FERC Project No. 10855

NATDAM No. MI00197,

MI00175, MI00183

Ms. Kimberly D. Bose, Secretary
Federal Energy Regulatory Commission
888 First Street NE
Washington, DC 20426

Dear Secretary Bose:

Dead River Hydroelectric Project: Silver Lake, Hoist & McClure Developments
Article 405 -Three Year Test Report: Year 2

Per the Article 405 Operations Monitoring Plan issued March 11, 2010, and amended September 1, 2011, pursuant to the License issued October 4, 2002, and amended September 9, 2011. UPPCO is submitting this cover letter and enclosed documents to satisfy the requirements of reporting requirements of Section 6 of the Operations Monitoring Plan labeled "Three-Year Test Period."

As a requirement of this section, UPPCO must conduct operations testing for three consecutive years and file with the Federal Energy Regulatory Commission (FERC) annual reports within four months of completing a "testing year"¹. At least 30-days prior to submitting the report to FERC, UPPCO must submit the report to the Michigan Department of Natural Resources (MDNR), Michigan Department of Environmental Quality (MDEQ), and United States Fish and Wildlife Service (USFWS), for review and comment. Any agency comments must be provided to FERC in the annual report.

The report must include hourly data in a tabular format for each development (Silver Lake, Hoist, and McClure) as well as summary of whether or not License requirements were achieved and a discussion as to why any License requirements were not achieved (if applicable).

Notification was provided to the MDNR, MDEQ, and USFWS on 10/5/2015 via E-mail. Additionally, UPPCO provided a courtesy copy to two other stakeholders, the Keweenaw Bay Indian Community (KBIC) and the Dead River Campers Incorporated (DRCI). Documentation of agency consultation is provided as an attachment to this letter, following the operations report and associated data.

¹ Testing Year" is the timeframe determined by the FERC upon UPPCO's fulfillment of the Silver Lake Refill Plan. This window has been declared as being annually August 5 to August 4 of the following year (i.e. Test Year Two is August 5, 2014; 00:00CDT - August 4, 2015; 00:00CDT).

Ms. Kimberly D. Bose

Test Year Two Tabular Data (Microsoft Excel Workbook)

Introduction:

Per Article 405 “*Operations Monitoring Plan*” within the License issued October 4, 2002 and amended January 24, 2006 and September 1, 2011, UPPCO must provide an Operations Monitoring Plan which shall include a provision for a three-year test period in order to determine UPPCO’s ability to comply with the provisions of Articles 402, and 403 of the License.

The Operations Monitoring Plan, approved in an Order issued March 11, 2010 and amended August 4, 2010 and September 1, 2011 is written such that UPPCO shall commence the three-year test period upon written approval from the FERC, once the conditions of the Silver Lake Refill Plan are fulfilled. On August 5, 2013, the FERC determined all conditions of the Silver Lake Refill Plan were achieved and that UPPCO could commence with the three-year test period.

According to the aforementioned Operations Monitoring Plan, Section 6: “Three-Year Test Period,” UPPCO shall conduct operations testing for three consecutive years and file with the Commission (FERC), annual reports within four (4) months upon completion of a testing year¹. Before submittal to the FERC, UPPCO shall submit copies of the annual reports to the Michigan Department of Environmental Quality (MDEQ), Michigan Department of Natural Resources (MDNR), and the United States Fish and Wildlife Service (USFWS). These agencies shall have 30-days to comment on the report. UPPCO will also provide hourly data in a tabular format, a summary of whether or not License requirements were achieved. If License requirements were not achieved, UPPCO shall provide discussion as to why, and recommendations to alter operations to improve compliance with the requirements. Additionally, when filing the annual reports to the FERC, UPPCO will provide responses to agencies comments (if applicable), including any reasoning as to why agency recommendations were not implemented (if applicable).

