COMMENCED WORK

Government Dredge and Tug Here and Work Commenced on Harbor Improvement.

TWO CREWS AT WORK

Formations for breakwaters to the light before close of season.

The tug Manistique of the U. S. Eng. Department, the government tug industry and Dredge No. 1, arrived in port last night, and this morning the dredge was placed in commission at the mouth of the river.

It is the intention of the engineer in charge to complete the foundation of the breakwaters before the close of the season. Going to the fact that the local men were unable to furnish the timber of proper dimensions the lumber used will be shipped from the Pacific coast, and it is anticipated that the stone to be used will come from Sturgeon Bay.

Engineer E. M. Nison of Milwaukee, came with the equipment and will oversee the work.

Manistique now has tangible evidence of the efficient work done in Manistique's behalf by Congressman Tamm.

MEETING A SUCCESS.

Large Numbers Attend Pomona Grange.

The Pomona Grange meeting held last Friday afternoon evening was the most successful and there was the largest attendance of any meeting since the Grange was organized. The meeting was called to order at half past one and the general order of business dispensed with after which Attorney Hixon was invited in and he addressed the Grange on the subject of organization, marketing farm produce, and the county fair, after which the ladies of the Grange served a bounteous supper which was enjoyed by all.

In the evening a circle of seven were admitted into the mysteries of the fifth degree after which we had an excellent Lecture program which was in charge of our Worthy Lecturer, Brother Chas. Howard, after which we wended our way homeward with much food for thought and the enjoyment of one more meeting our fellow farmers.

RECEIVED SEVERE BURNS.

Mr. Fred Carroll Burned About the Face During Fire Tuesday.

While engaged in building water in which a quantity of kerosene had been placed, Mrs. Fred Carroll received severe burns about the face as the result of the fire that followed when the mixture caught fire by falling over becoming ignited by contact with the hot range last Tuesday.

The interior of the kitchen was largely scorched before the flames were extinguished. The department was called.

FOR TREASURER

Mr. John N. Forshar Announces His Candidacy for Import-ant Office.

DESERVES RENOMINATION

Has Served the County Faithfully and Well and Will be Unopposed at the Primaries.

Mr. John N. Forshar, who is serving his last term as treasurer of the county of Schoolcraft, is announcing his candidacy for re-nomination in this issue of the Pioneer-Tribune. He has performed his official duties in such a satisfactory manner that he deserves an unanimous re-nomination and re-election. He has given the office his undivided personal attention, which is really an innovation in the office in question. He has faithfully attended to all business in a prompt and courteous manner and stronger now than he was two years ago, at which time he was out in the face of the strongest opposition at the primaries.

We doubt if any one will have the political shrewdness to make the race against him at to general election in November, for it would be a waste of energy.

When an official personally attends to his official duties and does his work as well as Mr. Forshar he deserves every vote in the county, and from all indications "Jack" will get them.

Mr. and Mrs. Carl Frankenstein arrived in the city Monday evening. Mr. Frankenstein returns home this week, while Mrs. Frankenstein will prolong her stay.

IS A CANDIDATE.

Mr. Virgil I. Hixon Announces Candidacy for Prosecuting Attorney.

IS POPULAR CANDIDATE

And will Without Doubt Land the Nomination by a Decisive Vote.

Mr. Virgil Hixon who for twenty years has been a resident of Manistique and who has established a reputation as an attorney equal to any in the upper peninsula, has accepted the requests and importunities of his many friends in every section of the county and will make every honorable effort to secure the nomination for the office of prosecuting attorney at the Republican primaries to be held September 20th.

Mr. Hixon has filled the position he seeks with credit to himself in years past and as such official has won himself the favor of one who has ever held the same position in the county. He has an established reputation for impartiality and fairness and his success as prosecuting attorney can be judged on the large number of convictions he secured during his term of office and the economy exercised in the conduct of the office.

He is known throughout the county as one of its best citizens. His personal and official life has never been tainted, and he deservedly enjoys the respect of a large majority of the citizens of the county.

There are reasons why he is a stronger candidate this year than ever and these reasons are very generally known. All indications point to his nomination by more than 200 majority of at the primaries, and of course his election will follow.

