# Young Democrats Pick New Dealer President

BY D. HAROLD OLIVER Pittsburgh, Aug. 12 (P)—The Young Democratic Club of Amrica went down the line for the new deal program in the 1940 campaign today in concluding their three-day biennial meeting. The convention adopted resolutions urging President Roosevelt to "press forward" with his liberal" objectives and recommending nomination of candidates next

year favoring his program. A new Washington, Aug. 12 (P)—Rep-dealer, 28-year-old Homer Mat resentative Sam Rayburn, who as majority floor leader has piloted Adams, Springfield, Ill., was unanimously elected president of the house for three years, endorsed young Democrats for the next two Although their constitution

forbids endorsement of candidates for the presidential nomination, the junior Democrats applauded of his fellow Texan in a statement and cheered Mayor Edward J. isued in response to an inquiry Kelly of Chicago when he "defrom the Fort Worth (Texas) manded" that Roosevelt run again.

#### PLANES IN SEARCH STOP OVER AT **ESCANABA**

Four Army Air Corps pilots ac companied by a transport pilot of the American Airlines landed in Escanaba yesterday evening with two planes after spending several hours in the air in search for the three-masted Sea Scout schooner Oliver H. Perry, uhreported at 3 o'clock yesterday afternoon with about 50 Sea Scouts of the Chicago area aboard.

The Perry was last reported sailing west from Mackinac Island Thursday night. When it did not arrive at Chicago on schedule the report was sent out and army flyers, coast guard cutters and private craft were notified to be on the lookout for the vessel.

Flyers here reported that they had encountered heavy thunderstorms at intervals over the lake and that thick fog-banks had hin-dered their search. They plan to take off again this morning at 4:30 to continue their combing of areas which were last night hidden by fog.

## SQUALUS, SUNK 82 DAYS AGO. IS RECLAIMED

#### SIGHT BEAUTIFUL; SAILORS ABOARD FALCON CHEER

Portsmouth, N. H., Aug. 12. (A) The U. S. S. Squalus, an icewater encased steel shroud for 26 men, was reclaimed in history making fashion by the navy today from the 240-foot depth to which the submarine sank 82 days ago. In an operation that combined both beauty and a high degree of mathematical precision, an expert salvage crew first hoisted the flooded submarine approximately 80 feet from the ocean floor in a cradle of chains festooned from 10 big lifting pontoons and then towed her slowly into shallower

water. The shoreward progress of the Squalus later was interrupted suddenly when she struck a pinnacle at about low tide after being moved nearly two miles, forcing the salvagers to wait for a rise in the tide to pull the vessel free.

Navy officers kept watch on a freshening sea in apprehension lest the weather delay another lifting and towing operationprobably early next week - that would carry the Squalus into the sheltering lee of the now nearby Isle of Shoals. Once there, the job virtually would be done.

A spontaneous cheer broke from the half-naked sailors lining the rail of the salvage ship Falcon when the three big pontoons above the bow of the Squalus finally broke water a few minutes before 11 a. m. (EST) today in a cascade of sparkling foam.

Pontoons Appear Not only was the sight beautiful-the huge red and white lifting drums leaping into the clear torrential rains lashed Apalachi- sunlight in unison as though three ble through the spray of a gushing fountain-but it meant the hardest part of probably the toughest salvage job in navy his-

tory had been conquered. Almost a month ago-on July 13—the same salvage crew apparently had gained the same victory when a sudden uncontrolled surge of buoyancy in the only partially - flooded bow of the Squalus tore the craft from its lifting chains. The bow shot out damaged and the few boats which of the water, actively endangering the salvage fleet, before the veswere pounded into piers by the sel's entire 290-foot length settled back to the bottom where it first plunged May 23, 15 miles off this

## ISABELLA MAN **BADLY INJURED**

William Morrison Victim of Highway Crash On U. S. 2

William Morrison, 63, of Isabella, was critically injured, and four others suffered cuts and bruises in a highway accident on US-2 near Isabella at 5:45 p. m.

According to information given the sheriff's department, Morrison was emerging onto US-2 from a side road a mile west of Isabella where he was struck by an automobile owned by Theodore Smith of Midland and driven by Irving W. LaBre of Midland. The Smith car, going west on US-2, hit the rear of Morrison's truck, which did not stop upon reaching the trunk line highway, according to State Troopers James Smith of St. Ignace and John Roberts of Lansing, who were patrolling, and came up just as the accident oc-

curred. Mr. Smith received cuts and bruises, Mrs. Smith was severely injured in the right leg. LaBre was hurt in the right knee, and Ella Rogner, another passenger in the Smith car, was cut about the head. All were treated at Gladstone, and Morrison was taken to the Nahma hospital, where his condition was reported to be very grave.

BETTER GAS IN PROSPECT Another new development will be in motor fuels. At least one nation-wide chain of filling sta-

tions already is set up to handle a 90 octane gasoline with'n the next 18 months.

Oil company engineers are working with car engineers toward engines designed for 110 octane rating gasoline. They will be standard, it is expected here, by 1943.

The thing is practically on schedule. Three years from now filling stations may handle nothing but 100 and 110 octane gasouse the new fuel satisfactory, but the new engines will have much Not far from the trail to the higher economy and efficiency.

#### Mossyrock Reports Huge Old Fir Tree

Mossyrock, Wash., (AP)-A fir tree containing approximately 40,-000 board feet of lumber and towering 350 feet into the air was felled by woodsmen near this southwest Washington town.

The giant tree, one of the largest ever cut in this district, measured 11 feet in diameter at the base. It took two loggers seven hours to make the undercut with axes and another 44 minutes of

sawing to fell it. The fir was delivered to an Olympia, Wash., veneer plant.

River Will Create

## TRUCK DRIVERS **BEST ON ROAD**

Commercial Accidents Reduced; Private Crashes Up

The truck driver, Mr. and Mrs. Private Driver, doesn't think much of your ability to pilot an automobile safely!

For years you've called this same truck driver a road hog or worse, and screamed that there ought to be a law to keep trucks off the road.

But times have changed. And the National Safety Council has announced results of studies that show the commercial vehicle driver has greatly improved his safety record in recent years, while the private car driver has become

Since 1927 the number of trucks involved in fatal accidents has decreased 29 per cent. The number of buses involved in fatal accidents has dropped 41 per cent during the same period.

But the number of passenger cars involved in fatal accidents since 1927 has increased 21 per

Is it any wonder, then, that the truck and bus driver feel they are entitled to toss back a few opinions of their own at the private driver? "There are a number of rea-

sons why the average commercial vehicle driver is a safe driver.' savs James G. Hayden, commercial fleet engineer for the National Safety Council, Foremost among the reasons listed by Mr.

1. The commercial driver makes for safety in his driving habits.

jeopardy.

Mr. Hayden will conduct a oneduring the program of the Nation-Training to be held at the University of Michigan in Ann Arbor. August 14-26.

#### The Michigan Poll

CENATOR VANDENBERG gets the preference of Michigan Republicans by a large majority over the other native son, Thomas E. Dewey, now New York's crusading district attorney, in the Gallup poll to determine the most popular presidential prospects.

Sixty-two per cent of Michigan's Republicans favor Vandenberg as compared with 29 per cent for Dewey. Since the state has 19 electoral votes, the poll results are of some significance to those supporters of the senator who consider him to be the Republican party's logical candidate for the White House. How a man is regarded by the folks in his home bailiwick is always quite important.

On the other hand, Attorney General Frank Murphy, born in Michigan and long a well publicized public figure in his home state, fares badly in a Democratic presidential preferment poll. Vice President Garner of Ulvalde. Texas, is the favorite of 49 per cent of Michigan's Democrats, while only 25 per cent are for Murphy. McNutt runs fifth with only two per cent of the vote.

The Gallup poll also made another interesting test of political sentiment in Michigan. The results showed that 54 per cent of the voters want the Republicans to win in the 1940 presidential race, with the remaining 46 per cent favoring the Democratic party.

The shift back to Republicanism was noted with the election of the late Governor Frank D. Fitzgerald in 1936. Since Fitzgerald's death, the Republican organlzation has been somewhat disorganized and it is doubtful whether Governor Dickinson has given the party any new strength. Nevertheless, the Gallup poll shows the people of Michigan still wanting a change in the White House, presenting 'he 1940 campaign.

#### The Antitrust Laws

ONE of the most difficult battles of the prosecution for violations of the antitrust contention between the Federal Govern- islator from the canebrakes or the ragged violations are made with the intention of been the consensus that the aims of business and the aims of the Federal Government are, in a large measure, the same,

The antitrust laws were enacted to maintain and foster freedom of competition, and to protect freedom of enterprise from the blighting encroachment of monopoly. It was the intention of Congress to prevent the use of certain methods and business practices that are regarded as incompatible with the form and spirit of the Nation's economy and broadly inimical to the public welfare. The removal of restraints upon trade is intended to encourage the full and profitable employment of both labor and capital.

It is generally agreed that the statutes should be interpreted and administered in accordance with their terms and historic purpose, faithfully and vigorously but with practical intelligence and in a spirit of common sense, to the end that their beneficial purposes may be achieved without doing unnecessary harm to business and reputable trade organizations. Hit-or-miss prosecutions, instituted without due consideration of all the facts or consequences involved, are considered harmful to business and government alike.

