Pat has made a success of the newspaper business and a fellow capable of accomplishing that would gertainly make as good a member of the legislature as a "neer-do-well".

Straw votes taken by newspapers on matters political are not safe propositions upon which to base your political prognostications. The Lansing Journal recently taok a straw vote on the goveroneship, Martindale stood first with 224 votes, while Osborn was second with 190. Grossbeck was a noor four the Politicians are sure that the fight as it stands is between Osborn and Grossbeck, with indications that Osborn will be the winner by a fair plurality.

The town farmer has his treubles also. He may plant cherry trees, care for them for years, spray them, enrichth; soil, and after a half dezan years of patient waiting, he may secure a bountful crop, so that irresponsible boys can have an opportunity of stealing them, and while doing so, almost wreck the trees by breaking off branches. In order to save his crop the average town farmer as virtually compelled to keep it in a safety neposit vault.

Now, some of the newspaper hostile to Oshorn, claim that organized labor is opposed to the Soo man. If that is, the case, organized labor is certainly unrareful, it was he that proposed and secured the compensation law under which inquiries and deaths are commensurated by recombensed without recurse to the law. For that reason alone he should have the vote of every man in the state of Michigan that carns his flaily brend by the sweat of his brow.

Why not hold a business man's pienic at Indian Lake arms day this summer? If this was tried one time it is afte to say that it would be an annual occurence thereafter. The hashiess men of this city are not acquainted with each attention to the extent that they should be. There is a distressing lack of "team work" smoon them. Every one is looking out for himself, and as a result there are too many selfish units in the city. A day devoted in getting acquainted and rubbing shoulers would quickly sliminate selfishness, and all would be sweeter, more whole-same and more efficient. The day could be devoted to sports and a big dimer should be a feature of the day. This is a sprepation that the Communical club should take up and push to a successful fruitton.

The movine of the old purvehin school was attended with nuch irouble. The front of the building collapsed herois to cold be pottos to the street, and had to be torn to jeleose. The second scotlon, more than seventy feet in length, was moved to the corner of Oak and Maple struck swhere it was found necessary to cut it in two before it could be moved to its permanent site. The building was bally recked in moving, owing to the liers upon which it was constructed, and it will require the way constructed, and it will require the expenditure of much money to convert expenditure of much money to it into a thing of beauty and utility.