Merton Himes, at one time stenographer in the bank here, now at Manistique, arrived Saturday evening and departed Monday evening. He called on friends, and says he could not begin to get around to see the half of them—must run over again.

Mr. Himes is the owner of moving picture theaters in Norway, and Peavack, employing managers to run them for him. He is keeping books at Manistique, and drawing a comfortable salary. Thus old world is good to him, and he fully reciprocates.—St. Ignace Republican News.

Fire Department Called.

While burning a quantity of paper at the rear of Whitcomb's store Saturday morning a lot of rubbish near the door was ignited by sparks and owing to the strong wind that was prevailing, quite a blaze was started. The fire department was called, but before it arrived, Mr. Whitcomb had extinguished the fire with the garden hose attached to the tap in the building. When the team at the house wagon, near the front in front of the department headquarters, one of the rear wheels collapsed under the strain, but the team made the run with three wheels and made good time, notwithstanding the fact that the wagon and its contents weighed about two tons.

HE DESERVES IT.

Mr. Alfred Dufstrom Announces Candidacy for Renomination.

IS A GOOD OFFICIAL

Has Attended to the Office of County Clerk and Register of Deeds in Able Manner.

Mr. Alfred Dufstrom, who has as acceptably filled the position of county clerk and register of deeds for only term, announces his candidacy for re-nomination in this issue, and from all indications he will have no opposition at the primaries, for his worth as an official is so generally known that no one would have the hardihood to enter the lists against him, thereby committing political suicide.

Mr. Dufstrom served as Mr. Bowen's deputy for six years and was thoroughly conversant with the duties of the office before his election two years ago. He has been attending to the duties of the office with faithfulnes that has commended him to all. He has given the office his undivided personal attention, and has treated everyone having business there with courtesy. It is pleasing to his best of friends that he will receive the re-nomination supposed for it is deserving of such honor.

It gives the Pioneer-Tribune great pleasure to support Mr. Dufstrom's candidacy for the nomination.

Mr. M. Ahmanson and children and her infant granddaughter, accompanied by a nurse, arrived in the city Monday morning.

HE MADE GOOD.

Mr. A. J. Smith Desires to Succeed Himself as Sheriff.

WILL HAVE NO OPPOSITION

At the Republican Primaries. Is Entitled to this Consideration at the Hands of the Party.

Mr. A. J. Smith, who has an acceptably filled the position of sheriff, of this county during the past two years, has announced his candidacy for re-nomination in this issue of the Pioneer-Tribune, and it is a pleasure for this paper to endorse and support the candidacy of Mr. Smith for he has made good as an official and is deserving of a second term.

He is continually "on the job," and if his services are needed it is not necessary to scour the town to find him. He has done an immense amount of work about the court yard and jail and it can be truthfully said that at no time in the history of the county have the premises looked so well as they are looking at the present time. He keeps all prisoners placed in his charge at work, and with their assistance has filled the yard and is creating the rear end of the yard, and preparing it for the planting of trees. He has also saved the old sidewalk surrounding the county's property for fuel. In fact he has attended to his duties with the care, enthusiasm, and intelligence with which a man of business would look after his individual affairs. He promptly sees all papers given him, and at the present time has not a "cold" paper in his possession.

Mr. Smith will have no opposition at the primaries, and little if any opposition at the polls.

When a public official makes good he deserves the courtesy of a re-nomination without opposition, and will receive it.

In Business for Themselves.

Mr. Edward Halgren and Chas. Heden have purchased Dr. Sells's harness shop and have taken possession. Mr. Halgren has been in charge of the shop ever since Mr. Sells embarked in the business. Mr. Peterson has been in charge of Joseph Honcher's shop for some time. Both are first class workmen and popular. The new firm is a strong one.