The antitrust laws were intended to be constructive and not destructive. Their purpose is not to harass businessmen, but to give them the right to compete in a free field without favor, and to give the consumers the benefit of orderly and healthy competition. These laws are designed not only to protect the community from consciously immoral acts but from practices which are economically harmful. The community is entitled to protection from economic as well as moral wrongs. and this is a view which the Federal

Government would have the public see. Most complaints for violations of the antitrust laws are made in the first instance by businessmen against businessmen, as well as consumers generally. The majority of American people-businessmen included-believe in the general theory and principle of this legislation, and delegations in a general way, outside of strictly against any steps on his part, agree that it is the duty of the Federal Government to see that it is diligently en- of as many delegates favorable to Vanden- states having candidates of their own. It

The the Republican best qualified to take up Department of Justice, however, has no the great problems the next President will too. First 1500 elephants were ordered authority to give advisory opinions with face. The uninstructed delegates will be destroyed. Now hippopotami are over-run respect to specific agreements, the legal in position to act after deliberation, if no ning the fields. effect of which may depend more upon the single candidate enters the convention manner in which they are carried out than with a majority. upon the express terms in which they are souched. The Department cannot do so Dewey, during a week or more in mid-manded a recount.

without too greatly complicating its task and hindering the work of enforcement. The Department of Justice endeavors, however, to make its own views as to what the law requires of businessmen as clear and unequivocal as possible. In this way it hopes to be genuinely helpful to those seeking by voluntary action to eliminate business practices which are econtors, and to the general public. The Department has no authority to grant imify or suspend them. That is a function of Congress.

#### Quota System Washed Up

BECAUSE the world today is such a dif-ferent world from that of 1924, the immigration quota system enacted at that ime is having unexpected effects.

When the quota system was proposed, the background was roughly this: Congress apparently felt that immigration in the early 1900s was overly weighed with people from the south and southeast of Europe. So it set up a quota system, assigning to each foreign country an annual number of immigrants which should be a certain percentage of the number of people who had already come to the United States from the same country at an arbitrary date in the past. The date and quotas were so set as to give larger quotas to northern Europeans, and to cut the quotas from the southern and eastern European countries.

For some years it appeared to work fairly well toward the end sought. Then came the depression. Immigration stopped almost entirely. During the first few years of business depression, almost no country filled its allowable quota, and for a time there was even a flow of the immigrant tide back to Europe.

Then the dictatorships tightened their grip on several European countries, and organized religious and racial persecution as a state policy began to appear. Instantly the applications for immigration visas from the countries affected began to rise. So today we have a curious situation in regard to immigration, one not imagined by those who framed the law of 1924. It flexed for a blow, found nothing to op is this: Immigration from Central Europe. pose it. which fell under its quotas for many years, is now dammed up behind the quota

wall in overwhelming masses. These quotas will automatically be filled to overflowing for many years. Yet quotas from countries like Great Britain and Ireland, Belgium, France, Holland, Switzerland, and Scandinavia are not nearly filled. As a result, the bulk of our immigration in the foreseeable future is going to come from almost the very countries which the act of 1924 sought to make a minority. In point of fact, last year a numerical majority of all immigrants came from Ger

This makes it clear that the basic immigration act of 1924 is no longer a suit- which is wearing the Germans down. a situation that will be disquieting to able basis for an immigration policy. -HUMOR SAVES THE SITUATION- D. Washington, D. C .- Ridicule and indifference are among the most powerful of omically harmful to industry, to competi- all weapons which may be used not only by individuals but by nations, and today a perplexed German Government is feelmunity from the antitrust laws or to mod- ing the irritation of these instruments of policy in Czechoslovakia. Nothing , can make an individual feel quite so embarrased and futile as to swing violently and -strike thin air. The same is true of a nation, especially a military nation. And that is what has happened in Czechoslovakia, according to many private communications as well as official reports which have come out of the former Czech Re-

> Nearly a year ago when the Munich crisis had all the world agog, much was heard of the military strength of the Czech nation. That they had built a line of forts, modelled somewhat after the famous French Maginot Line, was known, That their air corps was well equipped and finely disciplined was acknowledged by men of military acumen. Also, there was some reason to believe that France would come to their aid in the event of German aggression. All this was prelude to the occupation of Czechoslovakia which finally came last spring. With such a previous show of force, the Germans were gifded for fight, poised to meet a bitter resistance.

> But, when Czechoslovakia made terms of capitulation it appears she meant to abide by them strictly. Although the Germans more than half expected to find streets barricaded and snipers at windows when they marched in to occupy, they were met by a traffic policeman who said, in effect, "Oh, yes, here you are." The people were going about their affairs and paying scarcely any attention to the German invaders. The traffic policeman courteously directed the leader of the German troops to the Town Hall, as .he would direct any tourist. The strong arm,

There were several loud speakers i various parts of the city of Prague which were going as the troops entered the capital. Occasionally there was an exhortation to the people to maintain order and ignore the soldiery, but, for the most part, the loud speakers emitted the Tales From the Vienna Woods and the strains of the Beautiful Blue Danube.

It was a frightful disappointment to the coose-stepping Nazi troops, especially to their officers whose brilliant uniforms appeared scarcely to attract the attention of even small boys. This has been the keyote of German occupation of Czechoslovakia ever since and it is this anticlimax

# The Washington Merry-Go-Round

BY PEARSON AND ALLEN Washington-The congressional leaders who called on Roosevelt before going home had no better luck than the newspapermen in drawing him out on the third

The President was gay and chatty, but regarding 1940 he was utterly uncommunicative.

His callers trieed various stratagems to get him to talk, but he sidestepped them all. The only remark he did drap merely increased the mystery.

One Congressman, with characteristic Western bluntness, asked him point-blank if he would run again.

"I may be talking out of turn, Mr. President," he said, "but when I go home all my friends are going to say, 'Now you are a friend of Mr. Roosevelt's and have talked to him. Is he going to be a candidate or isn't he?' 'Id sure like to be able to give them some idea of your inten-

Roosevelt laughed heartily and then made this mysterious reply: "Three years ago, no one had ever heard of Tom Dewey. He zoomed out of nowhere as a racketbusting prosecutor and today is being prominently mentioned for the Republican nomination. Who knows? Maybe there will be someone like that in the Democratic Party next year?" -SOFT-PEDAL-

To two other callers, Representatives Kent Keller of Illinois and Jed Johnson of Oklahoma, the President expressed the wish that a damper be put on pro-third term talk. Both strong New Dealers, the two men had assured him their districts would support him if he ran again.

"I am deeply grateful for your backing." Roosevelt told them, "but it would suit me better if I were not mentioned one way or the other in any resolutions. Personalities don't count, but principles do very much. All that concerns me is that your States shall remain in the liberal column in 1940 and continue to support the progressive program of the New Deal." -OWN FAULT-

Probably Roosevelt's frankest talk was with Johnson, a close personal friend, whom he asked for a candid opinion as to the reason for the angry congressional rebellion. Johnson gave him this straightfrom-the-shoulder answer:

"Mr. President, I think it was partly your own fault. A number of House members were for your program but personally antagonistic to you. They felt you were too aloof. I know a chairman of an important committee who was sore because he said you went out of your way to be unfriendly to him. I know another Congressman who voted against every New Deal bill solely because you did not stop in his here and distributed among the joya the most. With his wife, home town during your last trip across

"I know both the men you refer to. Jed." shot back Roosevelt. "As for the marsupial and is remarkable for gard to the sugar shortage, days taking his ease amidst a set- first, I appointed a relative of his to an important, well-paying job. Do you call that being unfriendly? As for the second, well, I distinctly remember passing through his home town at 6 o'clock in the

morning. I had worked late the night before and was too weary to get up at that early hour. Do you call that being unfriendly?"

"No, I don't," agreed Johnson. "I guess those fellows were suffering from a sourbelly complex."

-VANISHING "VINDICATOR"-

Flashy Senator Bob Reynolds' fascistic Vindicator" seems to have blown a fuse. Ever since last March, when the ebullient North Carolinian launched his personal organ, he has been mailing it through Young Peoples' Union of Northern to March's Connecticut retreat in the facilities of the Senate Folding Room, paying for this service at the rate of \$4.25 per thousand copies. Employes of the Room, who work on a piece basis, were

glad to get the extra job. The first "handle" in March was 8,000 copies. But since then it has steadily diminished, numbering less than 3,000 in June. In July there was no edition at all. Reynolds' staff indignantly denies that

the paper has gone up the flue. "No, sir, we're still going strong," insisted Don Kirkley, editor of the publication. "The Senator has been out of town . . . It came about in a queer seem to bend your ear, you might for a few weeks and we are waiting for way. One evening the family give me the high sign or say his return before going ahead with the July issue."

Folding room clerks are hoping Kirkley is right because they could use the extra money, now that work has slowed down with the adjournment of Congress. Meanwhile, however, they are not holding

War, invasion, terror, bloodshed-those were the good old days. Now a dictator is coercing his subjects by denying them whipped cream.

A new safety glass is designed to reduce glare and to prevent headaches. That is, except when the head bangs against the windshield.

Mosquitoes, they tell us, cause sleeping sickness in horses. Looks like somebody'll have to invent a one-horse spray.

They nabbed a couple of runaway girls in Chicago the other day. The home these comely misses were escaping, strangely enough, was Hollywood.

To help and not to fight. To love and not to hate, To urge and not oppose,

To praise and not berate:

To smile and not to frown, To give and not to hoard,

To laugh and not to whine, The hand and not the sword:

To make a better world without Make a kinder world within, Let baser motives die the death And brotherhood begin!

## **GERMANS ARE** DISSATISFIED

Symons Finds Unrest In Hitler's Fatherland Over Conditions

BY CHARLES SYMON

Saarbruken, Germany, Aug. 1 -"Engine trouble" occurs even on a bicycle, and we had that a mile east of Kaiserslautern, in Germany. Bolts on the luggage carrier were loose from joggling over 2,000 miles of European cobblestones. A spoke in the back wheel was broken and the spangle bars on the rear wheel were loose and the tire was rubbing on the fender. We patched things as well as we could and peddled on to Kaiserslautern and stopped at the first shop we saw. The mechanic went to work on it immediately, and in an hour we were ready to start off again. The mechanic refused to accept pay for his labor or the materials he had used in making the repairs. In the English he had learned studying by himself, he said, "No cost. I will make for better friends for Germany. I hope you will not write too badly of Germany."

