William McGuire has resigned his position as engineer for the fire engine and Chief Loos has appointed J. W. Bower as his successor. Putnam & Co.

Manistique Legion No. 108, was organized three years ago with about seventeen charter members. Its growth was steady and substantial during the first two years of its existence and on April 1, 1890 seventy-one members in good standing, was the record. During the year which closed April 1, 1890, the membership increased to 151, with 150 contributors in force. No other organization is founded on a more liberal basis. Holders of full certificates receive \$15.00 per week in case of sickness or accident and the cost is only \$2.00 per month. The dividend paying feature also commends it.

Manistique's public schools are in a very prosperous condition and that condition bids fair to continue through the coming year as the present corps of teachers has been re-elected. The board of education deserves to be complimented upon its work. Supl. Hornberger has worked wonders in the schools and we are free to say that at no time in the history of the schools has there been less friction, and harder work done than during the past year. The superintendent has the assistance of able teachers that are putting their entire energies in the work. Even better work should be the result next year as there will be no change in the personnel of the teachers.

### Manistique Pioneer-Tribune

Published by Tribune Publishing Company.

Entered at the postoffice at Manistique, Mich. as Second Class matter.

GEO. E. HOLBEN, Editor and Manager.

FRIDAY, APRIL 13, 1900.

By Governor—CHAS. S. OSBORN.

There is a healthy demand for Manistique real estate and in consequence there is an advance in price.

The success of the Republican party is more to be desired than the gratification of any individual's personal ambitions.

The upper peninsula has one of the deepest shafts in the world. Shaft No. 5 at the Tamarack has attained a depth of 4,150 feet.

It doesn't help this paper to subscribe for it and owe for it. But it does help this paper if those who owe for it pay in advance.

Marquette county Democrats call Rush Calver and D. J. Campas for delegates at large from this state, to the Kansas City convention.

State Food Commissioner Grosvenor says: "I am for Chase Osborn for governor, and I don't care who knows it and Chase will have Monroe county, too."

**EDITORIAL COMMENT.**

Plant some trees this spring and clean up.

The man who says, "I told you so" is on deck.

Manistique needs at least two more dwelling houses.

General Nelson 'A Miles also has an attack of presidentialitis.

The signs all portend the re-nomination of Congressman Sheldon.

Most men who follow politics for a living sooner or later go broke.

Two great questions were settled last week; the Porto Rican convention and appointment of village attorney.

It is the general opinion hereabouts that Dewey is greater as a candidate than he would be as a candidate for president.

An honest, fearless newspaper is never appreciated by political tricksters. A cringing, weak, flabby sheet is just the sort of a paper that a politician prefers. He can do what he pleases with it.

The greatest temperance workers in this country are the railroad superintendents who have announced that any employee who habitually patronizes saloons will be discharged. This is a temperance lecture that cannot be understood.

Should he be elected for three years?

Tax Commissioner Osborn says: Supervisors ought to be elected for a term of at least three years, so that they would not be fired out of office about the time that they began to know something about the business, and he suggested that the supervisors get together and try to have the state law amended to that effect.

"The assessing offices," said he, "is a higher official than the circuit judge. He has more real power."

WHERE DEWEY STANDS.

Admiral Dewey has made a statement. He says the silver issue is dead in the United States as far as the coming campaign is concerned, and it will not be a factor in 1900. He disagrees with both McKinley and Bryan on the policy to be pursued in treating our new dependencies. Admiral Dewey prefers to call Puerto Rico a dependency rather than a possession. He further states that in dealing with the Philippines there should be no war of extermination. Dewey claims that the influential Filipinos have time and again recognized the sovereignty of the United States.

Question Answered.

Yes, August Flower still has the largest sale of any medicine in the civilized world. You are a factor in our grandmothers' never thought of doing anything else for indigestion, or biliousness. Doctors were scarce, and they seldom heard of Appetitizers, Nervous Producers, or Heart Purifiers, etc. They used August Flower to clean out the system and superintendence of undigested food, regulate the action of the liver, stimulate the nervous and organic action of the system, and that is all they look when feeling dull and bad with headaches and other aches. You only need a few doses of Green's August Flower in liquid form, to make you bright and there is nothing in the matter with you. Sample bottles at A. S. Putnam & Co., 10.

THEY'VE WELL SATISFIED

The Alpena Pioneer says: Chase S. Osborn, who visited Alpena last Saturday, is called by his admirers, the upper peninsula cyclone, and the way he goes tearing round them claim, bears out the appropriateness of the designation. He chatted about his gubernatorial candidacy quite freely Tuesday.

"I plowed my way through six counties last week," he said, "and I think that a pretty fair week's work for one candidate. Really the situation in the state as far as my candidacy is concerned has a most pleasing aspect to me and I believe that my chances for obtaining the nomination are growing brighter and brighter all the time. If my opponents are as good men as both they and their friends say and evidently they think they are, I figure out that they will neutralize each other in the convention and that the party will turn to me as a second choice man."

