The English and European papers cannot get over their sur-prise at the shrewdness of the Yankees in not only sending over their stoves by the hundreds to Great Britain and the dreds to Great Britain and the continent, but in shipping along also the anthracite coal necessary to burn in them. The American stoye is by no means any longer a rarity abroad, although in many places it is yet looked upon as a curiosity. An English contemporary, alluling to the fact that we ship both the stoyes and the coal culls it in "simplar" and the coal calls it a "singular phenomenon." It is rather plur al than "singular," and is only indicative of the normal deter-mination of the average American to be balked at nothing.
