# THE LAND OF NICOTINE.

I think every man, woman and child in Japan smokes. This may be an exaggeration, especially as regards the children, but it is no exaggeration to say that smoking is as much a part of the everyday life of the people as is eating or drinking, and it is indulged in by women with the same innocent, nonchalant enjoyment as is exhibited by the men. It was a bit of a shock to me when I first came to Japan to come face to face with this fact before I had an opportunity to form any sort of impressions of the little women in whom I was prepared to be so inalmost immediately took a train for Moji, whence I was to go for a trip through the interior. The first class carriage into which I was shown was anything but first class; it was unclean and badly ventilated, and its only other occupants were two Japanese ladies and a man. The women had evidently just finished breakfasting in the car and were now sitting on their feet upon the seat absolutely enwrapped in clouds of the most evil smelling smoke, which they puffed from long cigarettes. They were beautifully dressed in silk kimonos and were undoubtedly gentlewomen. I knew that even then, when I had seen so few, and I must confess I was rather annoyed, because their daintiness seemed to be entirely destroyed. But after a residence of months I think I would rather see them smoke than not. Franklin in Leslie's Weekly.

Russians Will Probably Fall Back Fecause of Oyama's Victory.

## CZAR'S LOSSES ARE 42,000,

Japanese Lost Only 7000 in Recent Battle-Kuropatkin Sets Fire to Sandepas.

London, Feb. 1 .- According to The Telegraph's Tokio correspondent the Russian casualties from January 25 to January 29 are estimated at 36,000 to 42,000. The Japanese casualties are placed at 7000. The overwhelming disaster which befell the recent Russian movement has affected Gen. Kuropatkin's main position to such an extent that a general retirement beyond Mukden

St. Petersburg, Feb. 1 .- Gen. Kuropatkin, telegraphing under date of January 30, says Sandepas was that day set in ire by the Russian artillery.

In a telegram dated January 31, the commander-in-chief reports a continuance of a successful bombardment of Sande-

and says that Russian balloonists had noted a portion of the garrison had been withdrawn.

Tokio, Feb. 1.—Noon.—Field Marshal Oyama, reporting yesterday, says that the Russians bombarded his center and right wing on January 20 and sent small bodies of infantry to attack the Japanese outposts, where they were repulsed. On the same day heavy Russian guns fiercely shelled Hiyentai and Chenchiek-

"On January 30 two companies of I ussian infantry unsuccessfully attacked Yatzupao, two miles northwest of Chenhiehpao, and two battalions of Russian

chiehpao, and two battalions of Russian infantry and a regiment of cavalry failed in an attack on Tutiytzu."

Field Marshal Oyama, in reporting the wounding of Lieut. Gen. Mistchenko, which he had learned of from Russian prisoners, characterized Gen. Mistchenko's attacks upon the Japanese flank as heave.

for retiring fully explain the army's movements and show them to have been independent of the weather.

A large part of the wounded are being cared for at Mukden, where the hospitals and trains are filled and the Red Cross corps is active.

The situation as it further develops, is better realized and understood, though it is less ominous as the weather has moderated and the Japanese are aggressive.

Regarding the first reports of large Russian losses it is now said that a considerable part of the first corps and Gen. Stakelberg, its commander, has rejoined the main body of the army and retired the main body of the army and retired to their old positions.

## Expected Great Battle.

Gen. Oku's Headquarters, Jan. 27. Noon, Via Tien Tsin, Feb. 1.—(Delayed in transmission.)—After three months' inaction there is now a prospect that the armies of Gen. Kuropatkin and Field Marshal Oyama will soon join in what will likely prove the greatest battle of the war. For some days past the Rusory to an attempt at a turning move-

clong the Shakhe river.

The Japanese force has also been increased and everything now seems ready for the greatest conflict yet recorded in this history of the war.

The movement by the Russians seems to indicate a desire to strike soon, in a desperate attempt to avenge the fall of Port Arthur. Probably the revolutionary outbreak in Russia has determined Gen. Kuropatkin to make a desperate effort to gain a victory before the outbreak in Russia becomes known to the army.

