\$1.50 PER YEAR.

MUNICIPAL CONTROL

Has Been Successfully Tested by Other Cities.

A SAVING OF FIFTY PER CENT

Effectuated in Some of the Cities. Letters From Officials.

As the question of municipal ownership of an electric light system may be decided at the next municipal election to be held early next month, it has been deemed advisable to ascertain the experience of various cities where the idea is being tested.

We are informed that a franchise offer will be made to thwart the will of the people by the franchise grabber of the electric light company.

David Harum Witnessed by a Fair Audience Last Monday.

A good house greeted the David Harum company last Monday evening, and the dramatization of the popular story was well received by the audience.

The play is clean and wholesome and the world would be a great deal better if there were more David Harums living in it.

The opera house management deserves credit for giving Manistique audiences an opportunity of witnessing plays of merit, such as David Harum.

Received \$100,000. Secretary Holman of Manistique Legion No. 108, N. P. L., received checks aggregating \$100,000 to pay national composition policy yesterday.

A Bazaar. The Ladies Aid Society of First Baptist church will hold an apron and handkerchief bazaar in Zeisleron building, March 20th.

Coal Shed Burned. A coal shed owned by the Soo Line railroad was burned about eight o'clock Wednesday evening.

What Lansing, Mich., has to say on the same subject: You are on the right track.

Manistique ownership is all right if you start it right. Keep it out of politics. We are managed by a non-partisan board, three Republicans and three Democrats, term six years, one member appointed each year, no salary, not even free lights.

Following is schedule of rate. 20,000 watts at the per thousand watts, any part or all of the next 100,000 watts at 5 per thousand watts, this is figured as monthly schedule.

Landlord started municipal ownership idea by building the water works, which proved so much of a success, the private lighting plant was purchased, have operated the lighting plant 10 years.

Lights for streets 2 times from private company, and the commercial schedule is only 1/2 charged by the old company.

Total receipts exceed operating expenses \$75,000.00 per year, we have grown from 124 customers ten years ago to nearly 1,100. Prices so moderate any body

IMMENSELY PLEASED ALL.

THE NEGRO PROBLEM

Able Discussed by Supt. Hanson Last Sunday Evening.

THINKS SOUTH HANDICAPPED

On Account of its Large Population of Colored People.

Supt. Hanson, who recently attended the meeting of the National Educational Association at Atlanta made a study of the race problem during his hurried stay in that section of the country, and upon invitation of Rev. Tuley, and officials of the Protestant church, made an address upon the subject last Sunday evening.

The church was well filled and the important talk, with all its dull and tedious every deduction made by Mr. Hanson, was very well received and certainly was pregnant with interest and sound argument.

The speaker said in part: A problem which has been of national importance two years ago and one which promises to be of special importance during the coming century is the Southern Negro problem.

The principle of the "Survival of the Fittest" has long been an established law. To dispute its authenticity is to acknowledge the doctrine of predestination.

In both the plant and animal kingdom this struggle for existence is continually going on and it is only the strongest of every latent power that makes it possible for the various species to survive.

This same principle has worked itself into the theory of political science until today it has become a recognized fact that the inferior races should either give way to their more enlightened brethren or make suitable progress as political powers.

Our faculties, guided by political doctrines, must make the North American Indians and several of the freed slaves of a giant people. The only excuse for the number of European nations today is the jealousy of one another to maintain the balance of power.

There is not far distant when the great Anglo-Saxon race will unfold its banner thereby proclaiming to the world—the new United States of Europe.

Before visiting the South I was much taken up with the Boston T. Washington idea of the negro. I favored his cause and could see no reason why this negro should be so badly treated.

The people of Georgia are engaged in lambering. Negroes are taken from the jails and prisons and farmed out to contractors for \$10 per month. These

A. J. HILL BEHIND IT

Reorganization Plans of Consolidated Lake Superior Co. Will

PLACE IT ON A SOLID BASIS

Chicago Will be the Planning, and Capital Management Have Been Secured.

