

# LOCALS

Miss Irene Johnson spent the week end at her home in Escanaba. Mr. and Mrs. G. S. Johnson left Monday evening for Chicago to remain a week.

Mr. and Mrs. H. P. Nelson, of Marquette, were visitors in the city on Monday.

Rev. and Mrs. E. C. Rupp moved this week from 211 Maple avenue to 200 Steuben street.

Jerry L. Lynch and Sam Shields, of Sault Ste. Marie, were visitors in the city on Tuesday.

Mr. and Mrs. Walter Stronwell, of Escanaba, attended the funeral of Paul A. Falk, on Sunday.

Gust Anderson, of Missaukee, spent Sunday here with his mother, Mrs. Gust Anderson, Mackinac avenue.

Clarence Mack, superintendent of the Edison Sault Electric company, was a business visitor here Tuesday.

Miss Mina Brewster underwent an appendectomy Monday at the Shaw hospital, and is recovering favorably.

Francis Gorsche of Sault Ste. Marie, spent the week end with his mother, Mrs. George Gorsche and family.

Mr. and Mrs. Edward R. Monroe spent the week end as the guests of Mr. and Mrs. J. A. Verling in Manistiquette.

Miss Cheryl Jones has returned to the city from Sault Ste. Marie, where she has been visiting for the past few months.

E. S. Coats, Chevrolet representative, and George Park, service efficiency expert, of Flint, were here on business Monday.

Miss Herta LaPoille of Milwaukee, is spending two weeks at the home of her mother, Mrs. Melvina LaPoille, Pearl street.

Miss Rose Bahch submitted to an operation for relief from appendicitis at the Shaw hospital Monday and is reported to be resting easily.

Mr. and Mrs. E. Oscar Anderson, Mr. and Mrs. Harold Anderson, of Escanaba, were here Sunday to attend funeral services for Paul A. Falk.

Word has been received in the city of the birth of a son to Mr. and Mrs. Robert McEwen, of Flint. Mrs. McEwen was formerly Miss Elsie Johnson, of this city.

Mr. and Mrs. Carl Gunnarson, Miss Evelyn Gunnarson and Mr. and Mrs. Clifford Bergman spent the week end with Mr. and Mrs. Helmer Group in Escanaba. Miss Evelyn remained for a week's visit.

Mr. and Mrs. Joseph Stronwell and daughter, Gerry, and Mr. and Mrs. G. E. Dolbin, of Gladwin, spent last Sunday here visiting with relatives.

Mrs. Robert Bradley returned to her home in Gould City on Monday, after spending a few days with her daughter, Miss Mina Brewster.

Mr. and Mrs. L. A. Danielson, and sons, of Escanaba, spent the week end at the home of Mrs. Danielson's parents, Mr. and Mrs. J. P. McLaughlin.

John M. Donnelly, of Ontonagon, and Rush Colver, of Marquette, were visitors in the city on Saturday. Mr. Donnelly is assistant attorney general.

Mrs. Alphonse Lavigne has been required to appear at the Shaw hospital recently.

Alvin Williams has been dismissed from the Shaw hospital, where he recently underwent an operation. He is recovering at his home on Otter street.

Mr. and Mrs. William Barker had as week end guests the latter's mother, Mrs. Delia Bodette, and son, Ralph; Mrs. Ed. Dupont and Mrs. Pete Shapp of Escanaba.

B. Vallier and J. C. Daly, of St. Ignace, were visitors here Monday. They accompanied Murray D. Van Wagoner, democratic candidate for state highway commissioner. While here, Mr. Daly received a long distance call which advised him that he had just been named as postmaster at St. Ignace.

## Schools Asked To Aid In Campaign

Lansing, March 16.—An appeal to all schools in the northern part of Michigan to participate in a serious campaign to prevent forest fires during the 1933 season, is being made by the Department of Conservation.

The appeal is being made not only on the plea that forest fires are in themselves destructive, but with the purpose of economy in lowering the costs of forest fire suppression. Few fires mean a relatively lower cost to the state, the Department said.

The Department is asking for assistance from the schools with the belief that if school children can be taught care with fire in the woods they can be an influence with their parents in practicing forest fire prevention.

Schools willing to cooperate in a forest fire prevention campaign will be given every possible assistance by the Conservation Department. Schools are invited to call upon their local fire wardens or conservation officers for talks on forest fires and forest fire prevention. The Educational Division of the Department at Lansing has available for loan motion pictures

## improve Streams For Trout Fishing

Lansing, March 16. Approach the spring, bringing another fishing season, is again attracting trout anglers to Paris in Meost County, where last year the Fish Division of the Department of Conservation built a demonstration stream improvement section on Paris Creek near its hatchery.

A number of men interested in trout have visited the section this spring. It is located from the Paris Fish Hatchery, where the purpose of obtaining ideas for stream improvement on waters in which they are interested.

The summer of 1933 is expected to result in the development of many northern Michigan streams, according to the Fish Division. Sportsmen owning property above trout streams, are, in many instances, planning to take advantage of the unemployment situation to inaugurate stream improvements at a minimum of cost.

The Paris Demonstration section was built by hatchery employees as a means of showing the public what devices have proved to be most effective in attracting and holding trout. All of the dams, obstacles, brush heaps, shade trees and other devices have

## Road Work Helps Many Families

Lansing, Mich., March 16.—About 75 of Michigan's 83 counties have taken advantage of the work relief program advised by State Highway Commissioner Grover C. Dillman whereby welfare dependents are given constructive employment on State highways and are paid a wage whereby each individual is paid in proportion to his need.

Under this program, the county receives 100 cents of R. F. C. welfare relief at wages for labor in return for the same amount advanced by the county for equipment and materials.

The State Highway Department in turn pledges future federal highway aid funds to the R. F. C. in return for money advanced at the present time. Under Mr. Dillman's arrangement, counties that have not yet received their snow cannot carry on highway work at the present time, can receive funds now to be repaid in work later in the year.

"And when the bank holiday was declared many county welfare agencies found themselves without any available funds," Mr. Dillman asserted. "But under the plan, they have received actual cash money from the department projects are now under way.

## Manistique in Former Days

Thirty Years Ago  
August Cookson and Miss Selma Youngfod were married at the Swedish Lutheran church Tuesday by Rev. Hamilton.

A Manistique citizen has purchased an automobile.

Lloyd Woods entertained a number of his friends at the home of Harry Hawkins last Saturday evening.

Mr. and Mrs. M. H. Quiek returned from Florida this week.

Mrs. W. A. McKinney entertained a number of friends last Friday afternoon at picnic, and served a chicken supper. Mesdames Rainie, LeRoy and W. L. Orr won the prizes. Those present were: Mesdames McKinney, Tuckler, Hancock, Carrie, Mallette, Cross, LeRoy, Rainie, Brasie, H. Rowe, W. Orr, M. W. Orr, Bowen, Kiss, Elmer, Orr, E. Carr, and Miss Burwell.

Twenty Years Ago  
Married at the residence of the officiating minister on the evening of March 2, 1913, by Rev. J. R. Mitchell, D. D., Mr. Huger Norton and Miss Annie Hoffman in the presence of a few friends.

The Misses Judith Dufstrom, daughter Mr. and Mrs. Alfred Dufstrom, and Signe Swanson, leave next Monday evening for the west where they expect to remain in the future.

Miss Dufstrom goes to Bellingham, Wash., while Miss Swanson will make her home in Escanaba.

Harold Brooks entertained a number of his friends in honor of his birthday last Tuesday evening. The guests who attended the party after which they repaired to the Brooks home where the evening was spent in playing bridge. Daily refreshments were served during the course of the evening.

Born to Mr. and Mrs. August Carlson, a son last Sunday.

Ten Years Ago  
H. B. Moulton of the First National Insurance Agency made a business trip through the western part of the peninsula this week.

Genevieve Garret, Grace Kendall and Miss McClellan, all of this city, have accepted positions with the Pontiac Telephone company.

Friends of Harold Leach, son of the Rev. F. R. Leach, and resident of Manistique for several years, received word of his marriage in Chicago on March 3, to Miss Elsie Lucille Hobson. Mr. and Mrs. Leach will make their home in that city.

George LeBeau left this week for Flint, where he has secured a position in a job printing plant.

## CARD OF THANKS

To the Voters of Thompson Township:  
We want to thank you for the splendid vote of confidence given us at the primary election last Saturday. We gratefully appreciate this and will try to give you to the best of our ability.  
Ed. Fitzgerald, Supervisor.  
Alfred Erickson, Clerk.

# Now—CHEVROLET presents

## THE WORLD'S LOWEST-PRICED

### FULL-SIZE SIX-CYLINDER ENCLOSED CARS

#### A NEW AND ADDITIONAL LINE OF CHEVROLET SIXES

● Another great new line of cars from the leader!  
Worthy companions to the present Chevrolet Master Six, world's most popular automobile! Chevrolet presents the new Standard Six—at the lowest prices ever placed on full-size six-cylinder enclosed cars.

These prices are many dollars lower than those of any corresponding six-cylinder models you can buy today. Yet each body-type is a big, full-size, full-length automobile. Each is a brand new car throughout. And each is a Chevrolet—featuring the same standards of quality that have made CHEVROLET the greatest name in low-price transportation.

The styling is modern, aer-stream styling. The bodies

are Fisher wood-and-steel bodies—spacious, tastefully finished—and featuring Fisher No Draft Ventilation. The windshields have safety plate glass. The transmission has a silent second gear. The engine is a smooth, fast, responsive six. And Chevrolet engineers have made economy an outstanding feature! Engineering tests show that the Standard Six costs less to run than any other full-size car on the road.

The introduction of this new car opens the way for new thousands to enjoy Chevrolet quality. It gives the public, for the first time, a full-size automobile combining maximum quality and maximum all-round economy.

### NOT A POLITICIAN

State Highway Commissioner Grover C. Dillman is not a politician. This was demonstrated at the recent Grand Rapids convention when he declined to enter any secret trades or behind-closed-doors agreements with certain factions to insure his re-nomination. He wants it known that he is an engineer, concerned with conducting the affairs of his office in the interests of the people of Michigan and not of any special class.

Economy is not something new in the highway department. It was there before and since the day he assumed office. It will remain as long as he continues as its boss. This is what he has to say concerning this phase of his work: "In the coming campaign, voters should not expect a lot of rash promises regarding ways in which I plan to economize. I shall make no such promises but on the other hand, I shall point with gratification to the record of economy that has been established in the past. Actual accomplishments stand the test of time much better than promises that are frequently made before election and then forgotten."

### ABOLISH THE FEE SYSTEM

Consider the delinquent tax collector of Allegheny county, Pennsylvania. Receiving a fee of 10 percent on collections, his net commissions in 1930 were shown by a recent audit to have totaled \$109,265.

Consider the town tax collector of New York state who receives a fee of one percent if he collects taxes within 30 days of the due date, a fee of five percent on taxes he collects after 30 days, and a fee of two percent of taxes he does not collect at all.

Consider, too, the town supervisors of New York state most of whom are paid a fee of one percent of the money they spend. On permanent improvements, they get two percent, since they collect one percent when the money is spent and one percent when the bonds are retired.

These are examples picked at random to illustrate the operation of the fee system of compensation in local government in this country. State law after state law puts a premium upon inefficiency and extravagance through provisions for compensation on a fee basis. Pennsylvania and New York state are no worse than many others. Today, when economy in government is a necessity, it is essential that such provisions of law be subjected to critical scrutiny.

