SPRINKLING HOURS CAUSE OF COMMENT

Many Feel That Hours Should Be Changed; City Makes A Check-Up

Probably the most paramount topic in Manistique homes at the present time is the city regulation with regard to the use of water for sprinkling lawns and gardens. The attitude of enforcing the rule on hours which are from 8:00 in the morning until 8:00 in the same hours at night. The city charges \$2 per month additional for using water at any hour.

The greatest complaint is not as the additional charge but upon the hours. Mayor Erikson points out that it costs the city considerable money to pump the additional water that is used in this summer time and without the extra charge the department would be losing.

The attitude of many citizens, as a result, is expressed in the following communication received to officials:

"Officials of the water department are conducting a campaign to enforce the rules pertaining to sprinkling hours are from 8:00 to 8:00 in the morning and evening.

"Many of us who have gone to the extra expense to make Manistique a more beautiful and better place to live, believe that these regulations would not apply during periods of drought such as we are having at the present time. If, any, will get up in the morning when sleep is not appreciative, to water our gardens and lawns, but if we were given an extra two hours in the evening, it would more than make up for the hours we miss in the morning.

"The pressure in the evening is so low that our sprinklers are ineffective, and hardly cover an area more than the size of a cucumber. Furthermore, it is next to impossible to take a bath when the sprinkler is turned on. This is a terrible nuisance for the bathroom tap. If we were given more pressure a greater area would be covered during the same time, which in turn would offset the necessity of daily sprinkling. Having the facilities of better pressure at the time it was built, the city council should amend their regulations to meet present day conditions.

"The writer believes he is expressing the views of all lovers of lawns and gardens, and sincerely hopes that this complaint will be received in the spirit of constructive criticism."

FORMER RESIDENTS AT ANNUAL PICNIC

About 150 Attend Festivities Of The Manistique Club Of Detroit

The fourth annual picnic of the Manistique Club of Detroit was held Sunday, July 9, at Palmer Park.

About one hundred and fifty Detroit Manistique residents attended the picnic.

The crowd was smaller this year than usual, however, every one enjoyed meeting old friends and renewing acquaintances.

It has been suggested that another picnic be held on Sunday, September 10, with the hope of having a much larger attendance. Plans will be announced later.

At the business meeting the following officers were elected for the ensuing year: President, Joseph E. Patterson; vice president, Elan Erickson; secretary, Charles K. Fox; treasurer, Gerald Morrison.

Those attending the picnic were as follows:

From Detroit: Archie Durno, Mr. and Mrs. Clarence Marks, Mr. and Mrs. W. DeLair, Mr. and Mrs. Harold P. Orr, Mr. and Mrs. Charles Snow, Mr. and Mrs. Mother, Mr. and Mrs. J. Tyrrell, Mr. and Mrs. Robert Gardner, Mr. and Mrs. Arthur Gouth, Mr. and Mrs. Luke Hazen; Mr. and Mrs. Harold A. Tennant, Mr. and Mrs. U. S. A. Eggerton, Mr. and Mrs. Norman W. Fox, Mr. and Mrs. Robert, Mr. and Mrs. Roy May, Mr. and Mrs. Arthur Morrison, and Mrs. Earl B. Westlake, Mr. and Mrs. Chas. L. Kirk, Mr. and Mrs. A. Skinner, Mr. and Mrs. E. Patterson, Mr. and Mrs. F. D. Byrne, E. LaBeau, Arvid G. Erickson, Charles K. Fox, Chester Snow, Mrs. Mary Taylor, Mrs. Caserman, Mr. and Mrs. Jack Baker, Florence Baker, Mrs. Maud Berry, Dora, Mrs. Agnes Erickson, Mrs. M. Lellan, Mrs. Louis Hagen, Mrs. Pollock, Ruth Pollock, Mrs. McKinney, Jessie McKinney, Mrs. Mox, James Cox, L. Rosenbach, Dorothy Rosenbach, Joe Byrne, John Robertson, Jean, Mrs. Glenn, Mrs. Edna Morrison, Mr. and Mrs. C. Crowley and daughters, Isadore Winkelman.

From Pontiac: Mr. and Mrs. Clarence Marks, Mr. and Mrs. James M. McKillop, Mr. and Mrs. Robert Ackers, Mr. and Mrs. Otto Kiefer, Mrs. Burns, Mr. Willard Fox.

From Flint: Mr. and Mrs. John W. McCanna, Mr. and Mrs. Stanley Baker, Mr. and Mrs. Donald Leach, Mr. and Mrs. L. Labombard, Mr. and Mrs. Fred Gagnon, Henry Mattison, Albert Mattison, Eva Hart, Mrs. Robert O'Connor, Mr. and Mrs. M. S. Setzerger, Mrs. and Mrs. H. B. Herr, Marine, Ann Arbor; Mrs. C. Fisher, Ann Arbor; Mr. and Mrs. Jacob Davis, Birmingham, Mr. and Mrs. Lyle Smith, Holly, Walter Neesman, Holly; Mr. and Mrs. Wm. Kendall, Huntington Woods; Mrs. H. A. Michals, Oak Park.

MAPS OF COUNTY GIVE MUCH DATA

Economic Survey Will Provide Much Valuable Information On County

Airplane maps of Schoolcraft county made from the original pictures taken by the army plane two years ago have been received by the Chamber of Commerce. The maps are highly interesting. Nothing is missed on the maps which reveal small dots representing farm houses and summer cottages.

Each of the maps, and there are probably over twenty, take in certain portions of the county. Some show the entire county, and some are now being made by the state and will contain much valuable information, such as soil conditions in all sections and what the various lands are best adapted for.

Schoolcraft county was one of the first in the state to secure the land survey and the maps largely through the efforts of Mr. Thomas several years ago. Mr. Thomas placed the matter before the supervisors and they in turn made application to the state.

The expense of the department was to have been discontinued this year because of a shortage of funds but Mr. Thomas stepped in to the rescue and secured a \$10,000 appropriation through to complete the work.

Dr. and Mrs. George A. Shaw returned before the city Wednesday night after a trip to Boston, where Dr. Shaw was a delegate to the National Rotary convention. Mr. Shaw, Melvin salesman for Republic trucks at Marquette, was business visitor in the city to day.

Car Ferries Now Run Every Day

Increased commercial business has made it necessary for an Am Arbor railroad to adopt a ferry schedule for its ferry which will have an hour interval. Daily runs have also been resumed on the Manistique & Lake Superior railroad between Marquette and Shingleton. The trains have been running only every other day.

SELECT DELEGATES TO NATIONAL MEET

Lady Foresters Express Pleasure At Reception Accommodated Here

The annual state convention of the Women's Catholic Order of Foresters came to a close here last Thursday night following a day filled with activity. The delegates from fifty attending high mass at St. Francis de Sales church at 9:00 o'clock in the morning and followed by the convention opened at the Knights of Columbus hall. A banquet was served at the Hotel Osgood in the evening.

