ITEMS OF LOCAL INTEREST :

The democratic conventions held in Escanaba Thursday nominated Hon. A. H. Powell, of Gladstone to be state senator from the thirtieth district and M. Gleason, of Gladstone to be representative from the Delta district. The county ticket nominated bears the names of the following Escanaba men; Sheriff, TRANSACTS A GENERAL BANKING BUSINE John C. Tolan; judge of probate, John P. McColl; county clerk, Frank Stoik; register of deeds, J. S. Doherty; treasurer, Nels Nelson. C. Sibole, of Brampton was named for the office of coroner. and those of prosecuting attorney and circuit court commissioners remain vacant, to be filled by the county committee next week. Mr. Powell will rewill Mr. Gleason; but as to the county ticket it is necessary to speak of it tenderly, having respect for the old maxim 'De mortuis nil, nisi bonum''.

Autumn Leaf camp, R. N. A. was organized Thursday afternoon in Swenson's hall with a membership of 24. Mrs. O. L. Molloy, whose efforts have till the necessity for her presence was over. The following officers were elected for the ensuing year; Oracle, Mrs. Emma C. Bjorkman; Vice Oracle, Mrs. Anna Smith; Recorder, Miss Mabel Bushnell, Receiver; Mrs. Olive C. Brown; Chancellor, Mrs. Genevra Stewart; Marshal Mrs. Julia Boley; Assistant Marshal, Mrs. Mary Murdock; Inner Sentinal, Mrs. Nellie Bushnell: Physician, Dr. George Bjorkman; Man-Brown, and Jas. A. Stewart; Past Oracle, Mrs. Rosenblum.

SKIRMISHING IN PROGRESS

Japs Continue to Harrass Russian Lines, but Are Repulsed.

CROSSING THE YENTAL.

Preparations for the Japanese Advance Not in an Advanced

MOVING

UPON VLADIVOSTOK.

St. Petersburg, Sept. 28.-A dispatch received from Gen. Kuropatkin, dated yesterday afternoon, announces that numerous skirmishes have occurred along most parts of the Russian front. The Japanese have not altered their positions east of the railroad and confine themselves to outpost attacks to the north, all

of which so far have been repulsed. Reconnoissances by the Russian troops have established the fact that the main Japanese forces are still along the branch railroad to the Yentai mines. Both sides are in constant contact. Gen. Samson-off's troops particularly have had frequent encounters, but have sustained very few casualties. The Russians have capsome Japanese cattle and horses. The Japanese have constructed pontoon bridges over the Taitse river at Pensihu.

Ambushed Jap Cavalry. The general adds: "On the night of September 26 Cornet Mikheiff, with a detachment of Ural Cossacks, attacked the Japanese bivouacked at Khouandi, causing a great panic. The same day the Orenburg Cossacks laid an ambush for half a squadron of Japanese cavalry who returned their fire but soon retired, having sustained considerable loss and leaving several dead on the field."

There is no evidence that the Japanese turning movement is not nearly so extended. The only Japanese at this point the scouts reported in these dispatches of September 26. The only information received from Gen. Kuropatkin, timed 3 p. m. yesterday, is to the effect that Japanese outposts east of the railroad along the Shakhe river, continue to threw out small detachments, but they are invariably met and repulsed by the Russian cavalry, which maintains close contact the whole Japanese line. Daily skirmishes are occurring, but none of an important character. A herd of cattle and a few horses have been captured by

According to information brought in by Russian scouts the main Japanese forces are still concentrated along the Yentai branch railroad and reinforcements are still crossing the Taitse river, using tw pontoons at Bensihu, five miles due east of Yentai station. From the latter fact it would appear that the preparations for the Japanese advance are more backward than heretofore supposed.

Have Not Crossed the Hun River.

6:15 p. m.—The latest official advice front are silent on the subjec of the Japanese flanking movements eas and west of Mukden, from which th war office concludes that Field Marsha Oyama has not yet begun to press hi advance from Sianchan or up the Liao river valley, indicating that there is still

further delay in the general advance.

The Associated Press is now author ized to definitely deny the statement that the Japanese in any force have crossed Hun river, about fifty miles from

In summing up the situation, the mili-fary expert of The Russ says it is evi-dent from all indications at the front that the Japanese are engaged in a big turning movement on the eastward. This would give them the advantage, as here tofore, of operating largely in the mountains to which their artillery is better suited than for movements in the open But, in the present movement, the units factory than at Liao Yang.

The Russ says it is a question whether a decisive or even serious engagement will occur at Mukden. Such an event will ploye of the Lammert company. depend entirely upon Gen. Kuropatkin's view as to the exigencies of the situation. "However, one may rest certain," the paper says, "that the sentimental question of violation of the Chinese tombs wi The public must wait patiently a few days, in order to ascertain whether there will be a big fight at Mukden or whether will be continued to the strong t weigh with the Russian commander. the retreat will be continued to the strong position at Tie pass."

Steadily Closing In. Mukden, Sept. 28.-After falling back before the unexpected appearance of large bodies of Japanese east of the railread, Russian eavalry outposts bring news of an important and unsuspected Japanese movement and threatened atin force upon the Russian positions. Practically the whole of Oyama's enormous army is engaged in the immense flanking movement now in progress. Gen. Mistchenko reports that his outposts penetrated to the Yentai mines and ound only small detachments there. Mukden is a storm center of alarmist rumors. It is believed that events are running rapidly toward a mighty clash the two armies.

Berlin, Sept. 28.—A Mukden telegram to the Berlin Lokal Anzeiger reports that the Japanese have crossed the Hunriver fifty miles above the city.

Must Fight or Retreat. London, Sept. 28.—5 a. m.—Oyama's armies are closing in around Mukden, on the west as well as on the east, which will result in Kuropatkin's being compelled to fight with an enemy on all sides

or retreat to Tie pass and Harbin. In addition to the sweeping movement to the east, screened by the mountains in the direction of Fushun, it now develops that great forces of Japanese are advance ing up the Liao river and its tributaries to flank the city on the west, and possibly cut off the line of retreat to the

Liao River and Tie Pass.

The course of the Liao and its tributaries lends itself to this movement. The Liao forms an avenue north and south and the Hun river is like a branch road and the riun river is like a branch road leading almost to the south gate of the Manchu capital. From the Hun branches the Pu river, which is crossed by the railway between Mukden and Tie pass, presenting a high road to the north side

The northern ends of the Japanese semi-circular position, which stretches for sixty miles, are at least ten miles south of Mukden, but the movement is steady and Kuropatkin must attempt to break the line within a very few days or retreat to save himself from being sur-

GRAFTERS IN PERIL.

Startling Revelations of Official Corruption in Buffalo-Grand Jury's Disclosures.

Buffalo, N. Y., Sept. 27 .- The "graft lid" is being lifted in Buffalo. Before the end of the week it is expected that three, perhaps eight, members of the common council will have been indicted for bribery. City officials will be caught in the dragnet of publicity. The department of public works will be under a fire of disclosures. The police department faces disruption. The school buildings committee is under a stigma. The September grand jury and District Attorney Coatse worth have begun to disclose the ramifi-cations of a "system" of graft on municipal contracts that has extended over the last four years. Already several high officials of the city government have been implicated, and the collusion of aldernanic committees has been shown. uable privileges and contracts have been from the city. An increased bond ed indebtedness and excessive taxation have resulted.

Police Held Guilty.

Blackmail by the police department is charged before the inquisitorial body. Superintendent of Police Bull has been brought under scrutiny in the investiga-tion of police methods. Saloon keeperof the "red light" district are said to have been coerced into buying stock in a gold mine that had a clouded existence in Canada, near Rat Portage. It is an old mine, but has never paid any divi

dends so far as known Saloon keepers also have been forced to take thousands of dollars' worth of stock at the instigation of prominent police officials. As shareholders they are allowed unusual privileges. They keep open all night and all day Sunday. Women frequent their places. Music is Supt. Bull admits he is presi dent of the mining company. He denies coercion of saloon keepers.

Every Department Involved.

Every department of the municipal government may be dragged into the light. A clamor has been raised for a Lexow committee. Meantime the ury daily will receive further informa on, and before the end of a week take action to force a municipal house-clear ing. A condition similar to that of the Ames administration in Minneapolis is expected to be divulged.

LADY CURZON UNCHANGED

Manages to Well Hold Improvement in Her Condition Noted Recently-Condition Still Critical.

CHICAGO UNIONS TO GIVE UP THE CRUSADE AGAINST IT.

Combat with Employers' Association Cost Them 100,000 Members.

Chicago, Ill., Sept. 28.-Abandonment of the fight against the "open shop," waged for the past two years by the Chi cago labor unions, is likely to result from the admission made yesterday by Secretary E. N. Nockles of the Chicago Federation of Labor that the combat with the Employers' association had cost the

labor organizations 100,000 members. Secretary Nockel's declaration that the membership of the federation had dwindled from 240,000 to 140,000 caused a sensation among the labor leaders and led to a discussion of the proper course to be taken in order to avert a further loss in membership.

Conservative leaders immediately began an agitation for the passage of a resolution by the Chicago Federation of Labor, in which that body should go on record as discountenancing hastly and illconsidered strikes. Some of them even went so far as to suggest that the central should declare that the unions should avoid presenting demands for exclusive agreements.

While the unions are losing members and prestige by unsuccessful strikes and friend:

of internal disturbances.

AMERICA SHOWS SENSE SAYS GREAT BRITAIN.

Anneyance Felt Over Attache's Fast Auto Drive and Consequences-Recalls Transverse Incident.

Boston, Mass., Sept. 28.-The investigation of Judge H. C. S. Phelps of Lee, at the state house today, in connection with the fining of Third Secretary Gurney of the British embassy for fast auto driving, was completed today, but the result was not even intimated.

London, Sept. 28.—The Westminster

Gazette says: It seems desirable that gentlemen connected with the legations should keep on the safe side of local law when they use motor cars, but if perchance they transgress the simplest, quietest plan is perhaps to waive their privilege and pay the fine.

No little annoyance is exhibited in offiial quarters here at the claim made by Gurney for diplomatic exemption with the consequent publicity over a tri-fling affair. It is recalled, however, that when the son of Henry White, secretary of the American embassy in London, and Spencer Eddy, in 1899, when he was third secretary of the embassy, were sum-moned here for riding bicycles on footpath, similar exemption was claimed and reference was then made to the statute of 1708 whereby any British official acting as Justice Phelps did toward a diplomat "became amenable not only to severe and glides out into the water, penalties, but even to flogging."

Spikes on the Ways.

The Westminster Gazette commends the attitude of the America Gurney matter as "showing its good

MANY MAIMED BY FALLING PLATFORM.

Women and Children Injured When Crowded Stand at Launching Collapses.

Milford, Del., Sept. 28.-The moans of more than 200 maimed and suffering victims hurled by a broken scaffold to the ground nearly 30 feet below silenced the strains of the national anthem sung by school children guests, as the new schoon-er Charles J. Bumas glided from the ways at the Abbott yard on the banks of the Mispillion river yesterday. With the crash came a panic, in which the absence of death seems almost miraculous. The victims, mostly women and children, were piled in heaps among the fallen timbers. Nearly a score were seriously injured and more than a hundred were cut and

FIFTEEN HURT IN CRASH.

Street Railway Collision Near Columbus, O., May Result in Death of at Least Two.

Columbus, O., Sept. 28.-A southbound passenger car on the Scioto Valley Traction road struck a northbound work car this morning at Buckeye park. Fifteen people were more or less seriously injured, two fatally. The injured are being brought to Columbus.

The accident was the result of mistak-

en orders. A Hocking Valley passenger train brought the injured to this city. The wrecked cars burned.

The most seriously injured are: John Mosier, Canal Winchester, O.Motorman baggage car, head cut.
William Southard, Columbus—Motorman
passenger car, bruised and cut about the
bedy and head, internally injured. L. L. Hare, Columbus—Conductor passenger car, bruised and cut.

Mrs. Elizabeth Arnet, Canal Winchester,
O.—Arm badly sprained and body painfully bruised. Mrs. Miller, Findlay, O.-Head cut and badly bruised.
Mrs. Kost, Hookers, O.-Seriously but not

fatally hurt.

Mrs. J. M. Winter, wife of postmaster of Carroll, O.—Painfully bruised, but not seri-George Baumeister, Columbus-Painfully Edward Weisecarver, Columbus -- Rib roken, badly bruised and cut. Unknown boy—Fatally injured.

RUMOR PERSISTS IN ALICE ROOSE- Freights Collide Near Toronto-One VELT'S ENGAGEMENT.

Nicholas Longworth, the Young Millionaire Congressman, Declared to Be Lucky Man.

New York, Sept. 28.-Friends of Miss Roosevelt in this city are expecting the announcement of her engagement to Nicholas Longworth, representative in Congress from the First district of Ohio. The rumor that they are engaged has been persistent for some time, and recent events seem to lend confirmation.

Mrs. Ogden Mills gave a dinner on

Monday night at her country home up the Hudson to Miss Roosevelt and Longworth. They sar side by side. In the course of the meal Longworth showed daughter of the President a news paper clipping reporting that they were Miss Roosevelt laughed and Longworth

laughed, too. The other guests, discovering the cause of their amusement and the purport of the clipping, proceeded to chaff them. The story of the dinner episode spread,

and yesterday Longworth, who was at the uptown headquarters of the Repubcongressional committee. lican pressed by his friends for something definite in the way of an announcement. At last he made this statement to a personal

the shutting down of the large plants, they are also suffering losses as the result that I be quoted at all, I desire to be quoted as saying that I have nothing to

Nicholas Longworth is a millionaire, 35 posted a notice on the gate of its works that operations will be resumed in the sheet mill next Monday. Former employes, who to the number of 500 went metropolis. From his grandfather and his father he inherited great blocks of valuable real estate in the congressional

district he represents. From the time of his arrival in Washington he has been most attentive to Miss Roosevelt. He was her devoted attendnt at receptions, and he accompanied or to places of amusement. During the ast summer, when Miss Roosevelt was traveling from place to place as the guest of her friends, Longworth was never far away. He frequently was seen with her and other young women of the Washington administration set at the house restaurant at the luncheon hour during the

WOULD WRECK BIG BATTLE SHIP.

Plot to Destroy the Connecticut at Launching Discovered-Spikes on Greased Ways.

New York, Sept. 28 .- A carefully laid plan of an Anarchist or a disgruntled vorkman to wreck the new United States ttleship Connecticut has been discovered in time. The new war vessel is to be launched Thursday morning and the last respection has just been completed.
The inspectors found that an obstruc-

ion was planted in the ways under the vater with the intention of ripping out the ship's bottom and furnishing the most largely attended shipwreck in history. Divers were put to work in preparation for the launching and were set to greasing the ways and looking for the smallest flaw that might turn the course of the Connecticut when with the speed of an express train it hits the lower ways

Spikes on the Ways.

found an obstruction whose nature is kept a secret by the navy yard people The divers reported the matter at once and the navy yard officials inspected the obstruction.

One report has it the obstruction was a set of stout spikes driven firmly into the ways, but whoever planted the obstruction reckoned without the official inspection which always is made of the ways before a warship is launched. This is an argument for the Anarchist theory. workman about the navy yard probably would have known better

There has been a guard of marines watching the big battleship ever since it neared completion. At once the guard was increased and electric lights strung about the vessel.

What Washington Officials Say.

Washington, D. C., Sept. 28 .- At the navy department today the statement was made that the special guard now stationed around the battleship Connecticut, which is to be launched at the navy yard. New York, tomorrow, was increased because of a discovery made some weeks ago of a defect in the ways which gave the department considerable concern. No word has reached the department as yet of the discovery of a new obstruction. It appears that an officer found this trouble and a searching investigation followed, but it was impossible to determine definitely whether the determined definitely determined definitely whether the determined definitely definitely determined definitely whether the determined definitely determined determined determined determined determined def feet was due to an accident or to treachery and the commandary of the yard could find no clue to the person responsible. The whole subject was guarded sible. The whole subject was sible. The whole subject with the greatest secrecy. It always with the greatest secrecy. customary to guard a ship preparatory to its launching and the incident weeks ago has put the officials of the New York yard constantly on the watch. In view of the fact that there has been trouble in the building of the Connecticut regarding the piecework system and other labor troubles, the anxiety of the officials about the safety of the ship has been increased.

INDICTS TRAIN CREW.

Grand Jury at Chicago Fixes Blame for Sunday School Picnic Wreck.

Chicago, Ill., Sept. 28.-Three trainmen formerly in the employ of the Chi-cago and Eastern lillinois railroad were indicted on a charge of manslaughter by the grand jury yesterday as a result of the investigation of the Doremus Sunday which cost eighteen lives. In addition the jurors prepared a report which is beneved to censure the officials of the road, but this was withheld and will not be made public until Saturday.

Those indicted were:

Frank E. Hoxie, engineer of freight train.
No. 144. believed to censure the officials of the

ak Casper, conductor of freight train . 144. Charles H. Wright, brakeman of freight rain, No. 144.

Frederick Whiteman, train dispatcher, and Patrick Costello, fireman of the freight train, were exouerated by the grand jury, although they had been held responsible by a coroner's jury.

GRAND TRUNK WRECK.

Other May Die-Open Switch the Cause.

Eastwood, Ont., Sept. 28.-An eastbound freight train on the Grand Trunk railway crashed into another freight train near here today. A number of cars were demolished and Engineers Kirkland and Heron, Conductor Falls and Brakeman Benedict were killed. Fireman Cameron was so badly scalded that his life is despaired of

An open switch is said to have been the cause of the accident.

NAKED LAMP SENDS TWO TO DEATH.

Nine Others Injured in Terrific Gas Explosion in Colliery Near Scranton, Pa.

Scranton, Pa., Sept. 28.-Carrying a naked lamp into one of the old workings of Mount Jessup colliery, near Peckville, today, Paul Skovers caused an explosion of gas which caught a dozen men at work in the shaft, resulting in the death of himself and John Manoski and the serious burning of nine others. Five of the latter are so badly injured that their ecovery is doubtful.

The explosion was terrific, hurling the men along the gangway and enveloping them in the flames that followed the

LADY CURZON RALLIES.

Although Her Condition Is Still Critical. It Is Less Grave, According to the Bulletin.

Walmer Castle, Kent., Sept. 28 .- A bulletin issued this morning announces that Lady Curzon has distinctly rallied and that her condition is less grave, although still critical. At 3:55 p. m. it was reported that Lady Curzon's condition was unchanged.

school here, prevented pupils from entering today. None of the pickets is more than 15 years old. Outside the picket cordon a crowd of 700 boys and girls hooted and yelled at the teachers looking from school windows. Every infant striker wore a badge to show that he or she belonged to a "union." Many of the strikers carried clubs and threatened violence against any child daring to enter the school yard.

The picketing was the result of a "strike," which was caused by a mistaken belief of the children that an assistant kindergarten teacher was colored.

Wife's Mean Trick on Her Husband. George Adams has a good story to tell on himself regarding how he became an expert in the culture of tomatoes. Early in the season a friend gave Adams a few choice tomato plants, and he took them home with a view of determining how fall such vines could be made grow and at the same time bear. selected a place near the stump of a tree, and, although his wife protested

because she had chosen the same place for a flower bed, Adams won over the protests and planted the vines.

He never knew until recently, when he met a number of friends whom his wife invited to dinner, that she had substituted rag weed for the vines, and all sum-mer Adams has nursed with care what he supposed were his choice tomato vines, and often wondered why they never blos-somed and bore fruit. He had boasted that he had tomato vines at his home 4 feet high.-Louisville Evening Post.

Lesson for Women.

Jersey Shore, Pa., Sept. 26 .- (Speclal.)—"Dodd's Kidney Pills have done worlds of good for me." That's what Mrs. C. B. Earnest of this place has to say of the Great American Kidney Remedy.

"I was laid up sick," Mrs. Earnest. continues, "and had not been out of bed for five weeks. Then I began to use Dodd's Kidney Pills and now I am so I can work and go to town without suffering any. I would not be without. Dodd's Kidney Pills. I have good reason to praise them everywhere.'

Women who suffer should learn a lesson from this, and that lesson is, "cure the kidneys with Dodd's Kidney Pills and your suffering will cease. Woman's health depends almost entireon her kidneys. Dodd's Kidney Pills have never yet failed to make healthy kidneys.

An Artistic Triumph.

Zeuxis was boasting of his grapes. "They were painted so naturally the birds pecked at them," he declared. "That's nothing," answered his rival; "I painted some so well that a man ate them and had appendicitis! Utterly crushed, he scarcely had enough gumption left to borrow a quar-

ter.-Philadelphia Press.

Deafness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing out an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot

Japanese Army Ready to Close in Upon the Russians.

OYAMA'S NET SPREAD.

Situation at Port Arthur Grows More Desperate as the Days Go By.

express the belief that if Kuropatkin intends to try and hold Mukden fighting may be expected almost immediately. Oyama's armies now cover a front of sixty miles, his wings extending to the northward, east and west of Mukden. A rapid advance of both wings is expected when he is prepared to close the net. So far there has been no heavy fighting. Tokio remains silent on the military situation and no word comes from the Japanese side.

Kuroki's Flank Move.

London, Sept. 27 .- 3 a. m .- The Japanese are slowly fighting their way to the eastward of Mukden, but their plans are so great and so much territory is to be covered that the advance will not be perceptible, perhaps, for a couple of weeks. The outpost fighting is severe, and Kuropakin's rear guard is contesting every

The Japanese have placed another army in the field since the battle of Liao Its strength is not known, but is believed to consist of nearly 100,000 men. Reinforcements are constantly arriving om New Chwang and from Feng Wang

A fifth army of 100,000 men is said to be forming in Japan.

Skirmishing Is Incessant.

· While the main bodies of the two great armies are not yet in actual contact, fighting of varying importance is incessant over the entire field of operations. Gen. Sakharoff, in a dispatch dated Sunday, informs the war office that an attempt made by the Japanese advance guard to capture Kaoutou pass, which commands the road to Fushun, failed. The Japaattack was repulsed by a strong de tachment of Russians guarding the pass. Fushua is the key to the situation. The best informed authorities on the war declare that its capture leaves the road open to Mukden. News of another and more determined attempt to capture this position is momentarily expected.

Fighting All on Flanks.

army no fighting of serious import has occurred, although Gen. Sakharoff reports that the advance posts of each army are constantly skirmishing.

Fighting productive of heavy casualties has become

has, however, been in progress at Inpu between Bentsiaputze and the railroad. In this fighting outposts of both Oku's Nodzu's armies have been engaged with Cossack outposts.

Oyama's Left Moves.

St. Petersburg, Sept. 27.-7 p. m.-The latest development in the situation at the front is the definite establishment of the fact that Field Marshal Oyama has now begun to move up his left. Gen. Kuropatkin's report today shows that the Japanese have reached Davan, on the west bank of the Liao river. A considerable concentration of Japanese is observed at Sian Chan, on the Hun river, thirty-five miles southwest of Mukden, and Japa nese cavalry is massing in the valley the Pu river. The latter is a tributary of the Hun river, which crosses the line of railway midway between Tie pass and Mukden, and may furnish a natural line of advance from the west. Oyama's armies now apparently cover a front of sixty miles for enveloping movements. His wings are extended to the north, east and west of Mukden. Thus far the Russians have found little strength or pressure from the Japanese center. Oyama seems to be moving with great deliberation, probably gathering strength for a rapid advance of both wings when an attempt is made to close the net. Although the imaginary line connecting the extreme Japanese advance east and of Mukden still passes ten miles below that city, it is evident that the fate of Mukden cannot not long be delayed. It Gen. Kuropatkin intends to try to hold the ought to be mentioned that news the city fighting on his flanks will begin such threatened risings travels swiftly. almost immediately.

Winter Campaigning.

Discussing the probabilities of a winter campaign, the correspondent says it is doubtful whether it will be possible for the Japanese to move far beyond Mukden, owing to the country north of Tie-ling being an exposed plain. Winter operations against Vladivostok, on the other hand, would be advantageous, betate transport. It is taken for granted that a spring campaign can be begun at the end of February.

St. Petersburg, Sept. 27.-The commissariat department is already prepared to furnish winter outfits for half a mil-About 478,000 sets of fur lion men. caps, cloaks and boots are proceeding to the far east. An Imperial Leader.

St. Petersburg, Sept. 27.-1:15 p. m.-Although an official announcement to the effect is not expected immediately since will require some slittle time to

Russia's second army in the field, the designation of Grand Duke Nicholas Nicholaievitch, the inspector general of cavalry, as commander-in-chief, is regarded as practically settled. Some of Gen. Kuropatkin's friends still cling to the hope that he may yet be appointed, especially if he now achieves a notable success against Field Marshal Oyama, but the idea is not shared in the best The situation at the informed circles. front with two and perhaps ultimately three big armies is considered to demand above all else that the supreme com-mander be of such personal authority as be beyond jealousies and the possibil-of intrigue on the part of subordinates, and such a man the Emperor now realizes can only be supplied by a

being extremely well fitted for this great responsibility. He has youth and an iron constitution, but above all resolution and untiring energy. With these qualifi-cations, whatever he lacks in military experience and ability as a strategist can be supplied by placing at his disposal the most able military advisers of the Rus-

sian army.

The suggestion that Kuropatkin might become chief of staff and thus in fact. if not in name, the real commander of the armies, as field Marshal Von Moltke was the actual commander of the German armies, although nominally only Emperor William's chief of staff, is generally rejected. Grand Duke Nicholas will not rely upon a single adviser, but on a staff comprising the ablest strategists of the general staff, who, in reality, will constitute a board of direction of military operations. Moreover, the officers who genius of a high order.

THREE CHILDREN DIE IN BURNING HOME.

Mother Saved in Nick of Time by Hired Man, Who Discovers the Flames.

Iowa Falls, Ia., Sept. 27.-A telephone message says that the three children of Charles N. Bird, Ruth, Edith and Ernest, were burned to death in a fire which de stroyed their home near Robertson, this county. The origin of the fire is not known. Mrs. Bird was rescued by a hired man after she had been badly burned. The fire was discovered by the man who rescued Mrs. Bird.

Dispatches from St. Petersburg BRITISH TORPEDO BOAT DESTROYER LOST.

Chamois' Screw Blade Breaks Off and Pierces Her Bottom-All Saved, Though Vessel Sinks.

London, Sept. 27 .- The British torpedo boat destroyer Chamois has been lost off the island of Cephalonia, in the Mediterranean. All on board were saved. While going at full speed on a trial yesterday a screw blade came off, pierced the bottom of the destroyer, and she sank. Two of the stokers were scalded. The Chamois was 215 feet long, was of 360 tons displacement and 5900 indicated horse power, and carried a crew of sixty two officers and men. She was built in 1896 and carried one 12-pounder quickfiring gun, five 6-pounder quick-firing guns and two training tubes for 18-inch

foot of the advance. Kuroki's army is attempting the amazing feat of a flank movement 100 miles to the eastward of Mukden. TRAIN DERAILED; 20 PEOPLE 20 PEOPLE HURT.

No One Seriously Injured in Accident Near Vulcan, Mo.-Aid Sent from St. Louis.

St. Louis, Mo., Sept. 27 .- Southbound passenger train No. 17 on the St. Louis & Iron Mountain railroad, which left here last night for Hot Springs, Ark., was partially derailed today near Vulcan, Mo., 125 miles from here. Twenty persons were injured, none of whom is thought to be seriously hurt. The bag-gage, chair car, coach and sleeper were derailed. The wrecking train, with the general superintendent of the road and

physicians, has left St. Louis. A list of the injured, telephoned from Piedmont, Mont., contains the names of thirty-one persons, a number of whom are so badly hurt that it is thought they

GET REWARD FOR CAPTURE OF BANDITS.

On the immediate front of the Russian Chicago Courts Also Settle Benefits on Relatives of Victims of Carbain Robbers.

Chicago, Ill., Sept. 27.-By a decree entered in the circuit court today a dispute between the Chicago City Railway company and twenty claimants for the reward for the capture of the carbarn bandits was settled without a contest.

Detective William V. Blaul, wh

companion, Detective John Quinn was killed during the capture of Gustave Marx, is the largest single beneficiary. Plaul receives \$989. Twelve hundred dollars is distributed

the swamps of northern Indiana. Mrs. Joseph Driscoll, whose was killed at the dugout, will divide with six detectives the sum of \$550.

BOXERS TO RISE AGAIN.

Reports from Distant Chinese Provinces Fix Date for Slaughter October 17.

Shanghai, Sept. 27.—Reports received from the northwestern part of the province of Shan Tung say that the Shotuan Boxers are openly distributing prospectuses, couched in the same language as circulated before the uprising October 17 is fixed as the date for the extermination of all foreigners. According to a dispatch from Shanghai

September 1, the North China Herald, ommenting on recent occurrences at Tamingau, province of Pe Chi Li, said: effect many miles distant from the scene of action has been immediately felt. As we said in 1900, so again we repeat with added emphasis, there is danger of a general conflagration, unless the utmost vigi-

LE SUEUR'S FORT FOUND. Minnesota Historians Discover Location on Blue Earth River.

Mankato, Minn., Sept. 27.—Representatives of the Minnesota State Historical have made a successful search for the location of the fort that was three miles from the mouth of the Blue Earth river in 1700, by LeSueur and his party of thirty men, who came up the Mississippi and Minnesota rivers in search of a copper mine. The writings of LeSueur and others of the party aided in tracing the location.

The fort was on a large mound where the LeSueur river flows into the Blue Earth river three miles from Mankato. This land is now under cultivation.

HALTS WOULD-BE LYNCHERS.

One Policeman Saves Alleged Negro Assailant from Wrathful Crowd.

Chicago, Ill., Sept. 27.—Policeman Stephen McGrath held at bay a crowd of 500 persons intent on lynching Frank Moore, at Twenty-ninth street and Wentworth avenue late yesterday. The negro ad attacked 5-year-old Annie Degnan. The mob followed the patrol wagon and attempted to enter the police station, but was dispersed.

Policeman McGrath was recently suspended for drinking.

CRUSADER RETENTION DOUBTED. member of the imperial family. Grand Duke Nicholas is regarded as Owners of British Vessel Hear Nothing Booker T. Washington Says Each Act

of Reported Capture.

London, Sept. 27 .- The owners British steamer Crusader, from Portland, Ore., August 31, which according to a dispatch had been stopped by the Japain Tsugaru straits and taken to Hakodate, received a cable message saying that the vessel had left Moji for Shanghai after coaling. No mention was made of any detection.

ALMOST DROWNED IN DITCH.

SITUATION IS DESPERATE.

Garrison at Port Arthur Making a Last Stand.

BIG SHIPS MUST ESCAPE.

The Task of the Russian Admiral Seems a Hopeless One, How-

ever.

St. Petersburg, Sept. 27 .- Gravest anxfety prevails at the courts regarding the situation at Port Arthur. Rumors are affoat that the fortress has fallen and that the garrison is making a last stand, against overwhelming odds, in the strongest of the positions which have not fallen

into the hands of the Japanese. The naval organ Kotlin publishes an article, evidently inspired, declaring that Rear Admiral Wirens has been explicitly instructed to break out of Port Arthur and attempt to save at least some of the ships. The paper admits the task of es-

caping appears hopeless.

London, Sept. 27.—A telegram to a local news agency from St. Petersburg says a dispatch has been received by the official news agency there from Har-bin, saying that the Japanese lost 1300 men killed during the night attack on Port Arthur September 18. The Rus-sian warships, it is added, rendered valuable assistance in repulsing the Japa-

Cronstadt, Sept. 27.-The local Red Cross society has received a telegram from Port Arthur, by way of Chefoo, announcing that all the Sisters of Mercy there are well.

Bean Cakes as Weapons.

Chefoo, Sept. 27.-10 p. m.-Two Japanese torpedo boat destroyers were observed outside the harbor of Chefoo tonight. A junk which left Liaoti promon-tory last night and which arrived here onight, reports having seen one torpedo boat near Chefoo. Another junk, carrying a Russian, his wife and two children, was stopped last night by a Japanese vessel, but, owing to the great distance, the treatment which the Russian re-ceived could not be observed.

Chinese say the battle which begun September 19 continued intermittently until September 24. In defending one fort the Russians rolled bean caks down on the massed Japanese. These bean cakes are very heavy and are pressed into the shape of circular grindstones.

Jap Advance Checked. St. Petersburg, Sept. 27.—The general staff has received the following dispatch

from Gen. Sakharoff, dated yesterday: 'The enemy's vanguard, consisting of one battalion and two squadrons of cavalry, has assumed the offensive, probably for a reconnaissance, in the district between the Mandarin road and the the His heights of the village of Toumytsa. His advance was stopped by our troops. The enemy retreated along the whole line, pursued by our cavalry. The enemy has yet advanced north of Dahn, on the left bank of the Liao river, but an in-creased force has been observed in the cavalry have appeared in the valley of the Liao river." assignment. Mr. Groves says the situation is one of temporary embarrassment.

Emperor to Review. St. Petersburg, Sept. 27.—The Emperor left St. Petersburg for Odessa today to review the Eighth Army corps.

Holy Day in Russia. St. Petersburg, Sept. 27.—Russia to-day celebrated the holy festival of the Ascension of the Cross, one of the most important religious holidays of the year. Services were held in all the churches and the government departments, theaters and other places of amusement were closed.

Russian Volunteer Fleet.

Constantinople, Sept. 27.—The Russian volunteer fleet steamer Nijni Novgorod passed through the Bosphorus yesterday ound for Candia island of Crete, and thence to Port Said, where she will await orders. The Nijni Novgorod flew the Russian commercial flag and carried no ms or ammunition.

BRITISH LEAVE THIBET'S CAPITAL.

Gen. McDonald Is Heaped with Devout

Thanks by Regent of L'hassa. Lang. Thibet, Sept. 27.-The British expedition to Thibet left L'hassa September 23, and is now marching in the direc-tion of the Chumbi valley. In bidding farewell to Brig.-Gen. MacDonald, com-mander of the British military forces, the venerable regent invoked the blessing of heaven for sparing monasteries.

Pekin, Sept. 27.—Tang Shaoki, taitoa of Tien Tsin, has been commanded to Thibet and investigate and manage affairs there. He has been created a metropolitan official of the third rank and also promoted to the military rank lieutenant-general.

HELENA OFFICIALS INDICTED.

Charge Assault on Man Alleged to Have Made Graft Allegations.

Helena, Mont., Sept. 27 .- The United States grand jury has returned indictments against former Mayor Edwards, former Chief of Pölice Travis and Sam Goodman, alleging assault upon the person of George Freeman, a receiver in land office. They were released this morning on \$300 bail. The trouble grew out of charges of "grafting" alleged to have emanated from Freeman, embittered by a Republican factional quarrel.

GET \$490,000 MORE OF JAPS.

American Tobacco Company Secures Better Frice Than Offered.

Tokio, Sept. 27.-The terms of the sale of the interests of the American Tobacco company to the Japanese government un-der the recently established monopoly, have been concluded. The company jected to the price the government first offered and appealed to the American legation. As a result there was an ingation. As a result there was an increase of \$490,000 American money. The total consideration has not been made public.

LYNCHING SHAMES WHITES.

Lowers Entire Race.

New York, Sept. 27.-Booker T. Washington, in addressing the Brooklyn Institute of Arts and Sciences at Association hall, Brooklyn, on his work among fellow negroes, says: "A white man cannot shoot down a negro without cause and not lower him-self. A mob of white men cannot lynch

a negro and not bring shame on themselves and their race. INDIANS MADE MONEY ON FAIR. Oneida Reservation Exhibition One of

Most Successful in Years. Appleton, Wis., Sept. 27.—[Special.]—
is reported that the Indians of the Oneida reservation made more on their fair which was held last week than any previous year in the history of the organization. Secretary of State Houser made an address on Friday.

OLD SOLDIERS TALK OVER ARMY EXPERIENCES.

The Blue and the Gray Review Incidents of the Late War, and in a Graphic and Interesting Manner Tell of Camp, March and Battle.

"A good many of the boys," said the Doctor, "made mistakes in the last year of the war. The hundred days' men and the one-year men who enlisted in 1864 or early in 1865, were hard to hold after the surrender of Lee. Even some of the veterans who had re-enlisted were restive when they saw the Confederate armies breaking up. They had enlisted for the war, and now that the war was over they wanted to go home. Those who for any reason were retained beyond their time became almost mutinous, and were only restrained from outbreaks by pride and sense of duty. The more reckless men, however, indifferent as to consequences, immediate or remote, took the bits in

their teeth and went their way. "These were the exceptions, however. Ninety-nine men in every hundred stood firm and true to the last, as proud of their last service as of their first, exultant over the privilege of participating in the grand review at Washington, prizing beyond all other documents their honorable discharges, and returning home the better citizens because they had been good soldiers. We know much of these fellows because they have little to conceal and much to be increasingly proud of. Their records are as an open book, but there are others who in the last year of the war had adventures and experiences that were known only to their company officers or to their most intimate comrades or to men of my profession.

"One of the strangest cases was that of one of the best soldiers in our regiment. He was in every engagement that came our way, and had been wounded six times when we camped in frontof Atlanta; but from every wound he recovered rapidly, and, as he exultantly said, never missed a march or a fight. But in the battle in front of Atlanta he was lying on the ground, ready to fire, when a rebel bullet struck him in the shoulder and went through his body longitudinally. The wound was so serious and of so peculiar a character that he was sent North for treatment, and landed finally in the Marine Hospital, Chicago.

"Here he recovered rapidly, and in October, 1864, declared that he was able and ready for duty. He was held, however, for the November election, and was given large liberty in the last weeks of his stay. After he had voted, While plowing in his field near Eufaula in November, he returned to his regirecently Charles Gibson uncovered a large ment, served to the end of the war, and received an honorable discharge, a few old-time pistols and a couple of which was of service to him in securswords. All these weapons are in a fair state of preservation, and are apparently ord as known to all of his regiment ord, as known to all of his regiment, except one man, was without a flaw; of adventurous Spaniards, numbering fif-ty-four, in the year 1664 left New Or-septer several times over. serter several times over.

"While waiting in Chicago he dressed in search of gold. They secured all the precious metal they could carry, and on in citizen's clothes, went to one of the recruiting camps, and enlisted, receiv-Shawnees near Standing Rock, eight ing the large bounty then paid. He made himself useful about the camp, drilled the raw recruits, gained the confidence of the officers in charge, and easily secured leave to come to the city. Instead of returning, he dressed again in citizen's clothes, went to another camp, enlisted, received his bounty, secured leave, and, after reporting at the hospital, went to Indianapolis and played the same game, and then to another point. In the end this one man was responsible for ten reported desertions, was an expert bounty jumper, and yet in actual service had a record

to be proud of." "I romember," said the Major, "a bright young fellow who came to us from the Third Ohio, in June, 1861. He enlisted in our company, explained simply that his company in the Third had gone to pieces on the three years' question, and, finding himself out in the cold, he had come over to us. Later it appeared that he had told the truth, except as to the manner of his leaving. When his company seemed on the point of breaking up he left camp disgusted; but the next week most of the men decided to enlist for three years, and the missing man was reported as a de-

"He served a year in our regiment, when he received a visit from an officer of the Third. Possibly the officer threatened him, for the next day he disappeared, and we never heard of him again, except in a vague way. One of our boys was sure that he saw him in another division in the mix-up at Chickamauga, bareheaded and fighting among the best of the desperate fighters of that day; but there was no way to trace him, and, in truth, no one cared to do it. He probably served creditably through the war; and yet he was, on the rolls, twice a deserter.