"I am looking around the state, and as I go I find much to encourage me in my travels. Mr. and Mrs. the best men of the state, are coming to me and saying that they are with me, and I want to say I appreciate from the bottom of my heart this kind of support."

### WOMAN

IN LINE A DELICATE MUSICAL INSTRUMENT

In good condition she is sweet and lovable, and sings life's song on a joyful harmonious string. Out of tune she is sour, there is discordance and unhappiness. Just as there is one key note to all music so there is one key note to health. A woman might as well try to fly without wings as to feel well and look well while the organs are weak or diseased. She must be healthy ere she can be a healthy mother. There is no doubt as to the fact that the health of the woman is the health of the nation. Mistakes made by other countries, while they are not applicable to this country, are applicable to this country. Every other country should give us a lesson. The health of the woman is the health of the nation. Mistakes made by other countries, while they are not applicable to this country, are applicable to this country. Every other country should give us a lesson.

### THE DEWEY EPISODE.

It is becoming more and more apparent that the many admirers of Dewey are sorry for him. His announcement that he would like to be President has fallen with a pitiful thud. Whatever might have been the result if such an announcement had been made upon his return from Manila, it is now very evident that he has misread the tide which might have carried him to the White House.

His conclusion that the office of President is not a difficult one to fill is about as much as an exhibition of his political wisdom. It is a sad fact that the Dewey party will send at Manistique a delegation to the convention at Chicago. The Dewey party will send at Manistique a delegation to the convention at Chicago. The Dewey party will send at Manistique a delegation to the convention at Chicago.

Possibly the controversy as to whether or not alcohol is food might possibly be dismissed with the general advice, "Don't eat it."

Railway officials estimate that 250,000 emigrants will come to the United States from Europe this year, and that most of them will settle in the great west and northwest.

The will of the late Dan Rice, fur man throughout the country as a circus clown, has been made public, and among other provisions there is one leaving \$10,000 per year to his daughter. His estate valued at \$1,000,000, of which he left to his daughter, to his heirs and to his family.

The National Legislative league has been formed in New York City, with Mrs. Lillie Devereux Blake as president, and a full corps of officers composed of prominent women in various states. The object of the league is to obtain for women equality of legal, civic and industrial rights through action by the national congress and the state legislatures.

A report from the sailing fleet in the Arctic is to the effect that the catch of seal this year has been 200,000, an increase of 100,000 over the year. The valuable animals are becoming scarce and in the long run the greedy hunters will have to pay for their merciless slaughter. The seal is traveling the same way the buffalo did.

London papers tell of the completion of the underground subway between London and Birmingham, a distance of 115 miles. The wives are laid in underground conduits, and the depth of two and a half feet, the conduits and wires being insulated with a certain kind of paper. The conduits place the wires at the reach of storms and the hands of vandals.

Good for Lydia Green! The richest woman in the country denies the rumor that her daughter is to marry a foreign duke, and says she would prefer for a son-in-law a good, strong American newspaper man. There is no doubt that her daughter is a very desirable match for a man of her rank.

Several cases have come to light during the last few weeks of Americans who have bitten at the old Spanish swindle of a distant relative and a fortune to be gained on advancing a few hundred dollars. All of which indicates not only that the new fortune is born every minute or two, but that the crafty Spaniard is industriously getting even, in a financial way, for Manila and San Juan.

Archibald Forbes, who died in London recently, was the most prominent correspondent in history. He died at the age of 62, of paralysis. In the '70s, when Lord Chamberlain's army was its great glory over the Zulus, Forbes rode 120 miles across a trackless and wild country on a telegraph office in order to send in the first news, and covered the distance in 14 hours. That was the beginning of his fame.

The Hundred Year club of New York claims to have found the secret of prolonging human life. The club, says the president of the club, says the matter has passed from the cerebral to the practical stage. It depends, he says, on what you eat and think. Well, it is generally agreed that as long as a man keeps on eating and thinking he will not die. Be member this simple rule. It may save your life.

Prof. Elliot, of Harvard university, has not only offered to receive 1,000 Cuban teachers into the Harvard summer school free of cost, but will open his private residence to as many teachers as it will accommodate, and members of the faculty will follow his example. This is patriotic of a grand sort. Most people content themselves with a sentimental approval of the effort to reorganize Cuba, or make a few patriotic remarks, but do not cooperate with the government in this work by personal labor and sacrifice in a very different manner.

A perch-climber of unusual daring robbed a North side residence in Chicago, risked capture and the penalty, and carried off \$40,000 worth of jewelry. A Chicago lawyer, meanwhile, without exposing himself to the slightest danger, gathered in a fee of \$20,000, and does not seem to have the body from the rule policeman. The obvious moral of course points out the superiority of legal study to the practice of climbing porches, and conclusively demonstrates that a Chicago lawyer is worth just as much as a man who can climb a good many American dollars coming into their pockets this year. Because of the Paris exposition, American travel abroad will be largely increased, and the money spent by tourists will probably more than make up for the money that has been sent across the water.