Mr. Ann R. Downes, of Chicago, High Chief Rumber, was an honored guest at the meeting and the principal speaker. Delegates selected to attend the national convention to be held in Chicago next month were: Jane H. Dwyer, Hancey; Helene Maloche, Escanaba; Emma Rose, Marquette; Anna E. Kelly, Detroit; and Elizabeth A. Hunter, Manistique.

Delegates expressed themselves as being highly pleased with the hospitality shown them in Manistique and for the splendid manner in which the convention has been arranged. Mrs. Antone was general secretary of the convention and Mrs. Seb Weber was chairman of the program committee.

SCHOOLCRAFT HAS FEW FOREST FIRES

Has Third Lowest Number Of Any County In The Upper Peninsula

Schoolcraft county has had less fires than most counties in the upper peninsula according to figures just announced by the department of conservation. The fires reported in the county this year number 17. Only two other counties in the peninsula had less fires, one being Keweenaw with 5 and the other is the county with 2. Dickinson had the most fires with 92.

With 1,224 forest fires reported in the upper peninsula in 1932, the number of fires and the reported damage is running neck and neck with last year's records, according to the Division of Field Administration of the Department of Conservation. So far this season it is slightly more than 21,000 acres have been burned over, equalling the figures contained in a report issued to the same week for 1932.

The department is hopeful that 1933 will see Michigan with a minimum of damage from fires. The department is reporting an unusual case on the part of the public with fire in the woods and the presence of 5,000 conservation workers in 45 camps throughout the northern part of the state during the summer is expected to result in fewer fires.

As was true last year, Dickinson, Marquette and Iron counties have left the brunt of the fires.

PUBLIC MEETING ON LIGHT PLANT

Report Of Recent Survey May Be Discussed Some Time Next Week

Although plans were not complete today because of the absence from the city of one of the council men, Mayor Erikson said that a public meeting might be called some time the first of next week to discuss the report of the survey made recently in connection with the municipal light and power plant. The council desires to learn the public sentiment before taking any further action in the matter.

CONGRESSMAN MAY COME NEXT WEEK

City Officials To Discuss Gov- ernment Dock With Pres- sures M. L. Brown

Congressman Prentiss M. Brown's presence is expected to be in Manistique next week when the date is definitely known. He will be making a joint meeting of the Chamber of Commerce and the Rotary club. City officials have already expressed a strong interest that the government dock here and there will be gone over with

Survey Shows Cost of Municipal Plant About \$290,000

Large Attendance Expected At Annual Meeting; Ar- range Fine Program

A municipal lighting plant for Manistique would cost \$290,000, according to a report by W. W. Aldrich, Burdick and Hovson, hydraulic and sanitary engineers, of Chicago, who recently completed a survey in this city. The report of the survey was made public at the council meeting held on Monday night.

Estimate Savings

By basing their statistics on an estimate of the number of kilowatt-hours sold here in 1932 (the public utility commission did not have available figures for the first four months of 1933) the stated that that an estimated saving of \$17,508 or a total saving of about 22 per cent could have been effected through a municipal plant according to the Manistique Light & Power company's report to the public utility commission. The charges for six months of current for the year were \$80,112.

"We estimate the operating cost of this municipal plant under the conditions prevailing in the year 1932, including generation, distribution and sale, at \$276,771," the report stated.

"We estimate the fixed charges upon the investment including interest at six per cent and depreciation at 4 per cent per annum, at \$28,334, making the total cost of the plant \$305,105, including operating expenses \$32,646 per annum.

"According to the company's report to the utility commission, net earnings from sales of current for the year 1932 were \$80,112, which is a similar figure from a municipal plant, including fixed charges, by \$17,508, which is an advantage of 22 per cent.

Should the city decide to build a distribution system, an estimated saving of \$27,789 per year is possible. The report states that the saving of the current at the same rate as the Manistique Light & Power company is buying it. This would mean a saving of approximately 35 per cent, or an immediate saving greater than that of the complete generation and distribution plant were built. In the long run, however, after the fixed charges of the investment had been paid, the complete plant would be more profitable.

"If Manistique should build its own electrical distribution system for public and private use, including street lighting and pumping," the report states, "we estimate the necessary investment at \$80,840. If the municipality could purchase current for this distribution system at the same rate paid by the Manistique Light & Power company as reported for the year 1932, we estimate that the net saving would be \$27,789 per annum, a saving of about 35 per cent."

"The above figures," the report goes on to say, "makes no allowance for uncollectible bills, ordinarily a small loss. Prospective customers who are unable to pay the amount of such loss. The costs are sufficient to cover interest on such working capital as would be required by a municipal plant, estimated at six per cent on one-third of the annual operating expense, including the operating expenses of distribution and sale, would be approximately the same as previously stated, the company reported earnings for the year 1932 of \$80,112. On the basis of these figures, the saving to the city and citizens through purchase and sale of electricity on the basis of the above figures would be \$27,789 per annum, a saving of about 35 per cent."

"The above figures," the report goes on to say, "makes no allowance for uncollectible bills, ordinarily a small loss. Prospective customers who are unable to pay the amount of such loss. The costs are sufficient to cover interest on such working capital as would be required by a municipal plant, estimated at six per cent on one-third of the annual operating expense, including the operating expenses of distribution and sale, would be approximately the same as previously stated, the company reported earnings for the year 1932 of \$80,112. On the basis of these figures, the saving to the city and citizens through purchase and sale of electricity on the basis of the above figures would be \$27,789 per annum, a saving of about 35 per cent."

LEGION TO ELECT OFFICERS TONIGHT

Large Attendance Expected At Annual Meeting; Ar- range Fine Program

Members of Manistique Post No. 81, of the American Legion, will hold their annual meeting tonight at the Legion Memorial Cottage. Election of officers will be held at 8:00 p. m. A splendid program has been arranged and it is expected that there will be a record attendance. Refreshments and a smoker will follow the business meeting.

The tentative program for the Upper Peninsula convention calls for registration at 10 a. m. Friday, July 21, for all American Legion delegates, auxiliary and members, officers, and the American Legion Auxiliary and Civil and Spanish-American war veterans.

Features of the three-day program include a joint meeting of the Legion and Auxiliary trap-shooting contest, boxing show, and a parade, including a drill and marching for the drum and bugle corps, and the annual picnic to be held at 9:00 o'clock, Saturday evening, July 22. The convention will close with a meeting of the Upper Peninsula Association delegates at 9:30 a. m. Sunday morning, July 23.

DR. A. R. TUCKER AND ROY ROBERTS WIN Lead Field Of Five At School Election Held Monday, July 10

Dr. A. R. Tucker and Roy Roberts were elected members of the Manistique school board at the election held Monday, July 10.

The board consists of Dr. Tucker, Roy Roberts, J. H. Bolte, Harold A. Cockerm, E. J. Hastings, Hubert North and W. H. Hughes, 95, Morrison, 1061, Rev. W. H. Hughes, 95, Morrison, 1061, Rev. W. H. Hughes, 95, Morrison, 1061.