The reorganization plans of the Consolidated Lake Superior are beginning to assume a tangible shape. If the present plans are carried out, it is said that James E. Hill, president of the Great Northern, will be the man behind the financial gem. It is also stated upon what is believed to be excellent authority, that Mr. Clegg will once more become the guiding spirit of the consolidation, and will be given a free hand to plan and carry out extensions with the consent of Mr. Hill.

It is understood that the Pittsburg, Pittsboro, representing the Pittsburg Plate Glass Co.'s interests, have pulled out saying that their interests would not suffer if present plans are carried out, Samuel Roy and S. M. Provost of Philadelphia, are said to have taken a fresh hold and to be thoroughly in sympathy with the plans of Messrs. Hill and Clegg.

"It is recognized," said a gentleman well informed as to the affairs of the company, "that the day of ascendancy of the Minneapolis calling interests so far as controlling for export is concerned, are over. No one knows this better than Mr. Clegg. The American exports of flour and grain will continue to be less and less, because the United States need its crops for home consumption. With the vast area of splendid wheat lands in western Canada coming under cultivation, Canada and not the United States will become the great exporter. Knowing this and with the assurance that the Anglo Central will be finished, and a route to Hudson's Bay opened, an advantageous spot at which to establish the milling center will be a question of the utmost importance. Already the milling interests have looked over the ground at the Soo. With the abundance of water power, and the completion of the new water power canal on the Canadian side, the Soo will be a most advantageous spot at which to grind for export, being easy of access both from the west and to the sea whether the northern or southern route is taken.

"There are some of the plans unfolded by Mr. Clegg, and I understand they have received the indorsement of Mr. Hill. These gentlemen are looking into the future, but I must say I think their plans are practical. Mr. Clegg

will do the planning and will have most capable managers for the various plants. It is said he has already selected a general manager in whom the business world has great confidence, but for the present his name is withheld."

A burning chimney at the Hinawatha hotel Monday noon, caused a little excitement. No damage done.

SALE POSTPONED

The Federal Leather Co.'s Plant Not Sold. Lack of Bidders.

The sale of the plant and assets of the Federal Leather Co. which was advertised for Tuesday afternoon of this week was adjourned to May 3d, owing to the lack of bidders.

Askle from Attorneys Knox, Wood, Dunton and Hines of this city, McCallum and Marcell of the Sea and Mill of Escanaba, there was a number of interested persons present at time of sale.

Principal terms were \$100,000.00 in cash, \$100,000.00 in bonds of the Chicago Lumbering Co., President Wheelwright of the Northwestern Leather Co. with headquarters at Boston, Mr. Maxwell of Louisville, Mo., and H. J. Flinders of Chicago.

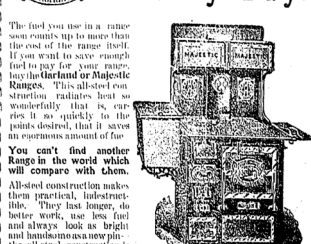

Gorton's Minstrels.

The approaching engagement of Gorton's Famous Minstrels at the new opera house, Tuesday, March 15, is looked forward to with much pleasure by all lovers of this popular form of amusement. Gorton's company has long been regarded as one of the standard attractions which always more than fulfilled all its promises, and the addition of all the latest and most important features insures a performance of unusual excellence. A grand street parade will be given by the entire company at 11:30 a. m. and 2:30 p. m., special attention being called to the magnificent and costly equipment. Prices 75c, 50c and 25c.

New Fixtures.

Two new glass counters and a "silent salesman" have been placed in Winkler's store. The new fixtures certainly add much to the appearance of the store and show commendable enterprise upon the part of the proprietor.

Save Money Every Day. CARLAND STOVE RANGE. You can't find another Range in the world which will compare with them.

EDITORIAL COMMENT.

Never explain: Your friends don't require it and your enemies will not believe you, anyway.

We understand that the Caar is to pray for a week. What the Caar really needs to do is to fight for a week.

