THIRTY-THREE YEAR MARVELS.
Not Ten So Marvelous, Because We Were Allowing for the Progress of the Age.

There is much to be said in the accompanying table. It can be extended to show that our manufactures have increased more than sixfold, our population has increased more than tenfold, and our wealth has increased more than twentyfold.

Population	1851	1900
Value of manufactures	\$1,000,000	\$10,000,000
Value of real estate	\$1,000,000	\$10,000,000
Value of personal property	\$1,000,000	\$10,000,000
Value of farms and stock	\$1,000,000	\$10,000,000
Value of foreign trade	\$1,000,000	\$10,000,000

Our population has increased more than tenfold, and our wealth has increased more than twentyfold. This is due to the progress of the age and the efforts of our people.

Our population has increased more than tenfold, and our wealth has increased more than twentyfold. This is due to the progress of the age and the efforts of our people.

Our population has increased more than tenfold, and our wealth has increased more than twentyfold. This is due to the progress of the age and the efforts of our people.

Our population has increased more than tenfold, and our wealth has increased more than twentyfold. This is due to the progress of the age and the efforts of our people.

FACTS ABOUT SODA WATER.

No Soda is Used in Its Manufacture according to Present Methods.

Many years ago a Frenchman conceived the idea of manufacturing carbonated water by mixing a solution of tartaric acid with carbonate of soda.

The public knows in a general way that marble dust is sometimes used in making soda water, and the question is sometimes asked, "Isn't marble dust injurious to the system?"

As a matter of fact, there is no marble dust in the technical term, carbonate of lime, in soda water. The part played by marble dust in the process of manufacturing soda water is simply to supply the carbonic acid gas which the water is charged with.

To understand how the two chemicals—sulfuric acid and carbonate of lime—act when brought together, the reader may call to mind the mixing of a sedimentary paper.

Effervescence at once takes place, carbonic acid gas being liberated and tartaric acid being formed.

Carbonate of soda, however, is a chemical which is not so easily decomposed, and it is in the mixing of soda water, except that the gas, instead of being permitted to escape, is confined to the generator.

The generator is simply an apparatus in which the acid and the carbonate are mixed conveniently. From the generator the gas is conveyed to one of the portable steel foundations, the appearance of which is familiar to the public.

The fountain is about three-quarters full of water. After a quantity of gas has entered the fountain it is agitated. It is usual now to place what is called a "rocker" or "agitator" in order to mix thoroughly the gas with the water.

When this is done, the fountain is again agitated. It is usual now to place what is called a "rocker" or "agitator" in order to mix thoroughly the gas with the water.

When this is done, the fountain is again agitated. It is usual now to place what is called a "rocker" or "agitator" in order to mix thoroughly the gas with the water.

When this is done, the fountain is again agitated. It is usual now to place what is called a "rocker" or "agitator" in order to mix thoroughly the gas with the water.

and killed a number of valuable animals.

At Paisley, Scotland, recently Halsey and Phipps ran a trap line for the Barlowe party. Phipps then was by a horse.

Barrow, N. H. Maynard of Squam, Mich., was compelled by his conviction recently to sell his horse because it had developed considerable speed as a trotter.

Incidentally, the horse of the Roman emperor, Caligula, was estimated as a prize, and, indeed, had an owner and was given a gallon of wine every day.

RAILROAD TIES. A train carrying the mails has the right of way over any number of lines of horse rail roads. Its tracks by a fine department.

It is estimated that capital and labor would lose \$2,000,000 a day were all railroads in this country blockaded by a strike or boycott.

The Southern railway has set aside a certain fund for the promotion of small industries along the several lines embraced in the new system.

It is reported that the logs of transport and the logs of the Reading have been abandoned as a result of a company's opposition to organized labor.

The highest point reached by a railroad in the western hemisphere is the tunnel on the C. and O. railroad, Peru—15,645 feet above the Pacific.

The Boston and Maine is building the largest and most convenient coal station in the country near Boston, to have a storage capacity of 400,000 tons. The coal is to be distributed along the tracks on which the engines stand by a cable road system.

