There are many wrong ways in doing 'thing right, but there is no right way of doing 'wrong thing.

Fanny Crosby, the blind Methodist hymn writer, is now 70 years of age. She has written about 3,000 Sunday school hymns.

The man who sneers at poor enterprise and attempts to pour cold water on every measure which advances the public weal, may enjoy to any town where he may reside.

The New York Herald is entitled the noisiest cuckoo in the entire lot. It twists and wiggles and squirms.

The woman of the Duluth construction train reported that on the hill at the north end of the bridge across the Grand-stone were nine bodies completely incinerated so that the sex could not be distinguished.

The astonishing somewhat which the democrats in congress made on the silver question and the equally sudden conversion to the president's views on some of the questions that easy one being made, there is no

plan in the peep behind foundation for them. There the scenes given us by Senator Gore were undoubtedly settlers and German. Note what he says: 'I have not yet been discovered. A search for them will be prosecuted with vigor and they will be buried where they lie.'

Lands for the Illinois. In a communication to congress a commission of the general land office estimates that the present area of arid land in the United States is 529,000,000 acres—an acre larger than most of the territories of Europe.

Curious Form of Larceny. A young French woman has been arrested at Brussels for the singular offense of kissing all the men she met in the street. Some of them, it appears, were injured.

These lands are unoccupied by the government of the United States. Representatives of the United States are to be sent to the territory to see if they can be made available for agricultural purposes.

A large class of persons who inhabit this world are well termed 'croakers.' They have always been abundant, we think from the time that Noah began to preach till now, and they will remain in the world, perhaps, till the coming of the long-anticipated general conflagration.

It has been estimated that a system of irrigation sufficient to render all these lands available for agriculture would cost not less than \$200,000,000.

Reason Why Her Marriage to the Countess. With her husband in the hands of the Countess, she was unable to do anything for her country.

The Forest Fire Record. St. Paul, Minn., Sept. 4. Barred at Hinckley and vicinity, 225; at Sandstone, 66; at Pockema, 25; at Miller, 12; estimates of dead not found, 50; total, 379.

The Hinckley horror is dawning in its awful magnitude. It is now lying in the desolate cemetery, under a shallow covering of sand or in rough boxes which take the place of coffins.

Four trenches in all have been opened, separated by about four feet. Commencing on the south in the north trench are forty-five unboxed corpses.

In trench No. 2 are twenty boxes, many containing from two to five bodies. This trench is not yet closed. In the third are twenty-seven boxes like the others.

The woman of the Duluth construction train reported that on the hill at the north end of the bridge across the Grand-stone were nine bodies completely incinerated so that the sex could not be distinguished.

Is it the only waterproof collar and cuff made?

No, but it is the only one made with the linen interlining and consequently the only one that can give entire satisfaction, because it is the best.

How can I know that I get the right kind? Because every piece is stamped as follows:
