NOW IN SESSION

The Swedish Baptist Conference Was Opened Tuesday Evening and is Now in Session

ABOUT 150 PRESENT

Dr. Arvid Gorrell of St. Paul, Minnesota Moderator for Opening Verse. Reports Very Satisfactory.

The annual general conference of the Swedish Baptist denomination convened at the Swedish Baptist church of this city Tuesday evening. At that time 108 delegates from various portions of the United States were in attendance aside from a large number of visitors.

The conference was formally opened by the Moderator Rev. E. J. Nordlander of McKeesport, Pa., at 7:30 o'clock. After the address of welcome by the local pastor Rev. G. Antonsen and reply by Rev. Nordlander the conference sermon was

preached by Rev. J. P. Sundstrom of Muskegon. This was followed by the reports of the nominating committee and the acceptance of the report. The following officers were elected for the coming year:

Moderator, Dr. Arvid Gorrell of Bethel Academy, St. Paul.
First Vice, President Carl H. Peterson of Berwin, Ill.
Presiding Secretary, Rev. Carl O. Dahlin of Chicago.
Recording Secretary, Rev. J. O. Backlund, Strandberg, So. Dakota.
First Assistant Secretary, C. A. Sogstrom, Kansas City, Kansas.
Second Assistant, Gunnar Vingron, Menominee.

The treasurer's report read Wednesday morning was more than encouraging showing a cash balance on hand of \$1,288.97.

During one of the early sessions of the conference, Dr. Mitchell, Dr.

Sloemaker and Rev. Scott, pastor of the Presbyterian, First Baptist, and Methodist churches, were introduced to the conference and all made brief addresses.

The program as published in a recent issue of the Pioneer-Tribune has been followed during the conference, much of the work, being of

a business routine, not of interest to the general public.

Overflow meetings, addressed by prominent visitors, have been held in the various churches of the city this week. On Wednesday evening Rev. S. A. Nelson addressed a audience at the Methodist church; last evening Rev. T. Clifford spoke at the Presbyterian church, and tonight the services will be held at the First Baptist church at which time Rev. John A. Swanson of Chicago will preach.

On Sunday next prominent members of the conference will preach at the various churches of the city at the morning and evening services.

The local pastor, Rev. Antonsen, and the various committees in charge of the entertainment of the visitors, are working day and night, and are doing everything in their power to make the stay of their guests a pleasant one. The delegates are entertained at the homes of our citizens, and the ladies of the church are serving dinner and supper daily at the church parlor, at a nominal price, when arrangement appears to be popular with the delegates, and it is thus made possible to reconvene without delay as the delegates are not compelled to leave the building until after the evening service.

The visitors are of a superior type of men and women, and their stay in the city has been enjoyed by those who have come in contact with them.

WAS A BIG SUCCESS

Labor Day Celebration the Best of the Kind Ever Held Here. All Business Suspended

EXCELLENT ADDRESSES MADE

By Dr. Mitchell and Deputy Labor Commissioner Johnson. Sports and Ball Game Postponed.

The observance of Labor day by the unions of the city Monday was the most successful celebration ever held in the city. Business was suspended during the day, and everyone was given an opportunity of participating in the event. The day, too, was an honest one. The committee in charge of the affair deserve all sorts of credit for the success of the celebration, and it is hoped that in the future every inworking man in the city will be found in the parade, for it is an honor to be classed as a toiler, whether it be by brain or brawn.

The procession was formed at the Osewinnawakee hotel and the speakers, Dr. Mitchell and Deputy Labor Commissioner Chas. H. Johnson of Detroit, and Chairman V. I. Hixson, were escorted to the band stand at the corner of River and Cedar streets, where the literary exercises were held. The procession was headed by the Manistique band, and was made up as follows:

Manistique Band

Auto Bearing Spoken Single Wavers Union Fishermen's Union Tug Men's Union Dredgemen's Union Organized Labor Unorganized Labor

There were 110 union men in line, viz: Single men, 22; Fisherman, 21; Tugmen, 16; Dredgemen, 9; Organized Labor, 31; Unorganized Labor, 31.