Hourly operations data is included in tabular format within an attached Microsoft Excel Workbook. The workbook contains three (3) tabs, each representing one of the developments within the Dead River Hydroelectric Project (Silver Lake, Hoist, McClure). Given the drawdown of the Silver Lake Basin in summer of 2015, graphical representations of Test Year Two have also been included, in terms of total plant flow (TPF), and headwater elevation. These graphs represent an operational summary of the entire test year, as well as an operational summary of both the Planned Deviation Period and Planned Drawdown Period in 2015².

¹ “Testing Year” is the timeframe determined by the FERC upon UPPCO’s fulfillment of the Silver Lake Refill Plan. This window has been declared as being annually August 5 to August 4 of the following year (i.e. Test Year Two is August 5, 2014; 00:00CDT - August 4, 2015; 00:00CDT).

² Per the FERC Order approved June 11, 2015. Planned Deviation window was May 15, 2015 to June 15, 2015; Planned Drawdown window was June 15, 2015 to July 15, 2015.

Hourly Data for Reservoir Headwater Elevation and Total Plant Flows:

Tabular, hourly data from Test-Year Two (2014-2015) is included as an attachment to this report. Additionally, graphical representations of the operations data (headwater elevation, and total plant flows) are also attached to this report. More specifically, the graphs attempt to outline the planned deviation and planned drawdown periods during 2015, to show how utilization of Silver Lake is vital to the Dead River Developments for not only the generation of power, but also in maintaining the aquatic resources downstream in terms of recreation and ecosystem stability.

Fulfillment of License Requirements:

UPPCO filed its report titled "2014 Annual Report – Operation Monitoring & Report of Deviations Less Than Sixty Minutes" to the FERC on February 26, 2015. Additionally, this report was submitted to the applicable resource agencies on January 23, 2014 for comment. The report outlines all deviations within the 2014 operating year, per Articles 402 and 403 of the License.

The 2014 operating year had three (3) deviations less than 60-minutes and seven (7) deviations 60-minutes or greater. None of the deviations reported in the 2014 annual report were a result of UPPCO's inability to comply with requirements of the License.

As of August 5, 2015, UPPCO has observed and reported three (3) deviations 60-minutes or greater within the 2015 operating year, and has had a number of other minor deviations that will be included within the 2015 Annual Deviation Report. None of the deviations observed within the 2015 operating year have been a result of UPPCO's inability to comply with requirements of the License. Additionally, UPPCO had a planned deviation starting in May, 2015 at both Silver Lake Basin and Hoist Basin in an attempt to limit stream channel impacts along the Dead River.

Proposed Amendments to License Conditions:

At this time, UPPCO is not proposing and amendments to License conditions in terms of Test Year Two. UPPCO reserves its right to request amendments to the conditions of the License at any time until the end of the Three Year Test Period.

Anomalies in Operation:

During the spring of 2015 UPPCO initiated a planned deviation and planned drawdown of its Silver Lake Development in an effort to reach an elevation of 1476.0 feet NGVD. This was considered an elevation that would be safe as a “buffer” against a 100-year flood event during the required dam safety- related construction. The 1476.0 feet NGVD target elevation was developed and recommended by GEI Consultants. Drawdown of Silver Lake took place just after the peak-runoff period until the anticipated construction start date of July 15, 2015.

UPPCO also initiated a planned deviation prior to the planned drawdown in an effort to reduce the intensity of flows needed to draw Silver Lake down in the necessary timeframe necessary to meet construction deadlines. This was in an effort to minimize stream channel impacts directly downstream of Silver Lake. The planned deviation was also an effort to minimize any impacts on summer recreation at the Hoist Basin in terms of erosion, as well as preventing sudden, major increases in headwater elevations.

The planned deviation suggested lowering the June start of month target elevation for Silver Lake from 1480.5 feet NGVD to 1479.0 feet NGVD, and also lowering the June monthly minimum elevation at Silver Lake from 1480.5 feet NGVD to 1479.0 feet NGVD. It also suggested keeping the June start of month target elevation for the Hoist Reservoir at 1342.0 feet NGVD, in order to allow for increased storage capacity during the upcoming summer months.

