Among those who attended the Executive meeting last Thursday night at which Congressman Prentiss M. Brown was the principal speaker were J. J. Gilligan, Geo. C. Taylor, J. J. McManis, Y. P. Deegan, Frank Fouchard, Sherwood, all of Manistique;

and William Brain and W. W. Ackley, of Germfask.

Some fine specimens of German Brown trout are being caught in the county this year. Fridolf Danielson, local contractor, went out on a fishing party for a few hours and brought back several large browns. The biggest tipped the scales at about two pounds. The scale of the stream was not announced for publication.

H. H. Anderson, project engineer for the state highway department in this city, represented Manistique Post No. 83, of the peninsula convention held at Bessemer on Saturday and Sunday.

Mr. Anderson took third place in the double in the Legion trap shoot. The next convention will be held at Menominee.

New Reels Depict State Wild Life

Lansing, July 22.—Five new conservation motion pictures, production of which was postponed from 1932, are expected to be released in the fall by the Educational Division of the Department of Conservation.

The pictures were taken more than a year ago but because of lack of funds it was not possible to make them available for release. However, because of the increasing demand from schools, clubs, churches and other organizations it is probable that a few prints of each will be included next fall in the loan service operated by the Department.

The new pictures are expected to include two reels showing all kinds of Michigan lake and stream fishing with illustrations indicating how fish may be identified. One reel will show various Michigan fish-bearing animals. Another will include Michigan game birds. The fifth reel will be of deer hunting in Michigan, designed not only for hunting interest, but to show how and how not to hunt; how to properly dress a deer, attach the seal, and other pointers on deer hunting.

Addition of the five reels will bring the number of reels available for free loan in Michigan to 21.

PASTURE SAVES CASH ON DAIRY FEED BILL

East Lansing, July 27.—Dairy cows can be fed on pasture at one-third the cost of first normal alfalfa in the barn but it is first necessary to secure the pasture before starting to save feed bills.

Wendell Mary and Alva Reid, Judith and Ruth Dufatoom, Iva Rennell, Harry Aiken, Evelyn Kerns, Annie Knudsen, Maren Balis and Grace Little.

Misses Nora Burrell and Josie and Tena Ross spent Saturday and Sunday morning at Rexton as the guests of Alex Ross. The ladies report that they caught forty fishes.

Who practically everybody is aware of the fact that each county has a Drain Commission, but we know that the Department of Agriculture is a Division of Drains, the Chief of which is a member of our county Drain. Further, the Department of Agriculture has a Division of Drains, the Chief of which is a member of our county Drain. Further, the Department of Agriculture has a Division of Drains, the Chief of which is a member of our county Drain.

STEEL ALONE IS NOT ENOUGH!

—neither strong enough, nor safe enough, nor quiet enough for the body of a quality car like CHEVROLET

STEEL BODY plus equals

HARDWOOD REINFORCEMENT equals

There is only one type of body construction which Chevrolet will permit on the chassis of the cars it builds: That's the type which every test—and every experience has proved to be the safest, strongest, and best. Not steel alone, because steel alone is not enough. But a Fisher body of steel reinforced by hardwood! The same kind of construction used on practically all the highest-priced cars in America.

Chevrolet well knows that steel alone has one distinct advantage: it's cheaper. Steel alone is strong up to a certain point, BUT—beyond that point steel alone will bend and crumple under severe stress or shock. It takes the strength and supporting solidity of a hardwood reinforcement to give you the full protection and full satisfaction you want in a motor car body today.

If you're thinking of buying a new low-priced car, better watch this matter of bodies, and watch it carefully. Insist on steel reinforced by hardwood! Fortunately, the only low-priced car with this preferred type of body is also the only car with a proven valve-in-head six; with Fisher Ventilation; Cushion-Balanced Power; a Starterator. That car is Chevrolet—America's most economical automobile.

Experiment With Barley And Oats

Greater disease resistance with high yielding ability of barley and oats is the goal of H. R. Churchill, research assistant in farm crops at the Chatham, Mich. station of the Michigan State College. Mr. Churchill promises to show some of these important experimental results at the Farmers' Round-Up, August 12.

Some varieties of plants, especially those of the oat family, have certain characters of disease resistance that are low in yield, susceptibility or some other necessary character. The plant breeder crosses this variety with some other variety with all desired characters, such as disease resistance. From this cross he hopes to obtain a new variety with all the good characters of both parents. The plants must be grown and studied to obtain this result. Mr. Churchill will show breeding work of this type to the visitors and barley.

Other new projects announced by Mr. Churchill include a rate of return for legume crops from one to three bushels per acre and the same test for Surtan Barley. Winter wheat varieties are being planted by individual plant selections. In addition an experiment in wheat rust and winter wheat breeding is being carried on in cooperation with the United States Department of Agriculture.

Among the older projects Mr. Churchill is continuing, are the yield test of Spartan as compared with other varieties of wheat, the effect of different varieties of barley and yields of barley is being studied by treating of several different varieties with formaldehyde, cresol, copper carbonate and smut. The same treatments are being used on Wintering Anthoni, logold and Markton oats and is being studied on smut and yield tests. The grain is being yielded in field pen varieties: English, Greenville, and O. A. C. 181.

Strawberry Test Plot At Chatham

One of the eleven strawberry variety tests in the Upper Peninsula is being held by interested growers of the Farmers' Round-Up, August 12, according to G. W. Putnam, director of the experiment station. The test was started last year by Mr. Putnam when three varieties, the Danzig, Premier, and Arona were selected. The yield as well as the time of ripening of the different varieties will be studied.

This year yields of each variety as well as dates have been kept and will be given by Mr. Putnam to Round-Up visitors. The effect of straw mulch will be explained since about one-half the plants of each variety were mulched.

Early in May this year the plot was further increased by ten varieties sent by the Horticultural Department of East Lansing. These varieties are: Empire, Beauty, Big Late, Late-berry, Kanter King, Brandywine, Arona, Benckman, Wilson and Gem Everbearing. Yields and dates of ripening will be studied on these varieties beginning next year.

"We will be glad to discuss different phases of strawberry growing. Those anyone interested during the Round-Up," says Mr. Putnam. "We are using the hill system of training plants, not because we consider it superior to the matted row, but because it is easier to keep varieties separate and accurate records which are important in experimental work."

Commercial Fish Laws Are Changed

Lansing, July 27.—A new standard upon which to base the amount of the license fees, shortening of the closed season on certain species of fish; establishment of a boundary line between Lake Michigan and Lake Huron; and placing white bass on the commercial list, were among the changes made by the 1933 session of the Legislature in Michigan's commercial fishing laws.

In past years commercial fishermen paid a minimum license fee of \$10 a year, gradually increasing in proportion to the tonnage of the boat or boats used in the fishing operations. Under the new law, the license fee paid by a fisherman will be based on the average

RIVER LINE

(Suevic Rowland, Correspondent.)

Dr. and Mrs. Dayton held a musical service at the Brick school house Sunday, July 23, which was well attended and enjoyed by all.

Walter Alexie of Calmar, hauled hay from Billy Parker's farm this week.

Jack Joly crew called at Maple Grove Sunday.

Bill Mansfield helped H. C. Ackerman haul hay Monday.

Postmen made a business trip to Manistique Saturday.

NEW FARM PLANS TO BE DISCUSSED

East Lansing, July 27.—Michigan farmers visiting the campus of Michigan State College will hear John N. Norton, former congressman from Nebraska as the principal speaker on the Farmers Day program Friday, July 28.

Mr. Norton is now president of the Nebraska farm bureau and his acquaintance with farm legislation and with the actual possibilities of adapting it to solve farm problems makes his appearance in Michigan especially timely. His state is now preparing to adjust its wheat acreage to the production allotment plan and a message about the Federal measures for raising farm prices has been sent to the Legislature.

Members of the State College staff will talk briefly on the afternoon program, will be present at various points of the College grounds to explain experimental work with crops and livestock, and will be in the department offices to meet any farmers who have individual problems to discuss.