There was at one time justification for the fee system of compensation. It is of course a relic of pioneer days when all public officers were part-time officers and when the work of government was largely a matter of individual services to neighbors or passersby. The increased complexity of government as it relates to the fee system has had the following results:

1. Overpayment of most officials and underpayment of some;
  2. Inefficiency in administration;
  3. Expansion of the spoils system;
  4. Development of the commercial attitude in public office.
- The first two points are sufficiently obvious so that elaboration is unnecessary. The fee system has contributed to the increased distribution of political spoils through the pyramiding of fees under provisions of state law. The list of fees received by various local officials in most states would fill pages and pages. It is of course a relic of pioneer days when all public officers were part-time officers and when the work of government was largely a matter of individual services to neighbors or passersby. The increased complexity of government as it relates to the fee system has had the following results:

### CITIZENS ALL

To me the most dramatic incident of the whole inauguration and one of the most significant of our democracy was only lightly touched upon.

Walking with the marchers past the reviewing stand was a large-tosed gentleman wearing a plug hat, a citizen on parade.

As he waved his silk topper to the new President of the United States he might have said, "There but by the grace of God stands Al Smith."

### SEEN AND HEARD IN OUR TRAVELS

In talking with one of our public officials the other day we learned of a plan which is now being considered to place a work on the Manistique. He suggested a municipal forest. The conservation commission had been asked to make a list of land which they plan for reforestation are made

at the present time it won't be many years before our timber supply will be exhausted. The plan is to fence and work on the Manistique. We trust that the officials who mentioned the matter to us will bring the attention of the proper authorities.

Manistique is following in the footsteps of other cities in practicing economy. This week the council decided to use only half of the number of street lights that are now in use. The lights cost \$2.30 per string per month. The city will save some \$8,000 per year. Manistique has, over, went farther by authorizing the addition to check up lights in various sections and to determine which ones could be turned off. We don't think, however, that Manistique has too many lights. Having seen as many as 100 in one place. In fact, we have heard complaints that there were not sufficient lights in the city. The city economy on these grounds. The city is to be commended for taking this step which business houses and citizens took some time ago.

Another of our pioneers has passed away in the person of Angus MacLeod. This community is going to miss Angus a great deal. Having served as trustee of the city for many years he was known to old and young alike and his acquaintance extends throughout the city. He was a fisherman and had the finest collection of fishing tackle that we have ever seen. Any time after the first of January Angus could tell you just what he had in his collection. He was a hardy fisherman and had the finest collection of fishing tackle that we have ever seen. Any time after the first of January Angus could tell you just what he had in his collection. He was a hardy fisherman and had the finest collection of fishing tackle that we have ever seen.

Bob Becker, outdoor editor of the Chicago Tribune and a frequent visitor to Blaney Park, writes that the number of articles sent reduced fishing licenses. For the purpose of having more sportsmen's dollars, some states this year will offer bare, short term tourist fishing licenses, according to a survey made recently by an eastern conservation organization. Realizing that tourists, non-resident fishermen bring in vacation funds, the tendency seems to be to reduce the seven, fifteen, or thirty day licenses to a one-day license. While this movement is on, conservation departments are hard pressed for money to carry on their work and are confronted with the problem of how to remedy it. There has been a need in some of the central states for short term, reasonably priced hunting and fishing licenses. For example last fall Wisconsin was inundated with a cut rate bird shooting license. A reasonable fee was taken. Many sportsmen would take advantage of low rates and costing \$5 or \$10 will result in a large income and fewer violations of the law than when a stiff license fee is in effect. Michigan's non-resident 15 day fishing license is another example. Even residents within the state are campaigning for a reduction of the \$10 now charged for such a license.

Arkansas has its eye on the tourist dollar by offering a special non-resident 15 day fishing license for \$1.10. For the season charge is \$5. In Kansas you can get the same license for \$1, commissioner, city attorney and Missouri charges \$3 for a non-mayor on different occasions. Mr. McDonald never played politics and \$1 for 15 days permit, while in public office. He served as a citizen on different occasions, Mr. McDonald never played politics and \$1 for 15 days permit, while in public office. He served as a citizen on different occasions, Mr. McDonald never played politics and \$1 for 15 days permit, while in public office.

### Small Fish Are Quite Friendly

Lansing, March 16.—Visitors are never surprised when the family dog affectionately follows them around the house or yard trying to make them welcome, but visitors to the state fish hatchery at Hastings are generally startled when they discover huge schools of the various rearing ponds.

The baby fish generally follow visitors waiting for them to drop morsels of food into the water, just the explanation given by John L. Brass, in charge of the Hatchery. Baby small mouth bass are usually shy. Mr. Brass says, and about the middle of June when artificial feeding usually begins in the hatchery ponds, they refuse to approach the food until the attendant has left the banks of the pond.

Gradually as they become accustomed to the new food they lose fear of the feeder and soon they associate food with man so much that they actually follow visitors around the ponds.

Large mouth black bass in the hatcheries are more shy of strangers and they seem to recognize individuals. Mr. Brass believes, since they will congregate in the accustomed spot at feeding time when the man accustomed to feed them comes to the bank of the pond.

## MICHIGAN SANATORIA and Tuberculosis Deaths

### THE NORTH'S PLIGHT

The accompanying map graphically shows how the southern and northwestern counties of Michigan are fortunately supplied with sanatorium beds for the care of tuberculous patients, while the remaining 28 counties in the northern part of the state have within their borders a single approved bed for treatment of the disease. This extensive area is to be served by the Northern State Tuberculosis Sanatorium, authorized by the 1921 Legislature and financed by the mill tax. Sufficient beds have now accumulated to constitute a first sanatorium, providing at least a partial solution to the perplexing problem of hospitalizing tuberculous patients in these 28 counties.

