INJURIES FATAL

Mr. Otto Auslander of Detroit Meets Death Last Friday Evening.

Mr. Otto Auslander, of Detroit, a close friend of Mayor Jos Pattinson, sustained injuries last Friday afternoon while engaged in his work as a street car conductor. The accident occurred at the intersection of the street car line, and on the way in question was conveying the superintendent and some of the other officials of the road. The scene of a wreck that the death desired to investigate. When Auslander's car reached the city of Wayne, something went wrong with the trolley pole. He ran back and fagged an oncoming car, and he and the two motormen clambered to the top of the car to make repairs. In establishing a screw driver against the pole, while one of the motormen was turning the nut with a wrench. When the work was completed, and he was about to get down, he fell backwards, off the top of the car, striking his head on the shoulders on the brick pavement. His skull was fractured on the top of his head, and also sustained severe injuries to his shoulders. He was a large man, and struck the pavement with terrific force. He was injured man was rushed to the hospital at Detroit, where everything that possibly could be done by the officials and physicians to stay his life, but he died about ten o'clock that night.

Mr. Auslander was thirty-four years of age, and was a model young man in every respect. He was highly respected by his employers, and assumed confidential relations with the city, and was in line for promotion to an official capacity. His habits were the best, he saved his salary, although young, had acquired real estate property interests in Detroit. He married Miss Emma Pattinson,

the eldest daughter of Mayor and Mrs. Pattinson, three years ago, who remains to her crushing sorrow of being deprived of a loving, indulgent and respected husband, at an age and time when life and its anticipations held forth such alluring prospects.

Funeral services were held in Detroit Sunday afternoon, and the remains were brought to this city for burial, arriving here at an early hour Tuesday morning. They were accompanied by the widow, her parents, Mr. and Mrs. Jos Pattinson, Mr. and Mrs. William Auslander, the former a brother of the deceased, Mr. and Mrs. Adolph Auslander, parents of the deceased, Mrs. Stevenson of Illinois, a sister of the deceased, Mr. and Mrs. Thos. Pattinson, Rev. Robert Pattinson, of Montrose, Mich., an uncle of the widow.

Short services were held from the home of Mayor Pattinson Wednesday afternoon, Rev. F. R. Mumby of the M. E. church officiating. The pall bearers selected were: Old Fellows, of which fraternity the deceased had been a member. The local O. D. Fellows also accompanied the remains to the cemetery. The floral offerings were beautiful and profuse. The widow, and the immediate relatives of the deceased have the heartfelt sympathy of the entire community in this, their hour of sorrow.

BIGGEST AND BEST

Manistique's Fourth of July Celebration Exceeded all Previous Efforts.

Manistique held the best Fourth of July celebration in its history this year, and it will certainly be a hard task for some future committee to improve upon the program presented last Saturday.

Every portion of the day was occupied with interesting features. The parade was good, the address of Rev. F. R. Leach was far excellent, the game was interesting as were the races, and the crowning feature of the day was the airplane flight.

Manistique never had a larger crowd on its streets and at the fair grounds than that one that was attracted to the city by the big feature program of Saturday. Everybody was interested in the airplane flight and while some had the good fortune to see previous exhibitions of air-mastery, the vast majority of the citizens of Manistique and vicinity had never enjoyed the opportunity, and to them, it was very interesting indeed. Those that had seen previous flights, were profuse in their praise of the local flight.

WANT SLOGAN

Commercial Club Offers Prize of \$5 00 for Appropriate Slogan for City.

The Commercial club wants a slogan or motto for the city and it is willing to pay someone \$5.00 for the best one presented, on or before August 1st.

The slogan must be short as same may be used as a illuminating sign, advertising the city, and the price of such a sign is gauged on the number of letters it contains.

But on your thinking, you write your slogan legibly, and mail it with your name, to the secretary of the Commercial club. No one is barred from participating in the contest and you can write as many as you wish. However, do not forget that honesty will be a commendable feature. In this contest, and that the one with the least words and expressing the most shall win the prize. Manistique's present, and future possibilities must be taken into consideration. Its water power, iceless port, and many other things that make Manistique a desirable city can be featured in the slogan.

The slogans will be published in the Pioneer-Tribune.

A TRUE STORY

Of a One Priced Store.