Due to an unexpected amount of heavy precipitation during the spring and early summer months, UPPCO was unable to fully reach the target elevation proposed in the planned deviation. UPPCO still initiated the drawdown of Silver Lake, and was able to maintain compliance using the proposed elevation of 1342.0 feet NGVD at Hoist Basin. No impacts on the Dead River were observed from the drawdown activities. UPPCO also increased outflows from the Hoist and McClure powerhouses in an effort to maintain target elevations at Hoist and McClure basins.

License Requirements Not Fulfilled:

UPPCO had several instances of non-fulfillment of License requirements during Test Year Two. Beginning in March, 2015 and continuing through mid-April, 2015, UPPCO’s operational data showed a decrease in headwater elevation at the Hoist Basin during that timeframe. This decrease in headwater elevation caused minimum target elevations to be missed, including a drop below the minimum elevation for March and April. This drop in elevation can be explained by low inflows due to the timing of spring runoff.

It should be noted that a similar instance was reported in the Test Year One report. That report indicated that the Hoist Basin did not meet minimum elevation requirements in February, 2014 until the 2014 spring runoff period, consistent with the data from this year.

Discussion of Recommendations to Alter Operations for 2016:

Silver Lake Basin:

Proposed Changes in Operations:

1. UPPCO suggests that the start of target elevation for June, and July at Silver Lake Basin be adjusted to 1485.2 feet NGVD.

Justification for Changes:

1. Higher start of month target elevations at Silver Lake will allow for maximum storage potential with the basin, while supplying the required flows to the Dead River. By increasing the storage capacity at Silver Lake Basin during, and immediately following spring runoff, UPPCO anticipates that it will be easier to maintain current License conditions at each development within the Dead River Project during summer months.

Hoist Basin:

Proposed Changes in Operations:

1. UPPCO proposes a February meeting for consultation with the resource agencies (MDEQ, MDNR, and USFWS), and stakeholders (DCRI, and KBIC) to discuss UPPCO's suggestions to alter the Hoist Basin start of month and target elevations for March and April based on weather forecasting and snowpack hydrology predictions under a planned deviation.
2. UPPCO suggests a start of month target elevation of 1341.0 feet NGVD for the month of May.

Justification for Changes:

1. By altering minimum and start of month target elevations during March and April, it is expected to limit UPPCO's need to file for planned deviations during the months prior to spring runoff, and will help to offset the dry year consultation process from occurring earlier on in the season.
2. Adjusting start of month target elevations to 1341.0 feet NGVD for May will allow UPPCO more storage at the Hoist Basin to maintain target elevations during June, July and August

McClure Basin:

Proposed Changes in Operations:

1. UPPCO suggests that the McClure Storage Basin be operated at or above 1194.8 feet NGVD, with the removal of the high limit of 1196.4 feet NGVD, while limiting fluctuations in elevation of not more than 1.0 foot/day.

Justification for Changes:

1. Currently McClure Basin has a maximum elevation set point of 1196.4 feet NGVD (spillway crest elevation). This elevation proves difficult when wave action or excess water due to storm events or runoff may cause water to be spilled.

Spilling water at McClure simply returns water to the downstream reach of the Dead River and should not be considered a License deviation. By allowing for the removal of the high limit of 1196.4 feet NGVD, UPPCO will not be deviating if spilling occurs.

Recommendations for Increased Monitoring Under License Articles 402 and 403:

UPPCO does not suggest any increased monitoring with respect to Articles 402 and 403 of the License. UPPCO believes that current License monitoring requirements are sufficient to maintain compliance, therefore, no additional monitoring or reporting is being suggested in this report.

