## This store of ours is a business with a purpose—and if you have been dealing with us for any length of time, you will have guessed what that purpose is.

The shortest way we can state it is that we aim to give standardized service in standard goods.

By "service" we mean a good bit more than handing you what you ask for and punching the cash register—more than courteous treatment and quick deliveries.

It means keeping alive—with the new things. It means looking for better grades, wider assortments, progress all along the line.

It means going a little further than many a hardware store usually thinks of going.

It means carrying bigger stocks, more satisfying range, greater freedom of selection—and every article backed by us, to give satisfaction to the customer.

In Arms and Ammunition, for instance, it means that we make a feature of Rifles, Shot-guns, Cartridges, Shot Shells. It means keeping right up-to-the-minute in our display of guns—the new models as they come out. And in Ammunition it means that our stocks are always fresh—often replenished, boxes clean and ammunition dependable.

### HAS A PATENT COMBINATION WRENCH.

Manistee Man Has Invented a Very Useful Wrench, Which Is Patented.

Mr. Adolph Desmet, who conducts a blacksmith shop on Main Street has invented and patented a combination wrench that no doubt will be a boon to both him and Dr. Seller who has bought a half interest in the patent.

The wrench in question is a combination wrench and will fit three sizes of bars without adjustment and equally as serviceable on hexagon as well as on square bars.

It is also superior to any other wrench manufactured as a pipe or grip wrench inasmuch as it will grip onto a round surface without special adjustment and releases automatically.

It is so constructed that each end of the wrench brings level to two pounds of pressure to bear on the article gripped, making it a sure grip wrench for either hand or pipe.

This adjustment also makes it valuable as a pipe, in fact it is superior to any pipe made at the present time, it is simple in construction and with the exception that it must be made from good material it can be placed on the market at a very reasonable price.

Mr. Seller on a recent trip to Detroit received some very high compliments and encouragements from some of the large automobile manufacturers and with his partner are making arrangements for the manufacture of the wrench for commercial purposes.

### TO ANALYZE CITY WATER

At the order of the Board of Health City Clerk Christensen on Wednesday afternoon two half gallon jugs of water to the State Board of Health at Lansing will be analyzed.

One jug was filled with water taken from a tap in the city which the water was taken at the intake pipe at the Indian River dam.

The local authorities at Marquette claim they heard nothing about the matter, although it had been hanging for two hours, viewed by a rapidly growing number of people had already arrived at the spot before the authorities say they knew of the matter.

That there will be an investigation is believed certain. Friends of the city are loudly declaring that the action of the city should not have been taken from the prison without some investigation while it is also believed that the authorities in Marquette could hardly have known of the projected project in view of the fact that their object was known. Frank's friends are demanding that the governor take steps and demand that the prison officials and guards who were held up by the raiders to Marquette be identified such men as they can.

OFFICIAL COUNTY AND CITY PAPER  
FRIDAY, AUG. 29, 1915

### EDITORIAL COMMENT.

It is with sincere regret that the many friends of August Norman will learn that his condition is yet critical. He is one of the very best citizens that Manistique has ever possessed, and it is sincerely hoped that he shall recover rapidly and again assume his work.

Petrograd may be again rechristened before the close of the present war. The Russians changed the name of their capital city from St. Petersburg to Petrograd, because the former name sounded too Teutonic. With Von Hindenburg's army headed that way the Russian capital is certainly in danger.

As will be noticed in the local columns, the Manistique bank has commenced the work of remodeling its building. The bank in question is one of the oldest banks in the peninsula and owns a handsome banking house. However the present building is found too small, hence the improvements and enlargement.

The "devil," a printing office, devil, and his satanic majesty, had charge of the Escamla journal last week during the absence of Editor Baldwin. This particular editor has a personality and such a virile style of writing, that it cannot be duplicated, either by a saint or the "devil," and when he takes a vacation we know that fact very quickly.

The Dr. Whitehead that was sentenced to eighteen months imprisonment for selling "dups" to drug fiends, is not the Dr. Whitehead that formerly resided in Manistique. The John doctor we all know so well, is located at Milford, Mich., where he is engaged in the practice of medicine, and is conducting a chicken farm as a side line. He contemplates making an auto trip to the upper peninsula this autumn.

