## Tankee Invasion of Egypt.

**A new incident in the Egyptian invasion** is reported from Egypt. An American engineer, according to the London Mail, has just completed a new system of suspended bridge tramways for substituting coal from common to Alexandria. The present apparatus is the first that has been installed in Africa, but the Egyptian railway administration has decided to adopt the system, which will undoubtedly meet with further success. The work is done automatically and only occupies one-fourth of the time necessitated by manual labor and steam whistles. Twenty-one hundred and twenty tons of coal in ten hours is the astounding capacity of these hoisters, two or three ships can be worked at a time, and there is a great diminution of waste and "smell." The saving of labor is also one of the great advantages of this system.

## QUEEN QUALITY SHOES.

**The Best Known and Most Extensively Sold of any Women's Shoes in the World.**

The great advances in methods and facilities for manufacturing and distributing commodities of daily use, and the vast opportunity which this country presents for the rapid growth in popularity and sale of any article which is in a considerable degree superior to what has heretofore been supplied, is strongly illustrated in the phenomenal achievements of The Queen Quality Shoe Company, which in fact, all over the civilized world, as the makers of the famous "Queen Quality Shoe," which has recently been awarded the Gold Medal at the Pan-American Exposition at Buffalo.

Beginning about three years ago with the theory that a superior shoe, combining all of the essentials of the finest footwear, could be produced at a cost that would permit its making at \$3.00 a pair, the makers of the Queen Quality Shoe have fully demonstrated the soundness of their theory and have accomplished what they undertook to an extent that is little short of marvellous.

The basis of the wonderful success enjoyed by these shoes is undoubtedly the attention given to modeling. No member of the human anatomy is more difficult to suit in its requirements than the foot, and years of patient study and experiment were required in order to attain to the perfection which these shoes exhibit. To their perfect ease and exactness of fit which they are invariably regarded by all women who have the opportunity of trying them.

Added to their lightness and comfort these shoes possess a thorough excellence in their structural features and contain the best of leathers and materials for rendering them serviceable and beautiful.

The factory that produces these shoes turns out eight thousand pairs a day and employs over twenty-three hundred people, and the sales of its products have outpied all records in the history of footwear, being now sold in 2500 cities and towns by exclusive agencies carefully selected. The agency in Manistique is Ross Bros.

## An Ornamental Fall Saver.

**Burton's Fall Economiser** is being universally adopted to prevent the usual waste of heat, up the chimney and fore and to radiate into the room. It increases the heat in the room where the stove is located, and heats one or two additional rooms without additional stoves or labor. It soon saves its cost, \$4.50 or \$5.00, by its reduced amount of fuel used. It is substituted for the "second" length of stovepipe, shows the stove, and heats in any room through which the stove pipe passes. Furnished by all stove and hardware dealers; manufactured by W. J. Burton & Co., 108-170 W. Larned St., Detroit, Mich.

# BEET PRICE GOES UP

## Farmers Conclude to Have a Bigger Share of the Value of the Product.

### PROSPECTS ARE FOR A FIGHT.

#### Sugar Makers May Take Their Own Fruit—How a Durable Factory Was Robbed.

Ray City, Mich., Nov. 18.—The farmers of this county have thrown down the gauntlet to the manufacturers of sugar and the latter have accepted the challenge. When the state legislature passed the act of 1917 for the beet raising the price of sugar was fixed at 25 cents a ton for each additional 100 lbs. of sugar, the farmers took hold of the crop, and the manufacturers were forced to pay a partial share of the beet, the farmers made a demand upon the factory owners for a greater price, with other favorable terms in the contract, all of which the factories have refused to grant.

Some Farmers Propose to... The price for 12 per cent, beets was fixed at \$2.00 a ton. The industry was new in these days and the farmers were not used to anything that would depress the grower, as upon the grower the success of the beet industry depended. This fall the farmers had themselves fair to face with the beet growers. The beet growers' association Saturday afternoon passed a resolution asking its members not to make any contract for beet growing unless the factories paid \$1.80 a ton for 12 per cent, beets and 40 cents a ton for each additional per cent.

Compulsory May Take the Beet... The farmers took the final action fully informed of the opposition of the factories to the payment of the increased price. The managers had been conferred with, and each was emphasized in saying he would not pay more than the figure of last year. But in the face of this knowledge the association proceeded to bind itself not to raise beets next season unless given the extra compensation. The matter will be that the companies may eventually be obliged to meet their own beets and have nothing to do with the farmers, excepting those who are willing to accept the terms offered by the companies.

### TEN JAPANESE KILLED.

#### Details of the Recent Collision on the Great Trunk.

Manitowish, Wis., Nov. 18.—Arriving travelers from Manitowish Junction, details of the wreck which occurred at 11:30 Sunday on the Great Trunk, are three killed, three injured, and a small station just over the D. & W. line.

It was one of the most frightful of the kind here ever known. It was an old railroad car. A special was carrying a lot of Japanese laborers west when the locomotive struck it. The wreck occurred at the end of a sharp curve and the train in hands completely out of control. The engine and several freight cars were telescoped.