How perplexing this problem is has been convincingly shown by the Michigan Tuberculosis Association in a cross-section survey of 169 deaths occurring in the district. The survey showed that 67 of these 169 representative cases, two out of every three, died within a day of their removal to a sanatorium. In typical counties in southern Michigan, by comparison, only one out of every three or one out of every four patients dying of tuberculosis fail to receive sanatorium care. People in these counties are given from two to three times the protection against tuberculosis received by residents of the Northern Michigan counties in the same survey. In addition, the survey showed the widespread danger of infection caused by failure to isolate open cases of disease. The 67 patients with the automobile so accessible, and with more and more sportsmen going into the open, it now is difficult for states to raise enough fish and game to meet the demand.

In order to keep pace with the demands for more fish and game, Mr. Noyes is undoubtedly correct in his statement that increased revenues from fishermen and hunters are needed. This means reasonable increases in the license fees. Today we have the cut rate license movement under way which more money is needed for fish hatcheries and game production.

### Service Men on Patrol

A citizens' night patrol has been organized at Topeka, Kas., to provide work for otherwise idle servicemen. It is used to supplement the regular police force. Shifts of twenty men are used, giving employment to sixty men.

E. Elmquist, pastor. Sunday, March 19, 1933. 9:30 Sunday School. 10:45 morning worship. 7:00 prayer service. 7:30 evening service in English. Wednesday evening at 7:30 prayer meeting. A hearty welcome to all our services.

### ST. PETER'S EVANGELICAL LUTHERAN CHURCH

Rev. E. C. Rupp, pastor. Third Sunday in Lent. 9:00 a. m. Sunday School. 10:00 a. m. Divine services in the English language. (All our services are conducted in the English language.) We welcome you to all our services.

### PRESBYTERIAN CHURCH

D. Huenisk, pastor. Sunday, March 19, 1933. Sunday School 10:00 a. m. Morning worship 11 a. m. Lenten season meetings. Young People's meeting 6:30 p. m. You are cordially invited to worship with us. This will prevent any fire loss and the fire or stove should be regulated. High temperatures cause the chicks to stay away from the hovey at night.

### ZION LUTHERAN CHURCH

George W. Wallin, pastor. Sunday School 9:30 a. m. English worship 10:30 a. m. Lists of Anthony. Swedish Lenten service at 4:00. "The Divine Origin of the Bible." The Parish Division of the Department of Conservation. While no campers have been registered since November, they usually bring out a scattering few to increase in number as the spring advances.

### METHODIST CHURCH

S. T. Bottrell, pastor. Morning worship at 10:00 a. m. Church school at 11:15. Dr. Yoder, Supt. Evening service at 7:30 p. m. Tuesday, Epworth League at 7:45. All our young people cordially invited. Thursday, prayer and praise service at 7:30. Friday, choir practice.

### FIRST BAPTIST CHURCH

Rev. Joseph Gross, pastor. Sunday, March 19, 1933. "Our Friends and Neighbors March to Church Day." 10:00 a. m. Morning service. The pastor will preach on the topic "Who is My Neighbor?" There will be special music. Thursday 7:30 p. m. Prayer meeting at the home of Mr. and Mrs. J. M. Hewitt. The public is cordially invited to all these services. March to church in March.

### USE ICE AS AUTO ROAD

Getting to their favorite fishing grounds is easy in the winter time for Gus King and Art Pless, two Klamath Falls, Ore., sportsmen. They drive their car twenty miles across the frozen surface, across the Klamath lake to their "spots."

### Warning

Don't be misled by false state medicine. Calomel, salts, mineral waters, laxative pills and drugs have no effect whatever on the liver or its production of bile. The truth of this statement can be proved by consulting the authoritative medical textbooks published during the past five years. There are only two known substances which will actually stimulate a torpid or sluggish liver to cleanse and purify itself by increasing its production of bile. Sargen Soft Mass Pills contain both of these substances, and no other advertised medicine on the American market today does contain them.—(adv.)

THE LANDLADY SAYS SHE'S GONNA KEEP ME A PRISONER UNTIL I PAY MY RENT.

# Franklin Roosevelt's Inaugural Address

"I am certain that my fellow Americans expect that on my first day as President I will address them with a candid and frank appraisal of the present situation of our nation and of the world."

"Time to Speak Truth—This is the first time in the history of our country that a President has spoken to the people in this way. I am sure that the people will find in this address the truth, the whole truth, and nothing but the truth."

"In every dark hour of our national life a leadership of frankness and vigor has met with that understanding and support of the people themselves which is essential to victory. I am convinced that you will again give that support to leadership in these official days."

"In such spirit on my part and in yours we face our common problems. They concern the God-given rights of the individual, the material things, the values have shrunk to fantastic levels; taxes have risen; our ability to pay has diminished; our homes and jobs are threatened; and our way of life is endangered by a perilous and powerful enemy within the walls of our homes and places of business."

"More important, a host of unemployed citizens face the grim problem of existence, and an equally great number toil with little return daily. Only by a bold program of new public works, only by the saving of our jobs in thousands of families are gone."

"No Failure of Substance—Yet our distress comes from no failure of substance. We are struck by no plague of locusts. Compared with the perils which our forefathers encountered, disease and disaster are few. We are not threatened by invasion from the oceans, nor by hunger and cold. For our material resources are abundant. We are not deprived of money, nor do we lack the know-how and the human effort which in our country has built a more magnificent structure of material wealth than all other peoples have ever created."

"Primarily, this is because the rulers of the exchange of mankind's goods have failed through their own stubbornness and their own incompetence, have admitted their failure and indicated. Principles of the unscrupulous and the court of public opinion, rejected by the hearts and minds of men."

"The money changers have fled from their high seats in the temple of our civilization. We may now restore that temple to the ancient truths. The measure of the restoration lies in the extent to which we apply our values more noble than mere monetary profit."

"Happiness lies not in the mere possession of money; it lies in the joy of achievement, in the thrill of creative effort. The joy and moral stimulation of work no longer must be forgotten in the mad chase of evanescent profits. These dark days will be worth all they have brought if they result in a better, more wholesome, more equitable and more prosperous society for us all."