## Raids Were Failures.

The utter failure of the recent cavalry raid by the Russians on the railroad shows the futility of further attempts of the kind. With the ground so solidly frozen troops on the advance would have great difficulty in entrenching to secure the slightest cover. The advantage of the situation would be entirely on the side of the army on the defensive.

Police Claim That Alleged Bluebeard Can't Be Convicted of Slaughtering Wives.

Chieago, Ill., Jan. 31.-Chief of Police O'Neil today declared his belief that Johann Adolph Hoch, alleged to have been married to over a score of women, has murdered at least twelve of them. This statement was made by Chief O'Neil in a letter written by him to Capt. James J. Langan of the detective bureau of New York, in which he requested the police department of that city to follow a clue given through an conymous letter received by Inspecto of Police Shippy from a woman living at the Belvidere hotel, New York. In this letter it is intimated that Hoch married two New York women, whom he has abandoned.

will probably be two weeks before Hoch is brought back to Chicago, unless he waives extradition.

### Another Victim.

Johann Hoch, alleged bigamist, under arrest in New York, may have had an other victim in Justine Loefiler of Eik hart, Ind., the police of that city believe This young woman came to Chicago in 1901 and found employment in a restar rant. On May 22, 1902, she returned Elkhart and announced that she had married Robert Schmidt, bookkeeper in a laboratory, and that he would shortly have a drug store of his own. Later she spoke of a trip to Germany, where her husband's relatives lived. Then her friends heard of the illness of her husband and that the trip to Germany had been postponed.

# POLISH REVOLT SPREADS.

The Situation A: Warsaw Is Growing More Serious.

# PEOPLE ARE MASSACRED.

Czar Receives Bad News from Lodz and Radom-Starving People Join Revolutionary Movement.

Paris, Jan. 31.-Semi-official reports, which have reached here concerning the general conditions in Russia outside of St. Petersburg are very unfavorable.

St. Petersburg, Jan. 31.-2:45 p. m.-The latest reports from Warsaw depict wreaking sly vengeance on the troops. the situation throughout Poland as increasingly serious. Minor collisions between the troops and police and the populace continue to swell the number of dead. Trade and industry are completely at a standstill and the presence of thousands of idle workers who have been out of employment for months and are starving and desperate adds a factor of the greatest danger which is not present to the same extent in St. Petersburg, where the government orders for war purposes have kept the factories busy.

MORE BAD NEWS. The American vice consul at Warsaw, Wieold Fouchas, telegraphs that many stores, chiefly Russian, have been pillaged by mobs and that the shops and factories without exception are closed A general strike is in effect. Those who not willing to walk out are compelled to join the strike by threats. Mr. Fouchas saw no improvement in the situation up to last night and reported the receipt of bad news from Lodz and Radom.

ESTIMATE OF THE SLAIN.

It is estimated that the number of killed or wounded at Warsaw is about 100, which is a conservative estimate.

The rioting in Poland will largely affect the economic situation. The fac-tories at Warsaw, Lodz, Petrokoff and other industrial centers in Poland have been compelled to gradually reduce their output and decrease their working forces since the outbreak of the war, which has almost entirely closed the Siberian and Manchurian markets.

THOUSANDS ARE DESPERATE. The result has been that thousands of workmen have been thrown out of employment for many months, furnishing a horde of hungry, dissatisfied, desperate men among whom the news from St. Petersburg produced an outburst of riotous and incendiary spirit. It is feared that a large proportion of these thousands may be utilized by the revolutionary organizations in Poland, which is the hotbed of Socialism, and the movement may develop a purely political character, though there is no indication so far of any co-operation on the part of the intelligent classes of the Polish population, which are adverse to a revolutionary

SHOOTING WAS ILLEGAL.

The Nashazhizn, a liberal newspaper of St. Petersburg, which has received a second warning from Governor General Treond warning from Governor General Tre-poff in a moderate tone, raises the legal point in connection with the firing of January 22. The law requires the police to exhaust all means to preserve order before calling in the troops and the Nashazhizn claims that this was not done before the military began firing.

MANY KILLED IN WARSAW.

There have been many sad cases of wholly innocent people shot accidentally as they turned street corners. There are rumors that hundreds have been killed in fighting in the suburbs, but personal in-vestigation shows that all such reports are exaggerated.

