

## COUNCIL ASKED TO GIVE FUNDS FOR HOSPITAL

Additional \$100,000 Sought Here; Government Will Then Give \$50,000

The Schoolcraft Memorial Hospital board will need an additional \$100,000 raised by popular subscription before construction work can be undertaken on the proposed hospital here. It was indicated at the regular meeting of the Manistique city council Monday night by A. Carin, chairman, who with other members of the board attended the council session.

If another \$100,000 can be made available locally, the federal government will increase its grant by \$50,000 to \$250,000, thereby providing sufficient funds to build the hospital. Because of the elimination of several items from the construction program, the cost of building the hospital has been reduced from \$616,000 to \$528,000. Caysia told the council. Bidders, however, promised to hold their prices firm only until 20 days from October 30.

## ELECTION BOARDS FOR CITY LISTED

Inspectors Of Election To Meet Friday In County Clerk's Office

Election boards for the four voting precincts in the City of Manistique were announced Thursday by Alex Robertson, city clerk, in addition to the board personnel, extra counters will be on duty at the closing of the polls Tuesday evening.

Inspectors of election in the City of Manistique and the township voting precincts will attend an instruction meeting Friday afternoon at two o'clock at the office of G. L. Bellaire, treasurer, city clerk, in the court house. Two inspectors from each voting precinct are required to attend, and others may be present if they desire.

The election board personnel for the city follows: First precinct—Inspectors: Elviah Young, Gertrude Harrington, Lillian Larson. Clerks: Dorothy Judd, Lillian Curran. Gatekeeper: Fern Cook.

## COUNTY'S PREMIER POTATO GROWER

William Winkel, Inwood township potato grower, is shown here, left, as he received the congratulations of Russell Watson, of the Manistique-Schoolcraft Chamber of Commerce, prior to receiving the Chamber of Commerce cup awarded annually to the champion potato grower of the county. Winkel was the title of premier grower with a yield of 631.6 bushels per acre. The award was made Wednesday evening of last week at the annual Schoolcraft County Potato Show banquet at the Knibbs of Columbus hall. Other Potato Show pictures, all by Lindreth, appear elsewhere in this issue.

## Council Sees Demonstration Of Parking Meters, Approves Start On Elm Street Sewer

The matter of installing parking meters in Manistique was again discussed at the regular meeting of the Manistique city council Monday night, but no action was taken. A representative from another meter firm attended the session and demonstrated a type of parking meter now in general use throughout many northern cities, including Manistique. Several weeks ago a different type of meter was demonstrated here. The council also ordered that work be started immediately on the New Elm street sewer. Performance of this work will involve not only the laying of sewer pipe but the installation of a electrically operated "lift" pump at the intersection of New Elm and North roads.

## Only Local Contest For Probate Judge; Thomas Kennedy Opposing Merwin

With the impetus of a presidential year and the added nationwide newspaper campaigning by both major parties to get out the vote, balloting in next Tuesday's general election is expected to be heavy in Schoolcraft county despite the fact that incumbent Republicans in county offices have no opposition on the Democratic ticket.

The non-partisan contest for the probate judge, however, only local campaign in the picture this year, is a stimulant to electoral interest in this county. Ralph H. Merwin, incumbent, is being opposed for the office of probate judge by Thomas J. Kennedy. Both have been residents here many years and are widely known.

Campaigning for state offices in this area was chiefly for the Republican ticket, although G. Mennen Williams, Democratic candidate for governor, did make a brief appearance in the city, unannounced except to party leaders. U. S. Senator Homer Ferguson was here several weeks ago, and Congressman Charles E. Potter has twice visited the county on campaign swings through the district.

Both President Truman and his Republican opponent, Thomas E. Dewey, visited the lower peninsula on their tours by special train to various parts of the country. Manistique was paid a visit by the prohibition party candidate for president, Claude A. Watson, Los Angeles lawyer and gasoline distributor, who came here in August to speak to a sizable crowd at the high school auditorium. The last time Manistique was included in the campaign tour of a candidate for national office was in the late 1920's when Henry A. Wallace, Progressive party candidate for president this year, came here. He was then vice president under Franklin D. Roosevelt.