Suppose, Dear Reader, you had a farm, building, a vehicle or other personal property, which you wanted to sell.

Now suppose you had only one chance to name one price.

Wouldn't your first and only price be the very lowest you could name?

Wouldn't your price be a rack bottom price. Now reverse the situation. Suppose you had a representative, a salesman—to fast size up the customer and see what he thought he could pay for your goods.

Wouldn't you then use a LIST price with a scale of discounts so that your expensive salesman could get back some of his heavy expenses by getting a little more from one man than from another?

In shop doesn't it stand to reason that the store which has the courage to name One Price and stand or fall on that price MUST be lower on the average bill of merchant than...

Such is the Bazaar Store; it has but one price the lowest price to everybody.

There will be plenty of cars in the special train to Garden Sunday to accommodate all. The Soo Line will furnish two extra coaches, and if necessary the coaches of the M. & L. S. will be used also. So don't postpone the trip because of fear that you will not be privileged with a seat.

THE SHOOT

Gun Club Making Elaborate Preparations for Annual Shoot.

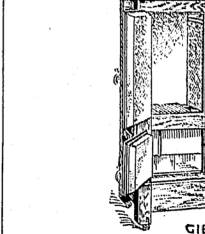

The Manistique Gun Club & Sportsmen's Association is making elaborate preparations for the annual shoot which will be pulled off at the club grounds on July 25 and 26th.

The various gun clubs of the peninsula have been invited to participate, and numerous invitations have been sent to other first class clubs.

The various manufacturers of ammunition and arms will also send representatives.

It promises to be the most successful event ever pulled off by the local club, and should attract large crowds.

THE ADDRESS

Rev. F. R. Leach Delivered an Able Address on Celebration Day.

Rev. F. R. Leach, pastor of the First Baptist church, delivered the Fourth of July address last Saturday morning, and it was one of the best addresses ever heard upon similar occasions was evidenced by the fact that he held the attention of the vast concourse of people from start to finish.

The chairman in charge of this feature of today's program, and introduced the speaker of the day. Rev. F. R. Leach, of the Methodist church, invoked the benediction and the Manistiquian band furnished the music.

The subject of Rev. Leach's address was "The Nation's Call to the Men of Today." He spoke in part as follows: Independence Day celebrates the signing of the Declaration of Independence by the members of the Continental Congress, then assembled in the State house of Philadelphia on July the 4th, 1776. By this act we became a free and independent nation.

HIS OWN STORY

"The River of Doubt" is There. Go see for Yourself

What will undoubtedly prove one of the most interesting and instructive stories of the recent times has just come from the pen of Colonel Theodore Roosevelt. In it he tells with his characteristic freshness and forcefulness of his thrilling, exploratory trip of adventure, exploration and research into the Paraguayan and Brazilian interiors, through the great tropical forests which so few white men have traversed.

SOME RESENTED

Idea of Paying Admission to Fair Grounds on July 4th. Plan All Right.

When the public expressed their indignation at the idea of paying admission to the fair grounds on July 4th, the fair committee, which has been of great significance to Manistiquians here, had a career of contest, but to make an immense people angry and suspicious is a nobler effort, than Britain was also fined, for she learned how to govern colonies as so keep them. We had advocated making the Fourth a universal celebration, for all kind was through as beneficent, country has grown to be one of the best nations of all time.

BALL GAMES

Gladstone and Manistiquite Teams Each Win Game. The Manistiquite and Gladstone baseball teams played a two game series this city last Friday and Saturday. The Gladstone team won the Saturday game in a score of 12 to 4. Had Swingle, the local twirler, received proper support, Manistiquite would have won with ease.

Hafford of this city received word recently to the effect that he is eligible to receive the degree of Fellow of the American College of Surgeons at Philadelphia. But 2,800 surgeons in the country have this highest honor, the degree being the highest attainable. In years ago were given Wednesday, of last week, but Dr. Hafford was unable to go to Philadelphia, an account of pressing business here. He received his cap and gown however.

MOST WONDERFUL OF PUMPS

Overflows Known as the Human Heart Truly a Marvelous Piece of Machinery.

