BALDWIN IS THE NEW BRITISH PREMIER

KING GEORGE PICKS A NEW STAR FOR JOB

Was Comparatively Unknown in Politics Until Law Advent.
His Handling of Current Budget Attracted Favorable Notice of All England.

London, May 22.—Stanley Baldwin is Great Britain's new prime minister. He accepted the premiership offered him this afternoon by King George.

The new minister played a comparatively minor part in British politics until the advent of Bonar Law, following the resignation of Premier Lloyd George and the break-up of the coalition party, which guided British destiny during the war.

Under Lloyd George, he was financial secretary and later president of the board of trade and it was in recognition of his ability in the field of finance that he was named to the premiership. When Bonar Law became premier he appointed Mr. Baldwin as chancellor of the exchequer.

His handling of the current budget which makes possible various reductions in taxes notably the levy on income brought much favorable comment. Since Bonar Law has been ill it has been almost impossible for him to take part in parliamentary debate and Mr. Baldwin acted as government spokesman in the house. The new premier is 55 years of age, is married, has two sons and four daughters.

FLAPPERS LEARN THAT VALENTINO IS ALMOST BALD

Barbering, Hair Tonics Fail to Conceal Flaw in Movie Star.

WASHINGTON, May 22.—Rudolph Valentino, who made the sheik a hero, came dancing out of the west Friday night and smiled himself so thoroughly into the hearts of about 2,000 feminine admirers that not one of them appeared to notice their hero is almost bald.

Amidst the wild excitement which marked Rudolph's appearance at a local hotel it remained for movie man—cool in the midst of the crush and turmoil of those first few minutes in the tinsel ballroom—to run an appraising eye up and down the dazzling features of the movie idol and find on the back of his head, the one flaw careful barbering and hair tonic had heretofore concealed. "He's bald," breathed the awed flapper, in much the same manner Columbus must have displayed when he discovered America.

CITY GOING AFTER PERSONAL TAX IN A DETERMINED STYLE

Assessor Advised to Crack Down On a Lot of 'Invisible' Property of Value.

In accordance with action taken last night by the city council as a special session, City Assessor Ramsey will proceed to revise his estimate of unimproved and unimproved property, in the matter of getting a proper assessment of personal property valuations from persons and firms which have "invisible" property, thereby increasing the tax on real property in the proportion to which personal property is assessed.

This matter has been a source of trouble to the tax collectors for years. Finding it onerous, people just simply did not report their personal property and when they did not report it, a penalty was levied and a writ of execution issued, which they fought like a dog against paying the tax assessed on the amount so declared.

Different Now.

Now it's going to be different. It has been discovered that the law has a lot of large, leggy moose and horses and one local city commissioner is going to stand behind the city assessor in having him put these recent operations.

It is estimated that a reduction of about 20 per cent could be brought about on real property, if personal property taxes could be collected. And that is the city's problem.

It is not contemplated that taxes should be raised, it is simply a proposition of reducing the too high taxes on real property and placing its fair share of the burden on personal property.

Luxuries Hidden.

For instance there is said to be lots and lots of money tied up in stocks, bonds, diamonds, furs of one sort or another, on which the owner is paying no tax. At the same time that owner is not a real property owner, the inevitable result is that the small home owner is paying the tax which should be paid by the diamond and stock and bondholder.

City Assessor Ramsey has been up against "pretext" for so long that he became discouraged and he wanted to know just how far council was prepared to go in backing him up. It is stated to get some personal property on the rolls that should have been on for many years. Mayor Johnson was prepared to go the limit and said so. In fact he mentioned many instances of tax dodging which he felt could be corrected. The other commissioners felt the same way about it and the upshot of the meeting was that the city assessor was told to "hop to it" and get the money.

Council is backed by state law and city law, while the law of morality ought to be a strong force in bringing forth from hiding, much of the personal property, which is now said to be under cover.

FOREIGNERS TRANSPORTED TO SUMMIT OF MOUNTAINS WHERE THEY LIVE IN DIRTY DUGOUTS

TIEN TSIN, China, May 22.—Latest advices from Tsao Chwang today confirmed the complete deadlock reported in the negotiations conducted by the Peking government in their efforts to procure the release of the foreigners held by the bandits in the Shantung mountains.

Conditions under which the foreign captives are being held on the summit of the mountain were described as terrible. The only real peace offer put forth by the Tschun of Shantung province is said to have been rejected by the bandits with the laconic reiteration "Withdraw the troops to their original station."

Plan of Withdrawal.