You can't write badly of Germany, but you can of conditions The country along the Moselle and Rhine rivers where we have travelled is very beautiful. There are lovely cities, fine cathedrals and other buildings. Roads are generally good. People are very friendly. But there is the "system" in Germany now which one can criticize openly. We saw the frontier fortifications of steel, concrete, wire, and men. Soldiers marching along streets with bayonets fixed in their guns. We saw evidence of the anti-Jew campaign. We steered our "bike" villages and saw utter poverty. We payed two marks (\$1.00) for two slices of boiled ham and two "chunks" of dry, brown bread. No butter was to be had.

People Are Hungry We stopped in a small town near Heidelberg for lunch, and after trying to make ourselves understood, a middle-aged man efitered the dining room, and began talking to us in English. He talked carefully until the room cleared and then "broke loose" with a frontal attack on the Germany of Hitler. "Lots of beer and wine keep the German people sleepy and dumb," he said, "but the conditions are such now that they cannot last. There will be war soon-in a few weeks-and there will be revolution too. People are hungry.

More people die now in Germany than ever before. It is the food-it affects their hearts. meeting at the home of Dr Alexscarce, we have no butter, milk is diluted. People work from early day until late at night Wayne county, Sept. 18. for a few pfennings. They must save carefully, for six months to buy a new suit or clothes or a They cannot paint their homes they are so poor. We have no liberty. This life is good for a few high in the government. It is killing the rest of the people. I came back to Germany five years ago from America, and I cannot leave now because the government is afraid I will talk against it. I am waiting for the

Await Revolution "The day" he explained was the revolution. Other people we talked with were waiting for the same time. We saw the poor conditions he described-very poorly clothed men, women and children-existing on a diet of brown bread and potatoes. Houses were barely furnished, and dirty-there does not seen to be any pride in cleanliness of home or dress. People seem to be weak physically, and mentally, to fight "for the fatherland" if there is a war.

Privates in the army are paid 50 pfennings per day, about 25 U. S. cents, and out of that must pay for their cigarettes, entertainment, and boot polish. Laborers working on the military fortifications on the western frontier are paid, average 15 marks (\$1.50) a day. Taxes paid to the government range upward from the \$10 paid daily by small shopkeepers. There is no unemployment-the army combatants and non-combatants total, we have been told, 4,000 men. Soldiers are dissatisfied with their pay when they compare it with that received by the laborers on the fortifications whom they must protect because of the governments desire to complete the frontier works hurriedly. Fights occur frequently between the groups, but action is seldom taken against the laborers. Hotels and other sleeping quarters in towns along this frontier are nearly all taken by the laborers, and we looked for several hours in the town of Homburg before finding

Soldiers and civilians told us that Germany would soon take Danzig-and without a war.

#### High School Band To Play At Legion Meeting Saturday

The Escanaba high school band will serve as a "greeter" organization on the opening day of the American Legion convention Saturday, August 19, Director R. P. Bowers announces.

The 45-piece band will play upon the arrival of trains and boats with visiting Legionnaires

and at Legion headquarters. The band will hold a rehearsal 7 o'clock Tuesday evening. Director Bowers urges that all mem-

human skul believed to be 130,000 years old has recently been found in Italy.

### Risks Life to Save a "Life"

When fire enveloped a neighbor's home Friday night, Abe Bousche, 1408 North 23rd street, risked the flames to go into the burning building and save a "child," which could be seen lying on the bed. When he emerged from the burning building with eyes filled down the side streets of country with smoke, Bousche and neighbors discovered the "child" to be a large doll. Occupants of the burning house were not home at the

value to his wife. The will was made September 4, 1917. Estate values are estimated at \$5,000 real estate and \$25,000 personal property.

Claims against the estate will be heard on February 10, 1940, Probate Judge Katherine Stiles Laughton said.

Sand was used to dry ink on documents until blotting paper was discovered. When a paper mill owner, in the 19th century, tried to write on paper which had not been sized, his ink spread to such a degree that he conceived the idea of blotting paper.

## DATES SET FOR **COUNTY FAIR**

**Exhibition At Marquette** Will Begin On August 22

Marquette, Mich. - Marquette Minnesota. county's 56th annual fair will be held here August 22 to 26.

Like other upper peninsula exbalance will be at the end of the gership." season-the fair here has been attempting to assure coming out on that of the "city manager" form top by offering more attractive of government, adopted by a numpremiums and an entertainment ber of cities throughout the counprogram with added drawing try. This time, however, it is ap-

Milton C. Spencer, secretarymanager of the exposition, thinks he has solved the two important problems—support by farmers and industry, and support by the entertainment-seeking public.

The eight superintendents have been allotted approximately 5.050 premiums to award their exhibi- of Gov. Stassen. tors in livestock, poultry, fruits and vegetables, school work, home economics, fancy work, arts and curios, and flowers. Prizes range from \$15 downward, with valuable loving cups being offered in some divisions.

With help of a special appro- the farmer-labor regime the Repriation by the county board of publicans ousted in Minnesota last supervisors, a new 40 by 60 youth fall. building has been constructed at a cost of \$3,000. It will house exhibits by 4-H clubs, which are for their part in the show. active in Marquette. county as elsewhere, the public schools, Scouts and other bodies. Resulting space in the 275-feet main exhibition hall will be given to other crowded departments, especial-

ly that of the flower gardeners. "We now have room for an unlimited number of exhibits," Spencer said. "I think it is worth the while of upper peninsula farmers and commercial houses to give our fair a trial. We are right in the middle of the peninsula, with an immediate potential attendance of 50,000."

Spencer said that "we hope to give the public an added money's in going through our well-planned exhibition halls, and in the fun they'll get on our clean midway. Sault Ste. Marie, Mich., Aug. Authorized the purchase of 9,- at the Robinson-LaVilla musical 12 (A)—The Michigan Conserva- 000 acres of public hunting review, the afternoon grandstand show, the big horse-racing program and the Jimmy Lynch thrill drivers' show.

Spencer pledged he would see to it that visitors, especially those supervisors for closing the season from other cities and farming areas, are hospitably received and county boards do not meet until taken care of. There are ample parking facilities, clean rest rooms and picnic grounds here, he pointed out. The dining room is managed by the St. Peter's cathedral altar guild, who drew liberal praise for their dinners last year. Concession stands will sell everything from hamburgers up, he said.

'We haven't stinted on the budget this year," Spencer said. 'That means we haven't stinted on premiums and entertainment."

## Stassen Inaugurates State Manager Idea

BY JACK WILSON St. Paul, August 12 (A)-The

trend toward application of business administration methods in government has reached a new high for the United States here in

The youngest governor in the land, Republican Harold E. Stassen, has inaugurated an experipositions-some of which have ment which students of governbeen wondering what the debit ment are hailing as "state mana-

The idea is roughly the same as plied on a state-wide scale.

In each case, elected office holders decide political policies and turn the actual day-by-day running of the government over to a trained "business manager." In Minnesota, this business manager is lean, be-spectacled

Leslie Gravlin, 36, an appointee

Result of Inquiry The experiment here really started when the 32-year-old governor, shortly after his inauguration in January, sponsored an inquiry which revealed widespread waste and an inefficiency under

The investigation sent half a dozen public officials to prison Then the governor forced

through the legislature a mammoth reorganization bill designed to block fiscal shenanigans in the

He appointed Gravlin "Comthe head of a new "Department of | fices—tax commissioner and pub- | Menominee.

Administration."

How Department Functions This is how it works:

Gravlin, who studied political economy at Hamline university and later worked with governmental research bureaus in St Paul and Providence, R. I., makes a budget of estimated expenses for all departments every two years. After the legislature has appropriated the necessary money. ne parcels it out to the state departments, and tells them what

hey can and can't do with it. Far down in the depths of the ong law creating his office is a little paragraph that carries sweeping powers for the "business manager." It says:

"The Commissioner shall have power, with the approval of the Governor, to make and amend rules and regulations, not inconsistent with law, respecting any matter within the scope of the powers and duties hereby conferred, which rules and regulations shall have the force and effect of law."

That means, in effect, that Gravlin can just about write his own ticket-as long as the governor okays it-in the matter of requests for money, shuffling personnel, and managing state pro-

To keep the state's bank account out of the overdraft column, the state auditor has to approve every expenditure before it is made, certifying that there is on hand enough money to pay the bill.

Other Offices Established The reorganization bill also

### Leaking Walls Annoy Owners

#### Haste In Construction of Modern Buildings Is Often the Cause

All types of masonry walls which leak are sources of vexation to their owners.

Leaky walls are not confined to any one type of masonry con-struction. Leaks have occurred and are occurring in walls built of the best materials and appar ently with special care. The fact if often overlooked, however, that the percentage of those which leak is small compared with the large number of masonry walls that are water tight.

A logical explanation for the leaks in masonry walls is the haste with which our modern buildings are erected. Workmanship is frequently sacrificed for the sake of speed. Perfection in design and materials cannot make up for this sacrifice. The prevention of leaky walls must begin with the design of the building, follow through the selection of the materials and the supervision of the workmanship, and continue with the maintenance of the structure after its completion.

Flashing should be placed under all vertical joints in sills, coping and caps or other horizontal surfaces which may permit the accumulation of water on or the passage of water through them. Projecting soldier courses and water tables, wall corbelled back and recessed panels with projecting horizontal courses at the bottom are frequently used without consideration for the more se vere exposures resulting there-

As a result, water seeps through the vertical joints into the wall. Snow and ice melting on these surfaces greatly increases the possibility of water entering the wall.

Flashing over horizontal surfaces may be necessary.

There is no alternative for ade-

quate flashing. Parapet walls should be flash-

ed through just above the roof level and also under the coping. Only permanent, rust-resisting metal or bituminous, asphaltic or pitch preparations should be used for flashing.

Projections and drips on copings caps, cornices and sills should always be provided. Overflowing gutters and leaky downspouts are a common source of trouble. Gutters and drains should be ample to carry away the heaviest rains. Metal from gutters should extend up under the roofing far enough to eliminate any possibility of water getting back of it.

#### REPAIR PORCHES

Repairs to porch floors, columns, railings, steps and supports will minimize the danger of personal injury and add to the exterior appearance. If the porch is out-of-date, it may be altered. converted into a room or removed. If inadequate, it may be ished basement. A charming livenlarged.

Partitions, preferably of fireproof material, built around the funds obtainable from qualified furnace and coal bins will render Modernization Credit Plan. the rest of the basement more useful for laundry, food storage, workshop or recreation purposes, Brightly painted and well equipped with shelves and built-in table, the basement will become a game room or lounge, den, playmore pleasant place in which to room, or workroom will furnish work. Additional windows will the entire family with extra hapadd to the appearance and help to piness and pride of ownership keep dust from the upstairs rooms when visitors come. If a basement is lacking, one may be dug, concreted and finished according to the above suggestions.

#### LINOLEUM CORNERS

This can be eliminated in old linomanufactured for this purpose. | did later.

## In the California Style

This L-shaped home has a definite California character and is typical of a style that is increasing rapidly in popularity throughout the entire country. The exterior is a frank expression of the interior, with the living room, dining alcove, kitchen, and one bedroom located in the main body of the house, and one bedroom forming the wing. This home was built in the midwest with the aid of a mortgage for \$5,000 insured by the Federal Housing Administration.

## WASTE MUCH SPACE

Almost one-third of the usable space in the average home today is wasted in unfinished attics and basements, which could be converted into livable rooms, adding comfort and pleasure to the home. with funds obtainable from qualified lending institutions under the FHA Modernization Credit Plan.

#### COVE-LIGHTING SYSTEM

Cove lighting derives its name from the curved molding near the ceiling line in which the lamps are concealed. It reflects light toward the ceiling, which results in an even illumination when properly designed.

In modernization of a home's ighting system, cove lighting may be substituted for the old type of central lighting fixture. Funds for such work are obtainable from qualified lending institutions under the Modernization Credit Plan of the Federal Housing Administration.

## EMPLOYES HEAR HIGHWAY HEAD

Van Wagoner Addresses Group At Annual Outing

Congratulations were extended comembers of the upper peninsula branch of the State Highway Department and to employes of the state ferry system for their fine work in the past year by Murray D. Van Wagoner, state highway commissioner, who addressed members of the upper peninsula division at its second annual picnic held at Pioneer Trail Park

The picnic was attended by approximately five hundred guests including officials of the highway department.

Van Wagoner did not comment definitely on any changes which may occur in the biennial shift of the highway department personnel but stated that an employe should feel well satisfied if he is fortunate enough to be transferred to the upper peninsula.

"A man should feel he is being put in a place where he can't always turn to the man next to him for advice, if he is transferred to one of our upper peninsula offices," he said, "He must be ; pretty much on his own in this country. He must be able to make decisions and carry them out by himself. That requires ability."

Commenting on the upper peninsula climate and scenery, he

lightful climate in the world than that in the upper peninsula. Fourteen-foot snowdrifts probably would frighten out some of our downstate maintenance engineers, but up here we put the kind of men who know just how to fight storms. As I say, it takes a special kind of man to fill these upper peninsula jobs and I can see that the jobs are properly filled." Congratulates Ferry Employes

Regarding the work that has been carried on by employes in the state ferry system, he stated:

banner year and they have yet to lowed her example. bring their biggest loads across the straits. You will all agree with me that George Loughin has been doing a fine job. He has service to the traveling public bet-

"All of you have worked hard and diligently. Perhaps some of you know what is planned for your future. You have nothing to fear if you have done your job conscientiously. If you haven't heard from the Lansing office before this.

"Your department likes to keep its men satisfied, contented and alert. We don't want you to have any worries about your jobs. For six years ours has been a smoothly operating machine for the maintenance and construction of Michigan highways. If you have fitted yourself into that rhythm. you have every chance for advancement in the next two years. Just remember we had enough confidence in the merit system of employment to try it before the state government did.

"I intend this talk to be brief. You will learn far more about the department's problem by circulating among your friends here today. This gathering is intended as a friendly get-to-gether, a chance for all of us to learn each other's first names and how the latest bables are growing. "All of you know the only thing

that carried us through many tough problems since we have been working together was our departmental morale. The attitude of our men stationed away from Lansing always has been that they would do their jobs and rely on their superiors at the capital to back them. That plan always has worked. I want it carried on through the next two years. No internal dissension or political upheaval ever can break entirely apart the organization we have built. These are valuable years to you. #### Missing Nahma Man Hunted By Sheriff

Officers of the Delta county sheriff's department have been asked to assist in locating John Summers, 74, who left his home at Nahma at 8 a.m. Friday without his breakfast and has not been heard of since.

Summers was traced two or three miles out on the old road to Isabella from Nahma, and it is believed he may have been picked up by a motorist. Anyone who has seen the missing man is asked to get in touch with the sheriff's department. Mr. Summer is short, of chunky build, and was wearing a blue overall jacket, dark pants, white hat with a black band when last seen.

# School For Writers, Artists and Photographers Opens Today

## **FREE LECTURES BEGIN TONIGHT**

Distinguished Faculty to Serve At Nahma "University"

The first annual Nahma Vacation School for writers, artists and photographers will open at Nahma today and will continue for two weeks. About seventy-five students from all parts of the country are enrolled.

Today will be devoted to registration of students and the assignment of accommodations, with the first of the series of free lectures to be given at the Nahma community building auditorium at 8 o'clock this evening by Mary Dickerson Donahey, well known lecturer and writer of Chic/go. who is now spending the summer at Grand Marais, Her topic will be "We Moderns of Yesterday," a talk dealing with her early experiences in newspaper work. Following her talk, Robert McLaughlin, Marquette, member of the conservaiton departments' educational staff, will show three reels of sound movies. This evening's program will begin at 8 o'clock. Tobin Will Preside

Bernard Tobin, superintendent of the Nahma public schools, will act as principal of the "backwoods

Classes will be held in the F. W. Good school every hour from 8:15 a. m. until 5:30 p. m. Only those who pay the weekly tuition fee will be eligible to attend the regular classes. The evening lectures will open to the general her early experiences in newspa- ed Michigan State college. The public and no admission fee will per work in New York and Cleve- bride graduated from Bessemer be charged.

Distinguished Faculty A distinguished staff of instructors has been engaged for the school.

Robert Gessner, English in structor of New York university, will conduct the courses in scenario writing and the novel. He is the author of Massacre, Broken Arrow, Some of My Best Friends Are Jews and Not Born to Die. His extension course in scenario writing at New York university was among the most popular offered at that institution a couple Prof. Kenneth T. Rowe of the

Milwaukee State Teachers college. public is asked to cooperate in State university, Prague and oth- disturbed for the convention er famous schools of art. Fine Photography Course

The Nahma Vacation School will offer an outstanding course in photography. The instructor in this department will be Wallace Kirkland, Chicago, whose pictures appear often in Life, Fortune, Look and other magazines; Ormal I. Sprungman, camera editor of often to outdoors and photographtc magazines; and Howell Conant, photo illustrator, who has studied under famous artists at the University of Wisconsin and the Art Center in Los Angeles. Illustrated articles by Kirkland and Sprungman appear in the current issue of Popular Photography. Frank Gruber, Hollywood, pro-

lific writer of western and detective stories, will conduct one of the short story classes.

Jean Mowat, Chicago, will con duct the course in writing for trade journals and business papers. A former newspaper writer. she is now engaged in free lance writing, and covers the fashion resorts, at Palm Beach, Paris, London and elsewhere.

Mary Dickerson Donahey will handle the class in juvenile fiction writing. Her newspaper experience includes feature writing for the New York and Cleveland papers. As a magazine writer, she has made notable contributions to Red Book, McCall's, Child Lafe, Good Housekeeping, Better Homes and Gardens and Munsey She has been an outstanding leader in writers clubs in the Middle West.

Classes In Poetry

Poetry classes will be in charge of Peter DeVries, associate editor of Poetry magazine and contributor of verse and fiction to Esquire, Coronet, New Yorker and other magazines; and Anne Campbell, Detroit, writer of syndicated newspaper poems. Arnold Mulder, professor of

English of Kalamazoo college, will serve on the faculty for the first week only and will handle the class in the novel. He is the author of several books.

Another short story course will be offered by Frank Bunce, formerly of Marinette, Wis., whose fiction has appeared in the Saturday Evening Post, Red Book and other high class magazines. He is also a world traveler. He covered the Italian invasion of Ethiopia and was in Spain when the civil war broke out. He also has spent much time traveling in the Arctic Circle and Hudson Bay regions.

Women in Journalism" will be the unique course to be offered by Lucy Rogers Hawkins, Chicago, editor of Matrix, during the se cond week of the school. Others to serve during the second week are Edwin Baird, fiction, writer and former magazine publisher and editor; and George W. Stark,

Returning from overseas in 1919. Mr. Good went to the Chicago offices of the Oconto company, and remained there until 1933 when he came to Nahma, 30 miles east of Escanaba, to take charge of the Bay de Nocquet company, affiliate of the Oconto company. He is now vice president of these two firms and the Brown Dimension company of Manistique, Mich. Besides hunting, fishing, and

golfing, Mr. Good enjoys the hobby of writing and reciting poetry in the jargon of the French-Canadian and Scandinavian lumber-

Mr. Good is a member of the Chicago Athletic, U. of M., University. Tavern and Army and Navy clubs in Chicago.