Dr. Tucker was formerly a member of the board. Mr. Roberts is an employee of the Brown Dimension company and has been a life resident of Manistique.

The board will organize at the next regular meeting which will be held on Friday, July 28.

FIVE LOCOMOTIVES DESTROYED BY FIRE

Blaze Of Unknown Origin Razes M. & L. S. Round- House Sunday

The roundhouse of the Manistique & Lake Superior railroad was destroyed by fire of unknown origin late Sunday afternoon, the fire including five locomotives and two coaches. The loss, which has not yet been estimated, is partially covered by insurance.

Hundreds of persons were alerted to the blaze, which was the largest in history of the railroad since the destruction of the city a year ago. As the flames swept through the frame structure, huge clouds of smoke could be seen from many miles away. The fire had a fine start when the department arrived but within 20 minutes the firemen had under control and were able to save the machine shop adjoining.

Three lines of hose were used on the fire, the total length of the hose being 2,800 feet. Reviewing records the pumping station, Chief Underwood estimated that 236,000 gallons of water were used on the fire.

Men and volunteers from the crowd succeeded in pushing one engine out of the roundhouse and the fire became more manageable. M. & L. S. has secured an additional engine from the Ann Arbor railroad at Frankfort and has placed it in use.

Gets Invitation To Annual Picnic

Earl E. Ellsworth of the Great Northwoods Club has received an invitation to the annual picnic of the Michigan Society of St. Peter- burg, Florida, which will be held in Traverse City on Wednesday, July 19, the opening day of the National Cherry Festival. The So- ciety is composed of Michigan residents who winter in the Florida city this year. Its picnic will be held in Traverse City, July 19, 20, and 21, at the height of the cherry harvest.

LOCAL INDUSTRIES AFFECTED BY NEW GOVERNMENT CODE

Wages And Hours Being Dis- cussed By Officials Of Various Companies

There is much speculation as to how Manistique's industries will be affected by the national administration's new codes for industries. New government regulations provide for shorter working hours, each week, the hours being different for various kinds of industry. The purpose is to give the workers more men at work thereby relieving the unemployment situation.

A. J. Cayia, general superintendent of the Inland Lumber and Stone company, and Gordon W. Hughes, sales manager, are in Chicago today to attend a conference. It is expected that regulations will be discussed as they affect the local company. Edward Shand, chief engineer of the Manistique Pulp & Paper company, is conferring with paper company officials in Chicago this week on the same matter.

American key industries whose leaders do not promptly submit shorter working hours, each week, Gen. Hugh E. Johnson will have rates and working hours fixed for them arbitrarily under a plan discussed Wednesday by the industrial administrator at Washington, D. C., according to a press release.

These enforced rates would apply until the industries present their codes. Gen. Johnson said, as he made it plain that he is anxious to get the principal industrial groups under federal control as quickly as possible.

The plan was devised by the President and has been in effect since the war. It has been in effect since the war. It has been in effect since the war.

DR. A. R. TUCKER AND ROY ROBERTS WIN Lead Field Of Five At School Election Held Monday, July 10

Dr. A. R. Tucker and Roy Roberts were elected members of the Manistique school board at the election held Monday, July 10.

Crown Gall Disease

BY PAUL VAN DENSBURG, DIRECTOR OF THE BUREAU OF AGRICULTURAL INDUSTRY

Probably few people not directly or indirectly connected with the State Department of Agriculture are aware of the fact that the most vital and important duties required of it by the law.

Among these duties is the enforcement of the law which prohibits the importation of insects and plant diseases into this state, from other states or abroad, of plants that would introduce new diseases or new pests into Michigan.

Michigan is the ranking state in the production of raspberry fruit. It is also first in the production of raspberry plants, of which 85% are shipped to other states. Michigan is further the leading state in the production of blackberries, dewberries and fruit trees. More than 90% of the raspberries and blackberries are raised in Michigan.

Dr. Banfield was engaged as research associate and agent of the United States Department of Agriculture in the investigation of crown gall diseases of nursery stock during the years 1923 to 1926. In conducting his research he worked in numerous large nurseries located in the Mississippi Valley from Minnesota to California, his base station being at Madison, Wisconsin. During 1930 to 1932 he was National Research Fellow in biological science at the University of California at Berkeley, California.

Dr. Banfield has retained the services of one who is undoubtedly the leading authority in crown gall disease in the entire United States, in the person of Dr. W. M. Banfield.

WOODS DISTRICT

(Mrs. W. Strickland, Cor.) Mr. and Mrs. Mitchell accompanied by Lena Shelton, mother of Marquette recently to visit relatives and friends.

Rev. Morrison and two young men visited the Sunday school last Sunday. Rev. Morrison spoke and the young men had musical interludes which they enjoyed very much.

Mr. and Mrs. Wm. Rice motor to Detroit a short time ago to attend the wedding of their son, Wm. E. Inman and Mrs. E. E. Fredlund.

Ed. Bassett, Harry Kane, Barney Nelson, Carl Wilde, John Williams and Frank Inman all and Gene Werisag, returned to their home in Detroit Saturday after spending a couple of weeks with their mother, Mrs. Barbara Mitchell.

Miss Louise Barbeau, of Detroit, spent a couple of days with her mother and brothers at the home of Mr. and Mrs. Curtis Clark and Beukeey Camp.

BLANEY

(S. Van Orman, Cor.) Mrs. Hunter, who has been on the sick list, for several days, is improving.

Mr. and Mrs. LaCourse are giving a house warming at their new home near the Green School on Saturday evening.

Wm. Laun, the Raleigh man, and his family, who are in our neighborhood, will be in our neighborhood on Tuesday.

Mr. and Mrs. L. Seivert and Mrs. E. C. Jackson and Mrs. E. E. Fredlund, who are in our neighborhood, will be in our neighborhood on Tuesday.

Mr. and Mrs. E. Inman and Mrs. E. E. Fredlund, who are in our neighborhood, will be in our neighborhood on Tuesday.

single species of fish in Michigan waters, the Legislature has made it necessary for anyone to obtain a permit from the Director of Conservation before he may plant fish in any of the public waters of the state except when secured from the state or federal government.

The measure was drafted, it was said, to prohibit the export of such species as carp or goldfish or other undesirable species often introduced with the surplus of the Wisconsin Graduate School Agricultural Fraternity, the Sigma Xi Honorary Fraternity of men engaged in science and research and of the American Phytopathological Association.

Dr. Banfield is serving as a member of a crew of orchard and nursery inspectors for the State Department of Agriculture. These inspectors work in pairs, the composition of each pair being changed frequently so that each man will eventually have had the benefit of working in conjunction with every other man in the force, including Dr. Banfield. Thus, in addition to what Dr. Banfield may accomplish personally, in the way of discovery and instruction to growers, each member of the orchard and nursery division is absorbing from him much information of inestimable value.

This activity is carried on under the immediate supervision of the Bureau of Agricultural Industry, a subdivision of the Department of Agriculture, under the direction and control of Honorable Samuel T. Metzger as Commissioner of Agriculture for the State of Michigan. The Department of Agriculture occupies the seventh floor of the State Office Building at Lansing, Michigan. The State Department of Agriculture therefore feels that it is performing a very valuable service for all of those in any way interested, whether directly or indirectly, in the production of the different varieties of raspberries and other fruit plants.

A Sticky Baby Is Somebody's Crime

What a price mothers pay for ignorance. It will be different with the next one! Mother will keep herself in vigorous good health with UCATONE. UCATONE contains vitamins B and C which aid digestion and appetite. Go to your NYAL drug store today and taste a sample of this health-giving tonic.

UCATONE is one of the home remedies made by the NYAL Company of Detroit and sold ONLY at your NYAL Drug Store.

Must Have Permit For Fish In Pools

Lansing, July 13.—The garden pool owner and the angler who dumps his surplus live bait overboard now come under state surveillance through action of the 1933 State Legislature.

The Division of Conservation is now necessary to have live game fish in public or private pools, ponds or aquariums and the Director of Conservation is authorized to prescribe such regulations as he may see fit and to charge a fee of \$1 for issuing such a permit.

As a means of prohibiting the introduction or spread of undesirable species of fish in Michigan waters, the Legislature has made it necessary for anyone to obtain a permit from the Director of Conservation before he may plant fish in any of the public waters of the state except when secured from the state or federal government.

rough-but Smart-
Say Thousands Who Rush to Buy Big New Dodge Six at only \$595*

In city after city the new Dodge Six is hanging up new sales records. In Detroit, where talk about a new automobile spreads from door to door almost overnight, Dodge sales are 97.5% of the corresponding period for last year.

Buy Now—Save Money!

No Dodge has ever sold for less than today's price... \$595. Many people, aware of the trend in today's markets are asking, "How can this big, new Dodge '6' be priced so low?" Right away, we say to you, better see this great car frantically... take advantage of today's low prices... And you don't have to take anybody's word for Dodge. This rugged big Six is ready to prove to you how it wins out—easily—against competitive cars.

All the guess-work has been taken out of car buying by the Dodge "Show-Down" Plan.

Buy Car on Merit Alone!

The "Show-Down" Plan gives you a clean-cut, definite show-down of performance and economy. We couldn't afford to offer the Dodge "Show-Down" Plan to the public if we didn't know the Dodge '6' would win out!

Dodge has 7 points of economy that mean direct savings of from \$50 to \$150 on running expense!

BRINGS FORTH COMMENT

The forest fire near Stueben on the Fourth of July which was fought by members of the Steuber C. C. C. unit brings forth the following editorial from the pen of Fred Keister, of the Ionia County News:

"From the northern part of the state comes the story of workers in a forestation camp waging a successful battle against forest fires. That is good news. Not only is the nation engaged in the work of growing new trees, but also in preserving those we already have. That part of reforestation work should be encouraged. Protecting what we already have will make better forests. It will make many of the forests more pleasant to travel in, more beautiful to look upon.

"Another good effect of the work in the woods will be the rehabilitation of the young money collector there. Young men are just as important as trees. The most important effect is that the stress on forestry is now on the saving of trees instead of the cutting of them. For generations the American people looked to their forests and computed their value in board feet, lumber, twigs, poles, telegraph poles and paper. Now we regard a tree as a creation of Nature, a thing to be cherished and protected, not merely for its material value, but for its many elements of pleasure and grandeur. From out of the woods comes a new conception of the beauty and worth of the tree primeval."

SALES TAX MEANS WORK

Michigan's retail business interests have already discovered that making a return to the state of the tax collected from the public is not going to be the easy job at first anticipated, but that it will involve an intricate set of book-keeping to avoid confusion in determining just what belongs to the state and what belongs to the merchant.

In some instances merchants had provided a receipt in which the exact amount of the tax was placed following each transaction with the customer. The state has rebelled against this practice, however, claiming it savors too much of the street car conductor who had a habit at the end of each trip of throwing all the money collected against the roof of the car. What stuck to the ceiling belonged to the company, the rest being pocketed. In the end the company were glad to get back their car.

As we understand it, everybody doing a retail business must provide sufficient evidence of their sales to convince the state it is getting every penny of the tax that has been collected. Even roadside vendors are said to come under this ruling. Fear has been expressed in some quarters that the sales tax may bring a horde of foolbird ringers into the state peddling goods on which the tax has been evaded. Just how much this street amount remains to be seen. In the meantime the public is taking the new tax with a spirit of resignation and there is every reason to believe that whatever tax is exacted from the pockets of the people will eventually find its way into state coffers.

SOUNDING AN ALARM

Fake eye specialists, the same old gang that has been fleecing innocent people throughout the country for years, are said to be headed towards Michigan from the southwest where they have been operating in recent months.

Don't take any chances with this class of gentry. The moment a smooth appearing gent stops at your door (and they work almost entirely in the rural sections) and starts to inquire about your eyesight, make some excuse to detain him long enough to inform your local officers who will lose no time in investigating his story. This is the only way those fellows can be caught.

There is a dozen variations to their game. Here is one way they operate: Posing as specialists of the state university they call upon the elderly, well-to-do farmers with failing eyesight. They offer "free examinations" and are shocked to find their victim is suffering from a cataract.

ZIP PRODUCTS

GREATEST OF ALL INSECT KILLERS is now obtainable in Manistique!

ZIP is absolutely odorless. It will not stain. It is guaranteed to kill!

Use it in the house for flies, mosquitoes, moths or anything. Use it in the yard for insects on your plants, flowers and trees. One trial will convince you that—

ZIP is ALL that is CLAIMED for IT!

Quart 80c GALLON LOTS \$3.00 Pint 40c Sprayers 75c

WE ARE EXCLUSIVE AGENTS FOR ZIP INSECTICIDE COMPANY Manufacturers of Insecticides that really kill!

ISAACKSON BROS.

However, for two or three hundred dollars they will remove it. Dressed in white surgical aprons, they "operate without resorting to the knife." They squirt a little water in the eye, manipulate the eyelid, and off comes the cataract, which is really only a piece of the inner skin of a soft-boiled egg or a fish scale, which has been concealed in the patient's pupil.

By the time the victim realizes what has happened they are well on their way to new and greener fields. Rarely do they pull off more than two or three jobs before leaving the state, and these days they place before their victims, have a system which is well thought out to take care of any possible slip, and invariably succeed in landing their prey unless he has had warning in advance. That is the reason for this editorial. Beware of the fake eye specialist.

THE PLEASANT HOUR

Front-porch visiting, where neighbors gathered and enjoyed the company and chat of each other during the pleasant twilight hours of a summer evening, was one of the pleasant social customs that disappeared with the coming of the motor car, hard-surfaced highways, development of country clubs and other play places.

To learn how completely front-porch visiting has been cast aside, try to recall how long ago it has been since you observed such a party in progress. It was a delightfully pleasant custom which helped neighbors to become better acquainted, but the law of changes sent it out of the picture almost overnight.

That distinguished Hoosier writer, Meredith Nicholson, said in a recent talk in his home town that the front-porch visiting custom had a culture important to the individual and the community, and nothing to take its place was provided when it disappeared. He felt that in his home town, where the pleasure and benefit of visiting were known and appreciated, it might be worth while to make an effort to restore the front porch to its historic use for visiting.—Ohio State Journal.

SEEN AND HEARD IN OUR TRAVELS

We want to apologize for an item that appeared in the Special Cholo correspondence last week and at the same time show you how easy it is to make such errors. Here are the two items as they appeared in the paper:

The Loraine of Cheboygan has a string of sucker nets in the bay. Lester Goudreau and daughter, Marguerite, and niece, Ruth Wehner, all of Manistique, are a string of sucker nets in the bay. Isaac Goudreau.

The proofreader corrected the error in the short item. A new slug was set correctly but was misplaced for a line in the lower item. Before the line was put in the lower item read like this:

Lester Goudreau and daughter, Marguerite, and niece, Ruth Wehner, all of Manistique, are staying the week end with Mr. Isaac Goudreau.

If you have ever seen type on a galley you readily realize how easy it is to make a mistake and get a corrected line in the wrong place. No matter what position you get in the type is either upside down or will read backwards. You haven't got to stand on your head to correct a line, but just the same its mighty easy to slip a line in the wrong place. And if either of the two readers of the column don't believe it, we invite them in some day to make a correction or two. Anyway, Mr. Wehner it's you and your daughter and niece we owe our apology and we trust you will understand how the error occurred.

In case you haven't struck the right dope yet for mosquitoes we are passing on the following advice of Bob Becker, outdoor life editor of The Chicago Tribune, who spent a considerable time at Blaney Park Resort. Mr. Becker had the following story in a recent issue of The Tribune.

Every fisherman has had a busy time testing the efficiency of various mosquito and black fly repellents this spring while on trips into the north country. For various reasons these pesky insects have been more numerous than usual and the boys who went north during May to toss their lures at the trout were kept busy applying dopes to keep the insects away.

This spring wave of flies and mosquitoes is gradually subsiding and campers, fishermen, tourists, and canoeists who plan on trips into the north country will not have to worry about them later on.

When we were passing through Escanaba, Mich., last week on our way to the trout streams around Blaney in the upper peninsula we stopped in a drug store to have a potent anti-mosquito dope mixed up, since we had received warnings about the heavy spring hitch of black flies. Before we got out of the drug store we had two different kinds of repellents on our own concoction. The other, a heavy dope which the druggist asked us to try.

Here is the recipe for the repellent which we had made up. We recommended it as a knockout against the mosquitoes and black flies. For five days when we were on trout streams this dope kept us immune from the bites of insects. The formula follows:

It is dark and it discolors clothing. But it was not irritating to our skin. It was made up of: Oil of saffraas 1 dram Citronella 2 drams Peruvial 1 dram Camphor 2 drams Bergamot 1 dram Enough pine tar to impart color and its odor to the mixture.

live all of the rumors that you hear after a fire.

Potatoes Require Thorough Spraying

Potato growers should not be alarmed over the dry weather that the Upper Peninsula experienced during June. During 1932 June was even drier in some sections than June this year and yet potato yields were excellent in the Upper Peninsula last year. However, it must be remembered that all insects are especially destructive during dry periods. Like wise, most diseases are most destructive during periods of plentiful moisture. Since spraying or dusting is the grower's best tool in combating both insects and diseases it is necessary that a thorough program of keeping the vines well covered with either a spray mixture or dust during the growing season.

Most growers probably have their potato bugs under control by this time, but leaf hoppers will present the remainder of the season. These insects cause what is known as hopperburn or Uplurn. This is the leaves turn brown at the margins and roll up. This is due to the stinging of the leaves on the underside of the leaf down to the veins by these leaf hoppers. The leaf hopper is a tiny light insect about one-eighth inch long. It can be observed early in the morning by carefully raising up the plant and looking on the underside of the leaf down to the veins. If it moves about so freely that you can see them only in flight by walking down the row and observing the insects as they go out ahead.

For efficient control by this time, but leaf hoppers will present the remainder of the season. These insects cause what is known as hopperburn or Uplurn. Simply acts as a repellent which discourages the activities of leaf hoppers on the potato crop. It is possible to kill the tiny hoppers in the early part of the season by using nicotine sulphate at the rate of one pint to two gallons of Bordeaux Mixture. However, nicotine sulphate is expensive and repeated sprays with it would be prohibitive. It is more advisable to use a thorough program of keeping the vines well covered with either a spray mixture or dust during the growing season.

Extend Time For Fishing Rainbows

Lansing, July 13.—Rainbow trout fishing in numerous lakes and streams in several counties for three additional months in the fall is permitted under a law adopted by the 1933 session of the legislature.

The waters from which rainbow trout may now be taken in September, October and November are in addition to those designated in past years.

The new fall rainbow trout fishing waters are: Benzie county: Round, Platts, Bronson, Lake Ann, Lower Helderberg and Betsie lakes. Cheboygan county: Mullet and Bart lakes, Indian river, Crooked river and Starvation river down from the dam at Wolverine. Emmet county: Crooked river, Crooked and Pictorial lakes. Manistigue county: Manistigue river down from Indian Bridge on Sec. 22 T 15 N. E. 16 W. and S. E. control of leaf hoppers. This mixture does not kill the insects but

Mr. and Mrs. Chris Schmeier and son, Jack, of Iron Mountain, are spending a few days at the home of Mrs. Schmeier's parents, Mr. and Mrs. Seb. Weber, Sr., and Mrs. John Schmeier's parents, Mr. and Mrs. John Schmeier, of River Road.

For many Major Walker says that he would rather have a gentleman farmer in Eng. as that returns to politics in New York and probably New York State the same way about it.

Miss Louise M. Papp, New York telephone employee who won \$118,000 in the Irish Hospital Sweepstakes, evidently did not do the wrong number, as Boston isn't her it's flood.

You Want a Summer Cottage

Everybody dreams of having a summer cottage some day. What investment can you make which will give you as much pleasure and profit in real enjoyment and health as a rustic cottage on the shores of a beautiful lake.

You can have a Summer Cottage

Where yourself, your family, and friends can enjoy a quiet restful vacation with clean, health-giving sport and recreation. Where you have your own private cottage and the use of nearly two miles of the finest sand beach in Northern Michigan, with wonderful swimming and bathing beaches, fishing grounds, boating facilities and water sports.