Afternoon hours of Farmers Day will be given over to inspection of the college grounds and expert advice to contests. The fishing and driving contests will be staged just before noon. Country choirs will be competing in the Peoples church most of the morning.

Music for the afternoon program will be furnished by the Eaton county 4-H club orchestra and by the winning choirs. Another diversion will be the diamond ball game between selected teams of livestock men. This game will be played in the afternoon near the bleacher seats erected for the speaking program.

Henry Ford Dearborn, Mich.

IN ANSWER TO A LADY'S LETTER

A lady writes to say that she does not understand why an 8-cylinder car does not cost more to run than a car with fewer cylinders. She refers to my statement that our Ford V-8 develops more power on a gallon of gas than any car we have made.

The use of 8-cylinders does not mean the addition of two or four extra fuel consumers. It is not, for example, a 4-cylinder engine multiplied by two. Our 8-cylinder engine takes the fuel supply of an ordinary 4-cylinder engine and divides it eight ways. And why?

By reducing four larger explosions into eight smaller ones, we get the engine smoothness and quietness. Eight-cylinders indicate the way the gas is used, not the amount. It is just the difference between going upstairs in four long jumps or in eight ordinary steps.

Two things use up gas—bad engine design and useless car weight. Besides having an engine that gets a high percentage of power out of the fuel, the Ford V-8 has a light, strong body and chassis so that no power is wasted in moving excess weight.

The only extravagance about the new Ford V-8 engine is in the building of it. The extravagance is ours—the economy is yours.

The whole question of car economy needs clearing up. An economical car gives economy all round. Price, operation, upkeep, all play their part. If what you save on gas you lose elsewhere, that is not economy.

As to upkeep, our dealers say that in recent years the improved quality of Ford cars has cut down their repair business 50 per cent.

As to price with quality—judge for yourself.

As to economy, here is the record of a stock car three weeks out of shop in Oklahoma:

On a run of 10,054 miles at the rate of 1,000 miles a day—the Ford V-8 gave 19.8 miles per gallon of gas. Not a drop of water was added to the radiator. The oil was changed once in 1,000 miles.

That should answer a lot of questions.

July 24th, 1933.

Message Exam For Government

The United States Civil Service Commission will accept applications until August 8, 1933, for the positions of assistant and junior messengers in the Department Service, Washington, D. C.

The entrance salary for assistant messenger is \$1,680 a year, and for junior messenger \$800 a year, less a deduction of not to exceed 16 per cent as a measure of economy and a retirement deduction of 1 1/2 per cent.

As the states of Maryland, Virginia, Iowa, New Hampshire, Vermont, and the District of Columbia have already received appointments in excess of their quotas under the appointment, residents of these states and the District of Columbia will not be admitted to this examination unless they submit documentary proof that they are entitled to military preference.

THE SESSION ENDS

Michigan's 1933 session of the legislature is now officially at an end. Its record can be said to be neither good nor bad. The legislators should not be subjected to acrimonious criticism or fulsome praise.

A GOOD START

The last legislature passed an old age pension bill. We do not favor pensions but we do favor old age insurance and in the strongest kind of terms. It should be compulsory with the state handling the fund and with every person in the country participating in the cost and in the benefits.

Study Control Of Potato Scab

An attempt to control soil acidity in order to reduce potato scab is being made at the Upper Peninsula Experiment Station by Dr. James Tyson, research assistant in soils for the Michigan State College. Dr. Tyson will show Round-Up visitors plots on the station farm which, before treatment, were alkaline, causing scab on potatoes. Scab is especially detrimental to market value. The treatment by Dr. Tyson this spring was with sulphur, inoculated sulphur, and pyrogenous acid.