"In another case, an impulsive Irish boy, who was among the first to enlist in 1861, took French leave after three weeks' service. One day his captain sentenced him to carry a knapsack loaded with brick, as punishment for some infraction of the rules. Pat resented this, left the company that night, enlisted in another regiment, served three full years, received an honorable discharge, and on his way home was arrested as a deserter from the company in which he first enlisted. The old regiment was recruiting with re-enlisted veterans as a nucleus, and Pat compromised by taking service; and he was not discharged until 1866." -Chicago Inter Ocean.

Business for the Doctor. "There are a good many incidents of tue, and everything sacred.

THE BATTLE-FIELDS. army life," said the Major, "which, if not told pretty soon, will not be told at all. They are not regarded as important enough to be classed as history, and yet history never will be history without them. The story of how Dr. A. C. Rankin brought 400 wounded men from Shiloh to Mound City has been told, but one little incident of the remarkable journey has been lost

sight of. When Dr. Rankin of the Eighty-Eighth Illinois was ordered without an hour's notice to report on one of the boats at Shiloh, crowded with wounded, he caught up his case of instruments and went on board, expecting a temporary assignment. He found himself in charge of 400 wounded with no nurses, no bandages, and scant accommodations. But the boat started northward, and he was told to do the best he could until he got the poor fellows on shore in their home State at Mound City. He detailed the guards and slightly wounded for duty, but could dress few wounds, because he had no bandages.

"At last he went to the captain of the boat and asked that the bed and table linen be turned over to him for bandages. The captain laughed at the suggestion, but Rankin told him the case was desperate, and he must have the bandages. If the linen was not, forthcoming he would authorize the guards to seize it. The captain surrendered, the bandages were made ready in short order, and when the wounded were carried off at Mound City all had been properly cared for. In the meantime Dr. Rankin had scarcely had an hour's sleep."

Made No Shoes for Rebs.

A white-haired, elderly man stood in Doric hall at the state house the other day intently gazing at the battle flags of the Massachusetts regiments that fought to preserve the Union from 1861 to 1865. He lingered long, and seemed to be greatly interested in the torn and tattered standards, says the Boston Globe. A visitor noticed the man and, stepping up to him, said:

"You appear to be interested in those flags?"

"I think I have a right to be, sir," replied the old gentleman. "That flag," said he, pointing to the shotriddled colors of the 19th regiment, was captured from me in front of Petersburg by the rebels, June 22, 1864. Thirty years afterward, by an act of Congress, it was returned to the State and I had the honor of delivering it to the governor of the commonwealth."

"That's remarkable," said the visitor, and the two fell to talking about the stirring days of the war, and the different engagements that the old 19th regiment participated in. The color bearer was Sergeant Michael Scannell of Lynn, who, although 78 years old, is hale and hearty, and is known by every Grand Army man in Essex county. Little by little Scannell was induced to tell the story of the capture of the colors at Peters-

"We were brigaded with the 42d New York and the 15th Massachusetts," said Sergeant Scannell, "and we were ordered to advance. There was evidently some mistake, as when we moved out it left a gap that General Mahone was quick to see and take advantage of. Without any idea of the perilous position we occupied we

moved forward in the best of spirits. "Quicker than it takes to say 'Jack Robinson,' the rebs swooped down upon us and we were powerless to resist capture. It was all up with us and there was nothing to do but surrender. A rebel officer rode up to me, and, with a long oath, demanded the colors. 'Give me those colors, you Yankee, blankety, blankety blank,' said he, with his gun pointed at my

head. "I looked at him coolly and, straightening myself up, said: 'Sir, I have been in this country nearly twenty years, and you are the first man to call me a Yankee. Take the colors. You're welcome to them.' "

Scannell, with the rest of the regiment, was hustled off to Andersonville and spent nearly twelve months in rebel prisons, suffering untold misery. One day while at Andersonville a rebel officer came through shouting the name of Sergeant Scannell. "That's me," replied Scannell. He was ordered to make shoes for the rebs, as he had been a shoemaker at Haverhill before the war.

"Never!" said Scannell. "Never!" The rebel officer argued with him and told him that he would get better food and treatment if he went into the shoe shop and that he would have a chance to recover from the scurvy that had attacked him. But Scannell was firm. "Never!" was the reply. "Do you think that I am going to go back on the flag of my adopted country and make shoes for rebs? Not while I have my senses about me."

AT OUR FAIR.

Michigan's upper peninsula counties have fairly outdone themselves in the exhibits at the state fair this year. The opinion has always been broadcast section were copper and iron. This is a delusion. Northern Michigan has more arable land than the area of the states of Massachusetts and New Jersey combined, and can support as great a population, entirely aside from mines and lumber.

It is asserted by Leo M. Geismar, in charge of the state experiment station at Chatham, Alger county, and also of that state fair exhibit, that the upper peninsula is the best grazing and dairying land in the entire United States, if not in the world. Forage crops reach a luxuriant growth there, and sickness among stock is almost unknown. Hard grains also prosper if the proper hardy varieties are used, and great yields are secured.

All early ripening crops do well, as also do the fall planted crops, the snow protecting them through winter. Samples of forage crops shown are: Clover from Ontonagon, 51/2 feet in height; alfalfa (cut three times a year), over 5 feet; red top, 5½ feet; timothy, 5 feet 8 inches; broom grass over 8 feet. These growths have made sheep raising a prosperous industry in the last few years. Great samples of wheat, rye and barley are shown, as well as oats that are simply marvelous in growth, reminding one of the freak California growths. The greatest crop of all, however, is potatoes and the samples shown this year are Immense turnips, radishes and sugar the owners lease them for \$25 a month. beets are also exhibited. The sugar beet of the upper peninsula is a very sweet plant, averaging 2 per cent more sugar

"THE WORLD".

The World is said by scientists to be several years old, and it will probably be here as long as the other places that float through space. "The World", as immortalized by J. Z. Little is not so old as this, but it will live as long as there are people who appreciate high class dramatic productions. Manager Doty has selected this ever popular play for this present season, and is giving a production of it that has not been surpassed. It has a plot that is of thrilling interest, and at the same time developed in an entirely new and original manner, and is brim full of wholesome effervescent comedy. Mr. Doty has engaged the very best talent procurable in order to give a presentation in every way worthy of this great play, and nothing is lacking in the way of scenic effects. The shipwreck scene is said by competent judges to be one of the best scenes of the kind ever attempted. At the Gladstone theater next Tuesday evening.

FOOTBALL.

********************** Superintendent E. H. Comstock, of the Houghton schools, secretary of the Upper Peninsula Interscholastic association has announced the schedule of games for the season. He has sent a copy to each school affiliated with the organization. According to a resolution passed at the last annual meeting of the association the names of all players likely to make each team must be filled in the blank sent for the purpose, and if additions are made at any time the names of the new players will have to be sent to the secretary one week before they participate in their first game. The schedule is as follows:

- Oct. 22-1. Marquette versus Negaunee.
- Escanaba versus Gladstone. Ironwood versus Bessemer.
- Hancock versus Calumet.
- Soo versus Manistique. Oct. 29-
- Winner of 1 versus winner of 5. Winner of 2 versus Menominee.
- Winner of 3 versus Ishpeming. Winner of 4 versus Houghton.
- Nov. 5-10. Winner of 6 versus winner of 7.
- 11. Winner of 8 versus winner of 9. 12. Winner of 10 versus winner of 11.
- Winner of 12 versus winner of digious. lower peninsula.

The final game will be for the cham- | Syrup, 50c a bottle.

pionship of the state and likely will be played at Ann Arbor as usual.

Some of the schools enumerated will not be represented by teams and changes time to time. Houghton is one of the schools that will not have a team.

their dance Friday. They are practic. ing diligently each afternoon. The average weight, stripped, is 125 pounds.

are interesting pieces of mechanism to game a little. watch, especially for the first time. They have been doing good service since they were installed a few years ago. They do not interfere with the regular beam, and a car can be weighed in the old way if desired. A metal cylinder with the figures from 0 to several hundred set on TARIFF NO BARRIER it, as on the type wheel of a typewriter, is turned by the levers, indicating the weight of the car, and a trip strikes a rubber platen, impressing the figures uppermost on a tape. The car number is written by hand alongside the weight, and the tape is dated each day and preserved. This is an unfailing certificate of the correct weight and answers all complaints. The car to be weighed is uncoupled and pushed on the rails. A trip registers the four wheels of the preceding car, and when the last leaves the scale rail, the plunger prints the weight. valves, moving in a cylinder of kerosene. This prevents the figure wheel from swinging loose. When coal is weighed there now the weight is guaranteed correct. A string of cars can be weighed

Call up C. W. Davis, phone 7. We are told by an interesting English insisted on having his shell fish brought discovered that the king had acquired his taste in Hanover, and that oysters carried so far from their native beds had a flavor which our British cousins distinguish by the appropriate word "high." Such notions are the result of habit, and neither reason nor hygiene has anything to do with the matter. So it is not surprising that the same eccentricities are to be found in Gladstone. P. & H. B. Laing this week had received some fine potatoes, such as mother used to dig in the new forty before the war-large, well-shaped, mealy and altogether allations of this country with the rest of luring. But one lady returned those sent on her order because "they all fell to pieces in cooking." She evidently cent. The exports to Europe alone likes to have her murphies with the con- grew in value from \$679,616,353 in sistency of bar soap. The Delta, however, will eat the other kind for old per cent, while we were purchasers in times' sake.

Powell's Headache Powders for sick 161,248 in 1893, 35 per cent increase. and nervous headache. 15c a package.* Without doubt most of the readers of this paper have planned at one time or another that when time and money should be available they would take advantage of the opportunity to see "The World". The majority of us, however, postponed it from time to time, and finally leave the old world without having seen more than a very small spot upon its surface. All who postpone seeing "The World" at the Gladstone theater next Tuesday evening will also have something to regret. This play has made several fortunes, and one of the America's greatest actors owes his reputation to it. The secret of its success lies in many features; it is one of the few plays that appeals to all tastes.

Houghton county, according to the other day came down on a live pigeon clusive. shoot like a wolf on the fold. When it is considered that Houghton county has a large mining population and many alien denizens, these facts are remarkable. The copper country is a burning producers and manufacturers in the and a shining light to the darkest corners world, but we sell more goods to our of the peninsula. The Mining Gazette is assiduous in promoting social reform and buy of the outside world \$1,000,000,000 the power of a good newspaper is pro-

Says the Iron Mountain Tribune: Who ever plays unfairly in a foot ball game is branded as a "dirty" player. Who ever enters a political contest, and in the schedule may be necessary from knifes the victor, is better known as a "dirty" politician. IT DOES NOT HINDER FOREIGN TRADE DEVELOPMENT.

We Are Not Only the Greatest Producers In the World, but We Surpass All Other People In Sales of Goods to Our Neighbors.

It has been steadfastly maintained by those favoring unrestricted international commerce that a protective tariff is a direct hindrance to a country in the development of foreign trade relations. The reason for this They are tested frequently by compar- lies, we are told, in the supposed inison with known weights. The wheel clination of every nation to resent inis held steady by a piston, with double terference with its commercial activity among other nations, a resentment which, it is claimed, finds expression sooner or later in the placing of retaliatory duties upon the goods of the offending country.

Probably no better proof could be ofvery quickly, without touching the ma- fered of the fallacy of this theory than chine otherwise than to write the car is found in the report issued recently numbers on the tape. There was one of by the department of commerce and lathese machines on the ore dock a short bor at Washington, through its bureau wonders both as to size and quality. time ago. They are not for sale, but of statistics, which shows conclusively the rapid strides made in its foreign trade by the United States during Sixteen inch summer wood, full cord, the last eleven years. In reviewing the delivered to any part of the city, \$2.50. figures given in these tables it is to be remembered that the period from 1893-1903, inclusive, embraced the four years historian that George I would not eat 96); so that but seven years (1897the celebrated Colchester oysters, but 1903) can properly be said to have been influenced by protective tariff measfrom Ostend. No one could understand ures. Even during that comparatively why the monarch should prefer the cop- short time, however, the percentage of pery bivalves of Belgium until it was gain in the total exports of this country is shown to be 47 per cent, while during Mr. Cleveland's term the in-

crease was only 14 per cent. There is discovered a rapid increase, even during the entire period from 1893-1903, inclusive, in favor of export over import trade. This gain amounts to 63 per cent of the total increase in our commercial relations with Europe, to 92 per cent of trade with North America, to 79 per cent of trade with South America, to 77 per cent of trade with Asia and Oceania and 71 per cent of trade with Africa and other countries, while in the total commercial rethe world the export trade is a factor in the increase to the extent of 60 per 1893 to \$1,087,049,843 in 1903, or 60 the same market to the extent of only \$527.878,256 in 1903 as against \$392,-

As already stated, during the first four years of the period scheduled the foreign trade of this country was conducted under lower tariff rates, and yet, as if to remove the matter beyond possibility of doubt, it is found that without a single exception growth and development have come to our foreign commerce only after the establishment of an adequately protective tariff. In the years 1897-1903 inclusive the value of goods exported from this country to Europe increased 28 per cent as against a gain of 15 per cent for the period 1893-97 inclusive. Goods exported to North America from 1893-97 inclusive showed a loss of 3 per cent in value and a gain during the years 1897-1903 inclusive of 87 per cent. Exports to South America from 1897-1903 increased 35 per cent in value, while showing a distinct loss during Mr. Cleveland's term, and in the total exrecords, must be civilizing itself with ports to all countries there is an inaccelerated speed. The slot machines crease of 47 per cent for the period are all out of business, the saloons are from 1897-1903 inclusive against a perregularly bumped and the sheriff the centage of 14 for the years 1893-97 in-

To sum up a few of the large trade facts which are set forth with great clearness in this report of the department of commerce and labor it appears that we are today not only the greatest neighbors than any other people. We worth annually, and we sell every year to the outside world our products to Stop that cough with Powell's Cough free traders continue to prate about the amount of \$1,500,000,000. And yet * the "barriers of protection!"