Mr. Rutledge, who was the nemesis of the liquor law violators raided four "blind pigs" in Crystal Falls recently, and confiscated a lot of booze. In county officials, with the assistance of Rutledge and citizens opposed to the liquor traffic are determined to keep that county "dry." One or two places raided were "temperance saloons." Where a fellow handles "near beer" and other beverages of similar kind, it is safe to keep an eye on him.

Edward Forsythe, the veteran editor of the Cheboygan Democrat, is dead. Forsythe was a rabid Democrat every minute of the day that he occupied the editorial chair, and there were times when Democrats were as scarce as hen's teeth, yet he never swerved from his faith. The Democrat has been a welcome visitor to the Pioneer-Tribune office every week for the past twenty-two years and its editor has always read the paper with interest even if he did not admire Bro. Forsythe's brand of politics.

Rare, indeed, is a Republican congressman called upon by a Democratic president to recommend some one for a postoffice appointment. This has recently happened in the copper country, when Congressman James was asked to find a postmaster for Arnoheim, Houghton county. There is not a citizen in the little town that would accept the honor, from the postoffice department and James has been asked to exert his influence in that direction. You can rest assured that if the office was a paying one a Democrat could be found that would accept it.

The Rapid River News editor is envied by his brethren. He skips an issue now and then and his excuse is: "For reasons best known to us and a few others," etc. It is an unwritten law of newspaperdom that the newspaper shall appear on schedule time every publication day even if the editor is ill, the foreman drunk, the devil out on a fishing trip, the Washington hand press at the blacksmith shop for repairs and the plates and "patent insides" of the sheet in the express office with a "C. O. D." for \$4.86 attached thereto. The average editor cannot conjecture what Editor Messenger's real excuse might have been.

The thirteen inning game last Sunday between Manistique and Newberry, in which Manistique won in a 1 to 0 score, was the best exhibition of ball playing ever witnessed on the local diamond. What Manistique won both games of the series here and three of the four played with that team this season, yet the Celery City must give the credit of having the best "all home" team in the peninsula. Manistique has the best ball team in the peninsula but the players are not permanent Manistique residents. However, we hope they shall decide to remain here permanently, for they can play ball and are a gentlemanly lot of young men.

Again the hazardous risks attendant upon a "mattress bank" were brought to mind by an occurrence at Hermansville last week. An aged workman had in the savings of a life time, hidden in a trunk. During his temporary absence someone appropriated the money and the man finds himself absolutely without money at a time when he needs it. He had an antipathy to banks and preferred to take his own risk, with the usual result. The bank that hoards his money instead of placing it in circulation. If you have money to deposit the bank uses your money, but always stands ready to return it to you on a minute's notice. While the bank has it, it is loaned to responsible parties who, perhaps, give employment to many men. If kept in a "mattress bank" it is, also, the constant danger of being appropriated by light-fingered gentry, that will give it wings when once they possess it.

### EDITORIAL COMMENT.

About the "hottest" proposition these sultry days is to see a mochan unmaking and marking winter goods.

A man was recently compelled to take an oath that he is all mine. The secret of which would produce it. He was also forced to say that his liquor is sold in a permanent state than in a "wet" state.

Kansas, the prohibition state, has a telephone for every family of the state, and an automobile for every even inhabitant. Oat there they are spending their money for such things, instead of investing it in headstamps and delinquent farmers.

Deputy Game Warden Guinan is determined that the game laws shall be obeyed. His wholesale arrests of cottagers last week should convince the most skeptical that it is dangerous to head light for deer, as long as he is on the job.

August Spies, demagogue's most influential citizen, is dead. Although of foreign birth he was not a hyphenated American citizen. He made his fortune in demagoguery and so showed his appreciation to the city that was so good to him, by founding a library and presenting the magnificent natural park on the lake shore to that city. He did this for the benefit of the dominions either, but the present as well as future generations owe him an everlasting debt of gratitude for his munificence.

### THINKS FERRIS IS EXTRAVAGANT.

Some time ago the Pioneer-Tribune made comparisons showing the excessive increase in taxation under the Ferris administration, and placed the blame where it belonged, on the manager of the state's business.

The article in question brought forth a storm of protests from Democratic newspapers, and from some copies per county Republican newspapers that were hypocritical by the donkey school teacher governor because he did what any other executive of the state, irrespective of politics would have done, during the big strike of two years ago.