Lists of Candidates for each of the major parties follow: State—Governor—Kim Sigler. Lieutenant Governor—Eugene C. Keyes. Secretary of State—Frederick M. Alger, Jr. Attorney General—Stanley B. White. State Treasurer—D. Hale Baake. Auditor General—Muriel K. Atter. Congressional—United States Senator—Homer Ferguson. Representative in Congress, 11th District—Charles E. Potter. Legislator—John C. ## Emeralds Play 6-6 Tie With Marquette In Season Windup

A touchdown in the last four minutes of play changed what looked like a Manistique victory to a game in the Emeralds' season finale with a strong Marquette quarter here Friday night. The final score was 6 to 6. Manistique scored first on their beautiful pass from Quirk to Smith after a steady march down the field to scoring position. The kick field to scoring position. Marquette made a real scoring threat in the third quarter, advancing to the four yard line, but unable to score on a brilliant defensive stand there and then took over to punt to midfield. It was late in the fourth with

**Come in and see the new Hudson—the lowest-built car on the highway, with beauty, riding qualities, comfort and safety only possible because of a new "step-down" design, offered by no other automobile!**

Only once in a blue moon does a car step so far ahead that it is a protected investment in motor-car value. You are invited to see just such a car—the New Hudson with "The modern design for '49"—and for years to come!

Here is truly streamlined beauty—a stunning combination of free-flowing, low-built lines that develop naturally out of a recessed floor which is the key to a basically new and exclusive design principle. The New Hudson is the only car you step down into.

The development of a "step-down" nose in an exclusive, all-steel Monocoque body-and-frame permits Hudson to build the lowest car on the highway—only five feet from ground to top-while maintaining more interior head room than in any mass-produced car built today!

But streamlined beauty isn't the whole story of Hudson's modern design.

Hudson has a lug-the-road way of going on every conceivable kind of highway. The way in which this car takes even the sharpest curves makes it a "stand-out" for roadability in any year!

These remarkable riding qualities are largely due to the fact that the New Hudson provides the lowest center of gravity in any American stock car—yet road clearance is ample! It is a widely recognized fact that the lower to the ground a car can be built, the more stability it will have and the safer it will be.

Such a delightful conformity to the road, coupled with the protection of riding on the ease which this car is built in a frame, gives to everyone who rides in a New Hudson a grand feeling of safe well-being. This feeling is further enhanced by the ease with which this car is steered, and by the restful quiet with which Hudson glides along—thanks to the superb sound control engineered into this advanced automobile.

See "The modern design for '49' today! Come in and let us show you the many advantages of Hudson's fabulous "step-down" design principle.

**Want To Join Our Club?**

Newcomers to our town are puzzled when they hear talk of "The Barbene Club." Want to know who can join, and what the purpose is. Well, the answer is: any one can join who's neighborly inclined. The purpose is simply to enjoy good food, good beer and ale, good conversation—all towards getting to know one another better.  
 Every other Saturday, at one farm or another, the pit is dug and the fire started. And by sundown, neighbors from miles around have come together—the women contributing cakes, pies, and coffee, the men contributing the meat for barbecuing, and the beer or ale.  
 From where I sit, it's this simple wholesome side of country life in America—its spirit of good-fellowship—that makes for tolerance and better understanding between neighbors.  
 As I say, Neighbor, any one can join and so come along a week from this Saturday.

Ballot. We assume that you have made up your mind, by now regarding your preference of federal and state officials.

Ballot proposal No. 1 was approved by the Michigan state legislature to avoid the Georgia experience after the 1946 election. The Georgia governor-elect died before he could take office, and a bitter dispute developed as to whether the lieutenant governor should take office or whether the legislature had power to appoint his successor. This proposed amendment would fix the succession of officers as follows: governor, lieutenant governor, secretary of state, auditor general, state treasurer and attorney general.

So far, we have not heard of any opposition to this proposal. Constitutional lawyers concede that the present charter is not clear.

Ballot No. 2 calls for repeal of the sales tax diversion amendment which is now funneling 78 per cent of the state sales tax back to local units of government—public schools, cities and townships.

In the fiscal year ended June 30, 1948, the state collected \$184,600,000 in sales tax revenue.

salary of Governor Kim Sigler, as set according to 1909 standards, is \$5,000. The same sum is earmarked for the attorney general. The 1909 constitution also fixes the salary of secretary of state, state treasurer and auditor general at \$2,600 a year.  
 How does Michigan manage to induce qualified citizens to serve as state officials? Answer: By a legislative subterfuge, upheld by the state supreme court, of allowing either an additional salary for membership on the state administrative board, or in the case of the governor, an "expense account" with no strings attached. Governor Sigler is paid \$20,000 a year on this basis. Other state officials get \$7,500 a year with the exception of the lieutenant governor who draws \$7,500 a year plus \$5 per day, or around \$1,500. Governor Devey and Governor Warren are paid \$25,000 a year by their respective states—New York and California. A further adjustment in the Governor's compensation may be forthcoming in the future when the governor's residence at Lansing is ready for occupancy.

Ballot proposal No. 4 would permit adjustment of the \$3 per day salary now paid to members of the state legislature. Since this amount is paid daily, whether the legislature is in session or not, the year's compensation averages \$1,095.

New York pays \$2,500 a year plus actual traveling expenses for a round trip once a week; Pennsylvania, \$3,000 for each session and \$500 for a special session; Illinois, \$5,000 for two year term plus 10 cents a mile traveling expense; and Ohio, \$2,000 a year plus traveling allowance once a week.

On the basis of compensation for term served at Lansing during a session of the legislature, Michigan legislators received the following salary: 1947 session, 185 days, \$639 per day; 1948 special, 67 days, \$15 per day.  
 Twenty-one states now permit the legislature to fix salaries of its members, but not for the term for which members are elected.

Other ballot issues are as follows:  
 Separate Ballot: A referendum to modify the 15-mill limitation.  
 Proposal No. 6: A referendum on the act to regulate and control the operation of foreign agencies

We veterans of World War I went into the army in 1917 and '18 to "save the world for democracy." In the last war the battle cry was the same although it was worded a little different.

The shooting war is over, we hope forever. But the fight to preserve the freedoms we enjoy in this country is going on. The alert American is ever ready to defend our great United States against the "isms" which in other countries has meant enslavement.

One of our greatest privileges is the right to choose men for public office. The right to vote is an inviolable one and should be carefully guarded. No matter what your politics are, be sure to cast your vote in next Tuesday's election.

LAST WEEK OF A&P'S 30th Anniversary DON'T MISS THIS BIG EVENT!

Thanks to Great Values Like These... A&P IS ONE OF THE TOWN'S TOP SPOTS FOR TOP-QUALITY MEATS

Attractive as A&P meat prices aren't, don't tell the whole "Super-Right" story. A&P believes that the quality of the meat you buy and the way it is trimmed are mighty important factors. For meat isn't a good value at a price if it's tough, dry or flavorless—or weighed with a lot of bone. "Super-Right" is specially selected experts from fine-quality beef, veal, and lamb, and chosen trimmers remove excess waste BEFORE after being weighed. And it's why so many smart shoppers come A&P for real meat values. Why not them? Why not get more good food for YOUR meat money, too?

POTATO QUEEN PICTURED WITH OTHER CANDIDATES

The smiling blonde miss in the center of this photo is Miss Diane Moertel, 17-year-old daughter of Mr. and Mrs. Carlyle Moertel, Hiawatha township, voted last week as Schoolcraft county's Potato Queen for 1948. Shown here with her are, left to right: Evelyn Tanguay, Cooks; Verna Smith, Gulliver; Shirley Tennant, Hiawatha township; Madeline Fountain, Cooks; Theresa Cutting, Hiawatha; Lorraine Fousher, Cooks; Sheila Myers, Hiawatha, and Betty Savage, Cooks. Miss Moertel was crowned queen at the County Potato Show banquet last Wednesday evening by William J. Sheahan, prosecuting attorney. She will go to the Upper Peninsula Potato Show in Iron Mountain next week.