A Happy Bedtime.

It is very desirable to bear in mind the fact that children should go to bed by all means let her put the machine It is very desirable to bear in mind happy; tired, it may be, but with something pleasant lingering in the brain,

in the reverse case. The bairn, its mind cause produced in quantities) that out to it in the morning, is not likely to have refreshing slumber to build up the waste of material which has oc-curred during the day. Its sleep is un-easy, the brain does not obtain the re-quired repose; the child talks in its semiconscious state, and awakes in the morn-

lutely a wrong condition of things.

A fault should not be allowed to go without correction, or a misdeed without punishment, but by all means avoid scolding or whipping just before bedtime. In the case of a child who has been scolded earlier in the afternoon and is still suffer ing mentally from it, the mother should improve the occasion by gentle forgive and soft words that will make the little one feel happy and look forward to

being still happier on the morrow.

It is unwise to excite the child by romping games; undoubtedly the games will make it happy, but they will have the unmental condition that will deprive slum-

Make the children bappy at bedtime! Even when they are growing up, the "tucking-in" by mother, the assurance that she will have another look at the bairn before herself retiring, and the simple joke of father that amuses the childthese things have an advantage not easy to set down in words. There is no need to descend to the stage of foolish cod-dling; let the actions be simple and loving, and your children will be all the better for these little attentions.

Envy in Children Is Easily Eradicated.

Children sometimes fancy that they have awfully hard times, and go about Lyen children in the same family will declare that their brothers ters have much easier times than they do. and want to change places regarding their little tasks. If a child sees any of

"I wish I was Jimmy Brown. He has everything nice, and can ride in an authorized and the street cars, or go afoot." The reason so many marriages turn out unhappily is not that there is any plaint as this it might be well to call his attention to the fact that there are chisperated.

"I wish I was Jimmy Brown. He has everything nice, and can ride in an authorized with hills he never climbs, and plains over which he never tries to wan plains over which he never tries to wan out unhappily is not that there is any lack of love at the start, but because wife, Homemaker & Co., Limited.—New lack of love at the start, but because wife, Homemaker & Co., Limited.—New lack of love at the start, but because wife, Homemaker & Co., Limited.—New lack of love at the start, but because wife, Homemaker & Co., Limited.—New lack of love at the start, but because to prevent being smothered by the pressure of the snow. From time to time the last plains over which he never climbs, and plains over us found nothing but cold white solitude.

For three nights and three days what take turns in standing on all fours to prevent being smothered by the pressure of the snow. From time to time the last plains over us found nothing but cold white solitude.

Starfish go into the shell far enough to get his stomach plains over us found nothing but cold white solitude.

Starfish go into the shell far enough to get his stomach plain attention to the fact that there are chi dren who not only have no automobiles, but who are sick, or crippled, and can-not go out and play or have any outdoor pleasure. Or perhaps Jimmy Brown may not be situated happily in every way and many times, if a child is shown the full situation, he would not wish to be Jimmy Brown at all. A little story illustrative ing grievances. But that she is very of the habit of thinking that every other numerous we all can testify, and the machild is better (f. 11). child is better off "than me" is told of a

clared Robbie, as he sat down with a thump on the nearest chair in auntie's nor feed chickens, nor—nor—nothing. I wish I had a girl's work to do—just no work at all. So there!" work at all. So there!"

Well, well;" said auntie, looking at Robbie's flushed face. "Girls don't have immediately set up a grievance that we to do anything, did you say? Come with nurse with tenderest care and take

ting room, where they joined Bess mending stockings, and weeping.

not care how many generous acts we may perform, they will not wipe out

ing stockings, and weeping.
"I wish I was a boy," she burst out as soon as they appeared. Boys don't have to mend or dust, nor do much of anything." Auntie looked at the two grave-

tered. And Bess added, "Girls don't lave to carry coal anyway." Then they both laughed, and that was the end of The facts placed before them had worked the charm of making each better contented with things as they were. There is nothing like a little tact, sometimes, bring about a change of mind.-The

Housewife, Homemaker & Co., Limited.

The practicability of having the sewing, baking, laundry work and fruit-canning done in the home is a question frequently debated by women's clubs, but it never be settled by them. Since no two homes have precisely the same conditions, each should be a law unto itself, and instead of trying to follow the decision the majority of her club sisters may reach, each woman should sit down alone and as calmly plan her business as her

husband plans his.

It is for lack of this planning and systematic persistence in carrying it out, that so many women make failures of their housekeeping and their personal lives. is hit and miss; one day attempting this, the next day something else; one fad and then another: a feast or a famine in the pantry; cleaning spasmodically; aiming at nothing in particular, yet trying to do a little of everything. A man living after this fashion would be quickly and aptly termed "Jack at all trades."

"But," protests one in a weary voice, "there are many things that most be done." Yes, if we are going to follow the fashion, our neighbors' theories and all the advice in the magazines we read. There are certainly many things that may done, a thousand we wish we could do but the must-be's are fewer than we think. It is because the field is vast and the variety it offers so distracting that women must choose and limit themselves

to the choice, or succumb en masse to nervous prostration.

Those whose sad lives are governed by poverty must, perforce, attempt to do their own sewing, baking and washing. (The fruit canning part of the question disposes of itself; there is no fruit to can, and no cans.) In homes where there is and no cans.) In homes where there is age they did not really do. Peace-loving wealth and plenty of help, everything can and should be done upon the premises from punishment by clip-bearing women,

do go what she shall delegate to others is, therea word to encourage—a smile that'll
cheer.

what she shall delegate to others is, therefore, a common question, and to decide it
wisely each housewife must consult her
face to face with them, because it is

tastes and previous training.

If she loves needlework and has an do aptitude for it, let her elect to do the wiman who would not change the posi-family sewing and hire the heavier work. Join of the furniture in her home because Her best suits should be purchased tailor-made if possible, but many garments, particularly those of children, can be made better, of better material and at much less cost than they can be bought. A sewing machine is still a money saver

if its owner be a neat, tasteful seamstress.

money into a good range and elect that branch. The whole matter of home bakthing pleasant lingering in the brain, the little one should nestle into the bed clothes and fall asleep.

Just picture what is likely to happen the duality of that obtainable outside. In our cities the best and cleanest of bread, cakes and pies can be bought at such low prices (betilled with the haunting recollection of woman is foolish to spend time, strength and materials in trying to compete with them. But if the best to be had is bad, a severe scolding, or a promise that a them. But if the best to be had is bad, punishment of some kind will be meted it is a different matter. Health demands pure, well cooked food, and the health the family is her first care, above everything else except the spiritual health of its individual members. So, if good bread is not to be bought, she must learn to make it and make it well.

To send the washing away from home ing with its nervous system impaired is the easiest course, but a woman should thore or less) by shock. That is absoling away from none is the easiest course, but a woman should know into what kind of place the garments go. It is not simply a question of "Are they all here?" or "Are they but "Are they free from disease?" By far the safest plan is to have a woman come to the house and do the work under the supervision of the miss; then, if economy is necessary, the oning may be done at leisure.

Fruit-canning in the home must be settled by the answers to three questions: "Does the housewife love the work and succeed in it?" If the fruit cheap?"
"Has she the time?" Because our grandothers or even our mothers filled their elves with home-made jellies and pre-ves is no reason of itself why we hould labor to do likewise. When one as the fruit upon her own trees, or lives where it is abundant, then by all means her imitate the aunts and ants and tore up sweets for the wintry weather. nder such conditions it is economy and isdom to do it, but when fruit must purchased at a high-priced city marit is a very different matter; espe-

Betty's Twilight Chat. In a world so full of beautiful, interwoman can find pleasure in being disagreeable, in seeking quarrels and nursnumerous we all can testify, and the majority of us class her with the other pests of life against which we have to "Girls don't have to do anything," de- wage the warfare of extermination, if we are to have any peace and comfort.

terferes with our pet projects or objects to our opinions and behavior and we re and we will see."

Robbie followed his aunt to the sitThat is the essence of selfishness. I do

ly, then said:

"Suppose you change places today. Let Robbie do your work, and you do his."

But to her surprise Robbie shook his head out on state occasions. We may make "I'll feed the heas myself," he muters, but we cannot possibly shift to them the burden of spite and malice we bear towards those who do not agree

with us in every particular.

Opposition is a benefit to mankind and argument of the cool, impersonal kind is a sharpener of wits. Wherever there is opposition and competition there is brisk business, a quickened life and it is a recognized wholsome business fact. But the opposition must be square and free from malice, and the argument good-natured enough to leave no sting. I have leard men and women depreciate co blooded persons, but they are the really happy ones and the only comfortable ones to have about. The most distressing companions are those who find offence it was never intended, who twist and turn chance remarks into pin pricks and we find them in every neighborhood. Every woman who lives has quite enough to keep her busy in attending to her own affairs. Whatever time is given to the affairs of others detracts from her own well-being, and there is no excuse for it, unless it is spent in good work, like relieving distress. Meddling, in the strict sense of the word, is about the worst occupation for a self-respecting woman, as it lowers her own moral plane. Have you any conception of the harm meddlers do? Fully two-thirds of the transleting this itself-due to the transleting the sense of the words of the sense of the words of the sense of the words of the words of the sense of the words of the word, is about the words of the wor the trouble in this irre is due to the interference of outside parties, connected by ties of blood, which gives them the by ties of blood, which gives them the shadow of a right, and so far outside the life which they seek to stir up as to have not even the excuse of friendship. Mind you, friendship does not permit such liberties, even though they are tak-en. Friendship aids, not hinders happiness, else are we many times better off

A foe to the peace of neighborhoods is the weman who boasts that nobody can walk over her, that she knows how to protect herself. She backs up her boast by a line of conduct that rasps the nerves and disgusts the sensibilities. Such a woman carries a perpetual chip upon her choulder and dares anybody to knock it off. She reminds one of the venders of plaster figures who used to go about the streets with their wares so uncertainly balanced that even careful persons got into trouble and had to pay for damage they did not really do. Peace-loving and the claim is unjust. They weigh is kept hot by wives who were married every word before speaking it and view when they were mere children, and be every contemplated act from all sides. I fore they found out how intoxicating it to you-how can anybody take a

esting things it seems strange that any lute perfection can never be attained on woman can find pleasure in being disearth, and it is the capacity to give and take in little things which constitutes a happy married life. It is the thousand and one little drawbacks, the constant and it was not pleasant to have one's disagreements and frequent bickerings, turn at cooking. We roasted the heart which make the "little rift in the lute. Love which could and would survive great misfortunes will wither up under petty miseries.

Little disagreements are sometimes but they were still unable to move, being necessary before people thoroughly understand each other, and it is far better derstand each other, and it is far better that they should occur before than after marriage. Often two people who have quarreled cheerfully all through an engagement, and caused their friends to healthy shake their heads ominously over them, will settle down to an exceedingly pleas

About the Girl Who Has Had.

As a general thing the sophisticated voman appeals to a man as more enjoycompanion than desirable as a wife. He may like to spend his leisure hours in the society of a woman who knows her world, but when he marries he is apt to pick out some gentle creature who has, at least, the illusion of artless ignorance about her, for there is no gainsaying the fact that an impression pre vails among men that the less a wife

knows the better.

This explains the fascination of the and the reason why men so often pass by the cultured, elegant, social experienced woman of their own set to fall in love with some rustic maiden with whom their marriages are as incongruous as the union of the Sevres jar and the earthen pot. To men, ignorance in woman still means innocence and absence of opportunity, lack of desire, when, in real-

y, they are as far apart as the poles. Still, this is a mistake that men almost universally make, and, strangely enough, the older they are and the less excuse there is for their making such an error, the more apt they are to fall into it. If an old bachelor marries, for instance, he almost invariably picks out some little girl just out of the schoolroom, with the aroma of bread and butter still about her, instead of some woman of his own age who has arrived at his own cocktail tate of experience, so to speak.

The average man's ideal of woman is still Eve before she ate the apple, not the Eves who refrain from eating apples because the fruit is bad for their d tion, so when his delighted gaze upon the ingenue he says to himself: "Here is the modest little flowerlet I have been looking for! She doesn't know anything about admiration and adulalike the splendid big roses doom in the conservatories, and so I will transplant her to the secluded shade of my own home, where she will be perfectsatisfied just to shed her perfume for Heaven defend me from acquiring my own pleasure one of the prizewinning flowers that every man that comes along has admired, for I apprehend that that kind of a woman can' ive except in an atmosphere of perpetual

adulation and I do not care for any married belle in mine."