2014 Pre-Runoff Operations for Hoist Basin:

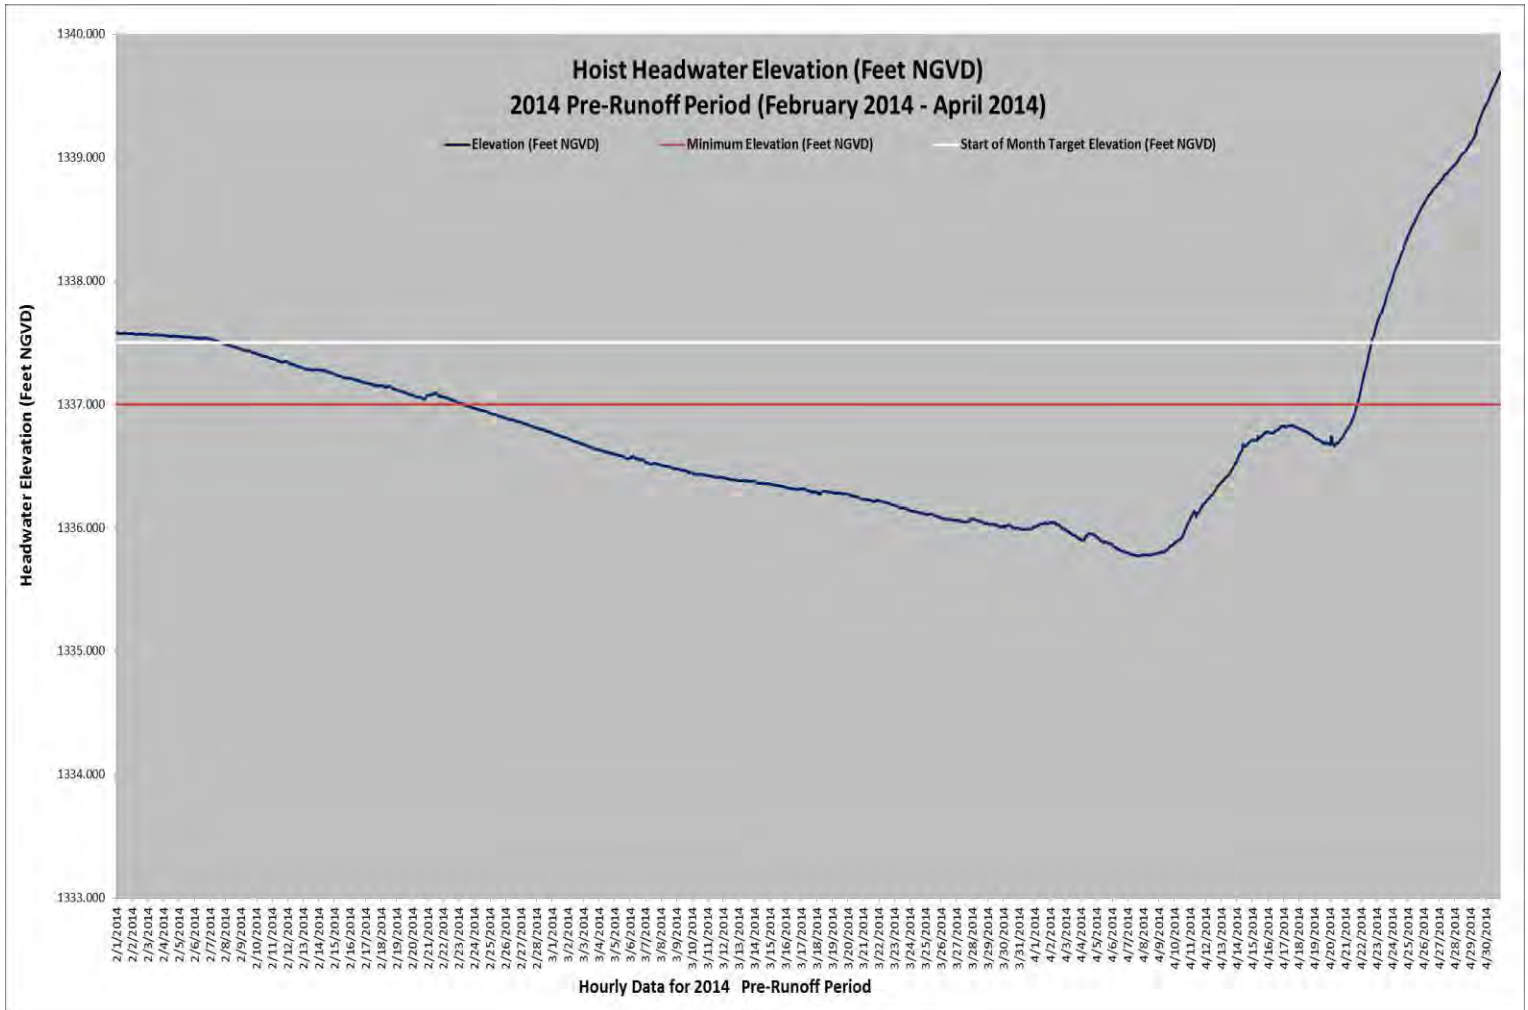

Figure 1. Graphical representation of Hoist Basin headwater elevations from February 1, 2014 – April 31, 2014

2015 Pre-Runoff Operations for Hoist Basin:

All,

Attached is UPPCO's Year Two Test Report under the Three Year Test Period for the Dead River Hydroelectric Projects. Please find the cover letter attached, which explains all of the information that is being provided as attachments to this E-mail. As specified in the cover letter, UPPCO is requesting that you please respond with your comments within 30-days of the cover letter date (10/5/2015). If you have any questions please do not hesitate to call or E-mail me, my contact information can be found in my signature below.

Thank you,
-Jarrod Nelson

Agency Representatives:

Dead River Hydroelectric Project – Silver Lake, Hoist, and McClure Developments
Request for Agency Comment to Three Year Test Report (Year Two: 2014-2015):

Per UPPCO's Operations Monitoring Plan (Plan) amended September 1, 2011 under Article 405 of the License issued October 4, 2002 and amended September 1, 2011, upon the conditions of the Silver Lake Refill Plan being fulfilled, UPPCO commenced the Three Year Test Period for the Dead River Hydroelectric Project. According to the Plan, UPPCO must submit the results of each testing year to the Michigan Department of Environmental Quality (MDEQ), Michigan Department of Natural Resources (MDNR), and United States Fish and Wildlife Service (USFWS).

Additionally, as a courtesy, UPPCO is submitting this report and supplemental information to the Keweenaw Bay Indian Community (KBIC), and the Dead River Campers Incorporated (DRCI).

UPPCO is submitting this report for testing year two (2014-2015) for the Dead River Hydroelectric Project. In addition UPPCO is also submitting graphical representations of operations data, and tabular-formatted operations data. UPPCO requests that all comments be made within 30-days of the date of this letter so that a timely and appropriate response can be formulate before submission of this information to the Federal Energy Regulatory Commission (FERC). If UPPCO does not receive your comments within 30-days of the date of this letter, it will be assumed you have no comments.

Darryll,

Thanks for the E-mail, I am happy to address the DRCI's questions:

1. **What is the refill plan to get Silver lake back to 1485.2 for start of target elevation for June. This morning Silver lake was at elevation 1473.24 or about 12 ft below that proposed target.**

- In the FERC approved drawdown plan, UPPCO indicated releasing only the minimum flows required from Silver Lake until the refill is completed. Silver Lake is lower due to dry year conditions throughout the Dead River Watershed and the requirement to release minimum flows into the Dead River below the dam.