SEEN AND HEARD IN OUR TRAVELS

The heavy rains during the past can be secured at any time, if you work did a great deal toward saving our brook trout. Prior to the rains the temperature in some of the streams was so high that trout could not survive, we were told by an employee of the conservation department who is connected with fish planting operations. The temperature in some streams registered as high as 80 degrees. Fortunately, these streams were not in Schoolcraft county but in counties farther west. If trout die from unusually warm water we have saved them. One would naturally think that you would see them in the streams but our informant told us that they are devoured by nighthawk and the various species of birds that prey on fish. German brown trout stand the warm water but a high temperature is fatal to brook trout, we are told. One thing has been noticeable since the heavy rains, according to local fishermen. The trout are biting much better and they seem to have new life. During the long hot spell they seemed to be dormant and anglers were reporting very poor luck. The rains were a great aid to conservation in more ways than one. A number of bad fires were also extinguished.

Last week we had mention in these columns about the outsiders who visit the city every summer and make a specialty of sharpening lawn mowers, cleaning chimneys and furnaces and doing other odd jobs. We pointed out that many local unemployed men could do the work just as well and, perhaps, some of them a great deal better. But it seems that most men do not go out after the jobs. Since our comment last week we have been informed by a local farmer, C. E. Underwood that local labor will be available for any kind of this work by simply calling the firm which has qualified persons for these various jobs have left their names at the fire hall and

REPORT MADE ON GAME VIOLATIONS

128 Arrested During June But Only 25 Are Given Jail Terms East Lansing, July 27.—More conservation law violators were suspended sentences or were placed on probation than paid fines or served terms, according to a report issued today by the Department of Conservation, covering law violations in Michigan for the month of June. The Department's list of apprehended violators includes 128 names, of whom 25 paid fines, 25 served jail terms ranging from five to 75 days; 21 were placed on three months to a year probation and 44 obtained suspended fines or suspended fines and costs. The total amount collected by justices of the peace in fines from conservation law violators in June was \$406. An additional \$339.66 was paid in court costs. The 25 sentences to jail served a total of 425 days or an average jail term of 20 days. While the number of persons apprehended for conservation law violations remains the same as slightly less than last year, the percentage paying fines or serving jail terms has been gradually decreasing according to the Division of Field Administration of the Department. The proportion of those being placed on probation or obtaining suspended sentences has been increasing. The list of violators includes five Westford County men, convicted of violating the law on June 25. They were sentenced to pay \$28 fines. Under an amendment to the general inland fishing law adopted by the 1933 legislature, the minimum penalty which may now be levied on anyone found guilty of dynamiting fish is \$50, or a jail term of 30 days. Of the 128 violators reported, 117 were violations of the general law and only 11 were for violation of the game laws. The most frequently violated regulations before the opening of the season. Possession of game fish out of season ranked second in number with 22 illegal "netters" reported. The number of persons convicted of violations of various conservation laws during June were: Fishing in closed season 30; carrying firearms in game areas without a permit 6; taking trout without a license 2; killing a deer out of season 1; dynamiting fish in position game areas during the closed season 27; illegal use of nets to inland lakes 28; possession of game fish 18; trapping song birds 8; netting 1; possession of undersized game fish 2; non-resident fishing without a license 1; possession of undersized commercial fish 4; selling undersized fish 4; illegal possession of frogs 1; shooting at pheasants during closed season 1; possession of a raccoon during the closed season 1.

HUGH REWARD READY FOR WHEAT GROWERS

East Lansing, July 27.—Benefit payments for wheat acreage reduction in Michigan amounting to \$2,600,000 a year are dependent upon the full cooperation of State farmers with the federal plan for wheat adjustment, according to B. W. Allen and H. W. Gilbertson, U. S. Dept. of Agriculture, who talked to Manistique county agricultural agents at Kalamazoo and at Flint. The average Michigan annual production of 15,000,000 bushels of wheat would qualify the growers for the huge sum but this amount will be reduced proportionately by the number of farmers who prefer to play a lone hand in the wheat game rather than to cooperate with their neighbors. The members of the U. S. Department of Agriculture explained that the purpose of the federal plan is to bring the price of wheat to a point where it has the same purchasing power as it had in 1914. This is to be done by making it profitable for wheat growers to reduce the total acreage so that plenty is raised for domestic consumption but no burdensome surplus is raised to depress the price of wheat sold. Mr. Gilbertson stated that the increase in wheat prices to farmers would result in benefits to the classes of industry as the added purchasing power of farmers would be reflected in sales of more manufactured goods and for increased pay rolls in factories. County agricultural agents in South-Humboldt high school teachers will address local meetings in their counties to explain how the adjustment plan can be operated. Plans to be administered by the Michigan counties will be selected by farmers following the local meetings.

MOVIES

Great Fraternity Act Big Emotional Film: Sunday Monday. Two of America's most glamorous stars and a newcomer who seems destined to enter the show-biz scene prominently are seen in "A Bill of Divorcement," the new Radio Picture, showing at the Grand Theatre Sunday Monday. John Barrymore and Billie Burke, contemporaries through years of this country's most colorful period of the theatre, are seen together for the first time in this powerful picture taken from the famous play by Clarence Dunsen. Katharine Hepburn is the newcomer about whom Hollywood at the moment is buzzing with praise. Barrymore, Miss Hepburn and Miss Burke are supported by a distinguished cast which includes: Fred Steiner, Henry Stephenson, Paul Cavanagh, Elizabeth Patterson and Gayle Evers. Geo. Cukor directed.

Marksmen Covered "Half-Naked Truth"—Saturday

Three armed gangs, equipped with the latest high-powered big game rifles, remained on duty during several sessions of the "The Half-Naked Truth," during its production at the RKO studios, to guard against any possible outbreak by a 180-pound lion. "The Half-Naked Truth," filmed from Ben Markson and H. N. Markson.

NOTICE

All persons having bills against the Schoolcraft County Poor Commission should have them in by August 1st if payment is to be made at August meeting.

SCHOOLCRAFT COUNTY POOR COMMISSION, Walter Moon, Secretary.

At Sunset Beach on Indian Lake

You will find every facility for the finest and most enjoyable vacation you have ever had. Immediate relief is the reward of many who summer here. No ray weed. The pure ozone of the North woods and smell of pine and balsam gives new life and vigor to hay fever sufferers and run down workers.

Easy to Reach Although there is no over-crowding, and the beach and woods are in their natural state, Sunset Beach is only one-half mile off U. S. 2 and four miles from Manistique by good auto road.

Fishing The fishing in Indian Lake is unsurpassed. Northern Pike, Perch, Walleye, Blue Gills, Bass, Bull Heads, and there are many streams nearby where brook trout abound.

Boating For boating, canoeing, motor-boating, or sailing Indian Lake cannot be beaten. The tributary streams afford opportunity for canoe trips, and the Lake is large enough for motor boating and sailing.

Golf The Indian Lake Golf Course is one of the finest in Northern Michigan and has a beautiful scenic setting in a hardwood forest on the shores of the Lake.

Side Trips Vacationists at Sunset Beach are located in the center of the Northern Peninsula within a two hours' ride of practically every point of scenic interest.

Cottages and Lots at Sunset Beach

A fine opportunity to combine pleasure with an investment. Real estate values are very low and due for a turn anyhow. Any inflation program or depreciation of money value is bound to increase real estate values. The "New Deal" policy seems to be shorter hours, more work, and more pay, which will give people more money and more time for recreation and enjoyment. Real bargains in cottages, lots, and camping locations at reasonable terms.

See Wm. S. Crowe, Agent Phone 6 Manistique, Michigan

Swanson's original story adapted by Corey Ford and Bartlett Crohmack, comes in the Greta Garbo Saturday. It was suggested by the Hays Office. Reichenbach biography, "Phantom Fane."

ANNUAL MEETING AND FINANCIAL REPORT OF THE BOARD OF EDUCATION, DOYLE TOWNSHIP, YEAR ENDING JUNE 30, 1933

The meeting was called to order at 10:00 o'clock by the secretary of the board, William Rice, President of the board, John Reid, not being able to act for the day, it was moved and supported that William Reid act as chairman of the Election board. Motion carried. Inspectors of election: William Reid, Mary Plant, August Carlson. Clerks: Basil Reid and William Rice. Moved and supported, the polls be closed for one hour for dinner. Motion carried. At 4:00 o'clock the meeting was declared open for any business that might come before it. Minutes of the previous meeting were read and approved as read. A motion was made by Isaac Pawley, supported by Basil Reid, that the board be authorized to pay the extra tuition for high school pupils. Motion carried.

At 5:00 o'clock the polls were closed and votes canvassed as follows: There were 11 votes cast for trustee, of which John Bergman received 11. There were 11 votes cast for treasurer, of which James Hubble received 10, and Isaac Pawley, 1. James Hubble receiving the greater number of votes was declared elected.

Financial report table with columns for Balance June 30, 1932, Refund, state tax, Primary money, Quarter ending June 30, 1932, Quarter ending Sept. 30, 1932, Quarter ending Dec. 31, 1932, Voted tax, Library money, From State Road Com., crossing school property, Mueller township, tuition, May 12, 1933—2nd Turner Fund, June 26, 1933—2nd and 3rd 10% Turner Fund.

DISBURSEMENTS table with columns for Teachers' salaries, Janitor and fuel, Tuition, high school, Transportation, Text books and supplies, pupils, Supplies for school, Officers' salaries, supplies, Publishing.

Bathing and Water Sports

The sand beaches of Indian Lake are fitted everywhere, and the Beach at Sunset is conceded to be one of the best on the Lake. Smooth sand gradually increasing in depth, 180 feet safe for children, with no sudden drop-offs or deep holes.

Camping

The hundreds of acres of woodland and many secluded nooks along the lake shore provide many ideal camping locations. For a small fee you can be guaranteed privacy and seclusion and the use of a location for the season.

Natural Beauty

The 1,500 or more acres of rolling woodland back of Sunset Beach are enchantingly beautiful. Forests of birch and evergreen, every variety of tree, shrub and plant life. The luxuriance and profusion of the forest growth in Northern Michigan is astonishing to people from farther south.

Berry Picking and Hiking

Over five miles of woodland trails have been built at Sunset Beach, and a main attraction for cottagers is hiking over these trails and picking berries which grow wild in the greatest abundance.

Congenial Company

The people who patronize Sunset Beach are neither the extremely wealthy class on the one hand, or the auto hobo on the other. Many University people, teachers, and professional men have found the atmosphere of quiet and refinement extremely congenial, and it is very popular with young people.

News From Michigan's Public Instruction Dept.

Lansing, Mich., July 27. Dr. Ralph Van Hosen, director of the Department of Public Instruction, has today as supervisor of secondary education.

Dr. Van Hosen is a graduate of the Central State Teachers College with higher degrees from the State University where he supervised the supervision of secondary schools and teachers training.

He has taught in the rural schools of Clinton county and was principal at Wellman, Mantou, and Alma. He was later on the faculty at Ypsilanti Normal College, from there to the State University.

County Normal
Because of the serious financial situation in many school units of the state, the county normal boards have taken action to discontinue the county normal training schools, and serious doubt as to the possibility of continuing has been expressed in five other counties.

The counties taking definite action for closing are: Branch, Chippewa, Jackson, Kalamazoo, Leelanau, Livingston, Manistig, Mecosta, Newaygo, and Saginaw.

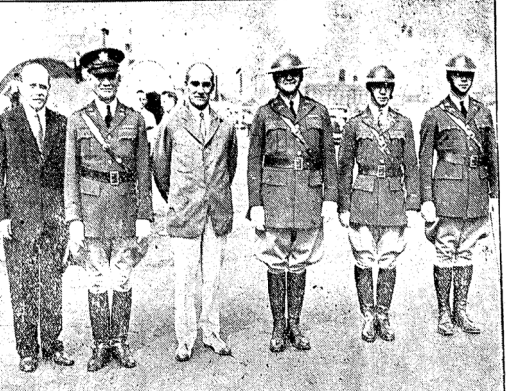

The discontinuance of these county normals is in harmony with the general feeling that the number of teachers produced must be lessened if a satisfactory minimum wage is to be maintained. It is also in harmony with the general educational principle that teacher training standards should be raised so that at least two years' preparation of adequate character would be required for a teacher's certificate.