Recreational Region

The model village of the Bay de Noquet company is situated on the shores of Big Bay de Noquet and at the mouth of the Sturgeon river. The Hiawatha National Forest extends northward from Nahma to the shores of Lake Superior. The company has built an attractive nine-hole golf course, community, building, hotel and a string of vacationist cottages. Good bass, trout, perch and pike fishing is afforded in the nearby lakes and streams. All these recreational facilities will be available to the students who will come from far and wide to attend Charlie Good's "university up in the sticks".

#### U.P. Architects **Hold Meeting Here**

The Upper Peninsula division of the Michigan Society of Architects held its meeting at the Delta hotel Saturday, August 13.

The Michigan Society of Architects is divided into seven groups or divisions. The upper peninsula division was organized in 1938 with David E. Anderson, Marquette, president, and Albert N. Nelson, Ironwood, secretary.

The U. P. division holds monthy meetings. The object of the society is to regulate the practice of architecture and to discuss problems per-

tinent to the profession.

The south magnetic pole of the earth has not been reached. It is ocated in Antarctica, at about 72 degrees south and 155 degrees 16

horities that it was believed the burglars were headed in this direction members of the Delta department checked traffic on highways M-35 and US-41, but up un- tive plans are to til yesterday afternoon the thieves had not been apprehended

The burglary was discovered at 6:50 a. m. Friday when Manager Clifford Corey opened the warehouse for business. Corey closed the office and warehouse at o'clock Thursday night.

Sheriff Edward Reindl said entrance had been gained by forcing open a sliding door on the warehouse. Entering the office room, the burglars broke off the combination of the safe with tools from the warehouse, poured nitroglycerine into the opening and touched it off.

The blast blew the door off the safe and fired pieces of the metal into the walls and ceiling of the room. A larger safe in the room was not broken open.

Officers did not divulge whether hey had clues or whether the blast had been heard. They said the blasting looked like the work The safe cracking was the first

#### Princess Lines Of Simple Frock Are Slenderizing

BY MARIAN MARTIN

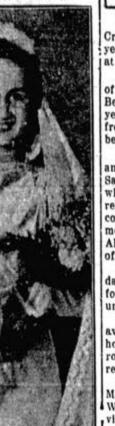

PATTERN 9181 The perfect one-word description for this enchanting Marian Martin dress is EASY! First, there's that wonderful all-downthe-front buttoning. It's a clever, in-fashion device that not only lets you spread Pattern 9181 out flat for easy handling in sewing and ironing, but also makes those long, slim lines so "easy" on the eyes. And what could be easier to stitch up than straight prinseams with no "crossroad stop" for waistline seaming? For additional slenderizing details, you might make the side-front and back panels on the bias, and stitch on amusingly shaped pockets with scalloped edges to match the sleeves and the becoming neckline, which may also be

in a sweetheart shape. - Pattern 9181 may be ordered only in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 4% yards 35 inch fabric.
Send FIFTEEN CENTS in coins for this
MARIAN MARTIN pattern. Be sure to
write plainly your SIZE, NAME, ADDRESS, and STYLE NUMBER.

Midsummer always calls for an inven-tory of your wardy be to see if it doesn't need replenishing. Something cool and crisp for days that are hot and nights that are sultry! MARIAN MARTIN will bring you dozens of easily-made designs for sport, play and formal midsummer wear in our NEW PATTERN BOOK. There are pages and pages of fashions for femininity of all ages. The book is fifteen cents but when ordered with a pattern the price for both is twenty-five cents.

You will want to consult this pattern that fracestle for work remaining sum-

### On The RECORD

By Dorothy Thompson

The Summer and the President The Spending Lending Program
The defeat of the Administration on the spending-lending program was above everything elec

the rejection of a theory. This Congress has not made retrenchments, nor taken steps to bring the budget into balance. On the contrary, the budget for the current fiscal year is the largest be with him. At the door of his yet, and the prospective deficit hospital room she meets Marcia

But the Congress, by throwing out the whole program, indicated -apart from the fact that it was hot and weary-that it no longer had faith that by spending and rehabilitate the economic order. It further rejected the idea that the loan of a government corpora- heard. . . tion guaranteed by the government was not an addition to the national debt. It indicated - on the basis of the record so far-its he?" skepticism about "self-liquidating" debts. For too many of the covernment's loans have been bad loans and uncollectible, and income-tax authorities admit to room. the taxpayers.

More importantly, the Congress shied away from the most questionable pump-priming theory which this Administration of fertile imagination has yet devised. The theory embodied in the gov ernment's bills was first aired before the national retailers. It was presented as an already familiar model, but it was actually a radical innovation. It was a program of government borrowing and investing not for the purpose of compensating for inadequate private investment and thus keeping the economy on keel but to attain certain levels of national income, with any prospect of a balanced budget left indeterminate.

Again, the probable effect upon the total economy was left unconsidered. That such a program was certain to encroach progressively upon private business and divert the savings and economy into governmental debt, masked as the investment operations of specially created government instruments, was implicit in the bill.

Like so many New Deal measures, It conceived of the government's activities this time in the field of credit expansion—as though they were being carried out in a world where no other economy existed that could be stimulated about us now." out of gear by what the government does. But in our economy cerss.

ventures were also to be singularly free from accounting control. The possibility existed that thus the government would sally forth

to enlarge the areas of socialization of business and banking and to enlarge them in a haphazard and chaotic way.

The pump-priming theory had gone through a remarkable evolution, until it got slapped at last by this disgruntled Congress.

It started as an emergency measure, at a time when almost any sort of stimulant, from digitalis to brandy, was useful. The brandy was actually forthcoming in the repeal of Prohibition, and

In 1932 the patient was passing out and there was not time to make a thorough diagnosis of all the factors responsible for his col-

There are still people who think that if we had left the patient alone he would have come around all right by himself, but they are the people who think that economic laissez faire is ordained in Nature—as some Vermonters think that Eastern standard time is God's time.

Most people, however ,thought that if some stimulant were not given, there would never be a diagnosis. Instead there would be an autopsy. The first New Deal arrived in the role of an ambulance surgeon.

But since the patient first opened his eyes and began to move his hands and give signs of life, we have had a series of doctors giving conflicting diagnoses and adminis-

tering various remedies. The most consistent of the doctors are students of old Professor

Marx, and there are one or two of them in every consultation. They never even look at the patient, because in their simplified science all social orders but one or two of them in every consulta-

They never even look at the patient, because in their simplified science all social orders but one suffer from the same disease; the patient is going to die anyway. and the most merciful therapy is to hasten the end. didn't want you worried.

that's why I didn't wire you," he mumbled. "Captain King was notified automatically." Bill Brooks, in a soft chair by

the window, made an awkward sound in his throat. "I guess I'll

There was so much she wanted bed and look at him. He was go- slain something in Marcia's heart. ing to be all right. She felt it in swift, flooding relief, all through her body. He was dreadfully hurt, but he'd recover.

"I met Marcia," she told him, after a while. "She-she knows

"She had to know sometime," he said with difficulty. "She's got "Pity isn't the same as love." the government itself lives on the Bill. I told you that before. He's Linda's mind said. "But she'll private economy, and not vice been washed out. He needs her." love him, some day, if he needs A few minutes later the Navy her enough." octor came in and asked courteously, to leave, "He's not very strong.

"I understand." She bent and kissed Jimmy's forehead. "I'll be back in the morning, darling, as

remedy may be good, more of the same thing may be fatal. Codliver oil, taken in moderation, hardens the bones. Its concentrated essence, too copiously administered, also hardens the arteries. Every medicine can produce its own peculiar disease, and we are suffering now from the complications imposed by the doctors on the original disease which has not yet been adequately diagnosed, and never consistently treated.

The action of the Congress in throwing out the spending-lending bill is the action of guardians throwing out the latest crewd of specialists, still without being satisfied with the condition of the patient, or indicating that they know what to do for him or whom

to call in next. They have devised by themselves, a set of homemade antidotes, but they are antidotes for the doctors' antidotes-not antidotes for the basic ailments.

The Hatch bill is an antidote for the W. P. A., and the Logan bill is an autidote for the disorders of the administrative agencies, and the vote to investigate the N. L. R. B. is a gesture made in the vague hope of finding an antidote for the chaos in laboremployer relations.

The rejection of the proposed, amendment to the neutrality bill provides no antidote for anything. It merely ties the doctor's hands while it keeps him on the case.

Common sense, which is the rule of thumb established by experience, says that a consistent diet of pork is dangerous even for the healthy. This Congress has diminished the pork barrel of the Executive. It has not put a cover on the pork barrel of the legislative department, however - for that is its own pork barrel.

In a legislative pork barrel everybody gets into the trough according to a kind of Gallup poll. and the pork being more generally distributed perhaps does less harm, although it costs just as much on the budget.

Executive pork is more dangerous, for it is distributed to specific late Ira Carley, were being truckeconomic or ideological interests. The real fight in this Congress has been between the paying pork barrel and the ideological pork barrel-except for the farmers. They are there no matter which address is dealing it out.

There seems to be a growing depowered specialists; once they of Dr. Coue. Because this school Box & Lun passed the buck to a clinic from of thought was represented at the years ago. the N.R.A. soon as they'll let me in." Marcia and Bill Brooks were waiting for her in the corridor downstairs. Linda braced herself. Now they'd have to have it out, she and Marcia. But curiously, Marcia wasn't hostile. "You don't know where you'll stay to-night, do you? Bill can find you a hotel. Linda, there's something-something Jimmy doesn't know. He'll never fly again. At least, not for the Navy. They'll invalid him out, when he gets well.