<p>When a bank certifies a check, assuming the payment of the same, the amount is at once charged to the drawer's account, and the check becomes the bank's liability. For this reason a certified check should never be destroyed, but should be returned to the bank.</p>				
<h3>The Farmer and His Bank Account</h3> <p>The farmer, more so than any other business man, requires the services of a bank, if he manages his farm in a systematic way. While he has no need for a set of books in which to keep a record of every transaction made, yet during the course of a year he must pay out large sums of money for various purposes, and a record for future reference is highly important. Merchants may fail to give a receipt for cash, a neighbor may not recall the payment of money owed, but the farmer who pays his obligations by check has written evidence of such payments which any court must recognize. In the same way he has a record of monies received by the deposit entries on his bank book.</p> <p>To the farmer, who desires such a record for his business, we extend an invitation to open an account with this bank.</p>

THE STORE THAT SAVES YOU MONEY

THE ARCTIC CROP.

Frigid Yield From Greenland's
Icy Mountains.

THE MAKING OF AN ICEBERG.

Huge sheets of ice a mile thick in
places slide down to the sea, and
as the ends become too heavy they
break off and form bergs.

At any time of the year ice may be
encountered in the Atlantic north of
the fortieth parallel of latitude, ap-
proximately that of New York. Be-
tween 42 and 55 degrees west longi-
tude, but it is in spring, when the in-
creasing warmth of the sun loosens
the arctic snow and causes the bergs to
melt and float from the places where
they have been stranded, that there is
the greatest danger in the world.

The bergs have their origin almost
exclusively in western Greenland, al-
though a few may come around Cape
Farwell from the Spitzbergen sea and
some from Hudson bay.

A huge sheet of ice a mile thick in
places covers the whole of Greenland.
This gradually slides down the valley
toward the sea, into which it is thrust
and great sheets fifty miles wide. As
these sheets become too heavy they
break off and become bergs. The pro-
cess is known as "calving." The pro-
cess itself may take a thousand feet
of the water and a mile square, but
as they drift about they become
broken and continue to diminish in
size until they finally disappear com-
pletely. The process sometimes takes
several years.

One set adrift bergs find their
way into the Labrador current and be-
gin their journey. But of all bergs so
set adrift only a very small proportion
ever find their way into the path of the
transatlantic steamships.

Not do all bergs take the same
course. Some go south; others lodge
against the shore or against islands.
Two years may separate the time that
two bergs reach a low latitude, though
they were "calved" at the same mo-
ment.

Field ice also offers an obstruction to
the bergs, though by their great
size and bulk they often act as plows
and melt materially as they pass up
the ice fields which obstruct the arctic
lanes.

Ice fields are more affected by the
wind than are bergs. Bergs gener-
ally drift with the current, so that one
sometimes is seen moving into the
wind.

Advantage is taken of this by the
sailing and fishing boats when caught
in an ice field. They often move to
the leeward and are towed through the
ice, through which otherwise they
could make no headway. This is ac-
complished by attaching a rope to the
berg and using a strong towline.
As the berg advances open water,
with small floating ice, is left astern.

But this is indeed a dangerous thing
to do. All ice is brittle, but especially
bergs. A blow of an ax has been
known to split one, while the report
of a gun at times will accomplish the
same end. In July and August, when
the bergs are breaking into the ice
coast of Labrador, the noise at times
is deafening, and the noise of one of
them causes another to break up.

From their very nature bergs as-
sume an endless variety of shapes.
Some resemble geometrical figures,
while others carry fanciful domes,
spires and minarets. Sometimes they
appear to be veritable ice bridges,
with two separate supports. In many
there are great caves and indenta-
tions. As they drift south and begin
melting cascades of water pour down
their sides or run from the tips of the
hundreds of icelets which depend from
every ledge.

Frequently there are outlying spurs
in the water, as dangerous to ships as
submerged reefs. For this reason ves-
sels should always give them a wide
berth, half a mile being considered the
nearest that one may be approached
with safety.

Several years ago the British steam-
ship Nessmore ran into an iceberg and
stove in her bows. When she was
doomed a search was found near the
keel the full length of the ship, the
plates being struck out through. The
ship evidently struck a submerged
spur. The government report says:
"It is generally best for ships to go
to windward of them, because disint-
grated fragments have a tendency to
drift to leeward, while open water will
be found to windward."