A curious inconsistency in the financing of the county normals for this year lies in the fact that reduction by the legislature was made in the sum of \$1,500 allocated to each county normal teacher by law; while at the same time the general appropriation is only half sufficient for all county normals collect on the legal basis.

Michigan is the only state in which the State Department of Public Instruction inspects the business colleges. H. S. Norcross, director of the department, has announced that the department of Kalamazoo schools is the official accrediting representative working in connection with the state department.

Legislation
An enactment of the legislature has eliminated the authority of the state department to inspect school buildings. Advisory service will, however, be provided, and Sunday's session will be held.

The Governor Goes to the World's Fair

These are busy days at the splendid Michigan exhibit at the World's Fair in Chicago and for the Governor of Michigan who has to do the honors for the state on all important occasions. In the upper panel, Governor Comstock is shown after the review of the troops at the Fair on Michigan Day. Left to right, Lt. Gen. Smith, who represents the Michigan delegation; Major T. H. McCarran, Lieut. Col. A. Carroll, Commandant of Camp John Whistler; Governor Comstock; Major T. H. McCarran, Lieut. Col. A. Carroll and Lieut. W. C. Hall.

In the lower right panel, the Governor smiles with Marion Evans, the Eastern Michigan Blossom.

It is a depression is an important one. Nobody can tell when recovery will come, how much of it is due to governmental programs and how much to the healing agencies of Father Time.

Certain it is that the recovery which was interrupted last September began again in March this year after the bank holiday. Whether it is sound and lasting remains to be seen. All Americans regardless of politics hope that it is. There is a general atmosphere of "going along with the President" all parts of the country. The people are refraining from criticism to an extent unparalleled in the political history of the United States and are wishing the administration well. If there is failure and then harsh criticism it will come until another campaign has pretty generally adopted a sportsmanlike attitude of giving Mr. Roosevelt his chance. There has been no setting up of a "poison gas apparatus" as was once done by Mr. Rasbok and Mr. Michaelson early in the Hoover administration. The Republicans in Congress during the special session just ended turned the tables on their Democratic colleagues in Congress by intervening the President at least 88 per cent support although practically the same Democratic

It is true that the stock market of the Glass bill is interesting to speculate on whether or not the election did halt the recovery which seemed to have set in about a year ago. It will be remembered that just before the Fourth of July the stock market hit its low for the depression. Business depression had been existent for three years. There was a slow recovery continuing until February when there was another setback. Republican politicians like to recall the fact that the first sign of the relapse came with the election which plainly indicated that there was to be a change in the national administration in November.

Rutabaga Tests Made At Chatham

Extensive experiments with rutabagas will be one of the most interesting features seen at the Fifteenth Annual Farmers' Round-Up to be held at Chatham, August 12. These experiments, carried out by R. B. Churchill, research assistant in farm crops, are planned to determine the best cultural practices and the best adapted variety from a market standpoint.

The rutabaga has not been grown extensively in the state for many years. It is a crop which has been developed in Ontario. We hope to find out from our experiments after the plants were up. Another plot was cultivated before seedling and another after seeding, neither being harrowed. Three plots were handled the same way as the above three except that the plants were harrowed, crossovers of the row after the plants were up.

Mr. Churchill divides his experimental plots into variety and cultural way as follows: Detmar's Bangholm, Hazen's Improved, Perfect Model, Canada-

dian Gem, Webb's New Masterpiece, Good Luck, and Hall's Westbury. Each variety will be studied from the standpoint of yield, adaptability and quality.

A time of planting experiment has been started by Mr. Churchill. One lot was planted early in June, one about the middle of June, and one lot the last of the month. Spacing between the rows, and within the rows, will be varied to eight inches apart in some rows, and nine to 12 inches apart in other rows.