Seated on the platform with the speaker were representatives of the various unions, Mayor Middlebrook, Rev. P. Schouwers and others.

After a selection by one of the leaders, Chairman Hixson in a neat little speech, introduced Deputy Commissioner of Labor, Mr. Chas. H. Johnson of Detroit, whose remarks were listened to with deep attention and with much profit to those hearing him. He devoted much of his time in explaining the workings of the department of which he was a representative. His purpose was to see that the laws affecting labor should be enforced, and that proper safeguards for the protection of laboring men were provided, and that the causes of all accidents be investigated. He also called attention to the fact that the department maintains a free employment bureau at Detroit for the benefit of the laboring classes, and that also one of the principal duties of the department is to see that labor avails itself to the fullest extent of the assistance of the department.

BREWERY BURNED

The Plant of the Manistique Brewery, Wiped Out by Fire Last Friday Morning

WORK OF INCENDIARY

The Loss Placed at \$25,000 WITH Insurance of \$10,000. Sheriff Hiller Had Narrow Escape.

The plant of the Manistique Brewery Co., was wiped out by fire at an early hour last Friday morning. The fire has its inception at the corner of the building next to the walls of the freezer, and was without doubt the work of an incendiary, as traces of kerosene was seen at the rear of the building, and objects nearby. A hole was evidently made through the wall and a quantity of the fluid poured therein, and the flames quickly communicated with the roof. Mr. W. H. Hill, who resides in the vicinity of the brewery, noticed the blaze shortly after four o'clock in the morning, and spread an alarm. He went to the brewery and awakened Mr. and Mrs. Hiller who were sleeping in the building, and to Mr. Hiller can be given the full credit for saving their lives. The upper portion of the brewery was in a blaze when they left the building, and the heavy tanks directly above their sleeping quarters soon fell, owing to the rapid weakening of the timbers supporting them.

That two persons were implicated in the disasterly work was evidenced by the fact that large and small footprints were noticed in the sand at the rear of the building, and they led into the underbrush that covers the tract along the river. Aside from the complete destruction of the building and machinery forty five tons of coal, 350 bushels of malt and 4000 pounds of fermentum, all of which had been placed in the brewery within a day or two before the fire, were destroyed. There were 650 barrels of beer in the brewery at the time and that was practically ruined.

The building was erected seven or eight years ago, and was not a paying proposition until the past year. Under the management of Tony Hillier, the brewing company earned the reputation of making beer the equal of any on the market, and the trade it was receiving placed it on a paying basis.

Mr. Hiller says that the loss will

aggregate \$25,000 and as but \$10,000 was carried on the building and contents the loss will be a heavy one. Owing to the fact that there was absolutely no danger from fire, Mr. Hiller was averse to carrying much insurance, and only last spring reduced the amount carried from \$12,000 to \$10,000.

The fire department made the run, but owing to the fact that the fire was a mile or more from the city limits, there was some delay in starting, but while the brewery proper was doomed long before it arrived, the department saved the nearby buildings, including the ice house.

The property is owned by Detroit.

The insurance was carried in the name of Edmund Ashford.

ARE BANKRUPT

The Mueller Co. Operating Extensively at Hixson, in the Hands of a Receiver

THE ASSETS ARE LARGE

And Will No Doubt be Sufficient to Meet All Liabilities.

For some time rumors that the Mueller Co., operating at Hixson and other portions of the peninsula, was in straightened financial condition, were rife, and developments this week prove that the rumors were well founded, for a decree has been issued by Judge Stone, for the sale of the holdings of the company in order to satisfy the claims of creditors. This news will be greeted by the citizens of Schoolcraft county, for the company has been an important factor in the business life of the county. It founded the town of Hixson, one of the best built villages in the upper peninsula, and gave employment to hundreds of men. The assets exceed \$1,000,000 and from unofficial sources we learn that the liabilities exceed one half of that amount.