So lately are bergs balanced in
the water that the slightest melting
sometimes will cause the center of
gravity to shift, and the entire berg
will capsize or founder. Thus many
ships have been wrecked.

Field ice is formed throughout the
waters within the arctic circle south
as far as Newfoundland, and each
year vast floes leave the shores and
drift south into the paths of com-
merce. The arctic ice often has lived
through several seasons in the far
north and occasionally is ten to fifteen
miles and sometimes twenty feet thick. Be-
cause of its continual motion, due to
currents, wind, etc., gradually it be-
comes broken up. Swells from storms
in the open seas cause it to raft or
pile one upon another in the arctic
every piece of field ice is a pan—until
it is covered with hummocks.

WEDDED THE DEAD.

Queer Marriage Ceremony That Was Performed in Japan.

The girl refused to marry the man. The two lovers decided to commit suicide rather than be separated. By appointment they met at a trying place that had been the scene of their love-making and embarked in a fishing boat. At a point some distance from shore they bound themselves together with some cloth brought along to serve that purpose and threw themselves into the sea.

Committing "white" as lovers suicides are called in Japan. In such an ordinary occurrence that little attention is attracted by it, but this tragedy was followed by something exceptional in Japan.

When the two bodies, still bound together, were washed ashore the officials who examined them turned them over to their respective parents. The villagers were so deeply affected that they called upon the two bereaved families to "do justice" to the bodies. "Buddhism Japan" and "Gleanings in Buddha-lands" never brought the at-

tribution of the accident to any Japanese custom or occurrence stranger than this real happening that finds its way into the columns of a Japanese newspaper as a feature of the day's news—Louisville Courier-Journal.

A Freak of Nature. Colonel Dennison had become the happy father of twins, and his unbounded pride in this twofold blessing found expression on every occasion.

He stood with a friend on the bank steps one day as a young woman passed wheeling a baby carriage containing a pretty girl baby.

OFFICIAL COUNTY AND CITY PAPER
FRIDAY, AUG. 5, 1910

EDITORIAL COMMENT.
People like abuse as long as they are not abused.

Advertising and rustling is a business combination that is hard to beat.

A hammock leaver may not be any leaver than other varieties, but he looks lazier.

Ever think how many good substantial men there are in Manistique—the pillars of the town that quietly do things.

The Iron Port, the oldest newspaper in Escanaba, has passed into the hands of the publisher of the Mirror, and has been consolidated with the Weekly edition.

Work has been commenced on harbor improvements here. Don't forget the fact that Congressman Young made it possible for Manistique to secure a big appropriation.

The sale of silk hats has decreased 60 per cent, and this fact leads the Grand Rapids Press to say that few persons outside of the governors and the corn doctor wear them now.

Congressman H. O. Young will speak at the opera house Monday evening, August 29th. Every voter in the city, as well as the ladies, should take this opportunity of hearing our eloquent congressman.

The rains are saving the crops of Scholcraft with a frequent regularity at the present time. However one or two downfalls at the proper time would have accomplished much more in that direction than at the present time.

The fact that the manager of the Calumet & Hecla Co. is president of the Kerr Boating club may help Kerr in Houghton county but will have a deterring effect in other portions of the district, where Kerr has been posing as the "poor man's friend" and exclaiming against corporations. It will "put him in bad."

The option Chase Osborn is receiving in the Fourth district casting consternation into the Kelley camp. This particular district has been considered Kelley's stronghold but the action into the Osborn camp is so pronounced that it is now considered that Chase will easily divide the vote with Kelley or receive a small majority.

The idea of the construction of a ship canal across the upper peninsula has come to light again. A Chicago firm making inquiries in this city concerning the probability of securing funds from this county in the nature of a bond issue, etc. They claim that there are two feasible routes, and that Manistique is the proposed terminus of one of these. It is doubtful whether a penny could be secured here, for the scheme is a chimerical one.

Now someone conversant with the situation claims that the beaver should be exterminated in the upper peninsula. It is claimed that they are doing untold damage to growing timber, and that they are the enemies of the fanny tribe for it is a well known fact, that while beavers do not eat fish, the stream upon which they work never contain fish. The "someone evidently is a trapper and would prefer to legally catch the furry animal.