The Tschun offered to withdraw some distance with the release of a third of the prisoners, upon release of another third, the offer to comply with a third of the demand for withdrawal and when the remaining third were allowed to go, the bandits would be allowed to begin at the regular army.

The outbreak, however, refused to believe the Tschun and so notified the foreign representatives at Tsao Chwang. Most of the captives have been taken to the very summit of the mountain and it is believed others will follow. Letters from the captives still reaching the outside have established something of their movements.

Lee Solomon, one of the hostages, who is the Shanghai agent for a San Francisco firm, wrote describing his trip to the summit of the mountain. "We started at six o'clock. It was hell. You climb up the mountains for 1800 feet and it is something like scaling the Woodman building. At the top it is terrible, the summit covers only two acres, all covered with dirty dugouts. Twelve of us live in one of them. There are 40 or 50 Chinese persons here also, mostly children."

NAME C. W. KATES CHAIRMAN OF THE DELTA CO. BOARD

Wells Man Selected by Vote in a Friendly Contest With Former Chairman C. E. Hawkins.

Members of the Delta County Board of Supervisors held their first meeting today since the recent elections which made some changes in the personnel of the board. The chief business of the morning session was the selection of a chairman, a matter which rested between former chairman Claude E. J. Kates of Gladstone, and C. W. Kates of Wells. Mr. Kates was the victor in the friendly rivalry and will be the head of the board for the next year at least.

Standing committees were to be appointed by Chairman Kates at this afternoon's session and it was expected that all the business of the meeting would have been completed by this evening.

A communication from the Northern Road Builders Association relating to conditions of construction work, possibilities of its continuance, the present status of financial affairs, was submitted.

Judge Yelland submitted a report of the result of his visit to Lansing and his work on behalf of the Escanaba Tax Bill which passed in the house and failed of passage in the senate and a price list of maps for the county was submitted.

It had been expected that Sheriff Carney might advocate the employment of county motorcycle cops by the board, but such a request had not been made up to the time of convening for the afternoon session.

Harding Talks Over Situation With Cabinet

(By the Associated Press.)

WASHINGTON, May 22.—President Harding, in consultation with the cabinet today, decided that the American government must be guided by advice from Minister Schurman, at Peking, and the consular officers in China, in its efforts to secure the release of the United States and other foreign citizens held captives by bandits in Shantung province.

Only as a last resort, it was added by White House spokesmen, will the United States government participate in direct negotiations with the bandits or take any action which will relieve the Peking government from responsibility in the case.

The Chinese situation is understood to have been the only subject of discussion by the cabinet today. Cabinet officials are said to regard existing conditions in China as very serious.

FARMERS KICK ON CONDITION OF CITY ROAD Want City to Make Repairs So Tail Light Stay On.

A number of farmers living on the Danforth road were visitors at last night's special meeting of the city council and explained to that body the necessity for making repairs to the city's portion of the Danforth road and the streets leading from it. They explained that the road was so rough it was impossible to bring milk into the city without having it terribly churned up by the time it arrived. But one of their main grievances was that the road was so rough, it shook their tailights off their cars, or the connections loose and the result was trouble with the police when they arrived in the city and happened to remain after dark.

Two Officers Killed While Pinching Thug

Two Others Wounded in Gun Fight With Suspect and Woman.

Man and Woman Driven from House by Gas Bombs and Captured After Desperate Battle.

(By the Associated Press.)

JERSEY CITY, N. J., May 22.—Two policemen were shot to death and two others were seriously wounded today in a gun fight, when they tried to arrest Frank Sayes, hold-up suspect, at his home. Sayes and a woman companion were caught finally when police reserves drove them from the house with gas bombs.

Six officers had gone to arrest Sayes in connection with a recent hold-up in which \$9,000 was stolen. Sayes saw them coming and opened fire from a window. A detective dropped. Three policemen rushed the building and without another shot being fired, until after they had been inside the house for a minute or so, when there was a volley from the second floor.

One Dead; Two Wounded.

Upon hearing the shots two officers from outside gained entrance and found one officer dead and two wounded lying outside the door of Sayes' bedroom.

Reserves were summoned, and the deputy chief of police renewed the attack. He led several men into the building in a search but Sayes was not found. Finally an opening door in the ceiling of the hallway was discovered. Warning his men to keep away from it, the chief sent to headquarters for a gas bomb. When it arrived the deputy himself thrust the bomb through the opening into the attic and withdrew.

Think Woman Fired.

Shortly afterwards Sayes started to climb down. An officer rushed forward to capture him but he put up a still fight and was not subdued until after he had been beaten severely. The woman had already been taken from the building. Police say that perhaps the woman, who is known as a dance hall girl, may have fired some of the shots as her hands showed marks of powder burns.