SAWS AND SAVINGS. When bees are over, they yield no honey. He that coveteth not with men knoweth nothing.

Every day has its night, every week its week.—Danish. Better to go to bed supperless than to get up in debt.—Spanish.

Go early to the fish market and late to the shambles.—Spanish. Building and the marrying of children are great wastes.—French.

PERSONAL GOSSES. Ex-Congressman John Mercer Langston, colored, of Virginia, is writing a book on the life of his father.

Padenwick claims that he has received 50,000 requests for his photographs and his autograph from his fair admirers.

Ex-Senator Warren's Wyoming ranch is 75 by 100 miles and is stocked with 2,000 horses, 15,000 cattle and 120,000 sheep.

Edith Foster's 9-year-old daughter, Edith Foster, lives in the city and is a devoted friend of the poor.

Mr. Clement Scott, the celebrated dramatic critic, is a Scotchman by birth and an Englishman by adoption.

It is said that Lady Greenhalgh, the youngest daughter of Lord Salisbury, is engaged upon a political novel into which several well known personages will be introduced.

Marshall Chisholm, the famous French soldier, died the report that he is about to publish his memoirs, much to the satisfaction of some people.

The marshal is in excellent health and carries his great age with ease.

Thomas Wickes, the vice president of the Pullman company, is an Englishman by birth and is 48 years of age. He came to this country in 1860 and two years later entered the employ of the Pullman company as an assistant ticket agent.

Lord Rosebery is an admirer of Washington. He has just bought a portrait of our first president which was painted in 1784 for the Earl of Shelburne, then prime minister. Rosebery will put the picture in a conspicuous place in his London house.

Thomas Jefferson as a lay role will play the violin, but he most sincerely loved to study. When very young, he went to college and gave 10 hours a day to his books and for exercise at twilight he went for a mile out of the college grounds and back again.

The late Judge Holt was the nation's popular orator 30 years ago. He was a burly W of distinguished appearance. His figure was tall and commanding, and there were visible signs of character in his face. Lincoln held him in great esteem and had much confidence in his ability.

Went Chevrolet. It was startling to be awakened by the light of a dark lantern shining in one's eyes, but Edith's politeness did not desert her. When very young, he went to college and gave 10 hours a day to his books and for exercise at twilight he went for a mile out of the college grounds and back again.

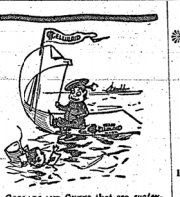

"Won't you sit down, Mr. Darghart," she said sweetly. Undoubtedly he obeyed and met his doom, for at another moment he was so entangled in the tidies, throws, ribbons, etc., that he could do nothing but sit still and glare at her as she stepped over to the telephone and called the police.—Indianapolis Journal.

No Recompense Whatever. Lawyer—Of course I'm willing to bring suit for any amount you may demand for breach of promise? Old Maid Client—No, sir, I have suffered to that extent? Lawyer—Do you think you have suffered to that extent? Client—You would think that if you had heard the woman around this town laugh when they got to talking about me.—Detroit Free Press.

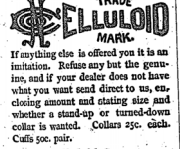

Just the Reverse. "You" said Yellowy, "I was taken for a burglar last night." "How was that?" asked Brownly. "Well, when I was late out at night my lover leaves a window open on the lower floor, by which I gain an entrance. Last night a policeman caught me as I was climbing in."

"Well, well! Did he pull you in?" "The pulled me out!"—New York News.

Reasoning From Analogy. "You smacking," said the baby, "what are you smacking your feet for?" "Because my head aches, dear." "The baby was evidently puzzled and remained wrapt in thought for a few minutes. Then he looked the silence again. "Mamma, if your feet ached, would you sock your head?"—Truth.

COLLARS AND COFFS that are waterproof. Never will and not effected by moisture. Clean, neat and durable. Wipes soiled simply wipe off with a wet cloth. The genuine are made by covering a linen collar or cuff on both sides with "celluloid" and as they are the only waterproof goods made with such an interlining, it follows that when they are the only collars and cuffs that will stand the wear and give satisfaction. Every piece is stamped as follows:
