THE CHICORA IS LOST.

Evergreen lodge, K. of P. officers, elected some time ago, were installed by Fred Cutler, Jr., D. G. C. on Thursday night. Since the fire in 1893, when much of the paraphernalia was destroyed, the lodge has done little or no work and but little interest was taken in its meetings and the lack of attendance placed it among the dormant lodges. Considerable interest is now taken in the lodge and we hope to again see it in the columns with the best lodges of the state. The regular conventions of the lodge will be held every Thursday evening.

An exchange says: "The newspaper business is the most reciprocal of all lines of trade. It not only expects life, but gives out life in return. For the patronage which it solicits and expects it will carry trash to the counters and business houses in return. Its business and the people's each, are affected and benefited by the other. In appealing then to the good people to give it their patronage and advertising patronage the newspaper is not soliciting bare favors, but it proposes to do them return all patronage it receives in measure well fitted, pressed down, heaped up and running over."

On Wednesday night last, Fred Cutler, Jr., deputy grand chancellor of the state, visited Manistique, Mich., K. of P., Thompson, for the purpose of giving instructions to the secret or unwritten work. It was 9:30 o'clock before Mr. Cutler arrived at Manistique, he having come by train to Thompson. He had no further to the east. The school of instruction lasts about two hours, every member present giving particular attention to his talk. Mr. C. proved himself to be thoroughly posted and he fulfilled the work in a manner pleasing to those present. After the talk the visiting members and officers were given a banquet at the Jettell House.

Lawyer Hayben, a well known lawyer of Ishpeming, while at Iron Mountain last week put a belladonna plaster on his forehead, to relieve the pain it came in contact with the raw surface in one place and the belladonna was taken into his blood. The toxic effects were somewhat similar to those of the opium. Mr. Hayben became violent, showing the temporary effects of Mr. Hayben, it was thought and was feared he had lost his reason. But he is entirely recovered and he will be glad to testify to the same, as Hayben is coming for the largest mining companies in the Lake Superior district, and had a large practice before the federal and state supreme courts.

Horde Greeley was right when he said: "It is strange how close men read the papers, and how they see everything that men don't like but we soon hear of it and everybody talks us about it. If, however, we happen to say a good thing we never hear of that—nobody says a word to notice it. We may say some unnumbered compliments and give him a dozen puffs, and he takes it as a rebuke to his greatness—never thinks it does him good. But if we say anything to his credit, he thinks that is a reflection on his character, and he looks quick to fly up and get satisfied about it. All our evil-doing changes in the eye of the man; apparently, get any credit for what good we do!"

The annual banquet of the Michigan club, on Washington's birthday, will be a rare feast so far enough. The Hon. Mr. McClintock will be the guest of honor and the vice presidents for the evening will consist of Gov. Rich, the republican ex-governor, congressmen, justices of the supreme court, Mayor Payne and the ex-presidents of the club. Senators McMillan and Burrows, Gov. Rich, Mayor Pingree, Hon. T. W. Palmer, Gen. R. A. Alger, and ex-Senator Patton will constitute the committee on resolutions. Followed by the law and order league, which has taken possession of the town. The adjutant men are charged with violations of the Sunday law.

On pleading guilty to a charge of keeping a disorderly house, Andrew White was sentenced to three and a half years at Marquette. He had just been cleared of the charge of murdering Jesse Merrier.

Our Teachers. The Lauding Program of recent date pays the following high compliments to the school marms and teachers: They are true, able, progressive and influential a body of men and women as can be found in any calling. The time is passed, if by the success of the women and men who were so far from the home of their profession. Men and women as capable as can be found anywhere are engaged in the sacred work of preparing children to-day for the duties of citizenship of tomorrow. It is a grand task which has of noble hands to be done.

If Daniel E. Lynn, the Port Haron man, who led a boat's crew to the rescue of the crew of the schooner William Sling last May, does not get a medal for his bravery, it will not be the fault of his neighbors. The boat capsized and all were drowned but Lynn. The government has been asked to confer on him a medal of the highest class.

W. A. Ahlich, who came from Honolulu as stowaway on a sailing vessel, says that a number of royalties had conspired to blow up the government buildings, with President Dole, the cabinet and the troops of the Republic. The plot was betrayed to the government by Claude Wetmore, a newspaper writer. The dynamite was brought from Vancouver.

It is very hard work for a country editor to promenade the floor half a night with a colicky lady to the tune of "amazing grace how sweet the sound, that saved a wretch like me" and then get out a paper full of bright ideas the next day.

We call to the attention of several of our readers to the fact that we have not as yet received the receipted bill (promise) for a Christmas gift. We own that it is a little late, but we are still in hopes that this reminder will produce the longest for documents.

The Pharoer's snorer brought, and a Jess made this plea: "Shall we, as our fathers taught, Take her life—or set her free?"

But the sailor, who discerned, At the still that they planned, No answer to their plea returned, But, smiling, he said: "When the wind blows, this man hath done: 'Shall we stay, or set her free?'"

Then these words the pharoer heard, In the sailor's steered boat: "Let the man who set her free, Be the first to reach the shore!"

The sun's heat will give out in ten million years more; it will surely give out then if it doesn't before," and he worried about it; it would surely give out so the scientists said in all scientific books that he had read, and the whole mighty universe then would be dead—and he worried about it. Mail from this hamlet departs twice a week for Little Harbor, and is received the same number of times from that place, the distance being twelve miles between the two towns, over a road rounded grand and picturesque by scenery which never fails to be charming and inspiring at all seasons of the year.

Some time I should beglad to send a history of the place, giving its past, its present, its progress, and its future prospects relating to its different branches of business and trade, condensing the style so it will be good reading for the mechanic, merchant, manufacturer and all others who are interested in the growth, prosperity and development of the whirly-knot and beautiful Lake Michigan port. Hence written, the article will treat of the religious churches and public schools in general and in particular, as no enterprise can be an established success without these essentials; the printing press will closely follow.

THIS BRAND IS AN ABSOLUTE **Guarantee** of **Excel-lence** EVERY GENUINE HUNT'S AXE IS STAMPED IN ABOVE.

The destination of the third Japanese army has been revealed by the landing of a force estimated at 25,000 on the Siantung promontory, 25 miles from the stronghold at Wei-Hai-Wei. This indicates a determination to move on the chief military post at present in the hands of the Chinese. Wei-Hai-Wei is fortified strongly by nature, and the Chinese have, moreover, fortified it with considerable force of late. But Port Arthur was likewise well protected by nature and military art, and yet it fell without any very effective resistance into the hands of the Japanese. If the latter gets possession of this valuable fortress on the southern shore of the Gulf of Pechili, they will be in practically complete control of the Chinese coast from the extremity of the Shan-Tung promontory northward.
