

WEEKLY TRIBUNE
A Nightly Journal.
Published every week by the Tribune Company, 110 N. W. 2d St., N. Y.
Subscription price, \$1.00 per year in advance.
Single copies, 10 cents.
Entered as second-class matter, April 11, 1906.
Postoffice at New York, N. Y., under No. 110.
Acceptance for mailing at special rate of postage provided for in Act of October 3, 1917, authorized on July 26, 1918.
Copyright, 1918, by Tribune Company.
Printed at the Tribune Building, 485 N. W. 2d St., New York, N. Y.

Cleveland, Ohio, not has a population of 1,000,000.
"Lovers will be the war" seems to be a popular song in this state just now.
The Mormon temple at Salt Lake City, which has been 40 years in building, was dedicated on the 9th.
An expert says that with 1,000 words a man can transmit a daily diary business of the end of them by the use of only 400 or 500.
The census of next year will not be a record. It will be the first to be taken in the United States.
The New York man who was in the office of the publisher of the real name would not be a success. It is a great mistake to think that a man can succeed in a business by using the name of a great man.
There is something in the suggestion of a "Coke" party. The Chicago divorce courts are issuing declarations of independence all the time and there is no need to exhibit the original one.
Before singing the song of "The Letter that Never Came," the woman should look in her husband's eyes and when that she goes he begins to realize why she has no use for the sugar barrel after the sugar is gone.—Ex.
Canada is gradually annexing herself to the United States by emigration. She gives us good citizens in return for the racials who have fled from the states to find shelter within her borders.
Ten thousand dollars have been appropriated by the N. Y. Legislature to ascertain by experiment the feasibility of utilizing electricity to re-open traffic on the great canals of that state.
"Mark Train," hailing from Genoa, dropped into New York the other day under the name of "George Jones, Gibraltar." His incognito didn't serve him long, but he still had the privilege of declining to be interviewed.
Mattie, the notorious French anarchist, has been recognized in New York city where he is living under an assumed name. A woman whom he represents as his wife is said to be Marie Lafon, another rabid anarchist.
Happily there is one thing that will be free at the world's fair. Some good people are going to give away 25,000 copies of the New Testament. No one, however, would think of selling a New Testament in Chicago.—St. Louis Post-Dispatch.
Sail has been brought for Jennie Sissinger, a Muskegon infant, against Henry Beach, a saloon-keeper, for \$5,000 damages. It is claimed that the latter sold liquor to Jennie's father, who was an habitual drunkard, and that in consequence he was permanently injured.
Deputy Auditor-General Herbert B. Pratt, who for twenty-six consecutive years has filled the responsible position of deputy auditor general of the state of Michigan, retires to make room for D. B. Ainger, who was appointed to the position by Auditor General Turner.—State Republican.
The total length of the Nile is 3,370 miles. It drains a country as extensive as Russia, and for the 1,200 miles of its course receives no surface affluents, large or small. The fall from Assouat to Cairo is from two to three inches in a mile, and throughout the Delta this slight slope diminishes to less than one inch.
In the long run there is no such thing as a free lunch. Any apparent feeling of languor is not a sign of debility, it is the first symptom of recovery from debility. In most sickness when a man begins to feel lazy, he is on the verge of recovery. The "extreme tired feeling" that comes with spring is not ill health. It is convalescence from winter.—Boston Globe.
A dispatch from Port Dodge, Ia., says: "All efforts to enforce prohibition have been totally abandoned in nearly all of the larger towns in northwestern Iowa. A city license system has been generally adopted by which all saloons pay a monthly fee into the city treasury." Prohibition is a failure, and its worst effect is that it has discarded and put back the whole cause of temperance reform.
They were talking of the vanity of women, and one of the ladies present undertook a defense. "Of course," she said, "I admit that women are vain and megalomaniacs. They are, and I am not. Why," she added, "with a glance around 'the flectle of the handsome man in the room is even now up the back of his collar." And then she walked for every man present had put his hand up behind his back.—Drake's Magazine.

The Democrats of Michigan and especially of Wayne county, seem to have been kept at bay by their "tired feeling" which is supposed to require spring medicine.
A census of the great trees of California, the "giant redwoods," reveals the fact that there are 2,676 of them left, the average diameter of the lot being thirty-three feet.
A recent advertisement in a country paper reads thus: "For sale, a bull-terrier dog, two years old. Will not accompany very head of children. Apply at this office."—The Dile.
The capital below is a capital below till his capital runs out, and when that she goes he begins to realize why she has no use for the sugar barrel after the sugar is gone.—Ex.

And then she walked for every man present had put his hand up behind his back.—Drake's Magazine.

Max Zerk, who has been appointed Chief of the United States Coast Guard, is in the United States.
There are between 75,000 and 100,000 people living in the city of Washington, D. C., and the weight in new city.
One of the new words coined in connection with "The McKays Spectacular" is the one which described an entirely new department in electric light. This word is "luminator" and it is derived from two Latin words, "lumen," meaning light, and "ator," meaning maker. The luminator is a new kind of electric light.
According to the census of 1906, there are 1,000,000 people living in the United States. A smaller total than has been reported for any quarter in eleven years. Wait till the extra step tears up the currency, and disarranges the business of the country with its list of failures—increased!
The Maine legislature has rejected a bill establishing woman suffrage. The Minnesota Senate has passed a bill confirming the right to vote at all state, county and municipal elections upon all women 21 years of age or over. Both houses of the Kansas legislature passed a bill, we understand, giving full suffrage to women—who have possessed municipal suffrage in that state for several years—at we have not noted whether it became a law. Evidently the female suffrage movement is pushing onward.
A New Specialist, Dr. Peterson, says that among the insane people who visit his office for treatment are two "very insane," one acting as a teacher and another who "has for years been switching hundreds of trains daily on a great railroad." When the wrong switch is thrown, somebody and many lives are lost in a horrible railroad wreck, this instance may be observed and sent to an asylum. It might save some railroad much trouble if Dr. Peterson would trouble his patient to an asylum now before he has caused the wreck in such affairs it is just as well to lock the stable door before horse is stolen.
Secretary Carlisle is having prepared a list of the employees of the Treasury department, showing the number credited to each state and the salaries received. The District of Columbia is credited with over 1,000 of the 4,000 employees, and the secretary intends to reduce the District excess, so that states may receive their proper quota of appointments. It would be the best thing possible for Washington city if no resident of the District were eligible to government clerkships. The city is already too largely made up of two classes—government clerks, and men who are trying to be government clerks.
Lumartine predicted fifty years ago that before the end of this century newspapers would supply book. He said: "Man- kind will write their book day by day, hour by hour, page by page. Thought will spread instantly conveyed, instantly written, instantly understood at the extremities of the earth. It will spread from pole to pole, suddenly burning with the fervor of soul which made it burst forth. It will be the reign of the human mind in all its plenitude; it will not have time to ripen, to accumulate in the form of a book; the book will arrive too late; the only book possible from day to day is the newspaper."
Let Your Hair Grow.
The doctors speak of a hereditary tendency to gray hair and old women gable of early piety, but soap and the barber do toward taking color and strength out of hair than anything else.
"The singing of hair is done to prevent the oils from exuding from the ends of clipped hairs, and singing is in this regard better. But ammonia-lathered snaps are the worst factors. Many persons wear ammonia when washing their hair, and on the next day their hair is a mass of it. It is also an ingredient of most soap. It dries up the scalp and robs the hair of all its moisture. That is where the most of the gray hair of today comes from."—Million.