"I shall presently urge upon a new Congress in special session detailed measures for their prompt and judicious consideration. I believe that these measures will provide a better way of meeting the common and urgent needs of the people. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy."

"I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy."

"I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy."

"I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy."

"I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy. I believe that they will help to put us on a new and sounder basis of national policy."

at a larger good. This I propose to offer, pointing that the larger purposes will be done up in all of our sacred duty, evoked only in time of armed strife.

"With the policies taken, I am sure we can best meet the leadership of the great army of our people dedicated to a disciplined attack upon our common problems."

"Constitution Enduring—Action in this sense and in this end is feasible under the form of government which we have inherited from our ancestors. Our constitution is so simple and practical that it is possible always to meet extraordinary needs by changes in emphasis and arrangement without loss of essential form. That is why our constitutional system has proved itself the most superbly enduring political mechanism the modern world has produced."

"It is to be hoped that the arguable balance of executive and legislative authority may be adequately to meet the unprecedented task before us. But it may be that an unprecedented demand and need for undelayed action will require normal balance of public procedure."

"I am prepared under my constitutional duty to recommend measures that a stricken nation in the midst of a crisis will surely take. These measures, or such other measures as the Congress may build out of its experience and wisdom, will be called upon to meet the emergency of the hour."

"I am prepared under my constitutional duty to recommend measures that a stricken nation in the midst of a crisis will surely take. These measures, or such other measures as the Congress may build out of its experience and wisdom, will be called upon to meet the emergency of the hour."

## Our Club News

I made a tour of inspection to a school in Milwaukee. I saw some interesting facts. I suppose it happens on your school grounds at some time or another. They argued for a long time. Finally the school bell rang. Here are just two examples of what I'm trying to point out:

Old Bad Good  
Teacher: Why is it that the blood rushes to my head when I stand on my head but doesn't rush to my feet when I stand upright?  
Bright: Your feet aren't empty.

Left-Handed Poetry  
Things in General No. 3  
I saw an ad that offered to teach me to throw my voice so it would reach  
To the next room, under the chair, into the corners and most everywhere.  
And I'd fool my pop to take in a dare;  
And boy, will he be surprised.

The lessons came and I went to work;  
I practiced long and didn't think I got it down pat and planned to try  
To fool my pop right after pie  
By throwing my voice and asking why  
I couldn't go to more shows.

I can't understand why he wasn't fooled,  
Because I followed all the rules.  
He spotted me, and then he scowled;  
Then he laughed and then he howled.  
He grabbed my neck; I heard him growl,  
And boy, was I surprised.

Health Hint  
Keep warm and dry and above all keep your feet dry.  
Club Special  
There are still some boys and girls who think that you have to

Do Not Distrust Future  
"We face the redoubtful that before us in the warm country of national unity; with the clear consciousness of seeking old and precious values; with the clean satisfaction that comes from the stern performance of duty by old and young alike. We aim and we assure you of a sound and permanent national life."

"We do not distrust the future of essential democracy. The people of the United States have not failed. In their need they have registered a manly and vigorous action. They have asked for discipline and direction under leadership. They have made me the present instrument of their wishes. In the spirit of the gift I take it."

"In this dedication of a nation, I humbly ask the blessing of God. May He protect each and everyone of us. May He guide me in the days to come."

Treated Seed Helps Grain Crops Profits  
East Lansing, March 16—One farm practice which always makes a profit and which involves little expense and but a small amount of labor is the treatment of seeds to prevent the occurrence of common diseases, according to the farm crops department at Michigan State College.

Barley can be readily protected from smut and the better from the losses caused by smut, and barley stripe. These two grain crops are always attacked by these diseases, and during some years, the crop is unprofitable.

One pint of formaldehyde will treat 80 bushels of oats or barley. The formaldehyde is mixed with water in the proportion of one pint to 40 gallons. Dusts made of formaldehyde or of mercury compounds also successfully protect grain from smut and the better from formaldehyde for barley stripe. Dusts usually cost more than the proportionate amount of formaldehyde and should be used as directed by the manufacturer.

Oats are treated as a clean floor which has been sprinkled with the formaldehyde solution. Use the solution at the rate of two quarts of the mixture to one bushel of seed. The grain is shoveled over, piled, and covered with clean sacks or canvas for from two to eight hours. The grain should then be spread out and allowed to dry. If the grain is not planted immediately, it should be raked over occasionally, it should not be permitted to freeze or to sprout.

The treatment for barley smut is the same except that the grain is left covered only two hours after being sprinkled and should be planted as soon as possible.

E. D. Kellerman of Montezano, Wash., who lost his suerkrout, cutter, advertised as follows: "Kellerman can't but his tractor cause some kussed kriter keeps his tractor kutter."

## NATIONAL AFFAIRS

None, even the most condemned, who keep up with world affairs through the newspapers and periodicals, can deny the fact that at present the world is in a state of flux, and that almost anything is apt to happen at any time. There is actual conflict between China and Japan, in the Orient, and between Bolivia and Paraguay in South America. The additional trouble seems to be brewing in Colombia and Peru. The signs of war seem to be smoldering and straining at the least almost everywhere.

There are many danger spots in Europe, too. Germany is in a state of unrest seldom witnessed since the close of the World War. The suppression of the constitutional liberties of Poland and Czechoslovakia, and the burning of the Reichstag, and bloody riots everywhere tell the story of conditions. Trouble looms between Italy and France would go to the aid of Jugo-Slavia while Hungary is bound to Italy by an alliance. The Polish corridor is a constant source of friction between Poland and Germany and might easily start another world conflagration.

From Soviet Russia, miles from an iron hand with its news carefully censored, we are able to learn that the pensants have again happy St. Patrick's Day.