The most perfect pump in the world, the most perfect over made, is also the oldest—how old, no one knows, for it is as old as man himself. It is in so simple a way that it might be carried in an overcoat pocket. Yet it runs day and night without a stop, without attention, drawing in and sending forth two and a half ounces of liquid 70 times a minute. In one minute it pumps 176 ounces; in one hour, 6547 ounces; in one year, 5,748,766 ounces; in which time it pumps 402,412,500 ounces, or more than 20,126 tons.

This diminutive piece of machinery has been known to keep up this work without a single stop for more than 100 years. It pulsates 1,200 times an hour, 100,800 times a day, 3,672,000 times a week. It has no journals or bearings to oil, no bolts to tighten or screws to be taken up. It is so constructed that its parts are automatically repaired as they wear. But, with all paired as it is, it is not perfect. One of its parts is one very serious characteristic inseparably connected with this pump, which is that once it stops it cannot be started up again, unless immediate steps be taken to do so by an expert. Even this generally fails. So the owner should take care and judgment in the selection. There is no other machinery of which the above can be said. How this is all accomplished is known only to its inventor. This pump is the human heart.

MADE THE SCENE EFFECTIVE

Comical Before, Small Boy's Anxious Question Turned It Into a Real "Scream."

An amateur dramatic society recently introduced a striking bit of realism into their skit of "The Enchanted Forest."

It will be remembered that when the heroine faints and falls gracefully upon the stage, the awkward stepfather is required to seize a large pitcher from a small table standing near R. B. and hold it over her prostrate form, exclaiming, as he does so: "Oh, heavenly! This water does so goodly for the faint!" This is a highly humorous effect, and in its way, but its side-effect, however, was greatly intensified when the pitcher was half-full of water when it was placed on the table. The proper comic servant, who had fairly deluged the unexpected heroine. She spluttered and gasped for breath, and wailed her arms wildly in the air, and utterly forgot to call for the hero's arrival before recovering from her "faint."

"Good kid, she swam called out from the gallery. And when the applause was simply deafening.

Odd Facts From Abroad. An Association of Neglected Wives has been formed at Schenck, on the Elbe, to establish a time limit for husbands' visits to beer houses and cafes. If necessary, the wives will form a militia to remove all husbands found on the premises after 11 p. m.

Land of Long Words. Eminent once said that nothing in Mexico strikes Europeans more forcibly than the excessive length of the words. This length, moreover, does not always depend on their being compound words. In the Greek, the German, and the Latin, the words are long, but that is not the case in the Mexican. This is the Mexican word for that simple thing, a kite, is tetemantiquillitli.

Get the Best Opinion. It is worth while to take pains to find out the best way of doing a given task, even if you have already done it a dozen times. And so also in the sphere of thought away from the political sphere. It is worth while to get the best opinion on the matter in order to make as sure as you can of having the best opinion, even if you know that this opinion has a small chance of being the majority, or by anybody else. Truth and wisdom have been given to us. Let us use them. —John Morley.

PLATE MONEY OF THE PAST

Unwieldy Coinage Once Issued by Sweden Now Found Only as Museum Curiosity.

One of the largest coins ever struck off has been acquired by the American Numismatic society, of New York. The piece is of copper, is 12 by 23 1/2 inches in diameter, and weighs 31 pounds and its obverse value in 1659 would be about \$2.20 in American money. The coin is a rectangular stamp, with five large round stamps placed in it, one in each corner and one in the center. Stamps were placed in the corners to prevent "clipping." Each corner stamp carries the Swedish crown in the center, and the date, 1659. Around the center stamp is the inscription of the Carolean edict in the inscription of the Carolean edict. The inscription of the Carolean edict states the value of \$8 in silver.

Coins of this kind were called "plate money." Sweden turned them out continuously for 110 years, beginning in 1629, in the reign of Christian, daughter of Gustavus Adolphus. In denominations of eight, four, two, one and half daler there were issued in the reign of Charles X. The coinage had been in progress 10 years when the specimen now before us was struck. In 1719 the government decreed that the value of the coin should be made them into \$8.700 plate money dalers.

Such large pieces of pure copper were issued as money in order to find an outlet for the products of the Swedish copper mines without depreciating the value of the metal. All plate money is naturally becoming scarce, and half-daler quite rare. Daler and half-daler pieces are no longer to be seen in Europe except in the large museums.

