TO THE PUBLIC:

Have you ambition to some day go in business for yourself? You'll need capital and the successful man of the future is the young man who keeps a savings account now and adds to it regularly. He has the capital when the opportunity comes. Your salary is only a temporary means of support. You ought to have money laid by to provide for yourself and family during a temporary loss of position. While you are successful, while you are enabled to live with ease and comfort that is the time to lay plans that will give permanency to your happiness, and the surest way to save is to open a savings account with this bank.

Think a little. How can you ever expect to have your ship come in, if you never send it out? Better start the voyage to-day by getting a bank book from of the fact that the news of the success us, and you will experience the joy of living by the absence of fear of future adversity—by the fact that you have money in a good, safely conducted bank where you receive 3 per cent, interest compounded semi-annually. KUROPATKIN WILL FIGHT.

Russians Are Fortifying Heights Near Tie Pass.

GETS REINFORCEMENTS.

Within a Few Days Kuropatkin's Army Will Be Doubled-Many New Guns Arrive.

Field Marshal Oyama reports to Tokic that a considerable Russian force remains south of the Hun river, while Gen. Kurypatkin today telegraphed to St. Petersburg that the bulk of the Japanese fores is still south of the Yentai branch railroad. Oyama also says the Russians are fortifying the heights on both sides of the Liao river at Tie pass. Beyond this today's dispatches from the seat of war relate to details of previous fighting and no light is thrown upon the all-absorbing question of where the next cagagement in force will occur.

Gen. Kuropatkin's estimate of his losses in the fighting around Liao Yang are far under the first reports. He reports that from August 28 to September man be lost four thousand killed and 12,000 wounded. Marshal Oyama placed the total of Japanese casualties at 17,500, making the total for both armies in round numbers 33,500. Accepting these figures as correct the battle of Line figures as correct, the battle of Liac Yang in killed and wounded falls much lewer in the scale of the world's great

Chefoo, Sept. 14.-A Chinese who left Liaoti promontory on September 10, says that the general assault on the strong-hold, which, in some quarters was reported, would occur on the 10th, did not take place. He declares that the Russians are giving most of their attention to the forts on the northeast line, which it clude Rihelungshan and Kiwanshan.

Tokio, Sept. 14.—3 p. m.—A telegram was received here today from Field Marshall Oyama, confirming previous reports that a considerable force of Russians is still to be found south of the Hun river.
Russian scouts are constantly appearing before the Japanese outposts. The Russians occasionally bring out their batteries from the vicinity of Sankunishih which arrived at San Francisco Sunday, hill and Russian cavalry camps have been seen in the neighborhood of Wuli-laitzu and Soutaitzu. Rain Paralyzes Both Sides.

St. Petersburg, Sept. 14.—The whole secret of the paralysis that apparently icken the opposing forces between and Mukden lies simply in the fact that the rain makes action quite im-possible. The roads are morasses, an possible. The roads are morasses, and the retreat of the Russian troops is being made at a small's pace under difficulties which would have totally disheartened any other force in the world, but are faced by the Russians with a fortitude The Japanese who started in pursuit

gave up the task as totally impossible, the conditions being so bad it looks as if the late rainy season, which ought to have been at its height six weeks ago, has now seriously set in.

Crisis at Port Arthur.

Meanwhile interest here is once more turning from the north to the south. Port Arthur again monopolizes auxious atten-tion. It is fully believed that a crisis is mininent there, owing to the approaching failure of the ammunition supply. The smokeless powder has entirely given out. The Japanese engineers are changing the gauge of the railway as fast as it is captured, but in such a way as to prevent the Russians from using it later on. One rail is left, while the second is so modified that it will bear the lighter type or narrow-gauge Japanese rolling stock, but be useless for the heavier Russian the hostile attitude of the Chinese troops is looked upon by the Russians as a highly serious feature of the situation.

The play was written for the purpose of introducing them.

She also is the heroine of the most remarkable story. She is the governess in a rich Londoner's family in the day time, and at night she appears at the Frivolity theater as Nellie O'Neill, the queen of serio-comic singers. The little convent girl who becomes a governess is lovable. The music hall singer is preposterous. The other music hall folk are all caricatures and consequently are frankly funny. The manager is worth his weight in gold. He is a real comedian.