CAPTAIN LARRY,  
More next time.

picture, and the comparative peace in the United States so far as blessed and violence an occasion, will bring again to the most favored international relations. The conclusion that it is the duty of the United States to stay away from foreign commitments, as far as possible and to work out our own normal conditions. In the United States we have our troubles too, but up to time they have been economic and political. Our country has been a hard hit by the depression as most others. We have seen only recently our banking system fail to function to the great detriment of business everywhere. But Americans can take a great deal out of the chin, and stand up under it as the saying goes. For this reason we have had few riots and no attempts at revolution. Everybody is hoping for better things soon, and feels that it is only sporting to give the new administration a chance.

But a broad view of the world course that we ought to take in a world-wide effort to restore normal conditions. It is not for the benefit of Europe and a few of our own international sales. Now does it mean that we ought to join in a world-wide declaration of embargo or economic boycotts against some nation whose political course in the world seems to meet with our entire approval. The best way to keep out of trouble is to stay at home and mind one's own business.

Wake Up Your Liver Bile—Without Calomel  
This bile is not flowing freely, your food doesn't digest. It just decays in the bowels, then flows up your stomach. You have a quick, bad taste and your breath is foul, when you wake up in the morning. Your eyes often break out in blotches. Your head aches and you feel down and out. Your whole system is poisoned.

It takes thought and CAPTAIN LARRY LITTLE LIVER PILLS to get those two pounds of bile flowing freely and make you feel "no more." They contain wonderful, harmless, gentle vegetable extracts, amazing when it comes to making the bile flow freely.

For they can't do it. They only move the bowels and a mere movement doesn't get at the cause. The reason for your down-and-out feeling is your liver. It should pour out two to three pounds of liquid bile into your bowels daily.

It takes thought and CAPTAIN LARRY LITTLE LIVER PILLS to get those two pounds of bile flowing freely and make you feel "no more." They contain wonderful, harmless, gentle vegetable extracts, amazing when it comes to making the bile flow freely.

# "Because It's Better"

By HENRY T. EWALD  
President, Campbell-Ewald Company, Detroit

Merchandise is advertised because it is better—also, it is better because it is advertised.

That is neither a paradox, nor a wise-crack. It is a truism!

The influence of advertising is two-fold. It reaches out into the world, and sways public opinion in favor of a worthy product. It reaches back into the factory and inspires the manufacturer, the shop foreman, and the humblest workman to build better and better and still better value in to the product.

It establishes a standard of quality that leads the buyer to expect much, and that impels the maker to measure up to the expectation.

To this extent then, merchandise is advertised not only because it is a better product—but it actually becomes a still better product because it is advertised.

Consistent advertising is the manufacturer's pledge of quality. It is a visible proof that he has faith enough in his product to back it with his name—and with his money.

# TRIM INCOME OF RECEIVERS

By Elton R. Eaton

The Michigan amendment to the bankruptcy law that is on the statute books is placed there in the hope that the legislature is to amend it. The amendment provides that the receiver of a failed bank shall be appointed by the court and shall be a resident of the state.

The Brown-Hartman economy program has set aside the taxpayers of Michigan another million of dollars. The bills that they introduced at the beginning of the legislative session to knock out the construction of armories at Ann Arbor, Grand Rapids and Detroit and former Governor Brucker put through at the last regular session of the state legislature, have passed the house. The legislature will keep grinding out the economy measures that either Representative Vernon Brown of Mason or Representative William W. C. Pennington introduced. When all of them have been passed, which is likely, the taxpayers of Michigan will have been saved something like \$10,000,000.

It was Senator Leon Case of Waterford that provided the depositors of the banks of Michigan with a night by having his day in court. He introduced a bill of new banking bill. Over 2000 people crowded the senate chamber during the public hearing that Senator Case arranged for the depositors on the bill. He declared that the bankers had been given plenty of opportunity to express their views and he demanded that the depositors receive the same consideration.

The efforts of a few senators to head off the bill that provides for a reduction of salaries for supreme judges has well created a stir. The bill has gone back to the senate judicial committee, but it will not be there for long as a number of senators who favor the cut.

What may happen in households in the future, when mechanical servants begin to develop human temperment, will be described, next Sunday, in *The American*. Within five minutes after G. F. Francis of Duluth, Minn., had assaulted an opposing witness he was arrested, fined and sentenced to a month in jail.

# Huge Increase In Tax Delinquency Shown In Survey

New York, March 16. Tax delinquency in cities throughout the country is increasing at an alarming rate, according to a survey just completed by Dr. Frederick L. Bird, director of municipal research for the Bradstreet company, and published in the current issue of the National Municipal Review. The survey also makes clear that when the increased value of the dollar is taken into account, the average taxpayer is actually paying more for local governmental services than he is receiving. A comparison of the percentage of 1929 tax bills uncollected shows that in the cities of over 20,000 population the last year for which complete figures are available, shows an average delinquency of 16.2 percent for the year 1932, as compared with 1931, 15.5 percent. Because of the lack of complete data for 1932 a comparison is made for the year 1929 with 1932. The delinquency for 1929 was 10.2 percent, and for 1931, 15.5 percent. Because of the lack of complete data for 1932 a comparison is made for the year 1929 with 1932. The delinquency for 1929 was 10.2 percent, and for 1931, 15.5 percent.

**Amount Expended For Poor Is More**

Taxpayers, Mich., March 16. A survey of Michigan cities, showing the amount expended for the poor in 1932, as compared with 1931, shows that the average city has increased its expenditure for the poor by 15 percent. This increase is due to the fact that the average city has increased its population by 15 percent, and its income by 10 percent. The amount expended for the poor in 1932 was \$1,232,700, as compared with \$1,066,963 in 1931. This increase is due to the fact that the average city has increased its population by 15 percent, and its income by 10 percent.