Usually when home talent essays "comedy" it feels that it must do so at the expense of the feelings of persons well known locally. Usually these gibes are made at the expense of professional men and are not resented by them and they are taken in the proper spirit. When "comedians" leave the beaten paths, and assail idiosyncrasies of others, they make grievous error that many feel like resenting. For instance the alleged penuriousness of well known citizens is carrying the joke too far. We have in mind a young man that has, by frugal habits acquired a competency. He is showing his public spirit by erecting the most costly residence in the city. We admire a young man that will save his earnings instead of squandering the sobriquet of being a "good fellow," by the frittering away of his income. It is certainly in bad taste for any person or society to hold such a person to public ridicule. If more of our young men had the same habits of industry and were equally careful with the expenditure of their money, it would be better for the city and certainly better for the young men themselves.

EDITORIAL COMMENT.

When a doctor uses a big word ask him to spell it.

The postal savings bank, like other banks, won't save our money, unless you save it.

Now since Clippen and his paragon have been apprehended what will the daily newspapers do to fill space.

When one has the privilege accorded him of a leucostyphambolic and notes the manner in which it cuts up the post, he is apt to resolve that he will purchase one sometime.

It is claimed that there are only twenty five original jokes in all literature, including the Congressional Record. The "mother-in-law" stanza is one and the candidacy of Kerr for congress in another.

According to the Michigan Monthly Bulletin of Vital statistics, twenty-two births and seven deaths are credited to Scholcraft county for the month of June. Ten of the births and six of the deaths are credited to Manistique.

Auditor General Fuller is spending a short period of rest at his home in Delta county. He performed his official duties so well during his first term that he will be given a reappointment without opposition. Serves him right.

No wonder that so many young men take up the profession of law. Ninety-two of the twenty-six presidents elected in this country were lawyers. Two were farmers, two were soldiers, two were statesmen and one was in public office.

Geologists say that the supply of coal will be exhausted in 150 years, and then post will have to be used exclusively. It will be a case of burning up the earth. What will happen when the post supply is exhausted, may be the query for a pessimist, but the present generation need not worry about that.

Practically all of the aspirants for county offices are announcing their candidacy in this issue. It is concluded that all of the present officials, with the exception of Wood, will be renominated without opposition. The latter will have the strongest sort of opposition in Mr. Hixson, and it is safe to predict that Mr. Hixson will win out.

A prominent politician of Wayne county writes the Pioneer-Tribune editor that Wayne county will give Chase S. Osborn at least 5,000 majority, and may double the figures above mentioned. That he will have a plurality of at least 25,000 in the state at the primaries, is estimated by persons conversant with conditions in the lower peninsula.

Three residences that will compare favorably with the best residences in towns twice the size of Manistique, are being erected at the present time. The fact that they are being built by men closely allied with the leading interests of the city, should be a source of congratulation for all. It means that Manistique is on a permanent basis, and that its future is assured.

Little things sometimes are vital. The fact that Dr. Grippen affectionately squeezed the hand of his "son" while walking about the deck, and the fact that a gust of wind revealed the fact that the "son's" pantaloons were fastened to the vest by means of a safety pin, were contributory cause for suspicion and the subsequent arrest of the pair.

Chase S. Osborn finds it impossible to visit the upper peninsula before the primary election as every day of the time is scheduled in the lower peninsula where his campaign managers think that most of effective work can be done. It is stated that he will make a tour of the peninsula after the primaries no matter what the result may be. He is impressed with the loyalty of the peninsula toward his candidacy to a very marked degree.

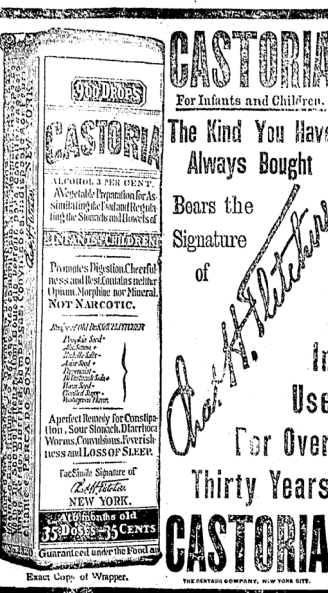

An Escanaba man claims to have the oldest piece of money in the upper peninsula. It is a note for twenty shillings and was issued three years before the signing of the Declaration of Independence. Just how he happened to hang on to it so long is a mystery, when it is taken into consideration that Escanaba has more saloons than any other city of its size in the state, and that the "rank outsider" has been led to believe that they garner in with daily regularity every cent that is in circulation there.