The play was well acted, and for two acts looked like a thorough success. After the third act, however, the interrogation points entered and it remains for the public to wipe them out, if it so

Miss Loftus acted with zest and with a good deal of technical skill in her comedy scenes. Her pathos would have been more interesting if its purport at all six miles out of Muscatine and near times had been clear.

SCORN THE PROPOSAL.

Request for Liberal Treatment of Americanized Jews in Russia Is Spurned.

St. Petersburg, Sept. 14.—12:35 p. m.-The fact that the government of the United States, through Ambassador Mc-Cormick, had opened negotiations with the Russian government, with the object of obtaining recognition of Jewish passports in Russia, is not generally known here. Even the Journal de St. Petersburg, the semi-official organ of the eign office, receives the reports drifting back through the foreign press with in credulity. The Journal refers editorially to what it calls a "stupefying" article in the Paris Siecle, representing President Roosevelt as a new Moses seeking to impose on Russian liberal treatment of Russian Jews naturalized in the United States and Pobedenostseff (procurer general of the holy synod) as Russia's evil genius, and says:
"Have those who have written or in-

Americans Always Welcome.

elieving they will keep to the cover the time being, the officers directing search have arranged to keep a sharp proceeds: "Washington says, 'Your reproceeds: "Washington says, 'Your restrictive laws are barbarous. We condemn them. We will breach them." Washington claims that Russian Jews naturalized in the United States are entitled to escape the laws of the empire, or the dignity of the United States would be surrendered. No! A thousand times, No! The prestige of the United States will not suffer.

"We deny and always will deny that a foreign country has the right to make overtures for the classification of our population under the fiction of rights acquired by naturalization in America." quired by naturalization in America. A simple statement of the case demo strates its enormity. American citizens are always welcome and will always en-joy treatment similar to the citizens of other countries. But that does not pre-vent our specifying conditions under which foreign subjects can enter the empire. If we wished to limit im migration as America does, if we wished to stop Chinese immigration as America does, who would deny our right to do so? Even if we reserved to ourselves the right of limiting the domiciliary privileges of native born Americans who were not Christians, we would have the right to Russian Israelites who might go to the United States and simply exchange passports to swarm back afterwards, sweep away the territorial dykes and upon the slightest provocation appeal to the ever-vigiant protection of the consulates of the land with which, as a matter of fact, they have to tie. Under artificial protection they would thus create a sore body politic.

Plan to Cut Railway.

The purpose of Gen. Kuroki was to cut the railroad which was Gen. Kuropatkin's only possible avenue of retreat

and attempt a surrounding movement. On the night of September 2 his force reached a position two or three miles from the railroad with the right division zeady to strike, but Gen. Kuropatkin was able to send a superior force against him and hold him at bay while the Russian army made good its retreat.

For two days it seemed possible that the Russians might assume the offensive a large scale and perhaps force the apanese army, as the command of Gen. Kuroki is called, to abandon its posi-tion. This morning, September 5, how-ever, Gen. Kuroki is following Gen. Kuropatkin's rear guard and a brisk action, but probably without result, is in

No estimate of the casualties can be obtained at this writing, but during the forty-eight hours in which the right army was engaged in desperate fighting the dead and wounded doubtless totaled several thousands.

At Awful Cost.

During September 1 and 2 the army under Gen. Kuroki advanced to the westward from a line between the village and the stone fort of Kwang Tung, with the division forming the right wing exending to the north and the division on the left in a bend of the Taitse river The right and center of Gen. Kuroki's line were fighting with determination and gaining every foot of their advance at great cost. On the morning of Sept-tember 1 the Japanese artillery was close to Skwangtun.

It advanced several times during these two days, shifting its positions and taking advantage of low bluffs. During this time the Russians shelled the Japanese artillery furiously. Their fire was con-centrated principally upon the batteries Kwangtung, but never disturbed the Japanese gan-ners, who continued coolly to man their pieces. With the advent of darkness on September 2 the right division of Gen. Kuroki's army had oc-cupied some hills which the Chinese apt-ly named the "Five Headed hills," situtung and overlooking the railroad station at Yentai, which is two or three railes to the west of them

MUST HAVE THE TARIFF.

Nothing Else Will Provide an Issue For the Democrats This Year.