GET EVEN WITH EMPLOYER

City Laborers Who Handle Shovels Have Many Tricks They Are Not Slow to Employ.

The employers who hire day laborers in Chicago seldom supply them with shovels nowadays. They give them picks, as they used to, but they expect the men to provide their own shovels. The reason for this is that as soon as the men are given shovels some of them file off the corners. They claim that the shovel being pointed enters the earth easier so that digging is less laborious, and they don't think of cutting down the shovel so that even if they threw out the same number of shovels a day they would be accomplishing less.

But at times they have a different reason for making their shovels smaller. If they think they are not being paid enough they will make a hole in the handle of the shovel. This makes the work just as hard for them, the gang boss probably makes them throw out just as many shovels each day—although of course each load will be slightly lighter—but at the end of the day they will not have covered as many yards as they would have with larger shovels. This is their way of getting even with their employer; they will work as hard as ever, but they don't want him to get as good results.

Ravenous Fish Eaters. Dr. Francis Ward said in a lecture that all of the birds which prey on fish the voracious are the most voracious. He mentioned a six-pound gormonant cat double or triple its own weight of fish in a day. Of aquatic mammals, the otter was the most destructive to fish, and the present Queen Mary, was in New York not so very long ago, and somehow paid a visit to the studio of a well-known American artist who shall be named. His familiar name is that of a novel and peculiar method of recording time. For instance, he will remark to a visitor:

"Ah, you are looking at that little thing over there by the window. It was begun—let's see—two weeks ago after the Prince of Battenberg was here for tea."

To Protect Birds. Mrs. Russell Sage gave \$10,000 the other day toward the \$100,000 being raised for a fund to aid in the protection of migratory birds, the director of the New York zoological park having the matter in charge. Fifty thousand dollars of the fund has now been contributed. An attempt is being made in different states to repeal the bird laws which his friends declare the best ever made, and Mrs. Russell Sage's interest in the matter will be seen in California where an effort is being made to repeal the law.

Bottle Stopper That Locks. A bottle stopper that locks is a recent French idea, and will be very useful for keeping fine liquors out of the reach of persons for whom they are not intended. A metal cap which turns a winged nut, and when all is in place a small arm comes down and locks the stopper so as to prevent the turning of a padlock through the two holes. This prevents any turning of the screw and keeps the bottle tight shut.

RUSSIA AS WORLD LEADER

In Ten Years Population of Colossus of the North Increased 20 Per Cent.

Authentic figures show that in ten decades ended in 1908 the population of Russia had increased from 130,000,000 to 171,000,000. This is an increase of about 30 per cent, and these figures will be compared with those of Germany, the next most prolific nation, in which the same period the population of France increased only 2.1 per cent.

If this rate of increase for Russia continues, in about twelve years that country will have a population of about 215,000,000, or more than the combined populations of England, France and Germany.

Not only has the population of Russia increased, but her productivity has increased as well. In the ten years ended in 1908 the Russian Empire produced 10,312,000 tons of wheat, 1,000,000 tons of rye, 1,000,000 tons of oats, and an increase of some 98 per cent. This agricultural advance was aided by the state, which instituted technical schools in many of the provinces. These schools are already attended by more than 10,000 pupils. Agricultural banks have also been established in many districts to loan the seeds of the farmers, of which Russia has now about 17,000.

Industry has not kept pace with the agricultural development of the country, however, though it is estimated roughly that there has been an increase of about 50 per cent in the number of factories in Russia in the last ten years. The empire can boast of enormous coal fields, especially in Poland and in southern Russia. The production of these fields in the last ten years from 15,000,000 tons to 27,000,000.

WHEN THE GAME WAS ROUGH

Jim Burke Tells Some Stories of the Old Days of the National Pastime.

Jimmy Burke, the former Blue manager and now coach and scout for the Detroit Tigers, thinks that baseball is getting to be a regular lady's game nowadays. This veteran of the old times, who has the mastery of diamond corners were so tough that you could crack hickory nuts on their heads, has not easily become reconciled to the good behavior and polished to the game in the modern manners of modern athletes.

"Handshaking players" were almost unknown in his day, and the expression "shake hands" and "if you please" were not regarded as an essential part of the pitcher's vocabulary. "The boys all act like gentlemen," he says, "and it happens to make a one-handed catch of a liner he tells the victim he is sorry he robbed him of a hit, and if a pitcher 'boots' a guy he is so full of broken up that he isn't able to continue. You bet things weren't like this when I broke in.

The best you get now is a curse, and the way the base runners would swing their spikes around in sliding was a caution. 'Get out of my way or I'll cut your blankets-blank eye out of your back.' And they were the boys who would do it, too; don't make any mistake about that.

"I can remember the time when it wasn't considered a legal game of ball when some clubs unless there was a flat fight somewhere along the way. The boys in the hole were so common that nobody paid much attention to them." —Kansas City Star.

His Art Calendar. One of those princes with German titles, who are on the payroll of the British empire because they are said to be the most destructive to the present Queen Mary, was in New York not so very long ago, and somehow paid a visit to the studio of a well-known American artist who shall be named. His familiar name is that of a novel and peculiar method of recording time. For instance, he will remark to a visitor:

EMPEROR'S BITTER CUP

INCIDENTS THAT PRECEDED NAPOLEON'S EXILE TO ELBA.

Conqueror Would Have Reluctantly Accepted the Last, But the Generals Deserted and Insisted on Former Leader's Abdication.

A hundred years ago one of the events of all history occurred, it was the abdication of Napoleon as Emperor of France and the signing away of the rights of his family to the throne of that fair land. The Bourbon family was to be returned to power, the Allies having entered Paris, Napoleon, best on every hand on the downward slide from the crest of power, had returned to Fontainebleau at the beginning of April, too late, though he would not recognize defeat, to do anything but resign himself. On the night of April 20, Caulaincourt returned from Paris with the news that the same day the emperor had abdicated. His reception of the news was dramatic.

STREAMS AND LAKES

To be Stocked with Fish Through Efforts of the Commercial Club.

The Commercial club, with the thought in mind that the lakes and streams of Scholcraft county can be made a valuable asset if bountifully stocked with fish, have taken steps to secure a plentiful supply of spawners from the state hatchery, and will attend to the planting of fish promptly.

People in the larger cities are ever looking for a section of the country that will guarantee them good fishing. The lakes and streams of this county are accessible by rail and auto, and if a little attention is paid to keeping them stocked, hundreds of persons will be attracted here to avail themselves of the opportunity of securing fish. Persons making such trips are usually of the wealthier class and spend money freely on such trips. Their patronage would assist local merchants materially. Two men recently came here for a two weeks' trip to Thunder Lake. It required an auto and two heavily loaded wagons to transport their baggage and supplies for the stay.

CLIMATE AN ASSET

Scholcraft County's Brand the Best Anywhere.

We, who live in Scholcraft county, are enjoying a summer climate unsurpassed by any other county in the state of Michigan, and the only time that we are led to appreciate it is when we take a trip to some other section and have an opportunity for comparison.

The bright sunny days, the breezy air, and the cool nights, properly exploited, would make this north country as popular in the summer time as California is in the winter time. Then, too, our numerous lakes and rivers afford bathing, fishing and bathing facilities unequalled the transformation of Manitowish into a summer resort would mean much more to the city than the securing of a new factory, and the Commercial club is on the right track in taking up the matter in question. Of course the city must place itself in readiness to care for and entertain an influx of summer visitors.

LYCEUM COURSE

Manistique will Have Excellent List of Attractions During Coming Season.

The Woman's Reading Club are enlarging their activities, and among other things, will promote a first class Lyceum Course for the coming fall and winter. There will be five numbers which will offer great variety, from a complete opera, down to first class Jubilee Singers, and include Judge Sailer of Chicago in his famous lecture "The Criminal in the Making," Alice Genevieve Smith, harpist of Chicago, will appear with her largest and finest harp, in joint recital with Helen Norton, reader, who has an enviable reputation in complete evening

concerts. The Manistiquian Concert company consisting of eight impersonation, bird warbler and whistler, and violinist, is one of the best of lyceum attractions and was heard to the delight of everybody at Ishpeming, Iron Mountain and other Upper Peninsula towns a year or two ago. Perhaps the most notable feature of the season's course will be the appearance of Mr. and Mrs. Burt McKinnis and their company in the presentation of a complete opera, "The Sleeping Queen." Mrs. McKinnis, better known as "Fula Fara" is a Scandinavian Ishpeming girl and has appeared in nearly all the towns of upper Michigan. She had the distinction of being the prima donna soprano with Schumann-Heink in her "Love's Lottery" company. Both she and Mr. McKinnis have beautiful voices and were formerly members of

the Saccas Grand Opera Co. Mr. J. Allen Grubb, acknowledged as one of the finest tenors on the lyceum stage, also appears in this company.