Thereupon the wise man marries a young girl during her first season in so-ciety, firmly convinced that because he is the first and only man who has made love to her, that he will be the last and only. This depends on circumstances. The girl may be sufficiently in love with him to never crave the admira-tion of any other man, or she may be so situated as to be cut off from it, and so safe, but the path to the divorce court

the draught of admiration and flatter grain of comfort in the neighborhood of and lovemaking that man offers to such persons? woman's lips. If a woman acquires a taste for this after marriage, God heip with crooks and her husband, for there is no cure for the married flirt. She may not be a woman, or an actually immoral one, but her craving for admiration is like the hunger for opium. It grows by what it

depth of imbecility into which it will not

lead its victim. If you will trace back the stories of them the infidelity of wives, half of the time you will find that the woman was married when she was very young, before she had experienced the thrilling of listening to a man's vows of deathless devotion, or had known the subtle of power with which a woman finds out that she can sway men by her beauty her charm. Few husbands ever make love to their wives, and so it is the woman's natural desire for this courtship and this adulation that she has missed that

> An old negro woman once put this matter pithily to me when, in speaking of a frivolous matron, she made this excuse for the flighty lady: "You see y," said the dusky philosopher, "Miss done married before she had any gal time. Ef it don't come while she's young, it's got to come when she is old. Miss Ma'y is just getting her gal time A profound truth is wrapped up

leads her into seeking it away from

in this homely axiom.

In the end the question of a choice between the girl who has had the things she desired, and the girl who has never had them, parrows itself down to the old one of human experience, and the reason men make so many mistakes in deciding this important question is because they

Lasting love comes far more slowly, and is the growth of time, intimate acquaintance, and friendship ripening into love, kindred tastes, and sympathies. A thorough understanding of each other's faults and weaknesses, as well as each other's married life; and all these things are learned much more easily before than after marriage.

Warm from permanent they became quite flat and frozen hard, so that when the gale surprised us we had to thaw ourselves gradually into the bags. Later on we used the dogs to thaw out the bags for us. They always liked to roll upon anything that was not snow or ice, even were it but a thrown-away mitten; and they would turn round and round over it, imagining that they were warmer it, imagining that they were warmer when later we had to thaw ourselves gradually into the bags. Later on we used the dogs to thaw out the bags it properly, but just shoves his main stomach out of his mouth and wraps it around the food.

The starfish will eat anything that comes in his arms. He is always hungry—and no wonder!—and sometimes he is in such a hurry for his dinner that he can't take time to cat it properly, but just shoves his main they were it but a thrown-away mitten; and they would turn round and round over it, imagining that they were warmer it. ffer marriage.

It imagining that they were warmer has been called the scavenger of the sea, there than on the snow. When later we but he likes oysters better than almost pretty face or elegant figure which threw our frozen bags on the snow, the anything else, and he makes a great deal

and want to change places regarding their little tasks. If a child sees any of his little playmates enjoying some special occasion, the result is often a case of envy and some such remark as:

"I wish I was Jimmy Brown. He has miliar with hills he never climbs, and man does not attract a woman as a pretty woman does a man; she looks for something better than mere externals, and consequently her love is more last-ing when once it is won.

The dark show bressure left us just enough the such and occasion, the result is often a case of something better than mere externals, and consequently her love is more last-ing when once it is won.

had brought a small alumninum cooking stove with us into the tent, and with difficulty we prepared a warm meal. But in the cold the metal stuck to our fingers. a seal, but other parts we ate raw. The dogs were completely snowed under their harness in order to free themselves

One Tomato for Nine Persons.

To supply nine persons possessed of healthy appetites with sufficient sliced tomatoes from one tomato was the feat performed by Mrs. Joshua J. W. Shockley, the wife of one of the round ser-geants of the Western district, last Sun-day at her home, 1937 Harlem avenue. And the tomato which assisted so materially in appearing the appetites of Sergt. and Mrs. Shockley, their family and guests was plucked from a vine in their yard. It weighed just twenty-two and one-half ounces and measured a little

of a number that had been cultivated ear-lier in the season by her husband. There are still sixteen tomatoes on the vine, most of them unusually large, but none as large as the one used last Sunday, which was the first to be picked day.

He Knew.

from that vine.-Baltimore Sun.

Brant has been an announced fact her small brother has been puzzling his head understand what it means.
"Why," explained his mother, "Mr. Skaggs has asked sister to marry him. That means that she will live in his house afterward, and he'll take care of her.

'Buy her things?" asked the boy.

"Hats and dinners and everything?" he persisted. "Yes," was the answer.

The boy thought it all over for a moment, and then he said: "Well, ain't that man got pluck, though?"—London Tit-Bits.

More Beer Made Here.

Germany having been for so many generations looked up on in every quarter of the globe as the special realm of Gambrinus, the drinkers of beer must be astonished to learn that in 1903 the Ten tonic brewers made only 1,787,615,000 gallons of malt beverages, or 133,085,230 gallons less than the quantity produced in the United States. Of course, it is not to be forgotten that the population Of course, of this republic is much larger than that of the dominions of Kaiser Wilhelm, yet, nevertheless, it cannot be disputed that those are suggestive figures.

Excuses.

Dealer-Yes, prices are high, that's a fact. You see, that strike—

Customer—See here, the last time I bought of you you said prices were high because of the threatened strike. The strike never materialized and yet prices are still high.

Je Young Folks' Column.

A Crustacean Carol.

Down beneath the rolling ocean,
At the bottom of the sea,
Lived a Shrimp who had a notion
That a perfect shrimp was he.
He was bright and he was pretty,
Clever, too, and rather witty;
He was jimp, distinctly jimp,
Was this pleasing little Shrimp;
So of course asyvorces as So, of course, as you may see. He was all a shrimp should be, He was all a shrimp should be.

As the Shrimp one day was flitting. Here and there and all around le beheld a Cockle sitting On a little sandy mound, And he said, "O Cockle deary You look rather sad and weary You look rather sad and weary; I will sing to you a song, Not too short and not too long; And I'm sure you will agree It is all a song should be. It is all a song should be.

Then the Shrimp, with smiles of please Took his banjo on his knee, And he played a merry measure Like a Carol or a Glec; And he sang a catch so jolly, All of frolic, fun, and folly, All of merriment and play, All of mirth and laughter gay; And I'm sure you'll all agree That is all a eatch should be. That is all a eatch should be.

-Carolyn Wells in St. Nicholas.

A Story of Starfish.

Little men and women who spend the summer at the seashore ought to try to see all the interesting things they can while they are there, and if they have never looked for them, they will be surprised to find how many treasures there have never yet learned that a woman is are in the sea. There is the starfish, or sea-star, for instance. All the little folks who know anything about the seashore have seen them, or at least his empty coat, but not many, probably, have taken the trouble to get acquainted with him Yet he is a very interesting little fellow and worth knowing. His morals are n very good, it is true, in spite of his pretty name and pretty clothes, but it is not

The worst fault of the starfish is that he is a terrible glutton, and will do any as several of these organs, one in t

How he gets at the oyster has long in. However, the thing turns out to be quite simple, and any little man or wom an who wants to visit the Children's n wishing they were someone else, fancying that then they would have great fun.

wishing they were someone else, fancying that then they would have great fun.

this department in her business, or to have discovered most of her charactering that then they would have great fun.

this department in her business, or to have discovered most of her characterout by the lantern; a thick layer of frost
spreads his arms down over the two exclude it, requires wisdom. It should not be a matter of wishes; nor is it a matter of necessity now as in days gone. We must narrow our groove if we would fill it. An engine attains its speed because its track is sure and straight. The dark shell open and the oyster trying to keep Men, dogs then the game is up. The starfish opens the shell far enough to get his stomach

reach; then one day comes the inevitable, disillusion, the discovery of the feet of clay, and the broken idol falls.

All this is very, very foolish. Absolute perfection can never be attained on the blizzard over our heads. We have the blizzard over our heads. We have the shows the monotony of which seemed in a remarkable degree to harmonize with the beds with bars of iron to which bunches and often destroy a farm in a short time. To get rid of them the oyster men drag the water above the beds with bars of iron to which bunches ights.

"Mr. Astor told me he wanted of rayeled rone are fastened." are brought up by the hundreds. They are then killed by steaming, or are thrown on the beach above the high water mark. Formerly the oyster men used to break them in pieces and throw them back into the sea, but they know better now, for each one of those probably grew into a new starfish. A starfish doesn't mind having its arms pulled off a bit. It can easily grow new ones, and the arms can grow into com-plete animals. Sometimes the starfish throws its arms off of its own accord and there is one variety, known as the brittle star, which drops all to pieces when it is frightened or put out about anything. There is no use trying to catch it, for whenever it scents danger the arms just swim off in different di-

But it is not fair to the starfish to talk only of their vices. They have virtues, too, and one of these is a very un mon one among the inhabitants of the water. Fish and other animals of the sea care very little about their young. over eighteen inches in circumference. They just drop their eggs into the water The slices numbered about thirty and let them shift for themselves; but They just drop their eggs into the water filled two good-sized bowls.

Of course, the little folks know that the starfish is not really a fish. A fish has a backbone and the starfish has

He Knew.

Since the engagement of pretty Miss diates; that is, its body is arranged in rays. The common starfish, which the little folks are most likely to see, has only five of these rays, but some of them

starfish has about 400 feet. Running through the center of each ray, on the under side is a little groove, and the feet are arranged in two rows on each side of it, like an avenue of trees. reason the groove is called the ambula-crum, which is Latin for avenue. As the starfish moves about on the rocks and sand it does not appear to

have any feet at all, but they can easily be seen if a live starfish can be caught and put into a glass pan or jar. When the animal begins to march about lift the pan and look at the bottom. The feet will be distinctly seen, waving like a field of grain.

The starfish works these numerous feet

by means of water power, and nature has provided it with an elaborate system of water works. The water enters the body through a little sieve on the back, and passes into a tube filled with sand, which is known as the "stone canal," and acts as a filter, so that the water is perfectly pure by the time it reaches the circular canal around the mouth. From this cir cular canal branches extend through each of the arms, and from the arms smaller branches go to each of the feet.

The eyes of the starfish are at the ends of the arms, so that it can see in all directions and walk backward or forward just as it likes. In fact, there is no backward or forward for the starfish. The It is all forward. Sometimes these eyes rices are covered by a lid which opens and are still high.

VERMONT'S MARBLE.

Great Holes Dug in Green Mountains by Those Who Extract It.

The Green mountains contain some of the largest artificial holes in the world, says the Springfield (Mass.) Republican. They are really vast chambers which have been excavated underground in working the great marble deposits. While marble is quarried in Vermont, it is also actually mined, as some openings are in the form of channels extending hundreds of feet underground. A visitor to one of these openings gets an idea of the mag-nitude of this industry when he realizes that from this space has been extracted nothing but marble. The Sheldon quarry, as it is called, on the property of the Vermont Marble company, is the deep-est quarry of its kind in the world. The bottom is nearly 300 feet from the surface. This quarry contains chambers more than 200 feet in height, and spanish cious enough to seat 5000 people without crowding. They form vast amphitheaters, whose walls and ceilings, as well as floors, are solid marble, for none of these quarries have been worked out, in spite of the enormous quantities that have been taken from them.

While marble was known to exist in the Green mountains a century ago, the quarrying of it is one of the new indus-tries of New England, but so rapidly has t developed that Rutland county duces more marble than all of the other beds in this country combined. From it comes material for not only banks, office buildings, postoffices and courthouses, but also for statuary, slabs and other interior work for buildings and cemetery decorations. Such is the variety which has been discovered that it is being used for every purpose for which marble was formerly imported, and has been put to new uses besides. The beds contain varieties similar to the Pentelic marble, from which the buildings of ancient Athens were constructed. Another variety is almost identical with the famous marble of Carrara. From this the tints range of Carrara. From this the this all the way to black, including blue, red all the way to black, including blue, red and green, with tints intermingled. Experts believe that the beds are practically inexhaustible. They have been traced more than fifty miles, and all the indications points to the existence of a deposit almost continuous for twenty-five miles. Although nearly 70,000 tons a year are being quarried, only an insignificant portion of the beds have been removed.

FIFTH AVENUE HOTEL OPENED.

John J. Astor Designed It, the Most Luxurious in America.

Col. John Jacob Astor's new hotel, the St. Regis, at Fifth avenue and Fiftyfifth street, in New York city, was opened the other day. Col. Aster designed to have it the most luxurious hotel in America. The hotel and its stationary decorations cost \$4,000,000. The furniure and fittings cost \$1,500,000. Landlord R. M. Haan, an expert, personally sought and bought all over Europe, under commission from Mr. Astor, pictures, carying, statuary, rare fabrics and other works of art. Among them are two Sevres vases bought from a niece of Queen Maria Christina. "She needed the money and I had the credit," says Mr.

The main doors are of bronze, and cost \$20,000 each. In every room there is a \$75 electric French clock. There are fifty pianos in the house. There is a library of 2150 volumes, in charge of a professional librarian.