Where you can have the use of over 1200 acres of woods teeming with bird and animal life and forested with every variety of trees and shrubs native to Northern Michigan, and traversed with interesting woodland trails to hike over, pick berries, picnic, and study nature to your heart's content.

Where you have a year-around caretaker at such a small expense that it is only nominal and insures you against vandalism and thieves and protects your property.

Where you will not be crowded or associated with undesirable neighbors.

At Sunset Beach on Indian Lake

You can realize your dreams. At our prices your summer cottage, we believe, is as safe an investment as you could make. With the growing attraction of Northern Michigan as a summer resort it should be worth more. Reasonable terms to responsible people. Cottages complete, fully furnished and ready to move into.

Laberan Brotherhood
A regular meeting of the Lutheran Brotherhood of the Zion L. Church will be held on Friday evening of this week at the home of John Marone, Chippewa avenue. All members are urged to be on time.

Zion Lutheran Sale
The Ladies Aid Society of the Zion Lutheran church are sponsoring a sale of baked goods on Saturday of this week, beginning at 10 o'clock in the forenoon. The sale will be held at the Gurnee-an and Kalamazoo streets.

Light S. S. Picnic
About one hundred and seventy members and friends of the Light Sunday School attended the annual picnic on Tuesday of this week. The picnic was held at Hanover shores on Indian Lake. Baseball games, sack races, developed races and wheelbarrow races were enjoyed with prizes being awarded in each event.

Sid Birthday
Erasmus M. Orr, well known pioneer resident of this county, celebrated his eighty-third birthday anniversary on Friday evening, July 12, at his home on the River street with a family dinner. There were twenty-eight members of the Orr family present and a delightful evening was enjoyed. Refreshments were served following the dinner.

Entertains Drill Team
Mrs. Antone Weber was the delightful hostess on Wednesday evening of this week to the twenty-four members of the drill team. Five hundred with players during the evening with honors being achieved by Mrs. Mary Steiner, Mrs. Albert Nelson and Mrs. Mildred Vassau. Mrs. Elsie Kozette and Mrs. Julia Matti were the drill team. Refreshments were served following the games.

Entire Party
A number of young people gathered at the home of Mrs. Edna Lee on Monday evening. Refreshments were served by Mrs. Edna Lee and Mrs. Mildred Vassau. Mrs. Elsie Kozette and Mrs. Julia Matti were the hostesses. Refreshments were served following the games.

Employees Picnic
The William Taylor Jr. company had a picnic on Sunday at the home of Mrs. Edna Lee. Refreshments were served by Mrs. Edna Lee and Mrs. Mildred Vassau. Mrs. Elsie Kozette and Mrs. Julia Matti were the hostesses. Refreshments were served following the games.

"I'm Putting Up Jams and Jellies."

Says President Roosevelt's Daughter

Here's Anna Roosevelt Dall engaged in the oldest of business activities. Notice that she has a duck in her hand. She is also engaged in making jams and jellies. Her mother, Mrs. Roosevelt, is also engaged in making jams and jellies.

By Anna Roosevelt Dall
I'm so often asked questions about politics and like subjects, but at present, my mind is miles away from these important world interests. Right now, a great portion of my interests is directed kitchenward. There's a reason of course. I'm putting up some jams and jellies for winter, and having a grand time doing it. I'm surprised to discover that I haven't been doing this with about twenty-five of the most modern scientific aids to duty. The food markets are filled to the brim with gorgeous fruit fruits of every description. You can't see more than a few dollars' worth of fruit, but you can't see more than a few dollars' worth of fruit. So I'm capturing these beautiful colors and delicious tastes in jellies and jams.

ZION LUTHERAN CHURCH
Geo. W. Washburn, pastor.
Sunday School 9:30 a. m.
Bible Study 10:30 a. m.
"Whom Shall We Love?"
9:45-10:15 a. m.
"I Am Willing."
10:15-10:30 a. m.

METHODIST CHURCH
Rev. S. T. Bottrell, pastor.
Morning worship at 10:30 a. m.
The pastor will preach. Subject: "The Burning Bush."
Church school at 11:15. Dr. Yoder, superintendent.

ST. PETER'S EVANGELICAL LUTHERAN CHURCH
Rev. E. C. Rupp, pastor.
Fifth Sunday after Trinity.
10:00 a. m. Divine services in the English language. (All our services are conducted in the English language.)
7:30 p. m. Preaching services at Germank.

ST. FRANCIS DE SALES CATHOLIC CHURCH
Rev. B. J. Schevers, pastor.
High mass and sermon 7:30 a. m.
First mass and sermon 9:30 a. m.
Baptisms 2:00 p. m.
Obtain clean 7:30 a. m.
Saturday confessions 3:00 to 5:00 and 7:00 to 9:00.

FIRST BAPTIST CHURCH
Rev. Joseph Gross, pastor.
Sunday, July 14, 1935.
10:00 a. m. Morning service.
Rev. Huennich of the Presbyterian church will preach. There will be a special offering for the support of the Miss Hillier Johnson will sing "The Plains of Peace" and "Teach Me to Pray" by J. M. Lewis.
This is the only preaching service. May we have a good attendance.
11:15 Church School. A class for all ages.
11:30 Calvary Mission Sunday School.
No evening service.
8:00 p. m. The pastor will conduct a service at the Carpenter school, River Road.
Thursday 7:30 p. m. Prayer

SWEDISH BAPTIST CHURCH
P. Elmberg, pastor.
Sunday, July 14, 1935.
9:30 Sunday School.
10:00 Morning worship.
7:30 evening service in English.
Wednesday evening at 7:30 p. m. for all attendees.
Welcome!
WELSH METHODIST CHURCH
Sunday, July 14, 1935.
D. Huennich, pastor.
Sunday School 10:00 a. m.
Morning worship. Sermon subject: "The Finished Work of Christ."
The Lord's Supper will be administered at this service. Remember "The Crusaders" at the First Baptist church, July 18, Tuesday, 7:30 p. m., under auspices of the Methodist Association.
You are cordially invited to worship at our church.

U. P. Blueberries Now On Market
The first pickings of the Upper Peninsula moisture and berries are on local markets this week, and the quality and flavor are reported very good.
June frost failed to damage the crop materially in most localities, and it is estimated that the total volume will be close to normal. Preliminary investigations have failed to find evidence of the fly larvae which threatened the fruit last season. The berries cannot be infested until they are fully ripe and the skin has become somewhat soft.
Federal inspectors will be in the field again this year and will also watch for larvae in the crop as they are being marketed in the big consuming centers. They warn that hand picking will be necessary to obtain clean fruit, and that the use of rakes or scoops for picking is sure to ruin the market for Michigan berries.

Invite Officers Of D. A. V. To City
Michael J. Wahlun, department commander, and Sydney A. Allen, welfare officer of the Disabled American Veterans of the World War are planning a trip to the upper peninsula shortly for the purpose of explaining to executive committee members the governing compensation. While in the upper peninsula the state officers have been invited to make their headquarters at Manistique. The invitation was extended by George Dupont, commander, and W. C. Clendenen, adjutant, of Manistique Chapter.

