**RE: Cataract Hydroelectric Project – FERC #10854
UP Hydro LLC
2013 ROR Report Articles 401/402/403**

Dear Ms. Bose:

On behalf of UP Hydro LLC, Licensee, Renewable World Energies, LLC (RWE) is submitting the 2013 Run of River (ROR) report for the Cataract Hydro Project. It is a requirement of Articles 401, 402, 403 of the License issued on February 7, 1997. Please note that the project is not operational and has not been for a period of time. There is a penstock replacement in progress at the project and is ongoing.

The ROR data including graphs both monthly as well as in 6 month blocks, January – June and July – December was sent to the agencies for review and comment on January 20, 2014. No agency comment has been received to date. The data is recorded hourly and is shown monthly as well. The only addition to the data is the addition of staff gage data recorded once per day/or when visited by the plant operator to further show compliance. You can see by the graphs that the electronic HWL data was only recorded for the first 22 days of January and for short periods of time in October and November. The Licensee has struggled with this equipment and tried/tries to rectify the issue. The staff gage clearly shows HWL compliance. The data for the period beginning about January 17 and continuing until approximately April 3 shows *no flow* at the USGS gage and therefore possible non-compliance by RWE. However, upon investigation it was noted by the USGS as "Ice" for this period. Minimum flow appears to have been maintained for the entire year, but no data was recorded during the above mentioned period. For the most part the staff and USGS discharge data follow the same trends. As in the past, the License will continue to consult at various times for temporary modifications to the operation due to river or nature conditions beyond the control of the Licensee or for other operational issues.

COPY

Kyle,

Please find the 2013 Cataract Operations Data attached and RWE's request for consultation and comment should you have any to offer. The data is recorded hourly and is shown monthly as well as in 6 month blocks, January – June and July - December. The only addition to the data is the addition of staff gage data recorded once per day/or when visited by the plant operator to further show compliance. You can see by the graphs that the electronic HWL data was only recorded for the first 22 days of January and for short periods of time in October and November. The License has struggled with this equipment and tried/tries to rectify the issue but to no avail. The staff gage clearly shows HWL compliance. The data for the period beginning about January 17 and continuing until approximately April 3 shows *no flow* at the USGS gage and therefore possible non-compliance by RWE. However, upon investigation it was noted by the USGS as "Ice" for this period. Minimum flow appears to have been maintained for the entire year except for this period of non-recording. For the most part the staff and USGS discharge data follow the same trends. Kyle, do you know why the Licensee is required to pay towards maintenance of the USGS gage and record electronic data? Just asking. As in the past, the License will continue to consult at various times for temporary modifications to the operation due to river or nature conditions beyond the control of the Licensee or for other operational issues. If you have questions or concerns, please give me a call.

Kyle, I also copied the other agency personnel for their records.

Gary
