EDITORIAL COMMENT.

The Menominee Herald suggests Ex-Congressman Stephenson as a gubernatorial candidate.

Prof. Dwight Waldo of Albion, was elected to the principalship of the new Normal school at Marquette, by the state board of education.

A Saginaw man struck his mother-in-law with an ax and the police justice let him off with a fine of \$3. This particular police judge is undoubtedly a married man.

A Missouri preacher has turned train robber. His downfall was rapid. The first downward step was becoming a Populist. From that he casually dropped into train robbing.

An ex-employee of the Standard Oil Co., accuses that monopoly of robbing the public in railroad rebates. We conjectured that some thing was up as Rockefeller has announced his intention of giving the Chicago university another \$2,000,000 donation.

Gen. Alger confirms the statement made by Gov. Pingree, that he would stand for election to the United States Senate. He declares himself opposed to trusts, and heartily in favor of the election of senators by direct vote of the people. "I do not believe in the concentration of wealth," said the secretary. "Monopoly forces the middleman out of commercial existence and the result is disastrous to the masses of the people. Gov. Pingree stated my opposition correctly when he said that I am also opposed to the selection of United States senators by legislative vote. Their election by direct vote of the people will do away with much political intrigue and is bound to come, although it may take years to accomplish it. Senator Burrows

A hundred deaths brought in, and never a sign that the enemy's shot, and sent out as usual. The fire was thin, and he was least of the rest. The first behind was jamming; the mortar boom. Heating the stream; the rest for a moment looked. Craven spoke to the pilot, slow the water; then the engine, and right to the narrow channel, between the shore. And the boat, torpedoes lying in track between them. The turret and a yard low, a mortar boom. A mountainous wave, and she rolled right and left. Over the machine, up in the ironed tower. "Pilot and engine man, this turret to be. The hundredth part of a second, vertical, an hour. For each must pass the way, and one must die. They stood the men in a dream; Craven spoke. Spoke as he lived and fought, with a captain's pride. "After you, pilot," the pilot spoke. "Down under he went, and Craven died. All men past the deck and its manner; but we were not apart from the pride that stoops to great. The strength that is supple to serve the strong and the free. The great of the army, hand and prouder. Still there, a humbler need to study. Nelson waiting his turn for the sun's hand. Gave orders with chains for a concrete's sake. Outran covering right before command. These were perils, these were Craven's peers. These with him shall be crowned in story and song. Crowned with the glitter of steel and the glow, and the stars. In peace of courtesy, merciful, proud and true." Circuit Court Notes.

The June term of the circuit court convened last Tuesday with Judge Stearns on the bench. The following cases were disposed of: People vs. Vartin. Stricken from the calendar. People vs. Lavigne. Pleaded guilty to the charge of larceny and was sentenced to Marquette for a period of one year. People vs. Chambers. Charged with rape. Found not guilty. People vs. Durrah, larceny. Not guilty. McMillin vs. Delta Lumber Co. Appeal. Judgment of lower court reversed and judgment for costs rendered to defendant. Truck vs. McCullough et al. Settled and dismissed. J. D. Marschner vs. Miller et al. New trial granted. C. L. Co. vs. Miller et al. New trial granted. Cowley vs. Cowley. Divorce. Decree granted.

"When in doubt as to the genuineness of a diamond," said a leading dealer in precious stones to the writer recently, "there is only one reliable way by which the expert or the amateur judge can determine the quality of the article and that is to test its hardness by holding it against a rapidly revolving grindstone from five to ten minutes. Then, if the least mark appears upon the diamond, it is not a real stone, for if it were a diamond, so far from any mark being produced upon it, it would be thicker on the other side to make a deep impression on the grindstone. The same test may also be made with any paper or on an emery wheel, neither of which, although harder than a grindstone, will make any impression upon a genuine diamond.

"This is a great thing for one to remember in these days of manufactured diamonds. The paste article is now made with such care that it is possible to test the skill of the expert to distinguish the genuine from the bogus, but the grindstone is brought into play and there is no room for doubt. Some people think that if they rub a stone against glass it makes a deep impression; it is a diamond. But no diamond pasted diamond will scratch glass, and the imitations of sapphires, rubies and emeralds will do the same."—Wallington Star.

RAPID RIVER BRANCH.

To be owned and operated by the Soo Railway.

The "Soo" line has removed the mystery that has surrounded what has been known as "Capt. Merriam's railroad," and openly admitted that the road was to be built and owned and operated by the "Soo."

The road will be known as the Rapid River branch and will be about thirty miles long, opening up what is declared to be the finest hardwood forest now standing in the United States. The line, which is nearly straight, starts at Rapid River, six miles east of Gladstone, and runs north. It is to be completed by Oct. 1. The land contract amounts to about \$200,000.

Our line of gent's neckwear has just received the addition of some new and nobly fitted in puffs, tucks, four in hand and club ties, most popular specials in the market.

Rose Bros. are advertising a July sale of clothing in this issue. Nowadays every one is anxious to have a dollar. Judging from the advertisement of this enterprising firm on second page of this paper it appears that they are anxious to give everyone an opportunity to effect a saving. Read their price list carefully. If you do you will celebrate the coming Fourth of July in a new suit of clothes.

The most outrageous single act of an entire session is conceived to be Representative Geo. P. McCullum's vote for the tax on minerals. The upper peninsula press and people are accustomed to use harsh and drastic measures in the case of representatives who fail to follow arbitrary definitions as to what constitutes the n. p.'s best interests. There was much of Pingree tax-pro-erim which Mr. McCullum was unable to endure, but he voted for the tax on copper and iron ore because he believed it to be just, though foresaw what constituents in a district which includes the ore-shipping port of Escanaba might do him. McCullum is a graduate of the literary department of Albion and is only a year out of the university law school. He is a political protégé of ex-Gov. Rich, being the son of the superintendent of the Delta Lumber Co.'s business in the northern country—Detroit, Journal.
