SELECTIONS

NEW YORK FIRE TEAMS

Powerful Horses That Are Known Thruout the State

Every one of the 22 hook and ladder trucks of the New York fire department is now drawn by a team of three horses, instead of two. The change from two to three horses was made in 1887, and since that time the horses have been bred for the increased weight to be carried. The department had been using for some years previously a large number of life-saving implements and tools, and these had finally weighed down the apparatus, particularly the trucks carrying the life-saving implements, to such an extent as to interfere with making their way to the fire. The first team to which a third horse was added was that of truck 10 on Fulton street. It proved so successful that a third horse was added to all the fire truck teams in the city.

There has also been added a kind horse to the team of the heavier engines and to the team of the engines that lie on the sides of hills or on the hills in the city. About half of the city's engines are now drawn by three horses, and will be provided with equipment to which they are enabled to use three horses in case of emergency. With the city's better water supply and the use of heavier engines, the necessity of the department is toward three horse teams for all engines. There are now no more teams in use in the city than the double companies. A double company is one provided with two complete sets of apparatus—each set given by one of the companies of the first company the second company. The ground. These companies are all in the crowded lower part of the city where the water is not sufficient for the accumulation of four or five horse teams, but in all the other companies four wheeled engines with two horse teams are now used.

Fire Chief Hugh Bonner says that the use of the three horse teams is found to be advantageous in every respect. It takes perhaps two or three seconds more time to hitch up a three horse team, but this is much more than gained on the road, and for long runs a three horse team can keep up a good steady gait and get better work done in less time. It takes more skill and more strength to drive a three horse team, but there is difficulty in driving a horse team, and it is a matter of time before the three horse teams will be used in every part of the city. The great advantage of the three horse team is that it gets the company there quickly. An engine has to follow through the streets, and it is a matter of time before the three horse team will be used in every part of the city.

The fact stated the other day by a contemporary in a letter to the editor of the writer's belief that the daily eating of a preventive of appendicitis is an interesting one. The letter cited the record of a fruit valley in California, where 75,000 residents are shown to be com-

He Has Never Proposed Slowly.

It happened at a public hall. He was a man of serious intentions and numerous attractions, and she was rich and wealthy. They sat in the hall under the stars, and a soul in sight, and he thought his golden opportunity had arrived. Down he hopped on his knees and clasped her hand.

"Dear one," he whispered, not very loud, but loud enough, "I have loved of a man's nature when it is roused by all that is pure and good and lovely in woman, and I can no longer restrain my pent up feelings. I must tell you what is in my heart and assure you that never yet has woman loved from my lips the secrets that are throbbing and just then a riddle was heard on the stairs above them, and a card fastened to a thread swung down and dangled not two inches from the lover's nose. On it were these portentous words: "I'm something of a bar myself!"

Then the awful truth flashed upon him, and he fled. As he went out of the door he glared from the head of the stairs and lo! he was into the damp night after him. He makes no love at balls now.—Tribune.

Her Vocabulary All Right. One day when in St. Paul's cathedral with a friend of mine invited to accompany me to the choir, I was surprised to find that she had been regarding, open mouthed, for several minutes the magnificent dome and eving of the cathedral.

I had a mind to speak to her, thinking that her limited vocabulary did not furnish her with means of expressing her thoughts. You can imagine my surprise when all at once she turned round and said to her companion: "Sarah, wouldn't this place take a long while to sweep out?"—London Answers.

Engaged Amities. The Wife (bitterly)—I'm sorry I didn't know you were a fool till after I married you. The Husband (shilly)—My dear, the fact that I asked you to be my wife ought to have warned in your mind a suspicion of the truth.—New York Press.

On the Town Too. Eliza Sully.—There's a sign of a love anywhere, and we are right in the course of the trade winds too. Second Sully.—My dear, I wonder if the trade winds have stopped on account of hard times.—New York Weekly.

A Narrow Escape.

C. P. HILL, Mgr.

At Lawrence, Kas., they are innocently being eliminated with cholera germ in the hope of causing a fatal epidemic among the insects. The elusiveness merely lulls the affair as a fitting end to a picturesque experience.

The law is looking up in Oklahoma. A man whose only pains were stolen from his room and what was stolen from a Mother Hubbard gave the alarm, was arrested for manufacturing in a woman's attire.

Beware of Outbreaks for Catarrh that Contain Mercury. An mercury will surely destroy the sense of smell and completely derange the whole system, when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the danger they will do is tenfold to the good you can possibly derive from them.

Do not take internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.