Now comes Frank M. Sparks of the Grand Rapids Herald, and makes tax comparisons that do not reflect favorably on the Ferris administration.

The governor is really a business man, it is his business to have down appropriations and veto lavish and needless expenditures made by the legislature. Democratic newspapers claim that the legislature is responsible for the excessive increase in state expenditures, and that the legislature is almost unanimously Republican. Of course the present law making machinery of a state is cumbersome and expensive. Too often briefless lawyers, muss back farmers whose front yards are dotted with thirty-year-old stumps, and business men that couldn't successfully conduct a peanut stand, in a congested street corner, are elected to the legislature because competent and busy men will not make the sacrifice of time to serve their constituency while the other side are permitted to go to Lansing, look wise, become the net nurses of special interests, misrepresent their constituents, and vote affirmatively upon vast appropriations and spend your money with the sang froid of a drunken sailor.

A business man, as a governor would see to it that this lavish expenditure should and would be curbed. It has been done before and will be done again, but it is not to be done by the Ferris administration. If the present governor had the business acumen of Auditor General Fuller, there would be a different story to relate "O. B." is saving his yearly salary every month, by refusing to pay out sums of money illegally appropriated by the legislature and sanctioned by the state's present general manager, Mr. Ferris.

The time will come when a commission of five or seven men shall conduct the state's business instead of the present cumbersome, expensive and unsatisfactory legislature. If such a commission was made up of the O. B. Fuller sort of men, Michigan's tax rate would drop as rapidly as the mercury in the Arctic circle in mid winter, and state institutions would be better and more intelligently conducted. When this is done it will be impossible for any governor to build up a machine by giving politicians official preferment and fat salaries for filing correct positions, irrespective of their fitness or qualifications for the positions in question.

### WHY NOT PURCHASE A SCHOOLCRAFT CO. FARM.

It is hoped that some photographer has secured pictures of some of the hay and grain fields of the county this season. The writer noticed several hayfields in Hiawatha township, where there was hardly room for the hay when the crop was raked into windrows. The more one gives the question thought, the more firmly he is convinced that Schoolcraft county has a brilliant agricultural future. When one sees the immense crops of hay, grain and fruit, on land that was originally purchased for a mere song, he is almost convinced that the only way to make money is engaging in agriculture. There are thousands of acres of land in the county, when cleared, will produce an abundant crop as any of the approved lands of the county, and they can be purchased for less than \$25.00 per acre. This same land, if planted to fruit will pay hundreds of dollars per acre annually. Some time ago we mentioned the fact that a Manistique township farmer raised and marketed more than \$500.00 worth of strawberries from an acre of ground this season. This one acre, after it was cleared, did not represent an investment of \$50.00 and ten times the purchase price in one season is a pretty fair investment.

There will never be more land in this good old world of ours, than there is at the present time. The population of the world is rapidly increasing. Humanity must be fed, and the time will come when every acre of tillable land in the United States shall be intensively farmed. Come to think about it, the thrifty farmer is the most independent individual on earth. He is always sure of a good living, and if he works, he can make and save money every year. Mossbacks will not be able to do this but a real farmer can and will do so.

If you take a drive through the country you can find variously distinguished farms of a real farmer that do not do a mossback. To the credit of the county it can be said that the crop of mossbacks is decreasing rapidly each year, and that the species is well-nigh extinct. This truth that there are some "farmers" that are content to raise a few rutabagas, carrots, cabbage and potatoes, for their own use, and spend their summers in shipping trout, plovers and their winters in assisting material in the slaughtering the deer and rabbits of Cloverland. This sort of farmer is content to have his clearing dotted with stumps until the elements rot them to the ground. Such a farmer is a detriment to any county.

If you want to be independently wealthy when old age creeps upon you should purchase a tract of Schoolcraft county soil, and improve it.

### WHAT SPARKS SAYS ABOUT IT.

Makes Tax Comparisons That do Not Reflect Favorably Upon Ferris Administration.

Mr. Frank M. Sparks of the Grand Rapids Herald makes the following statement concerning Michigan's phenomenal increase in taxation under the Ferris administration. His comments follow:

What is the matter with Michigan's financial system? Something must be done to make a better fact that this coming December the tax payers of the state will be asked to dig up the largest amount of Michigan's history is one evidence that something is the matter. That Governor Ferris, in more than two years as chief executive and now with a third term in his pocket has at last failed to make an investigation into the matter. But there are other and much more convincing evidence that what the trouble is is known to almost anybody at all familiar with the workings of the state.