In selecting so high priced a lecturer as Judge Sailer, the club have shown a liberal judgment. Judge Sailer brings to the platform a most interesting and helpful lecture based upon the facts which came under his own observation during his many years as judge in the world—the Harrison and Deplamant, branches in Chicago. His lecture is for boys and girls and for their parents as well. It has been said that any city could well afford to take of its funds to provide a lecture by Judge Sailer for the good of the community. This lecture also has been heard at Ishpeming.

Taking all the numbers together the Women's Reading Club have secured a course of the highest order and one well worthy their efforts and it is to be hoped that the public will show their appreciation by subscribing for season tickets.

The Club has taken this course not so much for a money making proposition, as for the purpose of procuring some high class entertainments for the winter. The season heard at Newberry secured this course for the benefit of the young people.

If, however, the Club is so fortunate as to have a residue after meeting their contract, the balance will be added to their city library fund.

THE PARADE

Not Lengthy but of a High Order of Merit. Norden Society and Baptists Were the Features.

The Fourth of July parade, while not lengthy, was of such a high order of merit that it deserves special mention. The parade was formed on the west side, and its formation was as follows: Manistique band, Norden Society, M. E. Sunday School, Baptist Boy Scouts, Departments of Baptist Sunday School, Grads Roll Float, Float bearing Scholars, A. S. Putnam & Co., Conies Float, Mr. Devorny, Citizens in Autoes.

The Norden society, sixty-eight strong, made a very pleasing display. The sturdy Sons of the North wore the Swedish colors, and their physique and bearing, made the average American citizen proud of the fact that its mem-

and the machine rose gracefully and soared toward the southeast. The aviator remained in the air twenty-seven minutes, and when he effected a landing, he struck a soft spot, burying his wheels into the mud, and wrecking two of them. As his contract with the committee called for one flight of at least twenty minutes duration, or two flights of ten minutes each, and as he had amply fulfilled his contract by remaining in the air for twenty-seven minutes, he was released from making a second flight, notwithstanding the fact that he was willing to make a second ascent if the committee so wished.

As soon as the aviator landed he made a break for some place where he might warm up, as he was thoroughly chilled by his stay in the high altitude.

The flight was easily the best thing in the matter of entertainment ever essayed in Manistique, and every person witnessing the flight, was frank in stating that they had certainly received their full money's worth.

Mr. Putnam was the only merchant of the city that took the pains to prepare a float for the parade. The float in question was a good advertisement for the "Rexall store," and also proved that its owner is enterprising.

THE FLIGHT

The Most Successful Aeroplane Exhibition Ever Seen in Cloverland, was the One of Saturday Last.

Manistiqueans, the vast majority of them at least, had the first opportunity afforded them last Saturday of seeing an aeroplane in action, and the fact that Manistique business men had shown their enterprise and liberality in featuring the flight for the celebration, attracted thousands of people to the city on the day in question.

The day was ideal one for a flight, and Aviator McGuire stated that he never enjoyed a trip heavenward to a greater extent than the one made. He ascended to a height of 4,000 feet, and reportedly circled over the city during his stay in the air.

While no spectacular stunts were pulled off, yet the vast audience was more than pleased with the exhibition. The stunt was made without incident,

Violating Game Laws.

Mr. A. C. Sart who lives at the Indian River Dam has notified the Pioneer-Tribune that hundreds of dead suckers are floating down the river from Indian Lake, and that the cause of their death is the fact that Indians are dynamiting fish in Carpenter bay. The suckers are thrown ashore. These dead fish are a menace to the health of those using city water for they float about the intake pipe. There should be some way of stopping this wholesale slaughter of fish, and it is hoped that the game warden will secure sufficient evidence to convict and punish persons guilty of this sort of work.