The dining room, in shape of a letter L on the Fifth avenue corner, is furnished in dull, deep red. The walls are They of various marbles, carved and sur-bed to mounted by an arched ceiling of gold sides, in which are set small electric

the lights.

"Mr. Astor told me he wanted this place where people who of raveled rope are fastened. The spines hotel to be a place where people who of the starfish catch in the rope and they have good homes could come and feel at was satisfied.

From the single room with bath at \$8 day to the royal suite of five rooms, including the use of a \$10,000 bed, at \$125 A a day, each apartment is a study in harmonious luxury.

"Our prices may not fairly be called high," said Mr. Haan. "We charge \$14 a day for a salon, bedchamber and both, whereas other expensive hotels get \$12. Each of our ordinary rooms cost from \$2000 to \$5000 to furnish, where in other hotels the cost is \$800 to \$1200. Our restaurant prices will not be higher than those of other restaurants of the highest class.

Virginia Girl and Her Aged Suitor.

A story of Machiavellian displomacy on he part of a 16-year-old Virginia girl in dealing with a too arden suitor of 60 years of age was brought up by pasengers on the Weems line steamer from Carter's Creek, Lancaster county, Va., several days ago.
As the story was told to Mason L. Wil-

liams, vice president of the Weems Steamboat company, the venerable suitor for the girl's hand invited her to go rowing, and while out in the stream asked a promise of marriage, but was refused. Driven to desperation, he threw the girl into the stream. "A thoughtless thing to do," said Mr. Williams, "for every Carter's Creek girl can swim like a fish." The young woman with steady stroke made for shore, but in being thrown from the boat she had struck her leg against the side, receiving painful injuries, and juries, and soon grew exhausted. The man, seeing the danger of her position, sprang into the water and assisted her to the boat, but before doing so renewed have as many as forty:

On each of these five rays the common his suit and demanded a promise of mar-

With a smile such as only the Carter's reek girls know, and "I was only funning when I said no," he was accepted.
The boat was then rowed to the shore, when the girl had her suitor arrested for assault.—Baltimore Herald.

RUSSIANS WILL TAKE OFFENSIVE

Kurepatkin Will Attempt to Isolate the Large Body of Jap Flankers.

MAY BALK OYAMA'S PLANS.

The Immense Area Covered by the Jap Lines Leaves Them Open to Successful Attack.

COSSACKS HARASS THE ENEMY.

London, Sept. 29 .- 6 a. m.-A dispatch to a news bureau here, dated Mukden, yesterday, says: "Gen. Kuropatkin has decided to take the offensive and attempt the isolation of the large body of Japanese engaged in the flanking movement east and north of Mukden. An enormous force of cavalry will be thrown at the Japanese lines. The immense area covered by Oyama's forces at the present time gives Kuropatkin an opportunity for the tactics which he attempted at Lino Yang, of defeating the Japanese armics in detail."

Time for Russians to Strike.

St. Petersburg, Sept. 29.-Members of the general staff committed themselves to the statement last night that the time now appeared ripe for decisive action at Mukden. It is believed here that the vast extent of territory covered by the Japa nese army leaves it peculiarly liable to attack, and that there is every probability of Gen. Kuropatkin balking Oyama's plans by assuming the offensive. Both armies are reported to be in close touch, and heavy outpost fighting is general

along the entire line. From Gen. Kuropatkin's reports of yesterday it is learned that the Russian cavalry has succeeded in seriously hampering the movements of Oyama's forces.

Stoessel Refuses to Give Up. St. Petersburg, Sept. 29.—Gen. Stoessel has finally refused to yield Port Arthur, as all expected he would. A friend of his said today that even if instruc-tions were sent him to capitulate he would follow the example of Nelson a the battle of Copenhagen, who put telescope to his blind eye and turned i on the signal telling him to cease fight

Russians are following the develop ment with bated breath. It is fully recognized that the situation at Port Arthur is rapidly becoming desperate. When the moment arrives for the ships to leave the harbor the water question will become doubly serious, as their con-densors no longer will be available, and supplies of munitions and coal, in spite denials, are running short.

The anxiety here is great, but no illusions are held as to the widely serious effect the fall of Port Arthur will

Japs Make Little Progress.

London, Sept. 29 .- According to the Chinese the Japanese have made little progress at Port Arthur. They are said to have taken forts 4, 5 and 6, but were unable to hold them, and withdrew on afternoon of September 26. Thei in these assaults were enormous while the Russian casualties also were

The Japanese have done much tunneling towards the forts. The Russians have counter tunneled and laid mines which have inflicted terrible losses The Chinese say the Japanese fleet has gone to its base in the Elliott islands. Two or three Russian ships occasionally

go outside the harbor. Impatient at Tokio.

An undated dispatch to The Express riding Massachusetts from Tokio, sent by way of Shanghai on Massachusetts court.

September 28, says: For the first time since the war began impatience is manifested in Japan regard-ing the delay in the capitulation of Port ing the delay in the capitulation of Port Arthur. The newspapers editorially complain about Gen. Nogl's failure to capture the fortress. One paper says: "We would like to send to the august general a sharp sword which hangs in our office." This remark is a covert invitation to Gen. Nogl to commit hara kari, which in Japan is the logical result of failing in such a task. In fiew of the failure of the last terrific assault the opinion is now expressed that the fortress may hold out three months longer.

Reinforcements, variously estimated to umber from 10,000 to 12,000 infantry, and ome siege guns have been sent Gen. Neg:

Invalided besiegers who have arrived home say the Russians are defending Port Arthur almost frantically. Every conceivable device is adopted to repel assaults, even to throwing red pepper during fighting in close oparters.

close quarters.

The stories of terrible havoc wrought by the land mines they say are not exaggerated. The Russians plant fresh mines at The approaches to the fortress pra tically are strewn with dynamite. Both sides are physically exhausted.

STEEL PREFERRED RUNS UP. Large Purchase, Rumored to Be for Schwab, Boosts Price \$1.

San Francisco, Cal., Sept. 29.-Charles M. Schwab and party have departed for the north and east in a special train. A flutter of excitement was caused on stock market by buying nearly \$1,500,000 of preferred stock of the United States Steel corporation. It is the gossip of local financial circles that the stock was bought for Mr. Schwab's account. Twenty thousand shares were purchased and it advanced the market from \$71.50

ELECTRIC LINE ASSURED.

Two Rivers to Be Connected with Green Bay by Interurban.

QUESTION NOT TRIED BEFORE.

the organization announce that a vote in Document Filed at Green Bay Purports to Dispose of Land of Hannah Miniham Worth \$2100.

> Appleton, Wis., Sept. 29 .- [Special.]-One of the first Indian wills ever submitted to court for probate was presented Tuesday to the circuit court at Green Bay. It was left by Hannah Nimham and directs the distribution of property granted by the United States and which part of the Oneida Indian reservation. is thought that never before has there been an attempt made to probate a will left by an Indian.

Since any contract to convey, or any conveyance of land received from the government is declared null by statute, it has been maintained that a will also onveying such land is likewise void.

John F. Watermolen will now test this, claiming that under the statutes of Wisconsin a will is not a "conveyance." The property involved is considered worth about \$2100.

WANTS STRICTER LAW.

Insurance Commissioner Host Will Ask Next Legislature for Better Anti-Incendiary Statute.

Madison, Wis., Sept. 29 .- [Special.]-Insurance Commissioner Host announced that he would recommend to the next Legislature the enactment of more stringent anti-incendiary laws and a law reating a state fire marshal. He says: "Statistics have been cited showing that the average rates of premium collected by fire insurance companies in five states last year were as follows:

"Something should be done to bring about a lower average premium rate in this state. The Legislature should eneffective laws such as the fire marshal law for discovery and punishment of incendiarism, for fully one-third of the fires which occur are of incendiary origin. Many fires are kindled by overinsured parties as a method of stealing from the insurance companies, and in making rates the companies must take this fact into consideration.

"Massachusetts and Connecticut have had in effective operation a state fire marshal law for several years. Our state law is bad and is responsible to a large extent for the increase average rate in Wisconsin over other states. The law should be repealed or amended so as not to place a premium on incendiar-

ENGINEER DIES AT POST

Locomotive Driver Deliberately Flies Past Meeting Place and Death Results.

Knoxville, Tenn., Sept. 26 .- The death list as a result of the wreck on the Southern road near Newmarket on Saturday has grown tonight to sixty-two and it will probably exceed seventy before Tuesday, as many of the injured are in a serious condition and more deaths will occur at the hospitals.

Yesterday there were six deaths, the last one occurring at 8 o'clock last night, when M. P. Gant of Shelby, N. C., passed away. Others who died at the hospital were the two colored fireman, two little girls, and Nep Miller, colored, of Johnson City.

To the list of dead there were also

added an unknown infant, found at the scene of the wreck, and two other unidentified bodies. The engineer of the westbound train, so investigation shows, was directly responsible for the disaster. He deliberately disobeyed orders. Why, will never be known, for he was crushed to death beneath his engine and his fireman suf-

fered a like fate. Flies Past Meeting Point.

Hodges, a little station, was to be the meeting point of the two trains. The westbound received orders to take the sidetrack at the depot and await the eastbound train. The engineer received his orders and placed the slip of yellow. paper in a little frame hanging in the cab, where it would be constantly before

There are but two possible explanations of his failure to follow orders—he may have gone to sleep or the still remote chance of him being suddenly stricken blind. But there is little chance. of either theory being aught else but a surmise. There can be no excuse of misleading signals, for the accident occurred in broad daylight.

Rushes On to Destruction. The train, driven by the man whose The train, driven by the man whose criminal carelessness cost him his life, rushed through Hodges at 10:15, going forty miles an hour. The telegraph operator knew that it should have stopped. He rushed from the depot when he no evidence of slackening speed and fran-tically signaled. No one saw or paid any attention to him. He realized the absolute certainty of the impending calamity, and calling the train dispatcher at Knox-ville notified him of the wreck which he

knew must happen, as the east-bound train, ordered to pass the west-bound at Hodges, was due in two minutes.

The news reached Knoxyille almost simultaneously with the crash of the trains, and the frantic railroad officials began ordering out wrecking apparatus and special trains bearing doctors, nurses, cots and medical supplies.

Meet on a Sharp Curve.

The crash came on a sharp curve, be-tween high banks. The westbound train was a heavy one, it carrying the sleepers from the east for Knoxville, Chattanooga, West Bend, Wis., Sept. 29.—[Special.] and other southern cities. The eastbound train was lighter, consisting of day

The heavy train crashed into the light er one with the force of a giant missile hurled from a catapult. And, by the irony of fate, the engineer and the fire-man of the train at fault were the only ones on that train to lose their lives, fifty-two travelers were killed on the train

that had the right of way. Smashup Is Complete.

Expert railroad men who have seen scores of wrecks unite in saying that never have they seen such an inexpressibly thorough smash-up. The two en-gines and their tenders were simply a mass of scrap iron, from which vomited fire, smoke and steam. The big machines were driven into one another, the cow-catcher of the heavy westbound finding final lodgment in the cab of the other This engine was turned almost on its back, the drive wheels pointing almost

directly to the sky. The light coaches of the local train were litereally knocked into splinters. Roofs were crushed like a crumpled envelope, two cars had both sides torn out

the ceilings, catching and crushing men, women and children as if in a vise.

When the first impact came the passengers on the eastbound train were hurled from their seats and thrown toward the front end of the cars. in an instant, before they could regain feet, the cars commenced literally to telescope and close up as a hat rack : compressed. As the jaws of wood and iron came together they killed and maimed the helpless, huddled masses of humanity.

Bodies Crushed to Pulp.

Dozens of bodies were simply crushed out of all semblance to human form, limbs were torn off, and bones broken by the hundred. When the doctors got to work it seemed as if hardly a victim had escaped without at least one fracture, and scores had half a dozen.

Then the mingled mass of splintered timber, twisted iron and trapped hu-manity was hurled almost on top of the

scrap heap which a moment before had been two giant locomotives. The baggage car of the west bound train was derailed, but the Pullmans and her coaches behind it kept the track. From them poured trainmen and passangers to render what aid was possible. The tool cases in the cars were broken open, and men, nerved to mighty deeds

work of rescue. It was a long, gruesom etask. In one car they found a woman pinioned by a piece of split timber which had gone completely through her body. A little beneath the woman. The child died ten minutes later. Within a few feet of the little one lay a woman's head, while the decapitated body was several feet away. Child Calls for Dead Parents.

Another little girl, Lucille Connor of Knoxville, whose body was fearfully cities, in which they employ only Eumangled, was pitifully calling for her ropeans, use their own stamps and mother, but her mother and father lay dead ten feet away.

One woman, terribly mangled, was praying earnestly to be spared for her In Salonica there are no fewer than children, but death relieved her sufferings in a few minutes. The uninjured and those only slightly hurt joined in the work of relief. Many stantinople six. If one wishes to be of them were searching for friends and relatives, and their weeping and wailing added to the horror of the scene. In one car but two persons escaped live. Gongressman Henry R. Gibson

from the Second congressional district of Tennessee and one other man, whose name is not known, were the fortunates. The congressman was en route to Ruspass the telephone has been excluded hinting for years for a lamp.