It'll break his heart." She must have been speaking with the doctor. "I feel so sorry for him, I don't know what to do! The Navy was his life, I-I've seen other men who had this happen to them. It's always a blow." If they invalided him out of the Navy, Linda thought, it would be the best thing that could hapright, it would break Jimmy's heart.

Marcia went up with her, matter-of-factly, to the hotel room. You must be dreadfully tried, Linda.

"Oh, Marcia, why do we go on talking all around the important thing?" Linda burst out. "I know you hate me, you must hate me, but I couldn't help it! I didn't mean to fall in love with Jimmy!" Marcia's brown eyes filled with tears. "I know you didn't mean to, Linda. We've been so much to each other. Closer than sis-He was swathed in bandages, ters. Do you think I could sus-'Linda!" get away from Pensacola, why he

"That's not why I'm crying." Marcia sobbed. "It's because I've been so mixed up. So torn between loyalty and duty and-and Bill wants me to marry him. . . He's washed up. The Navy does-n't want him. I feel so sorry for him."

Then she was pleading. "Don't hate me, Marcia. Try to understand." "I do understand." There was

no mistaking the sincerity in Marcia's eyes. "I'll always understand, Linda, because I love you, too. But I-I don't think ought to go back and see Jimmy any more, now that you're here. Bill and I will go home."

Their hands touched for a moment. Then Marcia King was walking to the door, brave and small. Her head high, her chin firm. "Goodby, Linda."

Linda's breath caught. "G-goodby, Marcia dear."

The next morning, she was at the hospital promptly at nine. Jimmy was impatiently waiting for her. "They'll patch me up, I'll be all right. But I think they're keeping something from me. I'll never fly again. That's it, isn't it?' Her clear eyes dropped.

"Linda, look at me." "Yes, Jimmy. That's it. Marcia old me." She bent over him tenderly. "Don't you care, darling. You've got me, isn't that something? And Jimmy, I've been thinking ... . The Navy might not want you. But at the university, where Daddy teaches, there's a chair in aeronautics. You could do so many worthwhile things there. You could teach boys to be splendid commercial pilots.

search." "And that would knock your objections to a pilot husband into a cocked hat, wouldn't it. Linda?" He chuckled. "Maybe this crackup was staged for our especial benefit." An instant later, his eyes were somber again. "Those boys who didn't come out alive weren't as lucky as I. There must be something I could do, to make flying safer. I used to have ideas for little gadgets. I never had much time."

You could experiment, do re-

"You'll have time galore, from now on." She kissed him gently. "I'm going out to telephone Daddy. I'm sure Rourke kept him from worrying, but I want to tell him that I'm coming home soon. and that I'm bringing him a sonin-law who isn't a warrior!"
(THE END)

### MILL DISMANTLED

Menominee - Sawmill machinery and other parts of the old Carley mill at Ingalls, built by the ed away today for junk by Peter Arnovitz of Marinette, closing a chapter in the lumbering history of that part of the country.

The mill was built by Mr. Carley about 50 years ago when the mid-county region was being logged. Thomas Finn of Marinette, bought the Carley stock in hthe mand for the return of the confi- mill about 20 years ago. Finn doctors have split fees with high- dence practitioners—the disciples operated the mill as the Ingalls Box & Lumber company until 10

#### Audubon Head Urges 1938 Waterfowl Regulations Be Maintained

New York, Aug. 12.- The directors of the National Association of Audubon Societies," said Mr. John H. Baker, its Executive Director, today, "have long felt that the plight of the migratory waterfowl on this continent is such as to demand most careful consideration on the part of all those citizens aware of the multiple values of these birds and appreciative of their presence.

'We have expressed our views on this controversial matter to the Secretary of the Interior, whose responsibility it is this year, for the first time, to submit recommendations to the President of the United States as to the waterfowl hunting regulations. We have urged that for the 1939 season there be no relaxation of the regulations of 1938, that the oneday possession limit be restored, that the bag limit on Geese be reduced, and that in view of the wisdom of a policy of more speedily building up an adequate breeding stock, the number of days of consecutive shooting be reduced from 45 to 30.

"In arriving at these conclusions," said Mr. Baker, "our directors have been influenced by the following considerations:

"1. The great increase in the number of waterfowl hunters, as demonstrated by the number of Duck stamps sold, rising from 448,204 in 1935-36 to nearly 1,-000,000 in 1938-39 is out of proportion to the increase in waterfowl. This tends largely to offset the benefits of the breedingground restoration, refuge and hunting regulation programs, and to outweigh good news from the breeding grounds of favorable rainfall conditions and good hatch of young birds this summer.

"2. The rate of increase in total waterfowl supply would not pounder. against inevitable years of adverse rainfall conditions on breeding grounds, and the capacity of existing breeding grounds is at present far in excess of occupancy by waterfowl.

"3. The number of consecutive days' shooting was increased in 1938 from 30 to 45 and we held that such increase was excessive, disproportionate to the increase in

"4. There still are waterfowl hunting groups and individuals who urge restoration of permits to use bait and live decoys, and it is our conviction that these destructive practices should never again be permitted. Already their banning has promoted fairer distribution of hunting opportunity and better sport.

"5. Inventory taken by the government last winter did not disclose expected increase in total supply of Geese.

"6. The two-day possession limit regulation, (extended from one day a year ago), has increased violations of the bag limit and made the enforcement job more difficult.

"First consideration," said Mr. Baker, "should be given to preserving an adequate supply of

#### Tourists Always Were A Problem

Yellowstone National Park Wyo. (P) - Psychology having failed, park officials have placed a guard over Morning Glory pool to protect its beauty from tokentossing tourists.

The shiny tax tokens, supposed to bring good luck to the person who tosses them into the famed pool that looks like a flower, disturb algae that give the water a delicate blue color. The tokens threatened to completely destroy the natural beauty of the pool.

First rangers placed a box with a sign that said: "You'll have greater luck if you toss your tok-

It worked for a time and then the tourists began tossing the

tokens into the water again. So Superintendent Edmund, under its influence loves to quar-Rogers announced a guard had to be assigned at the pool. The first offender was fined \$5.

#### Change Is Made In Fur Shipping Rules

Persons shipping, transporting or carrying furs out of the state are no longer required to mark on the outside of the container a detailed description of the contents, by a recent act of Congress amending the federal penal code relating to interstate fur ship-

The amendment states all packages or containers in which furs. hides, or skins of wild animals are shipped, transported, carried brought or conveyed, by any means whatever, from one state to another shall be labeled or tagged with information relating only to the name and address of

the shipper and consignee. The law still requires "an ac curate statement showing by number and kind" on packages containing wild animals, birds, dead bodies, or parts of game animals or birds, or bird eggs.

## Federal Study Of FOREST INCOME Deer Food Supply IS 4 MILLIONS Shows Depletion Tops 1938 But Is Below

According to a recent report ssued at St. Paul, Minn., the northern white-tailed deer is depleting its winter food supply in the Lake States region to such an extent as to create a situation that, if not corrected, will have forests during the fiscal year a disastrous effect on the animals ending June 30, 1939, amounted themselves. The report was by the Bureau of Biological survey and forest service of the U. S. departwas made to Secretary of the Interior Harold L. Ickes.

Based on laboratory tions of 72 deer stomachs and on record of \$6,751,553. ield observations by Biological survey scientists in the Kabetogama and Cloquet Valley State orests and the Superior National forests, in Minnesota, the report pointed out that the available factor on deer populations in areas where the animals are greatly restricted in their movetions prevailed in the areas stud-

In fall, plants of the willow tion diet, the report showed, and \$10,582. when deer cannot obtain choice foods. Pine, which is also being eaten in rather large quantities, likewise has poor nutritive value. Ceder Best Browse

By winter, the deer already have eaten the choice foods and are compelled to feed on balsam, pine and spruce, the three most available plants. The seriousness of the deer-food situation is indicated by the fact that the three plants, if fed on extensively, are all poor foods, spruce being eaten in large quanties only when conditions are severe.

The findings of the researchers in Minnesota were much the same as those of I. H. Bartlett and L. A. Davenport in their investigations throughout Michigan and in their feeding experiments in Cusino for the Michigan department of conservation. Their studies are referred to in the biological survey report.

The best deer food in this region is white cedar, which was not found in large quantities in the deer stomachs examined, bethe report said.

It continued by stating that feeding experiments by the Michigan Conservation Department indicate that white cedar is the only native browse that fed alone will support deer in winter. The chain gang, only there are no results of these experiments, it was pointed out, emphasize the difficulties faced by deer in win-

> Management practices must be developed for limited areas, the report recommended, if deer are to be maintained in optimum herds in a healthy condition.

Division of Minnesota's Conserva- with those of adjoining states, and tion Department got busy. Its en- drive them out of the state, lakes in the state and 20,000 employment problem. This arguplenty of water, for these lakes it has been quite effective in opwere natural storage ponds. The posing needed state legislation. trouble was Minnesota's lake wasouth through the Mississippi and state is afraid of. west into the Missouri River sys-

If they could conserve that water at its source, through dams at recent resignation from the Pennlake outlets, Minnesota could hold her water in drouth periods and P. G. Platt, well known consercontrol it during flood periods, they reasoned. So they enlisted of the Izaak Walton League. Mr. the aid of the WPA, CCC, Emer- Platt stated that he could no long-

the WPA in building dams. A total of \$12,136,593 in fed- ties in the State Health Departeral funds and \$2,749,937 in state ment who had long been known as and local funds was allotted for 1.011 lake outlet dam projects dustrial polluters, and who, by and work was started. To date their inactivity, were nullifying some 400 of these have been completed for the storage of water as on as the rains returned.