That hand wringing ... the state's \$25- ... general fund balance. ... with the plight ... districts which ... had to provide for our children while beset with inadequate ... buildings, not ... and equipment, too ... increased enrollment ... and increased birth rates. ... they are the ones who ... to wring their hands in ...

Yes, the teachers of Michigan are fighting to maintain an adequate educational system in Michigan. The last ballot showed they are fighting alone. With parents and other friends of Michigan's children, it is easy to fight for an adequate education for our children.

In these days of uncertainty we need to hold tightly to those institutions of proven worth. Your every action to be-cut the life ... we'll sit and debate ... until desirable measures are instituted.

Amendment No. 5 provides that districts needing to make major changes may do so by increasing millage for a twenty year period instead of the present five year period. This is to be done by majority vote of the electorate. Sounds like an American way of doing things. Could you build a state and complete the financing in five years?

We ask the electorate to get the facts, not wild estimates. Think it over and we believe you will. If you want our school to thrive vote NO on 2 and YES on 5.

### Rocks And Fossils Of Straits Area On Display At U Of M

Once at the bottom of a shallow inland sea, the Mackinac Straits region have provided geologists with "good hunting" for fossils and rocks illustrative of the history of the earth.

The rocks and fossils of this region are the subject of an exhibit in the University of Michigan Museum of Paleontology, which will be open to the public through October. Included in the exhibit are fossils, therefore a key to the relative age typical of different geologic stages through which the Straits country has passed, color photographs of outstanding rock formations, and a series of color slides of the region.

It was some 300 million years ago that Michigan and its neighbor-

ing states were submerged under a shallow sea which drained at various times into the Atlantic, Gulf of Mexico, and Arctic Ocean.

Through the eras of geologic time, erosion from bordering lowlands was washed into this sea and deposited on the bottom. Also deposited were the shells of creatures which lived in the sea. These shells, which along with the sediments, were buried into sheets of limestone, shale and sandstone, are the fossils of modern times.

Fossils Key To Age

The kinds of sea life changed with the passing of time, the exhibits explain, and the fossils embedded in the strata of rock are therefore a key to the relative age of each layer. During at least one period of time the sea covering part of Michigan had no outlet to the ocean and, like today's Great Salt Lake, increased in mineral content until a precipitation of gypsum go that Michigan and its neighbor-

bottom.

During another period, the sea withdrew and caves were formed in the region as running water dissolved some of the salt and gypsum. Later the cave roofs collapsed, dropping miscellaneous fragments into the cave spaces. Eventually these fragments were cemented into a rock known as "breccia." It is of this breccia that such outstanding formations as Castle Rock, near St. Ignace, and Arch Rock, on Mackinac Island, are formed. Both are illustrated in the University exhibit.

The sea came and went until the time of the great forests which resulted in coal beds. Geologic evidence indicates that all of Michigan has remained above sea level since that long-age period.

### BOY, 8, GROWS 528 BUSHELS PER ACRE

Horatio Alger would make an unqualified prediction of success for eight-year-old Dale McEachern, 8, right, who this season grew a total of 528 bushels of potatoes on a one-acre plot borrowed from his father, William McEachern, Coles. Young Dale is shown here receiving a special Lions club award for his spud-growing prowess. The presentation was made at the Potato Show banquet last week.

#### Checks Water System

Check the water system, septic tank and disposal system so that any needed repairs or maintenance can be done before severe winter weather makes the work difficult. Insulate the pump room and wellhouse if there is danger of freezing. If the safety of the water supply has not been checked recently, ask the local health department sanitarian to take a sample of the water and send it to the Michigan department of health laboratories for analysis.

Now is the time to install hot lunch equipment or to see that existing equipment is in good working order. Make sure that there is adequate drainage to receive liquid waste from the kitchen sink. Provide good dishwashing equipment.