The 1485.2 feet NGVD was a suggestion in operability as a part of the test report to allow for Silver Lake to be utilized to store more spring run-off. This is only a suggestion at this time, not a requirement of the License. UPPCO will attempt to operate Silver Lake at the 1481.0 feet NGVD elevation start of month target in June unless the refill has not yet been completed.

2. **Start of month target elevation of 1341 is proposed at the Hoist for the month of May with no mention of any other changes in target elevations other than the proposed meeting in February to look at possible changes to the start of month targets for March and April. Will the other start of month targets remain as provided for in the license?**

- For now 1341.0 feet NGVD for May is the only proposed change UPPCO suggested for the Hoist Basin, until the February meeting can be arranged.

Please feel free to E-mail or call with any additional questions.

Thanks again,
-Jarrod

Subject: Questions on Year Two Test Report

Hi Jarrod,

At the DRCI Board meeting last week we discussed UPPCO's Year Two Test Report under the Three Year Test Period for the Dead River Hydroelectric Projects that you had sent out for review and comment. We did have an a good discussion and appreciate being included to offer comments. We will not be submitting any comments, but the Board did ask me to ask two questions that came up during our discussions.

1. What is the refill plan to get Silver lake back to 1485.2 for start of target elevation for June. This morning Silver lake was at elevation 1473.24 or about 12 ft below that proposed target.
2. Start of month target elevation of 1341 is proposed at the Hoist for the month of May with no mention of any other changes in target elevations other than the proposed meeting in February to look at possible changes to the start of month targets for March and April. Will the other start of month targets remain as provided for in the license?

We appreciate it if you could respond to those questions.

BY the way it was great to meet you at the Range Engineers meeting. Hope to see you there in the future. As we are always looking for speakers for our meetings, and UPPCO has done several presentations for us in the past, if there is anything that UPPCO would like to do a presentation on at one of our meetings we would welcome that. Perhaps the project that was just completed at Silver Lake may be one to consider.

Thank you.

DRCI Comments:

1. What is the refill plan to get Silver Lake back to 1485.2 for start of target elevation for June? This morning Silver Lake was at elevation 1473.24 or about 12 feet below that proposed target.
2. Start of month target elevation of 1341 is proposed at the Hoist for the month of May with no mention of any other changes in target elevations other than the proposed meeting in February to look at possible changes to the start of month targets for March and April. Will the other start of month targets remain as provided for in the license?

UPPCO Response:

1. **What is the refill plan to get Silver Lake back to 1485.2 for start of target elevation for June. This morning Silver Lake was at elevation 1473.24 or about 12 feet below that proposed target?**
 - In the FERC approved drawdown plan, UPPCO indicated releasing only the minimum flows required from Silver Lake until the refill is completed. Silver Lake is lower due to dry year conditions throughout the Dead River Watershed and the requirement to release minimum flows into the Dead River below the dam.

The 1485.2 feet NGVD was a suggestion in operability as a part of the test report to allow for Silver Lake to be utilized to store more spring run-off. This is only a suggestion at this time, not a requirement of the License. UPPCO will attempt to operate Silver Lake at the 1481.0 feet NGVD elevation start of month target in June unless the refill has not yet been completed.

2. **Start of month target elevation of 1341 is proposed at the Hoist for the month of May with no mention of any other changes in target elevations other than the proposed meeting in February to look at possible changes to the start of month targets for March and April. Will the other start of month targets remain as provided for in the license?**
 - For now 1341.0 feet NGVD for May is the only proposed change UPPCO suggested for the Hoist Basin, until the February meeting can be arranged.

MDEQ Request for Information:

The MDEQ requested information provided in the initial E-Mail on 11/4/2015. UPPCO Environmental Staff provided the information requested. The MDEQ did not provide any comments on the Test Report prior to or following the request for information on 11/4/2015.

The MDNR Did Not Respond With Any Comments

The KBIC Did Not Respond With Any Comments

The USFWS Did Not Respond With Any Comments