The current issue of the American Lumberman has the following to say concerning the failure:

By a decree of Judge Stone the affairs of the William Mueller Company, of this city, will be closed out and all the assets disposed of to effect a settlement with the creditors who had previously disagreed upon the methods to be employed. A total of more than \$1,000,000 of assets, consisting of railroad stock, timber lands and other valuable holdings, will be sold at public auction to the highest bidder. The William Mueller Co., which practically built this town and established yards in Marquette and other places, through unfortunate investments were forced into bankruptcy. Among the liabilities are notes totaling it is said, hundreds of thousands of dollars made to various banks of the country.

The William Mueller people are well known here and a great many people in this vicinity will regret to hear they are in financial trouble. William Mueller, Jr., is president and James Jeffries assistant manager and secretary.

Mr. W. E. Campbell left for Iron River Sunday evening. His family will remain here for the present.

A GOOD SHOWING

Made by U. P. Experiment Station at the Delta County Fair.

Through the exhibit of the U. P. Experiment station at the recent Delta county fair was not extensive it was large enough and sufficiently meritorious to convince any one who will permit himself to be convinced that a change of location for the state farm is neither desirable nor necessary, says the Mining News.

Fifty different varieties of seeds ripened on the state farm and six varieties of corn with stalks from seven to over ten feet high were exhibited. About 150 pounds of seeds from one of the varieties of corn shown were distributed last fall to various farmers in the Upper Peninsula. This distribution will be larger and continue to grow.

One of the most interesting objects shown was a corn stalk which was over twelve feet high and had not attained its full growth. Superintendent Geismar of the state farm is co-operating with the U. S. Department of Agriculture to test the value of the tannin raised by the former as a plant producer.

A feature of the exhibit was twenty one varieties of apples successfully grown on the state farm. This is only part of the varieties grown there as the late apples have not attained a size sufficient large to be exhibited. Two years hence it will be possible to show sixty varieties of apples successfully grown on the farm.

The so-called famous "Wonderberry" and its twin, the nightshade, were shown side by side. The former very closely resembles the latter but the blossoms of the two plants differ somewhat.

One who only to taste the much talked of "Wonderberry" to discover its pretty poor fruit—not worth even a small part of the ado that has been made over it.

Among the vegetables shown was Swiss chard—said to be the best ever of green—and several varieties of beets usually grown only in southern America.

Taken as a whole the exhibit was a fine one and reflected credit on the state farm and on Superintendent Geismar.

Both Boys Saved.

Lois Iton, a leading merchant of Norway, Mich., writes: "Three bottles of Foley's Honey and Tar ably, I believe, saved my boy of a severe cough, and a neighbor's boy, who was so ill with a cold that the doctors gave him up was cured by taking Foley's Honey and Tar. Nothing else is as safe and certain in results. For sale by E. N. Orr & Co."

A Sprained Ankle.

An usually treated sprained ankle will disable the injured person for a month or more, but by applying Chamberlain's Liniment and observing the directions with each bottle faithfully, a cure may, in most cases, be effected in less than one week's time.

This Liniment is a most remarkable preparation. Try it for a sprain or bruise, or when laid up with chronic or muscular rheumatism, and you are certain to be delighted with the prompt relief which it affords. For sale by E. N. Orr, A. S. Putnam & Co., and Latta & Neville.

Van's Harbor Mill in Commission.

The new mill of the Van's Harbor Land Lumber company was placed in operation for the first time on Thursday and the lumber side of the plant is now being run full blast. The single making side of the mill will be fully equipped within a short time and an additional crew of men will then be employed by the company.

According to the plans of Supt. C. Collins the mill will be run with both day and night shifts constantly until the cut of logs now delivered at the mill site is cleared up, after which it will be in readiness for placing the old mill in operation this spring when it was burned and operations were necessarily delayed until the new mill could be erected.—Roman Morning Press.

Why?

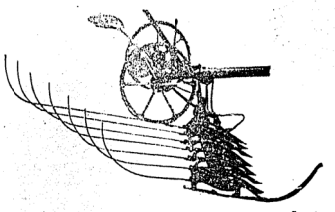

From a small beginning the sale and use of Chamberlain's Cough Remedy has extended to all parts of the United States and to many foreign countries. Why? Because it has proved especially valuable for coughs and colds. For sale by E. N. Orr, A. S. Putnam & Co., and Latta & Neville.