Taking Of Smelt Is Liberalized

Lansing, July 12. The increasing prevalence of smelt in Michigan waters has resulted in liberalization of the taking of the species, according to the Fish Department today.
The Department of Conservation has authorized to designate the time between March 1 and May 31 when smelt may be taken by use of a dip net. The law was changed since the Commission meets but once a month and as the season develops during the spring, Commission action would necessarily be delayed too long to permit dipping these fish in new waters that season.
The new smelt law also legalizes restrictions as to hours of dipping and will legally confine the use of hand nets to small streams.
There is now no limit to the number of smelt which may be taken in a dip net. In past years there has been a five foot limit to promote safety in the huge crowds that have gathered at some of the better known smelt streams.
Five single lines with one hook only attached to each line and only one line which may have any number of hooks may be used in fishing for smelt in recognized smelt waters under the new law.

Instal Officers Of Golden Star

Newly elected officers of the Golden Star lodge were installed with fitting ceremonies last Friday evening at the Old Peckham Hall, Miss Lydia Strom, leader of the organization and the other officers installed were as follows:
President—Gust Larson.
Vice President—Adolph Asplund.
Secretary—Gust Larson.
Financial Secretary—Mrs. Herman Peterson.
Treasurer—Signe Carlson.
Chaplain—Mrs. Anderson.
Marshal—Mrs. Gust Larson.
Ladies Aid—Mrs. Charles Marshall.
Inside Guard—Mrs. Adolph Asplund.
Outside Guard—Mrs. Nels Anderson.
Finial—Eleanor Lofgren.
Members and friends enjoyed a party following the installation.

ATHLETES FOOT QUICKLY AIDED

Constant itching between the toes and blisters on the feet are quickly relieved by the use of **Fungi-Rex**. All these are symptoms of the foot infection known as **athlete's foot**. Fungi-Rex is a powerful antifungal agent which kills the fungus and relieves the itching. It is used by simply applying it to the affected areas three or four times a day. It is sold in small packets for use in the home or in the field. It is also sold in larger quantities for use in the hospital or in the army.

SAVE SAFETY AND CONVENIENCE AT THE DRUG STORE

VACATIONS and HEALTH

By Dr. ERNEST H. LINES
Business Asst. and Chief Medical Director
New York Life Insurance Company

CAMP LIFE

CAMPING in the woods or on the shore of some lake can be one of the most beautiful ways to spend a summer holiday. This is especially true of city office workers who should aim to get plenty of fresh air and sunshine, and a moderate amount of exercise, during the two vacation weeks allotted to them.
When selecting a camp site, first of all be sure to choose a place that is not only healthy but also disease carrying as possible. Then choose a spot of ground high enough to be dry if it rains. Do not sleep on damp ground. An ample supply of wooden blankets should be provided, as well as warm clothing and overalls. You are camping in a place where the overalls may be cool.
Matchless gloves and clean socks should not be thrown away carelessly when camping in the woods. Campfire shoes should be thoroughly examined whenever you leave the camp. Parasitiferous insects, such as ticks and fleas, have often been started by careless campers.
Axe and hatchets should be used with care. If it is too easy to cut with an axe or hatchet, it is too easy to cut particularly those from rusty nails or iron, to avoid lockjaw or other infections.

The National Safety Council reports that one-third of the deaths from fire occur between ages 10 and 14 and another 20 per cent between ages 20 and 24.

The hazard exists chiefly among boys and young men. Firemen should be instructed in the use of fire extinguishers and in the use of fire escapes. Fire drills should be held in schools and in homes. Fire insurance should be taken on all buildings. Fire insurance should be taken on all buildings. Fire insurance should be taken on all buildings.

TEA CUP TOPICS

Short, fingerless gloves, like mittens, are correct for summer wear. They bring a general acceptance of the word when they match the belt of a silk frock, in red, green or blue, for example.

Detachable sleeves give a "dressy" note to an otherwise simple outfit. For summering merely of a frill, worn over the elbow, or the fingerless lid glove that tones with the ensemble.

There are rumors that manufacturers with loving care are designing kid shoes for fall that will resist the effects of water. It might be even reasonable to think that some day sneakers will come back with the ribs, join and leg of veal, lamb, mutton or pork.

Stem roasts made in the oven can be made with the chuck or shoulder, with the breast of veal, with the ribs, loin and leg of veal, lamb, mutton or pork.

Whites of two eggs, one-half pound almond paste or home-ground almonds, one-eight teaspoon salt, two-thirds cup powdered sugar, four the sugar into the almond paste or ground almonds, then gradually add the whites of eggs, which have been beaten until stiff. Add the salt. Work until perfectly smooth, drop the mixtures from the tip of a spoon, or pass it through a pastry bag and tube onto a baking pan covered with waxed paper, and bake in a slow oven for 20 to 30 minutes.

When cooking cabbage, turnips and other strong flavored vegetables, remember to use enough water to cover them completely. The pot should be left uncovered.

An oak stair railing may be cleaned and polished by first brushing off with soap and water, then scrubbing with fine sandpaper and rubbing with one part turpentine.

If you've been indulging in a deoxy organ and think the pot is good for roasting else, try this: Fill the pot with water and two generous handfuls of oatmeal. Let this boil slowly for some time and the pot will be free of the dyeing substance.

EDITORS ARE HOME FROM ONE OF BEST OF SUMMER OUTINGS

Michigan newspaper publishers have during the past few days returned to their desks in the various parts of the state, finding it difficult indeed to resume their normal activities following their three day summer outings. The Association members and their families enjoyed the recent session of the legislature from both a Democratic and a Republican standpoint. Trustmaster Schuyler Marshall, publisher of the Clinton County Republican-News, said to go that there was no discrimination between parties and he handled his duties very satisfactorily. Senator Leon Case, publisher of the Waterford Record and Democratic Party leader in the state since during the past session, gave an interesting and detailed account of the work of the legislature from the Democratic standpoint.

It was President Vernon Brown, publisher of the Ingham County News, and president of the Michigan Press Association as well as the Republican leader of the legislature who discussed the work of the legislature from the Republican side.

These two addresses alone were worth a trip to Frankfort. Other brief and interesting talks were made at the banquet, but with this event over all formally ended and for two full days following there was sightseeing and pleasures such as the Association has seldom enjoyed.

One day was given over to a trip through the beautiful Leelanau peninsula, the "little finger" of Michigan. News of the winding highways along the lakes and over the hills, with Lake Michigan and Grand Traverse bay now and then flashing into view, provided plenty of happy exclamations from the visitors.

A fleet of Ford cars provided by the Ford Motor company placed at the disposal of the editors at Frankfort, were used on the trip. Added to the amazing beauty of the peninsula, the delight of riding in the new Fords, there wasn't much more that the editors asked for to make the trip a perfect one.