The Democrats need an issue for the campaign this year, and it begins to look as if they would be compelled to fall back upon the old question of the tariff. The wiser among them will do so with reluctance, but it is not easy to see what else is left to them. The silver issue is as dead as the question of territorial expansion, and Senator Gorman has been instrumental in making it plain to the dullest comprehension that the party cannot be rallied on a platform of opposition to the construction of the Panama canal. There does not really seem to be anything left for the Democrats to take up but the old tariff issue and on that ground they are to all appearances hopelessly divided. Ex-President Cleveland is still confident that his free trade policy did not get a fair trial and that the transformation it experienced at the hands of Senator Gorman in the senate prevented it from being the complete success he had anticipated; therefore, he is eager to try it again. Senator Gorman knows better. He, at least, has not forgotten 1896, and he is anxious to trust to any conceivable issue rather than to again fool with the tariff. And there is coming to the front in the south a school of young Democrats, of whom John Sharp Williams, the minority leader in the house of representatives, is one of the foremost, who insist that the party shall permanently abandon its traditional free trade attitude and take up, with such modifications as may serve to make a distinction between the two parties, the Republican policy of protection. It is well known to these who are familiar with recent political developments in the south that the most progressive among southern Democrats realize the advantages that the south has reaped from protection, and that only their inveterate prejudice against the Republican party because of civil war memories and also because of the Republican attitude on the negro question has held them solid for the Democratic party, even while they realized that the supremacy of Democratic policies would mean disaster to the south. If they could contrive to shunt the Democratic party on to the protectionist track they would gladly do so.

But with the most laudable intentions they are likely to blunder as badly as ever. The Washington correspondent of the Times speaks of Williams as being disposed to favor reciprocity with Canada. From a southern standpoint that might suit very well, for Canada does not compete with the south in the production of any of the great southern staples, but if it is the object of Mr. Williams to make the north solid against his party he could hardly do better than to get that party to adopt a platform in favor of reciprocity with Canada. We have had an apple out of that bag before.-Brooklyn Times.

The Tariff and Exports.

Mr. Chamberlain's speeches give us some interesting facts regarding the result of free trade in Great Britain for the last half century as compared with protection in the United States during a considerable portion of that time. For instance, he shows that, although free trade was expected to make Great Britain the workhouse of the world, yet in the twenty years from 1880 to 1901 her imports of manufactured goods increased over 71 per cent, while the increase in imports of manufactured goods to the United States during the same period was only 20 per cent. When it comes to exports of manufactured goods it is found that hand, and for some time after death the increase of the United Kingdom was only 11 per cent, while that the departed warrior may be supthe increase of the United States was 300 per cent during the twenty years from 1880 to 1901. During the same time Germany increased her exports of manufactured products 73 per cent, and even France increased her exports of manufactured goods by 22 per cent, or just double the increase | northern United States to the limits of shown by Great Britain. This is a most terrible indictment against the contention that free raw material is necessary for the increased sales of manufactured goods abroad.

Correctly Apprehended. The free trade writers of the Democratic press have been jolted into activity by Congressman Dalzell's speech. The New York World draws the very obvious conclusion that in consequence of this speech "the tariff must be discussed." Undoubtedly. The tariff must always be discussed when, as this year, free traders are massing their forces in another attempt to dislodge protection. The New York Times calls the speech a "brutal challenge" and sees no reason to suppose that it does not represent "the dominant sentiment in the party-that is to say, a sentiment which the leaders can count on in the convention." Yea, verily, it is a challenge, a brutal challenge, if you like to call it so, and of a truth it does indeed represent a sentiment on which the leaders of the Republican party can safely count in the convention of June 21. Why not? Democratic makers of speeches and writers of editorials have made the tariff the dominant issue, practically the only issue, for 1904.

The Gladstone Delta Republicans accept the issue and chal- NOT SO MUCH TALK WASHINGTON LETTER lenge the enemy to a fight to a finish. The significance of the Dalzell speech seems to have been correctly apprehended. It is well.

Embarrassed by Friends. Friends of Judge Parker say that the connection of David B. Hill with his boom for president is injuring the chances of their favorite. Mr. Hearst is also likely to find himself in a similar predicament, as some of his boomers, notably in Massachusetts and Nebraska, may not be of great help to his candidacy.-Springfield Union.

CHOICE MISCELLANY

No "Blanks" For Krag Rifles.

