By Associated Press) PITTSBURGH, Pa., April 12.—The "arrest" here of Judge Charles Barr, left of Detroit on a charge of speeding, was a "joke" it developed here when his friends explained that they dissipated traffic regulations in an effort to have the judge hailed into court. Judge Harrell, a champion of traffic laws, was taken for a ride by several nobles of the Mistic Shrine. Members of the party said that when the driver sped a motor cycle off in the office he sent the motor forward at high speed. As expected, the officer gave chase and the party landed in police court. The police decided that the judge was a victim of a joke, and the charge was dismissed.

Miss Mary L. Patton, who owns and operates two cafeterias in Chicago, is planning to open a third establishment on the same city which will be the largest eating place of its kind in the world.

MAURETANIA IN FAST TRIP ACROSS ATLANTIC

CHERBOURG, France, April 12.—The Cunard steamship Mauretania arrived yesterday from New York, making the trip from Ambrose channel lightship, 2,161 miles, in five days, ten hours and nine minutes, which is declared to be the fastest time recorded by any trans-Atlantic vessel since August, 1914.

Any baby living long the Tiger Tamer will tell you that tigers are easy to train. If you want to see a tiger, and not push you down. Of course, these playful pets won't bite you while they're older.

Get Your Chimneys Cleaned

C. F. Noor, who has spent most of his life in this kind of work will be in the city for several days to take care of chimneys and furnaces.

A Recommendation--

"This is to certify that C. F. Noor has swept over 200 chimneys for the Oliver Iron Mining Company and I am more than satisfied with his work. He is very thorough in every case and reports the condition of all chimneys and recommends any work needed."

"I gladly recommend him to anyone who is in need of this kind of work."

"JAMES BRYDEN, Surface Foreman Oliver Iron Mining Co., Ishpeming."

When Will There Be A Disarmament of Dining Tables?

Suppose everybody would recognize the fact that there's no gain but much loss in keeping up hostilities with the stomach!

Suppose the ancient aggravation of improper food on indignant digestive organs should be settled with guarantees of sensible diet and tranquil digestion!

The saving would be beyond all possibility of counting.

Yet millions go on declaring war on the stomach and accepting war in return—loading up on starchy, heavy, unbalanced and highly-seasoned food at breakfast or lunch—and wondering why comfort, happiness and efficiency are out of reach.

Grape-Nuts makes a friend of the taste and an ally of the stomach.

There's a charm and satisfaction to this delicious food which prompts appetite to say, "There's a meal!" and digestion to answer, "Thank goodness, here's peace at last!"

Grape-Nuts is the perfected nutriment of wheat and malted barley—sweet, crisp, and wonderfully nourishing. It digests quickly, and provides the necessary elements, including the vital mineral salts, for body, nerve and brain.

Order Grape-Nuts from your grocer today, and let a delighted taste pass a treaty of peace along to an enthusiastic digestion and assimilation.

'THE BAT' COMING HERE APRIL 27TH; A GREAT MYSTERY

Play Which Breaks All Records in New York and Chicago, Will Astonish Local Audience.

Men delight in saying that women cannot keep a secret and women come right back at the stretchers and declare that it is men who cannot keep a thing to themselves.

'The Bat,' the highly mysterious play by Mary Roberts Rinehart and Avery Hopwood, which Waggoners and Keuper present at the Delt theatre...

From the day 'The Bat' was first produced, critics and audience alike have been asked to keep the story of the play a secret.

If men and women were paid to 'keep mum' about the last few seconds of the last act of a mystery play, who would deny that the secret would be told as soon as the paltry fee for silence had been paid?

The simple fact is that an American is quite as ready to say 'yes' as 'no.' It is proof that we were all wrong when we thought our pal would tell when we 'swiped' a few apples back in our youth.

File on you suspicious ones. Go and see 'The Bat.' And keep its secrets. You will.

Seat sale opens Tuesday morning, April 25.

MEN GIRLS LOVE By Laurel Gray

GIRLS love realistic men. Girls who find the lovely life of involuntary spinsterhood preferable to the society of dull men and drab men...

know it. It is a curious paradox that the realistic man is usually a romantic man. But behind the finer imaginings of his romance there is the firm, dependable common sense of the realist...

HEAVY MEAT EATERS HAVE SLOW KIDNEYS

Eat less meat if you feel Backache or have bladder trouble—Take glass of Salts. No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority.

The moment you feel a dull ache in the kidneys or your back hurts or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, stop eating meat and get four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast and in a few days your kidneys will act fine.