Senator Fairbanks of Indiana, has agreed to accept the vice presidential nomination on the Republican ticket if given him.

Mayor Joseph Wilson of the Canadian Soo, has discovered diamonds between that city and James Bay. He has a gem set in his riag as a sample.

In the news columns of this issue will be found several communications from cities that have adopted municipal ownership of electric light systems. They are worthy of careful perusal.

THE PIONEER-TRIBUNE has been making a subscription list for twenty-five years and circulates in every town and neighborhood in the county. Advertisers should not forget this when placing contracts.

The publication of the Menominee Leader will be continued by the widow of the late Editor Joseph Soult. The paper enjoys the distinction of being the only Democratic newspaper in the upper peninsula.

The teachers in the local public schools have evidently done excellent and satisfactory work during the past year for they have all received communications from the board asking if they are applicants for reelection.

Tom A. Hanna, editor of the Iron Mountain Press, who has been ill with some kind of dike disease, as he termed it, was compelled to undergo an operation for throat trouble. The intensity hopes that he will regain his usual good health.

This winter has been a hard one on lumbermen. Too much snow and the extremely cold weather have delayed operations to a great extent. Under these conditions the men in the camps could not do as good work as under more favorable conditions.

Whether Senator Smoot is or is not allowed to retain his place in the U. S. senate, the investigation certainly has revealed the true attitude of the Mormon church on the question of polygamy and also proven the contention of Protestants residing in Utah that the leaders of the Mormon church believe the tenets of their church superior to the laws of the country.

It has been rumored in certain quarters that Chippewa county is preparing a surprise to be sprung at the senatorial convention for the Thirtieth district. It is not definitely stated that this surprise will be a third candidate; but Chippewas haven't had a senator for a good many years and it will be some time to come before conditions will be ripe for making a try for the honor. Senator Fuller is assured of Delta county, apparently, and W. N. Mills is conceded Menominee. This gives Chippewa the balance of power and no one could greatly blame the people of that county if they should try and turn it to their advantage. It would be a strictly legitimate proceeding.—Mining Journal.

NORTHERN MICHIGAN AS A LAND OF PROMISE.

Thus early in the spring there are unmistakable indications of a great increase, this year, of the movement to the vacant lands in northern Michigan which was so conspicuous last season. Land agents and railroads are preparing to take care of a large and significant migration toward the country of unclaimed homesteads, and it is the opinion of the best informed that the acreage taken up in this state this year by home-makers will exceed the aggregate of several years past. Under these circumstances, a word of warning and advice to those who contemplate joining the movement should not be amiss.

The reclamation and subjugation of this territory is going to be no summer picnic. It will be pioneering the strenuous kind. In the former lumber counties which are now developing their agricultural possibilities there is neither room nor welcome for men who are looking for easy ways of acquiring property and a living. There are forests to be cut, stumps to be pulled and all the conditions of a century ago in lower Michigan to be met. The one really important difference is that railroad and steamship lines there lacking, give the present farmer of the new country ready access to profitable markets. None of the available Michigan lands are, from the standpoint of transportation facilities, at a disadvantageous distance from the communities that will consume their products, and, particularly in the upper peninsula, there is an ample number of populous towns that have always paid, and are still paying, the highest prices for the grains, fruits, vegetables, live stock and dairy products that the tiller of the soil can raise.

With land so cheap and facilities for distribution so adequate, there is for the man who is willing to undergo the privations and hardships of pioneer life for a few years the nearest approach to guarantee of a prosperous future that is to be found anywhere. He must use judgment and discretion in the selection of his location, for there are, unquestionably, some strips of ex-

ceedingly poor soil to be encountered in some of the counties which seem likely to attract the great influx of population which is promised, and there are, of course—though these are rapidly disappearing—degrees of advantage in accessibility of markets. But the man who is willing to depend upon himself, to use his own brain and muscle and energy and resource, who is not afraid of hard work or of some temporary privations in manner of living, will find northern Michigan a land of promise. It may be some years yet before the trolley lines, the free rural delivery route, the daily newspapers and the rural telephone exchange will follow them into their retreat; but the development of these facilities and conveniences will depend primarily upon the rapidly with which the country is settled and the thrift, industry and energy of the people who settle it. There will be no waiting for a generation for these improvements and luxuries, as there was in the case of older portions of the state, and if succeeding years carry forward the promise of this, the new communities will shortly arrive at an importance that will quickly supply the necessary incentives to public and private enterprise in indicated directions. And, with them, will come that large enhancement of land values which is the real inducement to the conquering of the world's wilderness.