"It is not generally known that when diers fires a salute with what purport firing bullets," said an employee of Frankford arsenal recently. Continu-

ing, he said: "Of course the only effect sought in a salute is the production of noise, and in the old days of the Springfield rifle, with its perfectly straight cartridges, it was easy to load a blank with a charge of black powder and a pasteboard wad and insure its proper confinement by a heavy crimp at the end of the shell. With the new Krag and its bottle necked shell the powder cannot be properly confined without a projectile. Hence we make a fake bullet of paper, into the nose of which we insert a few grains of powder. Now, when the rifle is fired the paper bullet leaves the muzzle with all the initial velocity of the real steel jacketed projectile. The intense friction produced by such velocity causes the powder in the paper to explode and scatter the paper to the four winds within five feet of the gun muzzle."-Philadelphia

Fixed Furniture.

Architects and builders of flats are showing a decided disposition to fit up these dwellings with everything possible in the way of furniture. Sideboards, wardrobes, window and corner ottoman seats, mirrors and bookcases are being provided with the primary view of economizing space and the secondary idea of enabling tenants to move in and out with as little inconvenience as possible. But it also means that dwellers in flats will thus be possessed of a mere few odds and ends and that household goods will be so reduced that home will practically come to mean partially furnished lodgings and nothing more. The gathering together of lares and penates will almost cease. and housewives will have less than ever to cherish and keep in order. This will probably be regarded as another blow at domestic life.

Passing of the Cowboy.

The cowboy is gone from Indian Territory. Allotment has practically broken up the cattle business in that territory, and this year there will be almost a total absence of the big herds which have for years grazed its rich grasses. The Indian agent states that there seems to be no move whatever on the part of cattlemen to take grazing leases this year, and there will be none. Leases of this kind cannot be made for a period longer than one year, and as most of the allotments are being fenced the cowman cannot longer handle his cattle under the old regime. The Hereford and Shorthorn have taken the place of the Texas ranger, and the herds have been broken up into small bunches, owned and cared for by the

Guatuso Mortuary Customs.

The Guatuso Indians of Central America live in considerable numbers in a single hut, and the village visited comprised about fifteen huts. The dead are buried in the habitations, and the earth covering the graves settles until it is about a foot below the surface of the floor. As time goes on the graves become less distinct, and finally they are completely obliterated. When a person dies the relatives wail aloud, crying, "I am distressed." When a warrior is buried, his body is provided with certain feathers of two currassows, a bunch being placed in each cacao is placed upon the grave in order plied with drink.

Wide Range of the Moose.

The range of the moose in North America is of enormous extent, from Nova Scotia in the extreme east, throughout Canada and certain of the tree growth in the west and north of Alaska. Throughout this vast extent of territory but two species are recognized-the common moose, Alces americanus, and the Alaskan moose, Alces gigas, of the Kenal peninsula-but it is probable that further exploration will bring to light another species near the head waters of the Laird river and the Sassiar mountains of British Columbia and still another farther north in the neighborhood of the Colville river.-Field and Stream.

Saving Room Rent. "A new graft has been discovered in Sedalia, Mo.," says one of the papers of that place. "Every night for some time past the men's waiting room at the Missouri Pacific station has been crowded with men sleeping in the seats. When asked their business there by station attendants they invariably resurrected tickets to some nearby town and said that they were waiting for trains. A few days ago about fifty of these regular boarders applied at the ticket office to have the tickets redeemed. The agent then became aware of the fact that the tickets were purchased for the sole purpose of bunking convention and all other Republican state conventions that are to choose in a warm room." and instruct delegates to Chicago.

DEMOCRATS SLOW TO TAKE UP RE-PUBLICAN CHALLENGE.

Party Unity Shown In the Speeches

Canada and Other Countries. There is silence in Democratic quarters on the "reciprocity" question since the admirable speeches by Representatives Dalzell and Volstead, says a Washington correspondent of American Economist. These speeches struck the keynote of the reciprocity policy of the Republican party. Speaking of the "reciprocity" question and the results of the scheme entered into with Cuba, it is interesting to note what is asserted to be the results of that relation up to this time. Attention has already been called to the effect of the more recent changes in the Cuban customs laws whereby the effect of the expected closer trade relations was to some extent at least nullified by the later action in the Cuban laws. Some testimony has since been given before the committees of congress regarding the effect of that new "reciprocity" relation. It is claimed by the Hawaiian delegate in congress

Needn't Tell a Fib.