The effect of outplowing and harrowing on stand, weeds, pressure, and amount of blocking and thinning necessary is being studied with the idea of developing a marketable product. Information given to the 300 to 400 farmers in the acre were laid out and the Annual Meeting of the Michigan State Horticultural Society, held in Chatham, August 12, 1933. The bill which provides that all delinquent 1932 taxes could be paid without penalty, interest or collection fees until Nov. 1, 1933. The bill adopted by the legislature in adopting a bill providing that all delinquent 1932 taxes could be paid without penalty, interest or collection fees until Nov. 1, 1933. The bill adopted by the legislature in adopting a bill providing that all delinquent 1932 taxes could be paid without penalty, interest or collection fees until Nov. 1, 1933.

Legislature Okays Deferred Payment

Lansing, Mich., July 27. Seldom in the state's history has any legislature, in adopting a bill providing that all delinquent 1932 taxes could be paid without penalty, interest or collection fees until Nov. 1, 1933. The bill adopted by the legislature in adopting a bill providing that all delinquent 1932 taxes could be paid without penalty, interest or collection fees until Nov. 1, 1933.

Now AN ENTIRELY NEW SUPERFUEL AT THE PRICE OF REGULAR!

AT ALL STANDARD OIL STATIONS AND DEALERS

Today at every Standard Red Crown pump you'll find a new gasoline, wine-colored and different from any Standard Red Crown you've ever used before. . . . We want you to try it. We know you can't buy anything better unless you pay more.

The Complete Superfuel!

- Some regular gasolines equal Standard Red Crown in one or two qualities—not one surpasses it. And we believe that no one equals it in all the essentials of good gasoline.
- 1 Top anti-knock rating for its price class.
- 2 Unsurpassed in starting, acceleration or mileage.
- 3 Free from harmful sulphur and gum.
- 4 Seasonally adjusted for maximum power.
- 5 Absolute uniformity in performance.
- 6 Fresher because of Standard popularity.
- 7 Sells at the price of regular.

NATIONAL AFFAIRS

An interesting theory of depression and recovery was advanced recently at the University of Virginia by Edmund Platt, vice president of the Millard T. Marvin Company, New York. Mr. Platt said that "1932 had not been a presidential year, the recovery began then might have continued without any serious interruption so that we might have been about where we are today."

"Personally I feel that the recovery beginning in 1932 would have continued, barring the election, if the Glass banking reform bill had been put upon the statute books before the adjournment of Congress in the form in which it was reported from the Senate Banking and Currency Committee in May."

Without going into the merits of the Glass bill it is interesting to speculate on whether or not the election did halt the recovery which seemed to have set in about a year ago. It will be remembered that just before the Fourth of July the stock market hit its low for the depression. Business depression had been existent for three years. There was a slow recovery continuing until February when there was another setback. Republican politicians like to recall the fact that the first sign of the relapse came with the election which plainly indicated that there was to be a change in the national administration in November.

Test 2 New Laws In State Courts

Lansing, Mich., July 27.—The constitutionality of at least two of the acts adopted by the 1933 legislature, is to be tested in court. In Wayne county, a suit has been started to determine the legality of the state retail sales tax. Another suit is threatened to determine whether or not the chain store license tax bill is in accord with the state constitution. This act became effective after both acts had overridden the governor's veto. It provides that the individual or company owning a single store would not apply for a license or pay any tax. The total tax for two stores under the same ownership would be \$10 while the tax for 25 stores under one ownership would be \$2,570. For each store over 25, the annual tax under the new bill is \$250.

Days from a hot sun, concentrated through a window glass, set off several hundred dollars worth of fireworks in a 5 and 10 cent store window in Claremore, Okla., on the Fourth of July.

members had knifed the Republican program in 1932 plenty.

in their action that there is nothing about them to remind you that you have never taken medicine, and more remarkable of all you gradually recover your strength and no longer require a laxative at all.

Unless you have tried Sargol Soft Mass Pills, don't be misled. There are only two generally recognized substances which will actually stimulate a torpid or sluggish liver to cleanse and purify itself by increasing the production of bile. Sargol Soft Mass Pills contain both of these substances.