"AGIN" THE TARIFF.

Grover Cleveland in arguing that the prospects for Democratic success this year are very bright if the party does the right thing, urges tariff reform as the issue. It seems strange that a great political party should in this time of its long career find only one issue to which it can return to maintain its hopes of success. The Democracy has worn tariff reform threadbare. It streaks off after other notions occasionally just to vary the game, but its strong suit seems to be tariff reform. Yet this country has never seen prosperity under a tariff as proposed by the Democrats, and Cleveland himself, when president, had a democratic Congress pass up to him a tariff bill so rank that he denounced it but did not veto it. As a result of this last tariff reform mess, the Wilson-Gorman bill, things went to smash at lively rate. The depression and suffering that spread throughout the land from 1893 to 1896 satisfied most of us that tariff reform was not the sort of medicine it had been recommended to be. How can the Democrats do any work this time that they didn't before? Have we not suffered enough from their tinkering at the tariff? The country has always prospered under a Republican tariff and whatever reforming is needed can best be trusted to the Republican party.

A number of the supervisors from the various wards and townships will no doubt be reelected by their constituents. Supervisors Ebert of Germfask, Williams of Lawwood, Harcourt of Sney, Miller of Thompson, Howard of Harrison, Brasel of Manistique, and Reid of Delta will probably have little if any opposition. In the city supervisors Middlebrook of the second ward, W. L. Orr of the third ward and Chas. Johnson of the Fourth ward are serving their first term and should be accorded a second. Mr. Bronson of the First ward who has so acceptably served his ward and the county as supervisor for many years will no doubt be reelected.

Tailor-Made Suits, Jackets, Separate Skirts and Cravenette Rain Coats. Call in to see our new glass counters and displaying cases, they are a great convenience for customers as well as clerks.

MUNICIPAL CONTROL

Continued from first page.
can have electric light. Schedule given is both for residence, business or factory, the large consumer gets the best fit in the power rate. There never has been any opposition to the water works system; there was to the commercial lighting for a few years, but the crooks have all been eliminated by the success and as the same time low rate.

Ypsilanti writes follows: Re-plying to yours of recent date will say that our municipal lighting plant is unquestionably a great success. No however do not furnish commercial lighting, simply light our city. We have now in use 125 Arlights which cost us annually \$80.17 each, we have both steam and water power, steam 300 horse power, average cost of coal \$2.30 per ton delivered. Not doing commercial lighting we are not in position to advise for or against; but for street lighting, city should own its own plant every time.

GLADSTONE
City of Gladstone says: Our municipal lighting plant and water works are giving general good satisfaction to its patrons. Not only in service but also in price.

THE NEGRO PROBLEM

Continued from first page.
the white children. If this hatred is allowed to go on unchecked in a few years there will be a greater conflict than in the years of 1861 to 1865.
The Southern negro is an inferior-looking man. There is no comparison to be made with his northern brother. Of the 1,000,000 of our colored population, 900,000 are ignorant and illiterate. He is a native of the South. He has no place in the white man's society. In the rail way cars and the car sheds (depots) he has separate compartments.
For the Northerner to appreciate the situation he should be forced to live with him. In no other way would he be able to see the Southern side of the question. You could not treat the negro better if you lived in the South. Most of the Southern business men see no future for the blacks. Educators are doing all within their power to educate him and make his condition better. His future depends on his own education.