Editor Dayton Selby of the Leelanau Enterprise and the business men of Leelanau saw to it that the visitors arrived at the beautiful New Nichols Hotel in time for dinner. And what a dinner it was. President Vernon Brown led F. P. Rosman of the hotel and the business men of Leelanau who their hospitality was appreciated in the fullest by the visitors. Editor Selby briefly told of the beauties of that section.

Through the urging of Editor Selby, the visitors were taken to the after noon itinerary that carried them to the very tip of the peninsula and they were not sorry they had so. They visited Northport, saw the beauties of this community and the surrounding country, leaving to Frankfort in time to the banquet given in picture shows as well as other entertainment that had been arranged.

The return trip sufficient time was taken to visit some of the local waterfalls, where a great stream of water flows 20 feet into the sea. The road was discovered some 20 or 30 years ago when an effort was made to build a road. It is now a never varied and it provides a wonderful sight at any time of the day.

Then came a breakfast the following morning at Beulah, the purpose of the citizens of that slightly located little community just at the east end of sparkling Crystal Lake. Editor Johnson of the Beulah Record saw to it that the visitors enjoyed a breakfast such as a prosperous little community like Beulah might expect to provide.

Barely had the breakfast hour passed when the climax of the visit to Beulah, Michigan and the Leelanau peninsula came. Operating out of Frankfort is the great level of car ferries of the Ann Arbor railroad, great girders of steel and power that crush their way winter times through thickest ice, and raise during the summer of waves during summering with out barely a movement of the great ships from their even keel.

On the powerful Walrus, the 180 foot long flagship of the fleet, the publishers, their families and friends as well as hosts of Frankfort sailed forth from the harbor of Frankfort on one of the most beautiful of cool days that northern Michigan experiences during the summer time.

The Frankfort school band and the school orchestra, great girders of steel for the trip out to the Manitowish islands and beyond Sleeping Bear point. Only one in many a year can see the coast against the open sea, which the wind comes. The amount of dust required per acre will run from 15 to 25 pounds each application, depending on the size of the vines, and the care used in ad-

justing and operating the machine. Leafhoppers seem to be especially fond of green Mountain potatoes, where this variety is grown next to some Barab's most important that the Green Mountain cover should not be sprayed or dusting when the bugs are killed. If the leafhoppers are as bad again this season as they have been for several years past, those farmers who keep their potato fields well protected with Bordeaux mixture will save on the average, about a third of their crop.

MAN WANTED—GOOD POSITION FOR RESPONSIBLE MAN IS NOW AVAILABLE

An old established company is looking for a permanent sales representative in the territory. This is a chance for a man with a good education and a few years experience in the territory. It is a financially responsible position with a good salary and a chance for advancement. The company is well established and has a large volume of business. The position is in a growing territory and offers a fine opportunity for a man who is ambitious and energetic. For a personal interview, call on Mr. J. H. Smith, 1234 Main Street, Detroit, Mich. This is a rare opportunity and should not be missed.

Many Looking For State Positions

Lansing, Mich., July 13.—More than 1,000 applications for positions with the Department of State or with the Sales Tax Commission, of which he is a member, have been received by Secretary of State Frank B. Fitzgerald within the last week. Mr. Fitzgerald is the only elective Republican state official now in office and a large majority of the applicants were state employees who had been discharged from other departments on July 1.

During the last two year period the Department of State reported

mounting a small barrel or box to be turned with a crank. See that some battle barrels are nailed in side to aid in moving. A cement bucket would be alright if cement but one used for cement would be likely to get pieces of dried cement out of the dust, and this does not do the dust.

Applying the dust. Start dusting when the vines are from four to six inches high, and go over the field every week to ten days. It is more important to get the dust on thoroughly than to use a lot of it. While the vines are small you can dust two rows at a time, using both nozzles. The chow of dust will hit the ground and roll back up, completely enveloping the vines before it settles. This is correct, as it is most important that the under sides of the leaves be covered. Later, when leafhoppers do their damage, they work mostly on the sides of the leaves. If there is plenty of dew on the leaves, good coverage can often be secured dusting with a little wind, providing the wind is blowing across the rows, and the duster is used on the side of the row from which the wind comes. The amount of dust required per acre will run from 15 to 25 pounds each application, depending on the size of the vines, and the care used in ad-

Justing and operating the machine. Leafhoppers seem to be especially fond of green Mountain potatoes, where this variety is grown next to some Barab's most important that the Green Mountain cover should not be sprayed or dusting when the bugs are killed. If the leafhoppers are as bad again this season as they have been for several years past, those farmers who keep their potato fields well protected with Bordeaux mixture will save on the average, about a third of their crop.

It Takes More Than Salts, Calomel, Mineral Waters, Oils, or Laxative Pills To Arouse a Sluggish Liver

They Give Only Temporary Relief From Constipation and Biliousness. Because They Have No Effect Whatever on the Liver or Its Production of Bile.

If bile is nature's laxative and your stomach and bowels require at least one quart of fresh bile every day to keep them clean, pure, free from fermentation, gas and disease germs. When your liver becomes sluggish the bile stagnates and stops flowing freely. The contents of your bowels become the breeding place for germs and poisons; your food does not digest. Just ferment and decays in the bowels. The blood absorbs these poisons and you suffer from constipation, gas, sick headaches, biliousness, nervousness and sour stomach.

Sargon Soft Mass Pills remove the cause of this condition in nature's way. They are not like any other medicine you have ever taken. They are so gentle, thorough and natural.

A. S. PUTNAM & CO. Drugists

The present need for making a dollar go a long way

—has taught many people that practical economy can be accomplished by using the advertising columns of The Pioneer-Tribune as their BUYING GUIDE! These advertisements perform for home-makers a weekly ECONOMIC SERVICE . . . gives them an opportunity to plan sensibly and spend wisely.

And not only do these advertisements help you in attaining PRACTICAL ECONOMY but they are a convenience as well. When you plan your buying with their aid you save shopping time as well as shopping money. PLANNED BUYING WITH THE PIONEER-TRIBUNE AS YOUR SHOPPING GUIDE WILL SAVE YOU TIME AND MONEY

The Pioneer-Tribune

SCHOOLCRAFT COUNTY'S BEST ADVERTISING MEDIUM

Only a STRAIGHT EIGHT can give Straight Eight PERFORMANCE!

PONTIAC—the Economy Straight Eight— is one of the outstanding successes of the year. It is showing the way to big-car comfort and Straight Eight performance at low prices and with operating economy.

Pontiac is the Economy Straight Eight. Ask any Pontiac owner—and you'll find it is giving 15 miles or more to the gallon and gives that not only for a few thousands of miles, but for many thousands after you'd expect it to show signs of wear.

One of Pontiac's outstanding features is Fiber Controlled Ventilation. Many say no car can be considered modern without it. Try a demonstration. Let Pontiac itself convince you that it has no equal at or near its price—that it is the outstanding car of the year in every detail that goes to make a car modern and desirable.