Measures Proved Effective Last year, a season of normal noisture, many of Minnesota's lakes were restored. This year the process is going further. In the State Health Department has December, 1936, Lake Minnetonka was five feet below the crest of its outlet dam. Now it is but two feet below that crest. Lake Traverse, emptying into the Red River of the North, was a dried up cake of cracked mud in 1936.

water. The lakes in three of Minneso Brainerd, Alexandria and Detroit Lakes have staged miraculous come-backs Lake Moses, near Alexandria, is up 13 feet. Pelican Lake near Brainerd is up five polluted that no fish or other feet. Lake Johanna north of St. Paul is at its highest level in 14

As a result marine vegetation has returned to most Minnesota lakes. This, in turn, has fostored better growth of minnow life, the predominating food of game fish. And already the cycle is nearing completion, for anglers report better catches of fish this year and bigger fish than in any season in

the past decade. At the same time the ground water level has been restored woody plant life, which constigame as deer, moose and bear. Ducks, too, have returned to Minnesota lakes by the hundreds of thousands. Last spring they were ta hatchery superintendent's resieven utilizing potholes and road- dence went out before he started

It may all be traced back to water, the life giving substance so essential to the existence of both animal and plant life. (Copyright 1939, North American

## Conservation | POLLUTION TOO **BIG FOR STATES**

Real Federal Act Needed to Deal With Problem of Water Control

BY KENNETH A. REID Theoretically states can control pollution if their Legislatures will give proper authority to some responsible state agency for doing so. Actually while a few states have done very creditable work, none have yet proved that they can do a complete job, and if the record of state attempts is to be used as a criterion the majority have rather definitely proved that they can't or won't. It is not always a matter of the authority of state legislation, for some states with relatively good laws have ac-

complished relatively little. When we study the subject of water pollution the reasons for lack of accomplishment under state control are readily apparent. In the first place, water is not static, it flows by gravity from county to county and state to state, with utter disregard for man-made political boundaries. and it carries with it the pollution originating in one state into another state.

Problem Is Interstate Some of our very worst pollution problems are interstate in character and there is no use kidding ourselves about the vaunted altruism of the human race. Human nature is just not that way when it comes to correcting water pollution. Both municipalities and industries that pollute water are too much concerned with their own fiscal problems to add to them voluntarily by the construction of treatment plants that would benefit not themselves but their downstream neighbors. An upstream state is not disposed to enforce corrective measures on its citizens and industries when the benefits accrue largely to citizens

of downstream states. It is this fundamental characteristic of human nature, coupled with the non-static character of water, which makes the fine theories of voluntary action and financial assistance in polition abatement largely an

One stock argument is brought up by industrial polluters whenever state control legislation is miles pass such a law in our state would penalize our industries, put then Then the Drainage and waters at a competitive disadvantage but the amusing and inconsistent ment is also used effectively in the "other states" that the first

A specific example of the weakness of state legislation in coping with pollution is furnished by the sylvania Sanitary Water Board of vationist and a national director er serve on that Board as long as its policies were dictated by parthe friends and protectors of in-

the Pennsylvania Pure Streams Act Pennsylvania recently passed an excellent state anti-pollution act. Now, after a brief period. it is inoperative through a return to the old laissez-faire policy that pursued for many years. The attempt of Secretary of Health Shaw to defend his position by saying, "this issue evidently is rapidly becoming a battle between fish life and human life," is amusing but not illuminative. Certainly purification of our streams so they will be suitable for fish life can in no way conflict with public health or human life, but it is entirely possible by elaborate treatment to deliver bacteriologically safe fluid through the water faucet from a source that is so vilely

aquatic life can live in it. If the polluted condition of the nation's waterways were not sufficient evidence, the failure of Pennsylvania to function under its splendid control act should be convincing proof that state legislation is not the answer.

Play Double Header With Copper Country Team Today

With a chance of advancing into a tie for first place in the Northern Michigan-Wisconsin league, if they can sweep both ends of a double header this afternoon, the Escanaba baseball team will journey to South Range today to engage in a twin bill

there. The locals seem to improve with each game they play in the second round and at the present time are riding high on the crest of a three-game winning streak. A double victory over the Rangers coupled with a defeat for the league leading Crystal Falls crew will enable Escanaba to tie for the

league lead. The games today at South Range will mark the beginning of the final half of the second round of the schedule and the double header is the result of a postponement during the first half of the

Show Improvement Although there has been a marked improvement in the locals fielding and hitting power during the second half of the schedule the outstanding factor in their winning streak has been the

pitching of Phil Brazeau. Brazeau started out by fashioning a six-hit masterpiece that gave the Escanaba aggregation a 1 to 0 victory over the Ford Twins, and the following week limited Niagara's Badgers to two unearned runs, finally gaining an eleveninning 3 to 2 verdict. He came through with his best accomplishment last Sunday against the Negaunee Rovers, limiting them to only two hits to earn another shutout victory, this time by a 2

to 0 count. The Escanaba hurler's feat last Sunday was extraordinary in view of the fact that he did not allow a hit until the seventh inning. struck out 12 men and retired the first 14 men in order before finally granting a pass in the fifth inning. It appears that he is at his best when the chips are down and he had to be last Sunday as Maki pitched four-hit ball for the Rov-

ers. Statistics reveal that Brazeau has not permitted an earned run in the second round and has llowed only 16 hits. In other games on the league calendar for today Crystal Falls will play the Rovers at Negaunee and the Ford Twins will cross bats with Niagara. While Escanaba fans are hoping for a Negaunee victory over Crystal Falls, a win for the Rovers would be regarded as a distinct upset. In three games played between the teams this season Hugh Orphan. Crystal Falls southpaw, has had the well known Indian sign on Negaunee, while the Falls crew has found the offerings of the members of the Rovers mound staff much to their liking, annex-

the tilts to set a league scoring NEGAUNEE TOSSES SPONGE Iron Mountain, Aug. 11-Negaunee, cellar team of the Northern Wisconsin-Michigan league, tossed in the sponge today, notifying league officials that "lack of players as well as funds compels

ing a total of 21 runs in one of

Withdrawal of Negaunee, making its second campaign in the circuit, marked the first time in the five-year history of the loop that a starting team has failed to complete its schedule. Clarence Trotochau, Negaunee

us to drop out of the league.

manager, said he was wiring Crystal Falls, which was scheduled at Negaunee Sunday. Negaunee, which ended the first half season in the basement with three victories in 10 games, has won only one game this half, beating the Ford Twins here recently. Negaunee and the Twins, each with one win and four losses, are

tied in last place. Franchise Fee Forfeited Unless another team is secured to play out Negaunee's schedule, games with Crystal Falls, South Range, Niagara, the Twins and Escanaba will be forfeited. Under league regulations, Ne-

gaunee's franchise fee is automatically forfeited by its withdrawal. In his letter to League Secretary "Buck" Erickson, Trotochaud

stated: "It hurts me to write this kind of a letter but we believe it is for the best. Lack of players as well as funds compels us to drop out we have all we can do to be able to line up nine men to put on the field. As you know in the Iron Mountain game we were compelled to use a man not on our roster. With our funds the way they are we are not able to meet the exout of town. They are practically

### Rapid River

SURPRISE PARTY

Rapid River, Mich .-- A pleasant surprise was staged on Mrs. George Ames Wednesday afternoon when her children and grandchildren assembled at the home of her granddaughter, Mrs. Waldron Johnson, where a party was held honoring Mrs. Ames on her 67th birthday. A very nice lunch was served. The birthday cake was prettily decorated, and bearing candles forming the figures 6 and 7, occupied a prominent place on the table.

Present were her two daughters, Mrs. Andrew Burnette and Mrs. Zeph Rushford, daughter-inlaw Mrs. Fred Ames, grandchildren, Mrs. W. Johnson, Mrs. R. Archambeau, Leonore, Doris and Gayle Rushford, Juliane and Rodney Ames, Fay Minor and Virginia Lee Burnette, great grandchildren, Jon Roger Archambeau. Waldron and James Allen Johnson, and two close friends, Mrs. son, and two close friends, Mrs. al Storage Bat Hilda Johnson and Miss Ella Erie RR Johnson. Johnson.

The chemical fire truck was called out twice the past week. Freeport Sulph Once to Masonville to the Percy Leach home and the second time to Whitefish to the Leslie Doty home. Both fires were chimney dilette Baf R fires and no damage resulted

Art Lauson is having a well granam-Paige Mot drilled at his home in Masonville. Grant (WT) Jos. Breuning of Gladstone is doing the work.

The Thursday Bridge club met Thursday at the home of Mrs. Al Morley in Gladstone. Mrs. Ralph Dickey received first prize, Mrs. Beadle of Escanaba, a guest, received travelling prize and Mrs. Morris Fickes consolation.

Mr. and Mrs. John Acker and daughter Margaret Louise left Thursday to spend the remainder of the week with the Fred Gra- int Tel - Te velle family atSault Ste. Marie.

Mr. and Mrs. Raymond Gravelle, who have been spending the summer vacation at the Frank Gravelle home, left Friday for Marquette to spend the remainder of the vacation there.

Mr. and Mrs. Edward Fuhriman, Elsie, Alice and Harold Weaver left Friday for a weeks visit at their former home, Shel-Loew's Inc. by. Mich.

Mrs. Joseph Duchay and son and Miss Ann Duchay arrived Thursday for a weeks visit with relatives. Mrs. Duchay is the former Olive Wickstrom.

Kathleen Holmgren and Eilene Johnson left Thursday by bus for a vacation visit at Bay City. They will be guests of Mr. and Mrs. Mo Pacific ..

E. M. Peterson. Miss Helen Wickstrom, who is employed in Cincinnati, Ohio, ar- Motor rived home Thursday for a sev- Mueller Brase ....

eral weeks visit. Mr .and Mrs. Joseph Lafram- Nat Biscuit ... boise and family, of Gladstone, Miss Doris Laframboise of St. Francis hospital, Evanston, Ill. and Prescott Earle of Hermansville were dinner guests at the Curtis Christiansen home Wednesday night.