In order that the South may awaken from the set back it received some forty years ago and rise to its feet with the progressive North and West, the black man should be colonized and sent to some place where they would be able to work out their own destiny and thus make it possible for the immigrant to step into the Southern region and to develop the land which has so long remained dormant. As Thomas Dixon says the nation can not be both "black and white" would it not be better to meet the problem now rather than wait for further contention and discord?

BROKE THE RECORD.

All previous records of production were broken at the Newberry furnace, when 87 tons of high grade charcoal pig iron were produced. When size of the furnace is taken into consideration—40 feet high by 100 feet long—and which is comparatively small, when compared with more modern plants, the record is remarkable. The average production of furnaces this size is from 60 to 65 tons per day.

Since going into blast a year ago the furnace has enjoyed the most successful run in its history. The daily production has been steadily increased until Monday she reached the 87 ton mark. It would not be at all surprising to see her yet reach the 100 ton mark before she is blown out for repairs.—Newberry News.

"Likes it as a Child Likes Candy."
The following enthusiastic testimonial is published by the editor: from Norman McDonald of Colorado Springs may interest our readers: "I am an ordinary good. Emil Peterson, formerly section foreman, at Cooke arrived here Feb'y 1913 in company with his wife. He likes this country as a child likes candy. He has a position as section foreman for the Santa Fe railroad. For almost two weeks past we have had nice weather than you have in the summer."

"I got my paper regular as clock work and number me to my counting friends."

Signal Station for the Beavers.
Rep. Darragh's bill providing for a cable from Charlottetown to Beavers Island for a signal station. The island has been reported favorably by the committee on interstate and foreign commerce. The bill provides for an appropriation of \$80,000 for the work. The station will be under the control of the weather bureau and will be used to the advantage of passing vessels.

MOORMAN BIBLE READING

President Joseph F. Smith Recalled to the Stand in Smoot Hearing.

Washington, March 10.—The seventh day of the hearings in the Senator Smoot case was opened before the senate committee on privileges and elections by Attorney Taylor, for the prosecution, recalling President Joseph F. Smith of the Mormon church to the stand. Mr. Smith was questioned as to the interview he gave to a representative of the Associated Press in 1902, giving statistics in regard to the church and the number of polygamists in Utah.

Mr. Smith said the entire interview consisted of statistics and in that statement he had said nothing for the purpose of supporting the candidacy of Reed Smoot for the United States senate. Upon leaving the interview read Mr. Smith admitted he had been quoted correctly in regard to Mr. Smoot and had signed his election.

Mr. Smith said he was acquainted with Benjamin Clough, Jr., president of the board of twenty of the Brigham Young academy and that he is reputed to be a polygamist.
"The officers of the Mormon church are sensitive in regard to charges that plural marriages have been performed since 1896, are they not?" Mr. Taylor asked.
Mr. Smith said he thought they were sensitive on that subject.
He was asked whether he had taken any steps to run down the stories that the laws had been violated by officers of the church. He answered that the public charges did not concern him and

Select Sioux Falls for Their State Convention on May 4.
Sioux Falls, S. D., March 10.—The Republican state central committee has selected Sioux Falls as the place and May 4 as the date for holding the state convention and nominating congressional and state tickets.

FINES FOR POLY GAMY.

prohibit polygamy and if that was the case when the law of the Lord charged in order to permit the practice. Mr. Smith said the book or the law had not been modified and that the chairman had read only a part of the chapter.
Chairman Burrows asked the witness to identify the Book of Mormon and then turning to the revelation of the prophet, Joseph Smith, he asked specifically in regard to the manner in which it was revealed and was informed that it was revealed to him by God.
Chairman Burrows asked if polygamy was declared that when the Lord wanted his soul prolonged, he would command it.
This, the witness declared, justified polygamy when a person is commanded by the Lord to enter that state. He said the command comes to individuals as revelations from the Lord.
Senator Dubois asked a number of questions in regard to the revelations received by Mr. Smith and Mr. Van Cott, for the defense, objected to the character of the inquiry.