The Pere Marquette Co., smarting under the loss of business as the result of the discontinuance of the Manistiquette, Northport ferry route, is contemplating establishing service between Escanaba and Northport. Rumor says that a deal for deekage at Escanaba has been made with that end in view.

Judge Knox left for the east yesterday. He and Mrs. Knox will be the guests of their children in New York city and Boston. It is their intention to attend the big Fulton celebration to be held on the Hudson river on the 26th.

Care in Preparing Food.

In recent years scientists have learned that the value of food is not only in the most nutritious part of it, but also in the way it is prepared. It is found that food which has been prepared as a perfectly good one, and which was a pure one, is not so good if it is not prepared in the best manner. It is the Quaker Oats food, prepared by the experts to be the best food for making strength, and it is the only manufacturer of oatmeal that has so thoroughly studied the problem of removing the husks and other matter which are so annoying when eaten. It is the only manufacturer of oatmeal that has so thoroughly studied the problem of removing the husks and other matter which are so annoying when eaten. It is the only manufacturer of oatmeal that has so thoroughly studied the problem of removing the husks and other matter which are so annoying when eaten.

TOWER OF LONDON.

The Tower of London has the most perfect system of burglar alarms that has ever been devised.

From Scotland Yard, from the governor's headquarters and from other places known only to a few reliable officials the whole Tower can be closed electrically within a few seconds. Even the numerous gates at the middle tower, which weigh some tons and through which visitors pass, swing to automatically, and the opening of every one within is instantly barred.

At the same time an alarm bell rings to warn uninitiated soldiers.

In particular the precautions in the apartment containing the crown jewels are of a most scientific character. One set of the jewelers on duty in the room has merely to press a button, whereupon the crown jewels, the diamond ball bow rings, the other gates slam to lock, and every person within the tower is instantly cut off from the outer world.

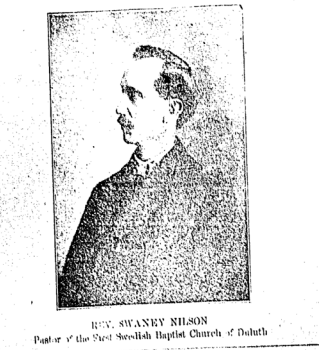

"The man who can get away with any of the crown jewels deserves death," observed a Tower official. "From where I am standing I could close every important door and take to utter those words."

It was mainly to insure the safety of the crown jewels that the system was installed.

No order had been issued for the closing of the Tower on the night under way, and to their alarm, the visitors found doors locked, bolted and barred against any effort to break through the unbreasting iron.

"The Tower simply closed—that is all," he said. "But who closed the door? It is so simple to do that I don't know. It might have been Scotland Yard, where the pressing of a button would lock the doors, or it might have been the police gave the signal for their release, or it might have been the governor, anxious to learn whether we were all at our posts. At any rate, it was none of the minor officials."

"In fact, who closed the Tower and why is a secret known only to the highest authorities. There was no alarm, no attempt to steal the crown jewels."—London Mail.

WAS A BIG SUCCESS

(continues from page 1)

and he deliberately chose to come in the family of a laboring man. For the greater part of his life he labored at the carpenter's bench. And in the last three years of his life he was harder worked than ever and continually busy about doing for the laboring classes. He was not like God then; and it is no wonder that God does not like an idler. Angels, that superior order of being just above man, are all ministering servants. They all belong to the laboring class. Men, who are in good company when you are in that class, God is one of you. And Christ Jesus is one of you; and the holy angels in the same class. There is no need of your being ashamed of your company.