A woman's age is her own secret, and it is doubtful if anyone has a right to inquire into it. There are plenty of inquisitive persons—men and women, and specially the latter—who are perpetually trying to find out that secret. One member of the fair sex, with prema-turely gray hair, tells how she escaped answering impertinent question of the character and at the same time conveys the impression that she is younger than she really is. "I think it is a foolish that so many women indulge, that of telling their age wrongly," said she. "I can honestly say that I never practice it myself."

Market Gardening Profitable for Women.

Now that women are more and more turning to out-of-door occupations as a means of gaining a livelihood, it is interesting to follow the career of one of the sex, who has made a success in this line. Miss Ruth Wheeler, an Englishwoman, who has taken up market gardening in her own country, pronounces it an en-couraging field for women. The first year of her experiment she cleared some \$350, the second this sum was doubled, and though but half way through the third, she has already trebled the amount.

Miss Wheeler has a pretty little home, surrounded by three and a half acres of ground; here she lives with her two sisters, one of whom keeps house, while the other helps in the garden. She employs a gardener and a boy, who looks after the horse and delivers orders. Nearly every-

When a Man Marries.

The commonest and the saddest mistake that man or woman can make in this blundering world is in the choice of husband or wife.

Unless you are a Mormon or a resident of Dakota, Chicago or Newport, when you enter the race for the matrimonial stakes you are bound to run to a finish. It is the merest toss-up whether you will be ecstatically happy or insufferably wretched after the wedding day, but once your choice is made you have to abide The changes and chances of mortal life are exemplified to the full in the course of a long matrimonial campaign, in which first one side and then the other claims the victory, and in which, perhaps, a drawn battle is of more frequent occurence than any other.

more frequent occurence than any other. By what shall a man be guided when he is about to choose a wife? There is not the slightest doubt that beauty appeals very forcibly to most men, and yet the married women we know prove to that a vast proportion of the who have been "wooed and wedded and a" are—to put it in as polite a manner as is compatible with the strictest regard for truth-not exactly beauties; that is, according to the canons of art. It is an indisputable fact, however, that man is, always has been and always will be an impressionable being, and he is more impressionable to beauty than to any other attribute, real or fancied, of le

Finger Print Identification of Slaves.

The identification of criminals by means of finger prints introduced in recent years in European police and penal establishments is paralelled by a similar custom which has been used in Korea for centuries to identify female slayes. In a paper recently read before the Anthropological society of London by a missionary from Korea, it was stated that in the deeds of sale of slaves the hand of the latter was placed on the sheet of paper on which the deed was inscribed, and an outline of the fingers

and thumb was traced, while, in addition, an impression was made of each finger. Such impressions, which natural ly furnished a complete identification, have been found on deeds that date back 1200 years.—Harper's Weekly.

Relatives of Chicago Lawyer Insist That There Was No Reason for Suicide.

Coshocton, O., Sept. 15.-Alve Rivers by a coroner's jury into the death of John lives and fortunes to rearing him to terday on request of members of his family. It was asserted by Philip Biegler, the dead man's brother, that the attorney, recently married and on the eve of a honeymoon trip to St. Louis, could not have killed himself and must have been murdered. While confident no other theory than that of suicide was tenable, the police agreed to a postponement until

a week from tomorrow.

It was shown yesterday that the attorney was prospering in his business and that he had \$800 on deposit. The friends of the attorney were agreed that his mar ried life of less than a week had been a happy one. Biegler was deeply in love with his wife, and had anticipated his honeymoon at the St. Louis exposition

with boyish enthusiasm Some time during the day of his de parture, the police think, the attorney was stricken with suicidal mania. He informed his wife on leaving her that he would be at home in an hour, but on arriving at his office he postponed an appointment with his partner, O. C. Bruhlman, until 8 o'clock. A few minutes afterward a janitor at work on the same floor of the building heard a sharp report. When the body was discovered by Bruhlman at 8 o'clock there was nothing to indicate that the attorney had mortem examination yesterday Coroner's Physician Lewke said he found grains of wder imbedded in the skin close to the

TO GET ANYTHING IN NEW YORK Average Gothamite Is a Lash-Driven Slave-Be Bossy.