What is the matter with the most recent published statement given out by Auditor General Fuller the tax to be levied for December 1915 will amount to \$21,957,000. This figure, if it proves correct, is 47.7 per cent higher than the tax levied in 1914. But this is hardly a fair comparison since the tax levied on the old years is always much less than that levied in the present years, because the legislature with all the attendant expenses and appropriations sits in that year. But if the figure given for 1915 is correct, the tax to be levied this year will be an increase of \$6,470, or 6.4 per cent higher than that of 1914.

Let's carry this analysis back just a little further and get an idea of how much the tax this year, the Ferris administration of Governor Osborn, compares with the taxes levied on the best years of the administrations of former governors.

The Campaign Recalled. It will be remembered that during the last campaign—the campaign of 1914—Governor Ferris excused the tremendous increase in taxes in his first year by charging that he was compelled to make good for certain economies of Governor Osborn, who he excused in 1914. But this excuse can no longer hold good. Governor Ferris has served a full term in his office as chief executive and must bear the responsibility for all that happens during his administration. It is his duty to make good whatever deficiencies he thinks Governor Osborn's economies may have brought about.

The tax to be levied this year will be \$2,531,049 higher than that levied in the heavy year of Osborn's administration. This is 26 per cent more than the burden placed upon the people by Osborn.

Go back a little farther. The tax this year amounts to \$3,127,371 more than for 1909, when Fred M. Warner was governor. This is 62.7 per cent higher, and Warner was not charged with unwise economies. He was charged with wise economies, and during those years, Governor Ferris shows an increased tax of 52.7 per cent.

Go back farther yet. Make it a period of 10 years. Take 1905, the first year of Warner's administration, when he had just succeeded Aaron T. Bliss. The tax in 1915 is 100 per cent higher, and not "unwise economies."

The tax this year under Governor Ferris will amount to \$5,187,306 more than in 1905, and that is 134 per cent higher.

Take the institutions in bulk and this is what the current expense accounts show. Current expenses of 1914 for 25 state institutions show an increase over the current expenses of the same institutions for 1913 of \$344,882.21, or 6.7 per cent.

This is the increase in current expenses for a single year, and all under the present administration. Current expenses of 1914 show an increase over those of 1913, the last year of Osborn's administration, of \$753,000.92, or 16.0 per cent. Let's go back a little farther and get into the administration of Fred M. Warner, who was called extravagant. He was governor in 1914 showing an increase over those of 1913, the last year of Warner's administration, of \$65,000.41, or 30.4 per cent.

In 10 years the increase in current expenses of the state institutions has amounted to \$2,918,720.38, or 43.3 per cent.

### WANTS DR. BOHN A CANDIDATE.

I learn that Dr. F. P. Bohn of Newberry is a candidate for the Republican nomination for state representative from this district at the primaries next month. This would mean, if successful, an election, as the district is overwhelmingly Republican. Last year the Democrats did not enter a candidate against Senator Wood, who, I believe, has longed for a third term to leave me Dr. Bohn quite friendly to the Republican cause. It is a gentleman of more than the average ability, popular wherever known and I am sure that he is showing a political will pulling. Personally, I would be sorry to see the doctor land in nomination, for on a contest that his best efforts would be put forth for securing every advantage for the disreputable party. I am sure that the Manistique legislator would be impossible when he was admitted to the legislature. He would be a block Governor Ferris in his efforts to give the state wholesome legislation. He would be a chief member in having the game warden department turned over to the public domain. He would be a member of the state several thousand dollars without receiving a single cent of good for the added expense. Senator Wood in his record would be a third term on his record. He would be a member of the legislature. So long as I would profit by his change, the office I believe that Doc Bohn would be a good man to be given the honor of the "Hercules" in the St. Ignace Enterprise.

**TO REMODEL BANK BUILDING.**

The Manistique Bank to Make Changes in Present Building to Increase Its Size.