HEVE YARE PROFESSOR USE MY DERBY

SIT DOWN JAKE, DON'T LOAN HIM YOUR HAT

NOTHING UP MY SLEEVES, LADIES AND GENTLEMEN, AND NOTHING IN THE HAT. WATCH CLOSELY NOW AND PRESTO-CHANGIO WE PRODUCE AN EGG!

HE WERE HAD MORE TRICKS THAN THEY GOT. BEANS IN BOSTON THE IDEA OF TAKIN' EGGS OUTA MY HAT!

WELL, HE'S GOT TO COME OUT OF HERE SOME TIME

As records show the only 15,763 cases of heavy borrowing were reported for 1932. The amount of heavy borrowing was \$2,700,000, as compared with \$2,000,000 in 1931. This increase is due to the fact that the average city has increased its population by 15 percent, and its income by 10 percent.

# Food Dollar Proposed By Osborn to Roosevelt

Possum Poke in Possum Lane, Poulton, West County, Georgia, March 6, 1933.

An Open Letter:

To the president and the congress and to the people of the United States:

I desire to propose a new currency, the base of which should be a Food Dollar, and to ask consideration for it.

The minimum unit of issue would be One Food Dollar. There could be bills in the amounts of Five Food Dollars, Ten Food Dollars, Twenty Food Dollars, Fifty Food Dollars, and so on. This Food Dollar would bear the stamp of the government of the United States.

## Good for One Bushel of Wheat Or Its Equivalent

This money could be printed in any volume deemed wise and practical. The first use of it would be to exchange it, with all state and national banks, for the frozen assets that might be regarded as eventually worth part. It might also be used to guarantee bank deposits in whatever degree is necessary.

This Food Currency would have at once both a material and psychological value. Its greatest purpose would be to translate Life and its Nourishment into terms of money.

A standard bushel of wheat of good quality has the same number and volume of invariable calories and nourishment.

The life-nourishing value of a bushel of wheat bears a definite practical and scientific relation to everything else that enters into nourishment of life.

Human life is the one thing of basic value upon the earth. All things that tend to nourish it have a relative value.

Everything needed for the enjoyment of life for its welfare and happiness and its material well-being in all directions, may be measured in terms of nourishment. It takes a certain quantity of nourishment to sustain life for one hour and one day. Food values can be determined quite nearly exactly by indirect measurement. The value of indirect necessities may be arrived at by computing the amount of nourishment time required for their production.

Thus material, physical values of a Food Currency are indisputably apparent.

The psychological value of it is almost as clear. It is everywhere, in some age, all humanity has been the victim of starvation. Lack of food may have been caused by tribal wars or famines or epidemics or by absence of transportation or some other physical agency. Consequently, there is a congenial conscious and unconscious fear of starvation. It does not always realize it is starvation but it is afraid of it. It is afraid of what it is. If he could have in his pocket or at call a dollar that would be translated into food that would sustain his life, he would at once feel at ease in mind and body.

## Out-State Truck Driver Arrested

Gordon Bank who was operating a large Minnesota truck without an interstate license, was arrested here last Friday by Inspector Geo. McLean of the public utilities commission. Bank paid a fine of \$15 and was also required to obtain a \$50 license. He was transporting goods for a large mail order concern.

## Mix Right Feeds Or Buy Good Mash

East Lansing, March 16.—Commercial chick feeds as manufactured and sold by reliable concerns are just as satisfactory as correctly prepared home-mixed feeds and those chick growers who will not save the time to obtain and properly mix the feeds needed to make a good growing mash will probably get better results with ready mixed feeds.

The feed mixture recommended by Michigan State College for a chick starter contains 36 points 20 pounds ground, 20 pounds ground, 20 pounds dried milk, five pounds 40 per cent meat scrap, five pounds alfalfa meal, two pounds steamed bone meal, one pound yeast, and one pound cod liver oil.

The old injunction that chicks should not be fed in the morning is a mistake. Chicks can be fed in the morning or from the shipping box. The mash is placed in hoppers where the chicks can get it at any time. Until the chicks learn to eat from the hoppers, mash can be placed on newspapers or on a board.

The chicks will need green feed daily. Either good pasture or cut green feed should be supplied. Green alfalfa, lettuce, spinach, or other green feed is best.

# LOCAL DEMOCRATS HEAR VAN WAGONER

## Candidate For State Highway Commissioner Is Visited Here Monday

Murray D. Van Wagoner, Democratic nominee for the office of State Highway Commissioner, is touring the Upper Peninsula of Michigan this week presenting to the voters his proposals for a reorganized department to bring about relief for tax payers.

Mr. Van Wagoner is speaking this week at various points in the peninsula and will end his tour at the Soo on Saturday.

Suspension of new highway construction by the State Highway Department except for the necessary connecting links, at the present time, is being made by the present highway administration are completed, is his first pledge. In addition he recommends relief for tax payers by reduction of automobile weight taxes as rapidly as a careful study of the existing situation shows it possible, with the present level of county refunds maintained.

Van Wagoner, who is a Michigan native, was elected to the office of Democratic State Convention at Grand Rapids.

He gained state-wide attention by his election as Drain Commissioner of Oakland County in 1928. He was the first Democrat to be elected there in 20 years. The county drain situation here has been tangled by litigation over the immense South Drain, with subsequent voiding of fund issues. Mr. Van Wagoner has been successful in his re-election in 1932 with the largest majority given any candidate.

We were able to reduce drain costs by 48% in Oakland county and to stop the ruinous construction of new drains. Mr. Van Wagoner says, "I believe a similar opportunity for saving exists in the State Highway Department."

"Of course, necessary connecting links must be completed but we should be moving new projects until the drain on the tax payer has been lightened. I believe another step in the program is to be taken by a careful study and proper recommendations for reduction of automobile weight taxes. It is possible to maintain existing highways in Michigan with due protection for the tremendous investment already made in them, but at an expense much below the estimates of the present administration," he said.