We read that Mr. Muscellman has gone to the north and "will receive as many votes for governor in the upper peninsula as will any other candidate." This is one of the way of decrying Mr. Osborn. Another is the frequent assertion from the Muscellman source that he is distinctively the upper peninsula candidate, backed by that section almost exclusively and for creditable reason. Thus do the Kelley and Muscellman managers think they will catch the voters both coming and going. Those well in touch with the situation know that Mr. Muscellman is to be a bad third in the race and that votes cast for him will be thrown away. Either Mr. Osborn or Mr. Kelley will be nominated. Voters who do not desire Mr. Kelley for their nominee have but one thing to do and be wise in the doing, and that is to vote for Mr. Osborn—Allegan Gazette.

Osborn Will Win.
The Detroit Times figure Osborn's nomination as a foregone conclusion, as follows:
"That Chase S. Osborn of Sault Ste. Marie will carry the state by 25,000 and Wayne county by 5,000 at least, in the coming primary election, is the confident prediction made by local supporters of Mr. Osborn, who are in close touch with the situation."
These figures are based on reports from every county in the state, gathered by means of a perfect system that has been evolved by the local organization, and the estimate is conservative.

"From the tone of these reports it would seem that Patrick H. Kelley's supposed strength in certain localities has been greatly over-estimated. It is extremely doubtful whether he will be able to carry even his own native county, Cass, for reports from Dowagiac and other points in that county show that Osborn's candidacy is steadily gaining strength here.

As far as the upper peninsula is concerned, there is apparently not the slightest doubt as to Mr. Osborn's superiority. The Osborn clubs of that section have been doing some most effective work, and as a result largely of their efforts, the enrollment has been increased in some localities as much as 100 per cent.

AT JOHANNES ANDERSON'S

LABOR DAY

Will Be Properly Observed by the Union Men of this City. BIG PROGRAM ASSURED.

Plenty of Spoken, a Parade, and Sports of a Grand Contemplation.

The unions of this city have decided to celebrate Labor Day in an appropriate manner this year, and have appointed a finance committee to solicit subscriptions to secure the necessary fund. This committee consists of Messrs. Dan Malloy and Robert Morrison of the Fisherman union, Verno Harshman of the shingleweavers union, and Joseph Webster of the Cigar Makers union. Mr. Malloy is chairman of the committee and our business men are contributing liberally toward the project and a big celebration is assured.

Labor day come on the 5th day of September, and by making an early start the success of the celebration is assured. It is most and proper that the laboring man should have a day set aside for his individual recreation and enlightenment.

On celebrations of this nature excellent speakers are procured, and those hearing them are immensely profited.

It is hoped that every citizen will assist the unions in making this the biggest celebration of the kind ever held in Manistique. We would like to see every man that earns his livelihood with brain or brawn to participate in the march, and the exercises of the day.

Hard to Realize. When we see a circus advertised we always begin to wonder what there is new that can possibly be offered more than we have seen before. This year, as each past year, Campbell Brothers have added attractions and surprises for the public, found and perfected only by great labor, patience and skill. Still one may say: "I never thought such things possible. Now trapeze acts—new juggling acts—new tumbling and sensational symphonic feats—new acrobats—wonderful daring feats of barbed wire and all the rest too numerous to mention. One must actually see to appreciate and their wonder grows as the show progresses. The perfection of these big shows is the result of hard work, both of brain and muscle, and the circus now offered to the public by the Campbell Brothers is perfect in every department. Will exhibit here Monday, Aug. 8. Don't fail to see the big street parade at 10 a. m., rain or shine.

The Republican state convention will be held at Detroit October 8th.