(By the Associated Press.)

STOP BUILDING, PRICE-WAR CRY

National Parley Decides New Work Must Be Deferred Until Costs Fall.

NEW YORK, May 21.—A recommendation that all new building construction be deferred for a few months to relieve a "serious situation throughout the country," was contained in a resolution adopted by representatives of virtually every branch of the building industry from various states who met to discuss the situation at the home of Franklin D. Roosevelt.

Calling a halt to new construction it was declared, would bring down steadily mounting costs in the industry. It was urged, however, that projects under course of construction be carried to completion.

The meeting was called to consider with the board of directors of the American Construction Council, of which Mr. Roosevelt is president, the present abnormal condition of the building industry and to take action that might possibly release the situation. Groups represented included bankers, transportation, architects, contractors, material dealers and manufacturers, bond and insurance interests, labor and federal, state and municipal authorities. The findings of fact in regard to present conditions were unanimously adopted and the meeting passed the following recommendations:

First—That banking interests curtail the financing of speculative building until after the close of summer.

Second—That wide publicity be given to the increasing trend of construction costs, both of labor and material.

Third—That governmental, municipal, state, county and town construction departments be urged to delay their work on such as much as possible until September or October.

Fourth—That the cooperation of the newspapers and trade publications be sought to keep the public informed of the monthly increases in construction costs and that they be requested to exercise their influence in curbing the demand for construction until the early months of fall.

Justifying its recommendations, the gathering reported that jobbers and manufacturers were unable to maintain their quotations for more than a day or two at a time on certain manufactured products.

"It appears," the statement added, "that the current demand has reached a stage where competition has passed from the seller to the buyer. The latter is bidding for materials and sending the prices upward. To aggravate the situation deliveries are becoming uncertain and recourse is being taken to the practice of over-ordering for the job."

"Labor rates, like the price of materials, are rapidly increasing. In the building trades, especially, employers are placed in the position of bidding for services in many instances ever higher than in 1920."

PAROLED MEN COMMIT FEW CRIMES NOW

State Commissioner Can See Big Improvement.

(By the Associated Press)

LANSING, May 22.—One of the best signs of the times, according to Fred E. Janette, state commissioner of pardons and paroles, is the small number of offenses committed by paroled convicts. This indicates, according to Mr. Janette, that work is plentiful and that economic conditions are generally good.

In the first four and one-half

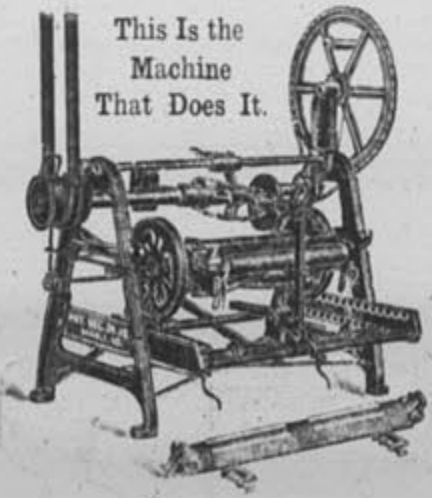

months of 1923 there were 27,000 violations reported to the state in the first four and one-half months of 1921, and there were undoubtedly others according to Mr. Janette.

It is estimated that there are about 1,200 paroled persons in the state. The present pardon and parole system, with its system of two trials, had not been established then, and neither was the system of check-up on all parole violators, which now makes violation without discovery by the state almost impossible, in effect.

Ninety-seven violations were ac-

Beautiful Your Lawn

Have Your Lawn Mower Sharpened by Machinery—
Make Mowing a Pleasure Instead of a Drudge.

This Is the Machine That Does It.

It is a well known fact that owing to the peculiar shape of the blades it is next to impossible to sharpen a Lawn Mower with a file, and many first-class Mowers have been ruined in the attempt.

Your Mower ground with this machine will be sharp and stay sharp longer than the old style way which is usually done by inexperienced workmen with an emery wheel, file or emery dust, etc.

While the emery dust method is a cheap one it is not desirable. The clearance of the cutting blade is reduced, making more surface in contact with the lower bar, so that it TEARS the grass instead of SHEARING it, at the same time making it run harder than ever.

Next time your Mower needs sharpening, bring it in or notify us, and we will make it cut so nicely that it will surprise you.

Drugs Excite the Kidneys, Drink Water. Take Salts at First Sign of Bladder Irritation or Backache.