The bank's remodeling and increasing its size is being accomplished by the purchase of the building owned by the F. W. Barnett of the Commercial Co. of New York City. The new building will be personally supervised by the architect, who has been in charge of the present quarters, owing to increasing business. Among the changes called for by the contract and specifications is a two-story addition to the present building, to be erected at the rear, and facing on Walnut street. The lower floor is to be utilized by a director's room, a ladies rest room, toilets, etc. The upper floor will house the Manistique Telephone exchange, and work room for the exchange. The entrance to the main building will be located on Cedar street, instead of in the corner of the building as it is at present. It will be placed at the north side of the building, and will open into the lobby of the bank, which shall be located on that side of the building. Instead of at the south side as it is at present. The work room, by being placed in the side in question will leave the benefit of the large windows facing on Walnut street, and will have a tendency to make it pleasant for the men to call there. The present vault will be torn out, and a new double vault will be constructed twenty-one feet east of the present vault. The present directors' room will be added to the work room by the elimination of the present partition. New toilet rooms will be placed in the upper floor, and new electric light fixtures will be placed throughout the entire building. The workroom of the bank will be separated by modern fixtures, comprised of marble, bronze and glass. The new building will be sufficiently commodious to anticipate the wants of the bank for many years to come. An elaborate system of safety deposit boxes will also be installed.

A modern heating plant will be installed in the basement of sufficient proportions to heat the bank building as well as the brick hotel owned by that institution to the north.

During the time that the work is being prosecuted, the bank will have its headquarters in the building above mentioned. The contract calls for the completion of the work on or before December 25th.

when it was erected, was considered the handsomest block in the city. The decision of the bank officials to remodel and improve its home, speaks well, not only for the growth of the city, but it also proves that Manistique is growing also.

The officials of the bank at the present time are: President, M. H. Quick, Vice President, Chas. R. Orr, Cashier, Edwin H. Jewell, Asst. Cashier, C. E. Kallfeldt, Directors, M. H. Quick, Chas. R. Orr, Albin Orr, W. L. Orr, E. H. Jewell, R. E. Waddell, O. G. Quick.

**TWO CLASSY BALL GAMES.**

Manistique and Newberry Play Two Excellent Games—Manistique Wins Both.

With a thirteen inning game Sunday with a score of 1 to 0 in favor of Manistique and a 2 to 1 game Saturday afternoon in which Manistique again won, Manistique base ball boys were treated to big league exhibitions.

Howard, a Detroit Tiger recruit, occupied the mound for the visitors Sunday, but he failed to stop the locals. He was batted eight times during the game, while the visitors scored five hits from O. Fredlund's delivery. Fredlund pitched Saturday's game for the locals, and held the visitors down to three hits, while Warden, the Newberry pitcher was hit six times.

In Saturday's game no score was made by any team until the seventh inning, when Fredlund and Weymouth scored on McDougall's single. Newberry made its lone run in the eighth. Neither team scored in Sunday's game until the thirteenth inning when Fredlund scored on Britton's single. O. Fredlund has demonstrated the fact that there is big league stuff in him for he has pitched forty-two consecutive innings without giving the "other fellow" a score.

Manistique has the best ball team in the peninsula and its record of eighteen victories and five defeats demonstrates the fact that it is made up of a fast bunch.

It is a matter of regret that the Saturday afternoon games are not better patronized. A number of people are opposed to Sunday ball playing but they do not attend the games when played on a Sunday day. While the Sunday games are well patronized, yet the expenses are so high that big audiences are also necessary at the Saturday games, to keep the financial balance on the right side of the ledger.

**THE COUNTY FAIR SOON HERE.**

It Is Up to the Farmers Whether Fair Will Be Successful as It Should.

A time draw near for the holding of the Schoucraft County fair, the officers of same are more than confident that it will be the largest and best exhibition that the county has ever had. Those who are in favor of it should be the best for the crops of the county were never more promising and the premium list was never more liberal or extensive as it is this year.

A good agricultural fair is not only of great value to the city of Manistique, but also a every farmer and local city from which the exhibits are derived by those who come merely to see what is on exhibition.

The object of the Schoucraft county fair is to once a year to gather the best products from the farms, schools and homes of the county, and exhibit them where they and their merits passed on by expert judges. The addition to this annual meeting of our stockmen, farmers, merchants, teachers and school children, will develop new ideas and better methods, and eventually the Schoucraft county fair will become a county institution in the welfare of which, all will be directly interested.
