What does the Dottor Prescribe?
What does the Dottor Prescribe?
What does the Druggist Supply?
Health often balances between these two questions. Life itself may depend on the precise filling of a prescription with drugs of absolute standard strength. Many druggists who fill prescriptions carefully are not as careful about the reiability or potency of the remedies used. We are careful about both. We see to it that all our drugs have the precise strength they should have, and they are always compounded with scientific accuracy.