"That the average New Yorker is a lash-driven slave was never more forcibly brought to my attention than the other night at Coney Island," said Carstairs. "When a man lives in the great and only town for a few years he becomes so accustomed to being bossed around by street car conductors, 'L' guards, policemen, janitors, and everybody else that the only way to get him to do anything is to howl

"As for the illustration: I went down to Coney with a friend of mind who knows New Yorkers like a book. As we got aboard the train at the bridge there was a crowd, of course, and it seemed impossible for us to get through and aboard the cars. I asked two or three burly members of the community who blocked our passage particularly if they would not stand aside and let us get a chance at the cars, but they gave me the merry guffaw and pushed me back a little farther. Here's where my friend's knowledge of New Yorkers came in handy. He is a small man who could not stand much show in a fight, but he has a carrying and rasping voice. Standing behind this bunch of bruisers he shouted:

"'Ho, there, git out of the way; git

out quick.' "You ought to have seen the effect. The group melted away as though grape shot had been hurled into their midst, without looking around to see who had given the order. We got the

best seats in the car. "On arriving at Coney Island we started in to take in Luna Park. The entrance was packed, and there seemed no chance of getting our tickets for an hour. But here again my friend came to the rescue. He put his hand on the shoulder of the man nearest us

and shouted: "'Here, you, move on, now! What d'ye mean by blocking up this passage? Git, now; git, I tell you, or

vou'll be sorry!' "The man sank trembling to the rear, and others who heard my friend's demand faded away and made a long lane for us to pass through up to the ticket window. There the man selling admissions was inclined to pay no attention to us, as he had a hundred or more clamoring with money in their hands, but my friend gave him a look

and yelled: "'Look here, you, I want to give you a tip. I've been watching you for a week now, and I won't stand any more o' this business. Understand? The man in the window looked scared to death. Probably he had not been doing anything out of the way, but he had the regular New York guilty conscience, and immediately handed out French Physician Makes the Claim two tickets and forgot to take our

"Cry louder still," insisted the man, and the boy did his best to obey.

"Louder!" fairly howled his uncle.
"I won't," snapped the infant, and he out his mouth with a click, and was oniet for the rest of the day.-London

Why the Burglar Escaped.

The rivalry between two sisters of West Baltimore as to which should shoot a burglar they discovered trying to open the kitchen door of their home a few days ago, became so great that he es-caped, and neither of them enjoyed the

rare pleasure.

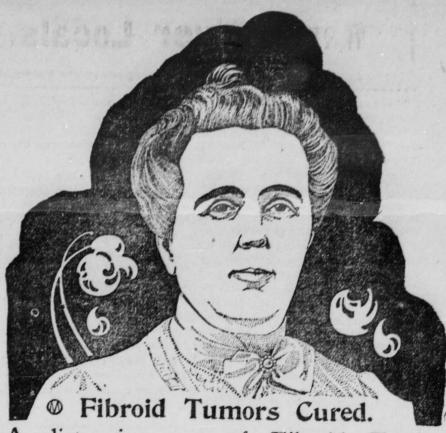

The older sister ran into the front room, and, seizing a pistol, returned with it and started toward the window for the purpose of taking a shot at the intruder 'You had better give the pistol to me, continued the younger, "you don't know how to shoot." "No," whispered the elder. "I wouldn't

think of letting you handle it."

"You shan't shoot the pistol!" commanded the younger, "you are likely to kill yourself."

The older sister attempted to walk to-ward the window, but she was prevented from doing so by the younger one. The argument was begun again, and as the young women did not talk in the softest tone of voice, the burglar heard them dis-tinctly, and, thinking that their inten-tions were not of the best, took to his

Upon the return of their mother in the evening, there was a consultation as to who should capture all future burglars, and the older sister was delegated to have exclusive enjoyment of this pleasant

The question was put and answered vociferously. The chairman proclaimed Mr. Darling and his colleagues elected and an adjournment was made. As their opponents quitted the room, Mr. Schraw and his followers seized the table. In an eloquent speech he declared the previous proceedings void and illegal, and that the caucus would be held decently and in order. He was elected chairman, and Messrs. Follo and Sorrenson tellers. Schraw, Follo, Manning and Boedcher were renominated. In order to make everything fair William Miller was nominated as an alternate. A ballot was taken formally, and seventy-eight votes were cast.