Mr. and Mrs. Alex Wickstrom and son Arnold spent Wednesday Otis Elevator at the Wyman Newnencamp home in Gladstone.

Lloyd Kennedy of Fond du Lac returned home after a six weeks visit at the James Kennedy home. Jimmy Kennedy accompanied him and will visit there for several weeks.

Emmet Kennedy left Tuesday night for Minneapolis to enter the Ethel Hospital. While at work a cinder became lodged in his eye and infection developed, which made it necessary for him to consult medical aid.

#### U. P. Dunes Help Geologists Trace 6.25 History of Region 69.50

34.50

(By Arthur W. Stace.) Ancient waters once washed 27.25 over a large part of the upper peninsula east of the great Marquette-Delta hills that mark the division between the flat lands and the uplands of the mining country. These ancient waters left behind them many records which geologists have learned to interpret, as archaeologists have learned to interpret the hieroglyphics of bygone civilizations. Among these records are numerous dunes-dunes along the northern shore of Lake Michigan from Brevort to Manistique, dunes as far inland from Lake Michigan as Seney and beyond and the great mass of dunes perched on the bluffs of Lake Superior west of Grand Marais. The geologists trace the forma-

tions of the dunes to three major periods-the Lake Nipissing period, the Lake Algoma period and the present period. The present 14.8 period, it should be explained, refers to the time during which Lakes Michigan, Superior and Huron have occupied their existing basins at their present levels and goes back hundreds of years.

The Lake Nipissing and Lake Algoma periods - 4,000 to 2,000 years ago-came after the time of Lake Algonquin from which is dated the formation of many of the western Michigan dunes. These great lakes existed after the ice cap which had covered Michigan had retreated far to the north.

When Earth Tilted. Upper peninsula dunes formed during the Nipissing and Algoma periods were subsequently lifted above present lake levels by the upward tilting of the earth in the northern regions. This tilting, the geologists explain, came when 76.50 the crust of the earth pressed down by the immense weight of the ice cap moved upward as the melting of the ice released the pressure. This upward tilting was north of a so-called hinge line which crossed Michigan approximately from Frankfort to Port Huron. It raised the eastern half of the upper peninsula well above the waters and in the course of centuries created shallows in northern Lakes Michigan and Huron where once there had been deeper waters.

> Until recent years the dunes of the upper peninsula have been so isolated along lonely shores or amidst deep forests that casual visitors have not known of their

# Bark River News LEADING ISSUES

BY FREDERICK GARDNER

New York, Aug. 12 (AP)-Last minute buying support put a wavering stock market back on its feet today and leading issues finished with gains running to a point or so. Steels, motors, rails and specialties led an upward re- Phone 105

The two-hour volume amounted to 257,880 shares against 236,980 a week ago. The six-day turnover, however, was around 1,000,-000 shares less than in the pre ceding week.

of 60 stocks was up .4 of a point at 48.3, but on the week suffered a net loss of 1.3 points. Early speculative indifference

At the same time, belated recognition was given to the brightcapacity next week, best rate since

Improved prospects for the motor makers, sustained traffic gains for the railways, mounting merchandising demand and expanding sales activities in other lines helped.

Prominent on the advance were U. S. Steel, Bethlehem, Chrysler, General Motors, Goodrich, Montgomery Ward, Santa Fe, Southern Pacific, Pennsylvania, American Telephone, Brooklyn Union Gas, Anaconda, Westinghouse, Du Pont, Loft, Continental Can and Celanese.

CHICAGO GRAIN
Chicago, Aug. 12 (P)—A late rally lifted
wheat prices here today a cent from early
lows to net gains of about ½ cent. The
close was at the full advance. Corn showed strength throughout the session and finished nearly a cent higher. The wheat market here started steady,

but weakness at Winnipeg, where prices were down more than a cent and closed ½ to 3-4 down, influenced it and helped produce a decline of about 1/2 cent. At that level, however, the market again steadled, strength in the corn market steadled, strength in the corn market a factor.

Wheat closed ½ to 5-8 higher, September 64 5-8 to 64 3-4, December 64½ to 64 5-8; corn 3-8 to 7-8 up, September 43 3-4 to 43 7-8, December 42 3-4 to 42 7-8; oats ½ to 3-8 up; sys beans 1-8 to 3-8 up; rye 1-8 up and lard 13 to 17 cents lower.

Oats were fairly firm in a light trade and rye, after a slight decline, turned upward with wheat.

Lard resumed its downward trend, establishing new season lows.

## **Provisions Explained** By WPA Headquarters

With the announcement that new calendar. 1939" has been given by local funds appropriated by section 11 WPA headquarters in an attempt workings of the measure.

past that they are entirely help-F. C. Harrington, federal WPA costs of living." commissioner, under the provisions of the act of congress,' and this condition still holds true.

The ERA Act of 1939 is quoted as follows: Section 16 (b)-There shall be removed from employment on Works Projects in section 1 (I) shall be 130 Administration Projects all relief workers, excepting veterans, who have been continuously employed on such projects for more than eighteen months, and any relief worker so removed shall be ineligible to be restored to employment on such projects until after (a) the expiration of thirty days after the date of his removal, and (b) recertification of his eligibility for restoration to employment on such projects."

Explain "Continuously Employed' The term "continuously employed," as used in this section of the act means project employwithout a period of separation or interruption in such employment causing the absence of a payment of wages for a payroll period. Non-payment due to rescheduling of hours or changes in payroll period dates shall not be construed as an interruption in continuous employment.

gressional act requires persons to terminate because of 18 months of continuous employment, they must be re-certified before coming eligible for WPA employment, and therefore WPA must cancel their certification upon their "temporary" release.

Also, if a worker who is term inated subsequent to July 1, 1939, due to private employment (district office notice), prior to termination has been employed 18 months by WPA his certification s to be canceled; however, if such worker recertified and if 30 fays have elapsed since termination, the worker is entitled to imnediate reinstatement.

Recertification Can Proceed Somewhat more favorable than previous predictions is the report that as a satisfactory plan for certifying WPA workers during period prior to Nov. 1, 1939 has been approved, affecting immediately all certified relationships, and relief offices will be able to continue certification after the thirty day periods have elaps-

Explanation of the 130 hour provision is explained by the fact that in Eastern states all work is being done on the assumption that the plan will in time amount to 120 hours per month on a new 13 month basis under a projected

### STORIES IN STAMPS

Forgotten Key Unlocked Secret of the X-ray

ONE of the most popular stories of the discovery of the X-ray by Wilhelm Konrad Roentgen, in 1895, is that a forgotten key, used as a bookmark, was accidentally exposed to the rays, reproduced upon a sensitive photographic

Roentgen never confirmed this anecdote, but it is certainly true that his discovery unlocked an entirely new field of medical science, gave physicians a most potent weapon in the battle against disease—the ability to see within the living human body.

Roentgen was over 50 when he made his remarkable find. His early life as a student was undistinguished by any show of brilliance, but later association with August Kundt, teacher of experimental physics, led him into research, won him honors as professor of physics at several great German universities.

In 1901 he was awarded the Nobel Prize in physics, which he immediately assigned to be spent on scientific research. But the World War wiped out that revenue as well as his personal for-

It was a queer twist of fate that Roentgen's death, in 1923, should be caused by cancer, a disease which his rays have combatted with a large measure of success.

The use of Roentgen rays in the treatment of this disease is cited in the inscription of the Danzig commemorative stamp, olive above. Translated, it reads, for Cancer-Cancer is rable." The stamp is one of a set of three honoring medical re-

252 workers of Delta county's From Section 15 (a) the fol-WPA load have been laid off and lowing is taken—"The (Works with possible future layoffs in the Progress) Commission shall fix a offing, further interpretation of monthly earning schedule for perprovisions of the "Emergency sons engaged upon work projects Relief Appropriation Act of financed in whole or in part from . . . shall not substantially affect

Here is the "A" shaft of the Cleveland Cliffs Iron company mine at Ishpeming.

### State Employment Offices Set Record in the Escanaba office, during which week there was a total of

The combined efforts of the lo cal offices of the Michigan State Employment Service thruout the state in June set a new all time high in placements. The 10,594 private placements made thru the offices, not only beat the 9,209 placements made in May, but topped all monthly records made since the inception of the Employment Service in Michigan.

June showed as the fourth consecutive month of increase in the June. number of placements starting from the February record of 4,025 to a large total for the month of June. In addition, there were 3 South 17th street, submitted to an 691 placements on public projoperation for removal of tonsils ects during June which would make the total number of placements during this month 14,285.

The Escanaba office contributed to this record by making 39 private placements, an increase of Washington avenue, submitted to five over the previous month, and an emergency operation for relief 115 public placements, making a total of 154 placements for June 1939.

In July, the local office of the MSES made 45 private placements, an increase of six over the amount made in June, the will need temporary help during Ursula McLaughlin, 405 South previous month. There were also the American Legion Convention at 2181. Either will bring them total of 71 public and private placements for this past

Kuchenberg, 102 on a Green Bay yacht cruise, as North Raymond street, Marinette; cemetery.

Kuchenberg was stricken about four o'clock, as the yacht neared Egg Harbor. Two physicians vacationing at the Alpine resort were called, but pronounced him dead when they arrived. Members of the party, Mr. Meyer, who is president of the Badger Paper Mills, Inc., of Peshtigo, Wis., Mr. Cucheberg, Harry Haslanger, Ralph Smith and Loren S. Miller, had been sun bathing on deck. Kuchenberg complained of feeling cold and went below. He was found slumped on the floor, unconscious, a few minutes later, and died within a short time. The body, returned to Menominee aboard the yacht, was removed from the Menominee breakwater to the McLain Funeral Home in Marinette. Kuchenberg was serving his