The American men and women must guard constantly against kidney trouble because we often eat too much rich food. Our blood is filled with acids which the kidneys strive to filter out; they weaken from overwork, become sluggish, the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment, or you are obliged to seek relief two or three times during the night; if you suffer with sick headache, or dizzy, nervous spells, acid stomach, or if you have rheumatism when the weather is bad, begin drinking lots of good soft water and get from your pharmacist about four ounces of Jad Salts. Take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate clogged kidneys, to neutralize the acids in the system so they no longer are a source of irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive; can not injure, makes a delightful effervescent lithia-water drink and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time. By all means have your physician examine your kidneys at least twice a year.

He was more successful financially than his Finnish countrymen and incurred their hatred when he refused to join their socialistic organization. The ill feeling aggravated by his refusal to extend them credit at his store. The climax came when Lehto made a savage attack upon him with a spike topped club. Nurmil shot to save his life, and the bullet severed Lehto's jugular vein, killing him instantly.

May Abolish All Fraternities at the Augustant School

(By the Associated Press) 100% ISLAND, Ill., May 22.—Abolition of all fraternities at Augustana, Lutheran college and seminary, was threatened as a result of recent escapades of students, one of them, Elmer Gilbert of Mermette, has been suspended by the faculty for a year because of his arrest by the police on a charge of disorderly conduct.

With all their professed enthusiasm for peace, there is room for just the edge of a suspicion that some of the conferees at Lausanne will be able to bear up if the United States and Turkey abstain from entering into a special treaty of amity.

Frowzy looking at a distance, on deck the Sarah Tyler showed no sign of disorder. The old plank was scrubbed clean and the brass of the little wheel shone.

"That's him," said Jude. "Your father?" "Yes." "It was after Mother baked," said Tyler.

"He made her work for him in a laundry," said Tyler. "It was at Ponce de Leon, up the gulf, and a year after when she landed up there again, she was found and died."

"Some of those came off a wreck he had the picture of," said Tyler, "in that thousand-tonner that went ashore off Cat Island."

"The boy in Ratcliffe rose to this little adventure, delightful after weeks of routine and twenty years of ordered life and high respectability. He had chartered, yachted in a small way, fancied that he had at all times touched the fringe of the Free Life—he had never been near it. These sea gipsies in their grubby old-boats were it!

Jude's face blazed red like a poony, the galley, and Ratcliffe, well fed, lazy, and smoking his clear, leaned for a moment over the rail before taking his departure, talking to Tyler.

Tyler winked across the table at Jude and Jude grinned. "Shut your head," said Jude, "and don't be givin' stows away!"

"Who's giving shows away now?" asked Tyler. "Oh, he won't split," said Jude.

It's on the island here, said Tyler, near a ton of stow, canned. A brig went ashore south of Marijuana.

"You were saying about something more than fishing," persisted Ratcliffe, whose curiosity had been, somehow, aroused.

"I was," said Tyler; "but I'm not free to speak about private affairs without Jude, and there's no use in tacitly her when she's snoring."

2 BOYS RUN AWAY TO SEE HIGH ISLAND

Buy a Bag of Cookies and Set Sail in a Rowboat.

(By the Associated Press) SHELBY, Mich., May 22.—Searching parties are scouring the country near Little Point Sable lighthouse for Edward Elliott and Victor Bender, 12 and 13 years old respectively, who left here Friday in a rowboat to investigate the mysterious stories relative to High Island, the Israelite House of David's "Siberia," which they have heard.

The boys ran away from their homes Thursday evening. Yesterday they hired a rowboat at Stony Lake, 10 miles north of here, spent a dime for cookies and a bag of salt, and announced to their playmates, it is said, they were going up Lake Michigan to High Island. They were out of sight at the lake before the alarm was given and vicinity was experienced in obtaining a motorboat for pursuit. Finally their little rowboat was spotted on the beach near Little Point Sable, but the boys escaped in the woods before the pursuers could overtake them.

Young Elliott, an orphan, has been making his home with his grandmother, Bender is a son of George Bender, a farmer.

POLICE HUNTING A 7-FOOT STRAY BOA CONSTRICTOR

Huge Snake Wanders at Large After Escaping from Sunbath.

BERKELEY, Cal., May 22.—Some where in the Claremont district, Cleopatra, a seven-foot python boa constrictor, wanders at large. It is the property of Leonard Keeler, son of Charles Keeler, managing director of the Berkeley Chamber of Commerce. It escaped Thursday while taking a sun bath. The Keelers declare the snake is harmless, but Claremont folk are taking no chances, and policemen, who are working on the case, are doing their hunting in pairs.