Large savings can be made in general administration of highway affairs.

Van Wagoner pledges four major points in his platform:

1. On completion of the program contained in the Republican Administration, no new road projects except badly needed connecting links will be built.
2. Conducting unit line maintenance with greatly reduced cost—excluding sharp curtailment of overhead expenses.
3. Reduction of administrative cost in keeping with present economic conditions.
4. Recommendation of a study of the Automobile Weight Tax with the object of reduction without disturbing the present level of county refunds in order to stop the unfair tax burden on the automobile vehicles.

Van Wagoner was accompanied by Attorney G. B. Doyle, of Menominee, who spoke in behalf of the county and in support of the national and state Democratic officials. Both visitors were introduced by W. W. Gilligan, Democratic county chairman. The meeting was held at the American Legion Cottage.

## MAN'S HEART STOPPED

W. L. STOMACH GAS CAUSE, said that his heart often missed beats after eating. Adhering to a diet of fruits and vegetables, he found relief. A. S. Green, a group paper maker, is the man.

# Deer With Broken Back Is Killed

Suffering with a broken back, a deer found in the vicinity of the Lake-side school on Oak street at the home of her parent, Miss Clara Boush, was killed Monday night after examination revealed that the animal had no chance of recovery. Conservation Officers Julius Thorsen and Leo Marlette were summoned when the deer was found. It was first believed that the animal's back had only been sprained but later it was discovered that it had been broken. It is believed by Mr. Thorsen that the injury was sustained when the animal fell when being chased by dogs. The deer was a last year's fawn. Persons reporting having seen it on Monday morning at 11, S. 2 near Fairview cemetery.

# Sellman Case Is Given Acquittal

William Sellman, local commercial fisherman, was acquitted by justice court jury last Thursday afternoon on a charge of having illegally fished in his possession. A crowd packed the court room during the trial. Conservation officers found about 200 pounds of walleye fish in Sellman's possession. Sellman and two of his employees denied any knowledge that the fish were there. The fishermen were out on the lake when the warden discovered the fish and declared that the fishermen were "unfitting" a warehouse when they left early in the morning.

# Warn Public On Burning Permits

Lansing, Mar. 16.—With the arrival of the first annual "Burning season" warning has been issued to all others in the fire zone of the state who build grass fires, clear land, burn over brush or start any fire. The fishermen were out on the lake when the warden discovered the fish and declared that the fishermen were "unfitting" a warehouse when they left early in the morning.

# Officers To Pick Two Candidates

Prosecuting attorneys, probate judges and county clerks from Allegan, Lake and Schoolcraft counties will meet at Blaney Park on Friday to select the two candidates from the Allegan district who will run for delegate to the state convention which will decide whether Michigan shall ratify the twenty-first amendment to the United States Constitution, repealing national prohibition. One of the candidates must be pledged against ratification and the other opposed to it. Voters will elect one of the candidates at the April election.

# Township Roads Taken By County

A complete list of the township roads to be taken over by the county this spring appears elsewhere in this issue of The Tribune. Twenty percent of all township roads were taken over by the county last spring and this year's list represents a further extension of the action. The action is taken as a result of a state law which provides that counties must take over the township roads within a five year period. With this year's list of roads, County Engineer John E. McCarthy says that practically all important township roads will have been taken over this spring.

# Extension Given On License Tags

G. Leslie Boush, county clerk, has been granted an extension of the secretary's office of the state of Michigan to receive word that an extension has been granted for the purchase of new automobile license plates to will March 31. The original last date had been taken over this spring.

# The 'It Girl' To Be Seen Sunday

Clara Bow, the famous "It Girl" of the talkies, will be seen and heard at the Grand Theatre on Sunday afternoon at 2. Her new admirers will see her as the new of Clara Bow in a strong story with a dialogue, Miss Bow has reduced considerably but is still basson and with added personality.

# COUNCIL PROCEEDINGS

Manistique, Mich., March 13, 1933. A regular meeting of the City Council was held on the above date with Mayor Erikson in the chair and the following members present: Councilmen Carlson, Gilligan, Cayin, and Lied. The minutes of the previous meeting were read and approved. By Councilman Gilligan, RESOLVED, That the following be submitted at the Biennial Spring meeting to be held on April 3, 1933: Are you in favor of investigating the feasibility of a municipally owned light and power plant for the City of Manistique? Yes [ ] No [ ] Motion carried. Yes: Councilmen Carlson, Cayin, Gilligan, Lied and Erikson.

The monthly reports of the Chief of Police and Justice of the Peace were submitted and approved. By Councilman Gilligan, RESOLVED, That the following be submitted at the Biennial Spring meeting to be held on April 3, 1933: Are you in favor of investigating the feasibility of a municipally owned light and power plant for the City of Manistique? Yes [ ] No [ ] Motion carried. Yes: Councilmen Carlson, Cayin, Gilligan, Lied and Erikson.

# ROADS TO BE TAKEN OVER

At a regular meeting of the Board of County Road Commissioners, held on the 13th of February, 1933, by a majority vote and by vote of said commissioners, the following roads were amended, the following roads:

**Doyle Township**  
1 mile north of US-2 between Section 23 and 24, thence 3/4 mile east and 3/4 mile west from above point. All in T. 42 N. R. 14 W.

**East 3/4 mile between Sections 23 and 26.**  
1/2 mile north of US-2 in center of Section 31.  
1/2 mile north of US-2 in center of Section 32.  
1/2 mile south of US-2 in center of Section 33 and 34. All in T. 42 N. R. 14 W.

**1/2 mile south of US-2 in center of Section 31.**  
1/2 mile north of US-2 in center of Section 32, thence south and southeasterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner. Beginning at this point and extending west and northwesterly through Section 22, to a point on section 23, 20 rods north of southwest corner. Beginning at this point and extending west and northwesterly through Section 21, 10 rods south of 1/2 corner.