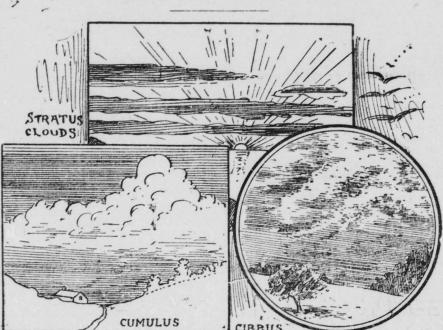

To remove yellow stains from pyro developed negatives, bathe them in sulphurous acid water or in a 10 per cent solution of sulphide of soda, to which a few drops of sulphuric acid have been added.-News Monger.

Cracked but not broken glass negatives, whose film is still uninjured, can be repaired in the following way: Put a dry plate of the size of the negative-not yet developed, but fixed-for a short time in water; that is, sufficiently long to cause a swelling of the gelatine film. The broken negative is placed upon this plate, so that its reversed side comes to lay upon the gelatine side of the latter. Now press lightly but carefully. By the swelling of the gelatine the entrance of air is completely excluded, and both plates will adhere solidly and form a whole, so that prints may be made as from any negative.-Photographic Times.

Dispensers of their own chemicals will probably have noticed that strong alkaline solutions-such as the accelerating, or No. 2, solution-of a developer often turn a brown color after they are bottled. This is often due to imperfect cleansing of the bottles, for vessels intended for strong alkalis are not sufficiently clean if merely washed in water. For this reason it is best first to make up a small amount of the alkaline solution, and, pouring it into the bottle, swill it well round, and then hold against a white sheet of paper to test for brown coloration. Should this have occurred, throw out the contents and give another wash in a similar manner, so effectually ridding the bottle of any ingredient acted upon by the alkali. If a brown sediment afterwards precipitates, as it frequently does, the clear solution should be decanted off, leaving the sediment behind, as filter papers would be destroyed by a strong solution.—Amateur Photographer.

WHAT GOES ON ABOVE US.

CLOUDS. Considering the important part clouds play in art and poetry, their beauty and their value as weather indicators, it is strange that so few people understand the method of their formation or can distinguish between them. Such

a knowledge is essential to a full appreciation of landscape and sunset. A mass of air on the earth's surface, being warmed by heat radiated from the earth, rises, bearing with it the moisture given off by the soil, plants and water with which it has been in contact. As this warm, moist air moves up into the thin, rare atmosphere, it expands and its temperature is considerably lowered. The amount of vapor which cool air will sustain in an invisible state is decidedly less than the amount which is sustained by warm air. Therefore, when the moist air cools a part of the vapor condenses into minute globules of water, which catch the light and are then

visible. In this form the moisture is called a cloud. The difference in the form of the cloud depends upon the altitude it reaches before its water vapor condenses. There are four principal kinds. The cumulus, or heap-cloud, is large (sometimes five miles from base to

summit), rolling and lumpy. It floats about a mile from the earth. This is the commonest summer day cloud. They are largest a little after noon, but if they continue to grow until sunset, look out for rain. The stratus, or sheet-cloud, forms in the region above that of the cumuli. This is the kind so often seen when the sun sets. It shows in horizontal bars

the blue. The ordinary stratus is from two to four miles over us.

The highest form is the cirrus, or curl-cloud. It is light, fluffy, cottonlike and extremely light. It is formed only above the frost line, and is made up of floating ice dust. It is at its best in winter. The cirrus is sometimes eight miles from the earth.

The nimbus, the low, dark rain cloud, is the fourth and last primary

across the western sky. It sometimes spreads over the whole sky, hiding all

Besides these four there are an almost unlimited number of varieties and combinations bearing such names as cirro-cumulus and cumulo-stratus. Clouds are always changing and in motion, the heavy cumulus sometimes traveling as fast as twenty-five miles an hour, and the cirrus even ninety miles. This may explain why the clouds float, though they are much heavier than air. The wind probably supports them, just as it does the

thistle down near the earth. Yet clouds are constantly evaporating and being renewed by newly-rising moist air. There is much to learn by looking up.

How the Millions of John Lowber Welsh Were Accumulated.

The death of Philadelphia's richest citizen, John Lowber Welsh, brought out the curious method by which a part of his great fortune, estimated at \$20,000,000, was amassed. He was, early in his business life, a member of the mercantile firm of S. & J. Welsh, who traded in Cuban products and exchanged them for merchandise, which they sent back to the island. They were also fiscal agents for many rich Cuban planters. Shiploads of sugar came to Philadelphia and the Welsh firm sent back shiploads of merchandise.

Often the ship would carry a cargo of merchandise.

Often the ship would carry a cargo of merchandise.

And the other things he cats.

And you ought to hear him telling how it's done, done, done.

He's sure he knows it all.
And he's deaf as any wail.
To what other people tell him for his good, good;
Of raising corn and hay.
And he simply wouldn't change it if he could, could.

He tells the biggest lies About the taste and size
Of the fruits and garden sass which he has sown, so citizen, John Lowber Welsh, brought out

CURIOUS BASIS OF A FORTUNE.

money. An American 10-cent piece passed for an English sixpence in Cuba, showed itself in frequent and trying spells of vomiting. Part of the time I was able to work and again I would be confined to bed for three or four days in succession.

"My stomach was at times so delicate that it would not retain even plain water. trade for the house, and John Lowber Welsh soon amassed a big fortune.

The following picturesque description of Mr. Welsh in his office has been

to fie down between them. I would have several of them during the night worth \$20,000,000, he worked and acted in his own office like any of his clerks. A row of old-fashioned office stools are in front of a long, slanting desk placed against the wall. Mr. Welsh occupied one of these stools, and several clerks sat beside him. If a customer walked in to ask a question, Mr. Welsh was as likely as anyone to leave his stool and walk

\$3.50 SHOES W. L. Douglas makes and sells more men's \$3.50 shoes than any other manufacturer in the world. The reason W. L. Douglas \$3.50 shoes are the greatest sellers in the world is because of their excellent style, easy fitting and superior wearing qualities. If I could show you the difference between the shoes made in my factory and those of other makes and the high-grade leathers used, you would understand why W. L. Douglas \$3.50 shoes cost more to make, why they hold their shape, fit better, wear longer, and are of greater intrinsic value than any other \$8.50 shoes on the market to-day, and why the sales for the year ending July 1, 1904, were

\$6,263,040.00. W. L. Douglas guarantees their value by stamping his name and price on the hottom. Look for it—take no substitute. Sold by shoe dealers everywhere. Fast Cotor Eyelets used Exclusively.

Superior in Fit, Comfort and Wear. "I have worn W.L. Douglas \$3.50 shoes for the last twelve years with absolute satisfaction. I find them superior in fit, comfort and vear to others costing from \$5.00 to \$7.00."

B. S. McCUE, Dept. Coll., U.S. Int. Revenue, Richmond, Va. W. L. Douglas uses Corona Coltskin in his \$3.50 shoes. Corona Colt is conceded to be the finest Patent Leather made.

Facts About Furs.

Fur is being used in narrow band form on the bodices and sleeves of wraps,

Short-haired furs are to reign supreme and long coats of the finest as well as o indifferent broadtail are shown.

Fancy chiffon velours with fur trimmings are making several smart coats, and taffetas, too, in the soft makes will have a large following.

Mink and sable coats-those, too, or broadtail, caracul, and moleskin-will be

For trimming purposes on expensive coats sable paws are being used, while sable-dyed squirrel is a fur that has been nade up into pretty coats and muffs.

The perishable qualities of molesking and chinchilla put these pelts in the back-ground; they are, however, to be much in

Something of a novelty in calfskin in it natural coloring, known as "yetta." The skins with fawn and white markings are chosen, and on blue, brown and mauve broadcloths are remarkably effective.

The short basque coats which were is great favor last season are certain to b popular again, but undoubtedly the long skirted coats which for several years past have been in favor will be largely patron

There is an effort being made to rein troduce bear this season, but only for stoles, muffs, and neckwear generally.

A Brief Description of the Blight on the Northwestern Wheat Fields.

Largely because the recent sensationa "Please, Mrs. Subbubs, mamma says advance in wheat has been chiefly rust, many people not generally interested in the wheat market have been anxiou to know what "rust" actually it. Then are, in fact, many traders of long experience in wheat who freely confess that they do not know. They know, generally, that it is a diseased condition of the plant, and that the growth is of a fungus nature, but that is about as far as the majority attempt to go

as the majority attempt to go. Rust is a blight that develops and b comes serious in seasons when the weath er is hot and wet. The disease rarel spreads when the weather is reasonable cool and dry. But it often makes it appearance suddenly and unexpectedly overnight, after a day or two of alter nate rain and intense heat. At one stag it is called "red rust," partly, if not who ly, because it can be rubbed off on th hands or clothing, leaving a ruddy stail

ike iron rust. In the spring, rust begins its growth on plants other than wheat, preferably barberry leaves. The spores from this spread to the wheat fields, where they quickly develop and enter the wheat leaves tissues. About harvest time the second crop of spores is produced. These are the red sports, and from this the name of red rust comes. Afterward another set of spores develops, usually in the stubble and sometimes along the leaves, and these are seen in long black rows, giving the name of black rust. This latter is the worst and most dangerous form of the disease as it is likely. gerous form of the disease, as it is likely to spread rapidly and sap the vitality

from the plant.

Thus far little has been accomplished to successfully combat the disease. rule, hard winter wheat, which ripens early in the season, seems most able to withstand the blight. There are many wheat dealers whose experience has led them to believe that important damage by rust is frequently brought about by the use of poor seed. In other words, if the seedw was not strictly choice, the plant would be weak and susceptible to attack.—New York Evening Post.

A Mutual Mistake.

Little Willie told his mother that lion was on the front porch, but when an investigation was made it was found

to be the Newfoundland dog, which had been newly sheared.

"Now, Willie," said his mother, "you have told a very naughty story, and you must go up to your room and pray for forgiveness and remain there until the Lord does forgive you."
Willie promptly obeyed, and he was

cone only a few minutes before he came ripping back. "Did the Lord forgive you?" asked his

mother. "Yes," was the reply, "and He said about this one more than any of the others.

Mrs. Wise—Of course, she wants the rest of us to think the girl isn't worth

The didn't blame me much either 'cause when He first saw it He sorter thought it was a lion himself."—Collier's.

Would Stop Runaway Horses. Once, when Daniel Webster was riding along a New England road in a stage coach, so the story runs, he was annoyed by the jolting, and poked his head out of the window to yell at the driver. "Hey, can't you drive a little slower?"
"No," responded the coachman, "the horses are running away, sor."

Run 'em into a fence corner." advised "Can't, sir," said the driver reluctantly and despairingly. "They've got the bits between their teeth, sir!"
"Well, run them into debt, then," thundered Daniel. "That'll stop anything!"-

Mrs. Weisslitz, president of the German Womans' Club of Buffalo, N. Y., after doctoring for two years, was finally cured of her kidney trouble by the use of Lydia E. Pinkham's Vegetable Compound.

Of all the diseases known with which the female organism is afflicted, kidney disease is the most fatal. In fact, unless prompt and correct treatment

is applied, the weary patient seldom survives. Being fully aware of this, Mrs. Pinkham, early in her career, gave careful study to the subject, and in producing her great remedy for woman's ills—Lydia E. Pinkham's Vegetable Compound—made sure that it contained the correct combination of herbs which was certain to control that dreaded disease, woman's kidney troubles. The Vegetable Compound acts in harmony with the laws that govern the entire female system, and while there are many so called remedies for kidney troubles, Lydia E. Pinkham's Vegetable Compound is the only one especially prepared

Read What Mrs. Weisslitz Says. "Dear Mrs. Pinkham: - For two years my life was simply a burden, I suffered so with female troubles, and pains across my back and loins. The doctor told me that I had kidney troubles and prescribed for me. For three months I took his medicines, but grew steadily worse. My husband then advised me to try Lydia E. Pinkham's Vegetable Compound, and brought home a bottle. It is the greatest blessing ever brought to our home. Within three months I was a changed woman. My pain had disappeared, my complexion became clear, my eyes bright, and my entire system in good shape."—Mrs. Paula

Weisslitz, 176 Seneca St., Buffalo, N. Y. Proof that Kidney Trouble can be Cured by Lydia E. Pinkham's Vegetable Compound. "Dear Mrs. Pinkham:—I feel very thankful to you for the good your medicine has done me. I had doctored for years and was steadily growing worse. I had trouble with my kidneys, and two doctors told me I had Bright's disease; also had falling of the womb, and could not walk a block at a time. My back and head ached all the time, and I was so nervous I could not sleep; had hysteria and fainting spells, was tired all the time, had such a pain in my left side that I could hardly stand

at times without putting my foot on something. "I doctored with several good doctors, but they did not help me any. I took, in all, twelve bottles of Lydia E. Pinkham's Vegetable Compound, five boxes of Liver Pills, and used three packages of Sanative Wash, and feel like a new woman, can eat and sleep well, do all my own work, and can walk two miles without feeling over tired. The doctors tell me that my kidneys are all right now. I am so happy to be well, and I feel that I owe it all to your medicine."—Mrs. OPAL STRONG,

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address Lynn, Mass. Source testimonials, which will prove their absolute genuineness.