Now before I close I wish to call your attention to a local matter that concerns us right here at home. The last legislature passed an act making it unlawful for any store or business house where women are employed, to keep them at work more than 64 hours in a week. If this law is enforced, the stores would close at six o'clock instead of keeping open until late at night. Now the clerks are just as much entitled to close their day's work at six, as are the strong men who work in our factories. It is not fair that more hours should be required of them, than are demanded of the men. And this law should be enforced just as are the other laws that are on our statute books. And you, ladies and gentlemen, you can have a great deal to do in having this law enforced. Never enter such a store after six o'clock in the evening. These clerks are your fellow laborers. Stand by each other, demand it. Let them see that they are mistaken. Ladies and gentlemen do your shopping before six o'clock. I call upon you every one here to see that this law is enforced.

The ball given by the members of the Union that night at the Armory was the largest attended of the season and was a social success in every way, enjoyed by all who participated. The spacious hall was beautifully decorated with bunting, flags, palms and Chinese lanterns which showed that the committee in charge were adepts in the art of decorating. Everything was done to make the affair one of pleasure and joy to be remembered by those who courted the goddess Terpsichore. The music was furnished by Melloni's orchestra and was enchanting. Lemonade was served at a booth located near the entrance to the hall.

DEATH OF MRS. MANSON

Was the Widow of the Late Frank Manson, Who Was a Member of Arctic Expedition.

Mrs. Frank Manson died at her home in Riverdale addition last day of chronic nephritis. She has been ill for the past five years, but was not confined to her room until three days before her death. The deceased was nearly forty years of age, was born in Sweden, and had been a resident of Manistique for twenty years. She became the wife of Mr. Frank Manson shortly after his return from the Arctic regions, where he had been a member of the ill-fated DeLong expedition, and who died about three years ago. She leaves three children, John, Alma and Esther. The funeral services were held from the Swedish Baptist church Sunday afternoon, and were largely attended.

The deceased was an estimable lady, and had many friends that regret her untimely demise.

MAY OPEN BRANCH HERE

Roid's College of Business Contemplates Such Move in the Near Future.

Mr. H. F. Roid, principal of Roid's College of Business, located at the Soo, who recently visited Manistique and thoroughly canvassed the field, has practically decided to open a branch here on or about October 1st. He was influenced in this decision by the request of a number of business men, as well as young people that are desirous of attending school. The course will be identical with that given by the parent institution and night school will be a feature, for those unable to attend the day session. The advantages Mr. Roid offers to our young people should certainly be appreciated for they will be enabled to secure a first class business course at practical no expense. The biggest item of expense in attending school away from home is board and room. This will be eliminated by the proposed branch, as you will be enabled to work daily and take instructions at night if you desire it.

If those interested will write Mr. Roid at the Soo, it will materially assist him in formulating plans.

Tendered Surprise Party.

Following the general lines of the statement below

Fall style recommendations adopted by the National Cloak and Skirt Manufacturers Association

COATS of two piece suits, from 36 to 48 inches long with 40 to 45 in. lengths predominating, the backs to be cut closer fitting than the shapes heretofore known as best fitting, the tendency being to make them fit rather closer to the figure, sleeve to be smaller.

The Coats of three piece suits 40 to 45 inches long, the back to be cut somewhat looser than the two piece suits.

SKIRTS of suits have more fullness at the bottom. This is attained by an increased flare or by the introduction of plaits in the new effects.

SEPARATE COATS are full length with more shaping in fact than were the vogue last season. Tailored suit coats are the most popular in the seven digit's fitted shape and in length, and in length varying from 40 to 45 inches, popularity called "the three-quarter length."

In Fabrics stripes continue very popular because of their tendency to emphasize long effects. Worsteds, serges and soft finished suitings in stripes and diagonals, as well as coverts, broadcloths, korsays, and mannish mixtures are the favored materials.

W. B. REDUSO CORSET FOR STOUT FIGURES

Puts every stout woman on the same style basis as her slender sister. It is the last word in corset making radical in its ideas and its results. A scientific, logical, simple corset which by forcing its wearer to hold herself properly so encourages deep breathing, the nature itself reduces the excess flesh out of the abdomen through hardening the soft, fattened tissue into hard muscular fibre.

THE REDUSO will in a few months bring about a natural reducing of the figure.

Made in Coutiz and Batiste, size 19 to 26.