Get sand and chloride ready for removing ice from steps and walks.

Consult the sanitarian in your local health department on questions related to school sanitarian or environmental engineering.

Ask the health department for a copy of "Sanitarian Standards for Schools," a pamphlet prepared by the Michigan department of health and school administrators and board members.

### Winterize, Rural Schools Advised By Health Officers

Schoolcraft county rural schools this week were advised to winterize to check their heating facilities, hot lunch equipment, water supply and sewage disposal to assure that they are ready for the blustery wintery months ahead.

The Michigan department of health offers these winterization suggestions in a release to Schoolcraft county school board members. Invite the local fire chief, the chief of the fire bureau of the Michigan state police to inspect the school for fire hazards, poor electric wiring, and faulty chimneys and check the fire extinguishers to make sure that they are ready for use in case of an emergency.

Engage the services of a good furnace man or heating expert to check the heating system for operating efficiency. Money spent for good advice pays dividends in fire prevention, fuel savings and comfort. If possible, insulate the building.

**AMERICAN SOLDIERS BUILD SNOW HUTS**—The U. S. Arctic Infantry Patrol erects an igloo in the extreme northland. The snow in the lee of trees or rocky obstructions is too soft to be used in igloo building but packed snow in open drifts is ideal for this purpose. With the base circle complete, the men "chink" loose snow into seams, and shave the surface rim at an angle to start a second row of blocks canted inward. These "snow masons" have completed the first course.

NEWS OF OUR MEN-WOMEN IN UNIFORM
Headquarters, Far East Air Forces, Tokyo — Sergeant Norton H. Secore, son of Mr. and Mrs. Harry Secore, 116 Pearl Street, Manistique, has been assigned to the Intelligence Section of Far East Air Forces Headquarters, Tokyo.

Set. Secore arrived overseas in Mid-September following an adventurous voyage from the West Coast. He sailed aboard the Army transport Gen. Weigel, which responded to an SOS from the Philippine islanders living on tiny Camiguin Island when a volcanic eruption threatened with fiery death everyone ashore. The Gen. Weigel spent three days evacuating some 1700 islanders from Camiguin, all of whom were disembarked safely at another Philippine Island, before continuing on to Japan.

This is Sergeant Secore's second trip to Japan, as he was here following the surrender, having come up from the Southwest Pacific battlefields of New Guinea and the Philippines, where he won the Asiatic and Pacific Battle Star, the Battle Star for the Philippine Campaign, and the Good Conduct Ribbon. In '45 he was stationed outside Tokyo at the Tachikawa Air Force Base, which is still used for incoming and outgoing airplanes, although newer landing strips have since been constructed. He received his present promotion to sergeant at that time.

### Flotsam And Jetsam

(Continued from page one)  
so, and has always been going strong right up to the summer-time closing.

Every once in awhile we hear about teen-age boys getting stinko on the booze they obtain from young drinkers over 21. We hear about boys letting loose some of their 'chullence' by shooting BB guns off in restricted areas—through people's front windows or at street corner lights. Or of girls staying out too late, and maybe sampling some of the stuff the boys have access to. Halloween is coming this week end—lots of kids who might have been corralled at a party in the youth center are going to be having another kind of fun around town and some of it may not be good.

There are many plights afloat about the boys and girls today being the men and women of tomorrow. The PTA organizations meet regularly full of plans and sincere interest in promoting parent-teacher cooperation, better things for kids from kindergartens to the graduation platform. Churches are making an honest effort to provide varied youth activities in their own spheres. All of this is commendable and fine, BUT—the young girls and boys of high school age and just younger still want the youth center!

The Manistique Youth Council's executive board is making a desperate bid to get some emergency funds with which to open the center. If they are obtained—probably on a loan basis—probably have to be paid back. So—a drive for funds, at least \$1,000, must follow. There has to be some interest

### and cooperation from the parents of these youngsters who get so much enjoyment out of their own recreation spot. The center has proved itself—it's time someone, individuals or organizations of both, took a hand.
