Last week Joseph, son of our neighbor August Miller, ran a silver over an inch long into his leg and nothing was thought of it until it began to pain him badly this week. Yesterday Dr. Sattler succeeded in extracting the wood, after putting "Joe" under the influence of chloroform. The piece had penetrated the leg to considerable depth.

D. W. Thompson has completed taking the school census on the east side of the river and reports the number of children between the ages of 4 and 20 years as 585. Lakeside makes up about 200 of this number. This will give Manistique from ten to twelve hundred scholars this winter and we hope that the patrons will take a deep interest in such matters this year.

Kennedy the much talked of Deputy Game Warden, who was under arrest in Alger county came here Saturday and will be here for some time. He went to Tulliver Lake and captured a green deer, and took considerable skin music from the hunter. They are on the trail of many others and it looks as though the State Warden had brought in the line of hunters in good order. The fact is hunters cannot now tell into whose hands they are liable to fall. Better hang up your gun boys and wait until proper time to shoot.

Never have we found a greater lackness in live local news in Manistique than just at this time. Regular business goes right along, but nothing new comes up that will interest our readers. The mills furnish no accidents; the churches no conventions; the reports no runaways; the opera house no entertainments; the doctors report but little sickness, and still it is expected that the local columns of the paper will be filled. Baby items help us out a little and we have to hunt through a long list of exchanges to find something that will supply the place of local matter; and even do it when we find plenty of vacant room. We hope for a change, and that mighty soon. Local news and good gossip is what we want.

The Criminal Eye.

Eyes are the most certain revolvers of the criminal nature. Many an expert detective tells a criminal by just one glance—not at him, but from him.

The criminal eye varies greatly in setting, but it is a good choice for a man as it is deeply placed in the head as if tried to hide, fearing the result of its own involuntary revelation.

Sometimes it is bold, protrusive like frog's and heavy lided. Such eyes, taken in connection with some other signs, denote, treachery, lechery, loquacity, mendacity and generally with just money covetousness to boot.

The criminal from a doing murder often maliciously looks at his other. Of the criminal eye there are many remarkable anecdotes. The murderer Franconetti had little about him to indicate the ferocity that ambushed in his breast. His forehead was high and smooth, his beard was not unattractive. To most people he