Three of the Japs were caught in the wreckage, which took fire immediately, and were burned to a crisp. The engine of the through freight was completely wrecked and several freight cars were telescoped.

Charles Baasch was conductor of the freight. It is his opinion that neither he nor his men were at fault in the matter, and that the wreck was caused purely by the carelessness of the special trainmen who failed to stop the freight.

### SKATE INTO AN AIR HOLE.

#### Three Young People at Duluth Find a Watery Grave.

Duluth, Nov. 18.—Miss Belle Woods, aged 15, Charles F. Valency, aged 26, and Stanley Woodcock, aged 18, skated into an air hole in the St. Louis bay about 10 p. m., and were drifting together and did not see the hole until it was too late. Efforts were made to save them by the few persons in the vicinity, but the boy was crumpled from eight to five moments.

Valency was a clerk in the Marjorie Hall Hardware company. The man, woman and child were engaged to be married. The bodies have not yet been recovered.

Can you get constipated with one of these? You can't. You can get a taste of hospital work without leaving home. The product will be made in one day, and additions will be made from time to time. Ten box lots will be arranged in a single shipment. It will be a wall of eight feet in height. The patients will have an opportunity to test the virtues of our medicine. For the tests will receive no other heat than that obtained from the open fire, and will be secured by means of sleeping bags, but water lines and felt blankets.

**Eureka Harness Oil**  
An oil which makes the harness and the horse's skin soft and pliable. It is made of the finest materials and is of a quality which is superior to any other.

## Chauffeur Wants to Make a Mile in Thirty-two Seconds.

### SAYS AUTO IS YET IN ITS INFANCY

Express to Build Machine That Will... The chauffeur, who is now a member of the State Expressors' Association, United States and Manufacturers Association.

Heal Courier, who has just broken all automobile records by going a mile in 32 seconds on the open park way in Brooklyn, is far from being satisfied that the limit of automobile speed has been made, says the New York World. In fact, he says the fastest machine has just begun to demonstrate its power and declares next year he will make a mile in 22 seconds, at the speed of 101 miles an hour.

Founder said he will in the future make his home in this country, and that he will be in the forefront of the automobile industry. He will be in the forefront of the automobile industry. He will be in the forefront of the automobile industry.

It is from this plant that Fournier expects to turn out a machine that will set a new record for the mile made by the Empire State express. "It is a matter of fact," said Fournier, "that I shall by use of the other day not be the best I have made. On Friday, Nov. 15, I was preparing for the trials of Saturday, Nov. 18. I had a machine on a mile on the road near Koshon's place in Hudson in 32.5 seconds. The conditions were not a little better. Next year I will have a machine that will do a mile in 22 seconds. Of this I am sure, but the type will not be the first record of 22, that will get below the minute mark in half a decade.

It was announced that in addition to the length of the machine. It will have to be considerably longer to enable it to remain on the ground at such a speed. Even at the speed mentioned on Saturday the automobile was in the air part of the time, and it would have practically flown.

"In increasing the length the weight will be increased, but at the same time more than made up by improved driving machinery. The automobile is practically in its infancy. Its development will be just as the bicycle, and as improvements pile up and competition increases the machine will become better and the price lower.

"I expect to turn out next year a first class high speed automobile for \$2,000. It will in all probability be faster than anything that has ever been made. It will represent the low level in price that will be made in succeeding years.

"The meet on the parkway on Saturday was a splendid one in every way, and its success will do more to call the attention of the public to the automobile and its possibilities than any other thing could. I hope in the future, however, that we will have an opportunity to conduct distance runs of the same fine conditions. A mile race will have the machine to show what it can do."

### GLOBE TOUR IN AUTOMOBILE

#### Cincinnati Millionaire Will Start Next Spring on Seven Year Trip

Edward V. Wilson, the Cincinnati millionaire who sold out to the trust for \$1,500,000, is in New York, staying at the Waldorf Astoria. He is planning to make a globe tour in an automobile, says the New York Herald Tribune. He says he will start with two friends next spring from Cincinnati and believes he can make the twenty-five thousand mile journey in 800 days.

Mr. Wilson's plan is to go direct to the Cape Verde Islands, and take a steamer to a French port. He will cross France, Germany and Russia and follow the course of the Transiberian railroad until he reaches the Pacific ocean. After touring Japan he will cross the Pacific to California, and then return to Cincinnati. The man, Mr. Wilson is only thirty years old. He acquired his fortune through his work in the coal business. He is worth \$2,000,000 when only twenty-eight years old.

One of the Most Perfect Ever Taken of a Notable Person.

# VAN SANT MEANS BUSINESS.

## Will Prevent Proposed Railroad Consolidation if Possible.

### FEARED A HUNDREDS LIVES ARE LOST IN A MINE AT FELLERS RIDE, COLO.

Blaze Starts in Buildings at Mouth of the Tunnel, Which Acts as a Flue and Fills the Workings With Deadly Gas—Two Hundred Men at Work at the Time and About Half of Them Make Their Escape.

Colorado, Nov. 18.—What is believed to be the most disastrous accident that has ever occurred in a coal mine in Colorado, took place at the mouth of the Bullion tunnel, through which the Smuggler tunnel runs, and which filled the mine with deadly gas and smoke. It is impossible to give even an approximate estimate of the loss of life. It is believed it will reach nearly if not quite 100. Twenty-two are known to have perished, their bodies having been recovered.

The fire started from a defective pipe in the bank house at the mouth of the tunnel, it quickly communicated with the other buildings. The dense smoke from the burning engine house, which was connected with all, began pouring into the tunnel, with the shafts of the mine, and the shafts of the mine.

The day shift of 200 men had just gone on duty and before they could be removed their escape was cut off and the slopes were filled with gas. As soon as the men became aware of the danger they were ordered to reach the surface through various exits, but many of them were unable to escape. It will be impossible to ascertain the number still in the mine for several hours or several days, it is believed.

The Smuggler tunnel mine is one of the oldest mines in the district and has several abandoned openings, some of which were used for the purpose of those who escaped did so through the old tunnel workings and the old shaft at the mine.

A rescue party was sent through the tunnel from the Commission building, but they were unable to reach the mine. Although the buildings were mostly empty, the mine was completely cut off from the surface.

The property loss is about \$50,000, fully covered by insurance.

### WRECK ON THE SANTA FE.

#### Seven Trainmen Killed and Seventeen Others Injured.

Los Angeles, Cal., Nov. 18.—A fatal wreck occurred on the Santa Fe at a point one mile west of Francisco, A. T., a switch taking 20 miles east of Needles, Cal. During the collision, seven trainmen were killed and three passengers injured. The train was carrying a load of lumber, and the engine was derailed.

Both the trains were made up of wooden cars of various makes, and the most improved material and while they stood the terrific shock well and protected the passengers, the collision was a severe one. The three engines were crushed and killed by the collision.

The collision said to have been due to a derailing of orders on the part of the crew of the westbound train. The eastbound train was stopped at the crossing, and the westbound train did not wait, the two trains crashed together with a noise and a shock which was heard for miles.

From the meager details of the wreck gathered from the passenger it is learned that the sleeping car with one or two exceptions, escaped slightly, and as a result the passengers were afforded comparative safety. The wrecking of the train was most entirely the result of the carelessness of the dining car crew.

As soon as news of the wreck was received at Needles, which is the division headquarters of the Santa Fe, a wreck train was made up and attended by a number of physicians from the division hospital. The injured were placed aboard and started west for Los Angeles for treatment.

# DEATH LIST LARGE

## IS EASY FOR JEFFRIES.

### Col. Rubin Stays With the Big Call—Fornian but Five Rounds.

San Francisco, Nov. 18.—In one of the most satisfactory prize fights ever witnessed in this country James J. Jeffries proved the victor over Gus Rubin, the Akron giant. In the fifth round of which Jeffries had a 20-second struggle Rubin yielded and was surrounded to his peril, to the utter amazement and disgust of the masses of thousands. No one was more surprised at the outcome than Jeffries himself, who asserted that while he had delivered a telling blow in the second round he did not expect to win the victory so easily. Rubin's sole explanation of the outcome of the fight is that he received a chance blow which utterly disabled him and that Jeffries persisted in fighting him low.

While Rubin will not be a contender for the title, he was sufficiently handicapped and injured as a result. In this connection Rubin received the worst part of his record, who say that his was a hopeless case after the second round.

Almost from the beginning of the fight Rubin appeared exhausted. The fight was practically finished in the second round when Jeffries landed a charge that Jeffries estimated a foot and a half, and that Rubin received a blow that he was sure would knock him out. In this connection Rubin received the worst part of his record, who say that his was a hopeless case after the second round.

## Col. Rubin Stays With the Big Call—Fornian but Five Rounds.

San Francisco, Nov. 18.—In one of the most satisfactory prize fights ever witnessed in this country James J. Jeffries proved the victor over Gus Rubin, the Akron giant. In the fifth round of which Jeffries had a 20-second struggle Rubin yielded and was surrounded to his peril, to the utter amazement and disgust of the masses of thousands. No one was more surprised at the outcome than Jeffries himself, who asserted that while he had delivered a telling blow in the second round he did not expect to win the victory so easily. Rubin's sole explanation of the outcome of the fight is that he received a chance blow which utterly disabled him and that Jeffries persisted in fighting him low.

While Rubin will not be a contender for the title, he was sufficiently handicapped and injured as a result. In this connection Rubin received the worst part of his record, who say that his was a hopeless case after the second round.

### Do You Like Good Cheese?

Buy the Famous "Lenawee County Cheese" at the Midway Grocery

It is the best. This is a straight tip. The following is a verbatim dialogue between our buyer and a wholesale salesman: Salesman—"I would like to sell you some cheese." Buyer—"You can't sell me cheese." Salesman—"Why?" Buyer—"Your cheese is not good enough." Salesman—"We have the best made." Buyer—"Let me show you some good cheese." Salesman, (tasting it)—"How'll you trade for one of mine?" (Wanted one to take home for family use). No only in cheese, but in everything else you will find the best at the Midway.