WOMEN ARE STARVING.

An enormous body of troops holds the Wola district, one of the poorest in the city. Some of the streets look like the headquarters of an army. In this district the writer today saw starving wom en trying to enter a baker's premises, but the soldiers, with their bayonets, formed a ring fence about the shop. The soldiers were good-natured and did not hurt the women who tried to push the bayonets aside. The women could not break through, though they were ready to tear the house down to get bread. ### GRANT REFORMS TO END REVOLUTION,

St. Petersburg, Jan. St.-The Associated Press is informed on excellent authority that the chances of the government meeeting the present situation by granting a sort of zemskysbaro (old Russian land parliament) is growing hourly brighter. In the opinion of many Liberals the creation of such a body, made up of representatives of all classes which could, like the old states general of France, voice the needs and grievances of the people without intermediaries, directly with the sovereign, would rally to the government's support all the conservative and liberal elements.

People are afraid to venture into the street. Some prefer starvation rather than risk death by the bullet. Most, however, court danger, the young women especially of the lower and middle classes risking their lives merely from love of

excitement. Girls of 18 seem to try to, get into the places where the fighting is the thickest.

The ambulances are busy day and night. The hospitals are full of wounded. The police seize the bodies of rioters when they are shot in order to prevent demonstrations over them. demonstrations over them.

The movement, the letter says, has taken on a distinctly political character, through the influence of independent students or those not belonging here. These are southern Russians, who came to Riga under government encouragement to Russify the Polytechnic institute. They were heard in the streets shouting, "The war must stop," "Down with the Czar,' "Give us a constitution," "Long live revolution," "Hurrah for Japan." A number of students were killed o

RUSSIAN BOMBS IN PARIS.

Paris, Jan. 31.—During the exit of the audience from the Twoli Vauxhall, held to protest against Russian autocracy, a bomb was thrown into the center of the group of police republican guards, in which stood Prefect Lepine and other high officials. None of these was hurt, but two guards were wounded and many windows broken. The bomb was loaded with big headed bootnails. Two men have been arested.

The meeting was under the auspices of the revolutionary Socialist groups and 5000 persons were present. Deputies Jaures, Vaillant, and Depressense spoke. The police were present in strong force.

Later in the day the police discovered a supposed bomb with a tube attached containing a lighted force on a window. containing a lighted fuse on a window ledge in front of the house of Prince

Troubetskoy, an attache of the Russian embassy here. The policeman extinguish-

ed the fuse and informed the authorities, who are investigating the affair.

The bomb was bottle shaped and of small dimensions. It was filled with a green powder and chemicals. There were construction the acid could not mix with the powder, and it is believed the bomb could not have done great damage.

### JAPANESE LOSSES GREAT.

St. Petersburg, Jan. 31.- A telegram from Schiatun, dated January 29, says the Russian losses from January 25 to 28 were 10,000, but that the percentage of dead was small. The Japanese losses were very heavy.

Over 300 were made prisoners. RUSSIAN POSITION WEAKENED.

Tokio, Jan. 31, 11 a. m.—It is believed that the loss of Heikoutai weakens the Russian position and will probably compet a material charge in the Russian front at that vicinity. Heikoutai will be strongly defended by the Japanese, who are now occupying the Russian works. As the ground is frozen it is practically impossible to construct new

JAPS ADVANCE ON MUKDEN.

Mukden, Monday, Jan. 30.—(Delayed Transmission.)—This morning the Japanese advanced on the Russian left, drove in the cavalry screen and bom-barded the outlying hills. The Russians moved up reinforcements, repulsed the Japanese and drove them out of a village

they had occupied. Constant streams of wounded men are arriving here from the right flank, including Lieut. Gen. Mistchenko, who is in excellent spirits and is receiving visit-ors. According to the official army or-gan the wounded number 3500. The cold is intense and the condition of the wounded causes the greatest anxiety, because the exposure of their wounds to the frost induces gangrene. Preventative precautions have been taken, but the wounded are suffering the greatest pain.

JAPS SPREAD NEWS OF REVOLT.

The Japanese are taking good care to see that the Russian rank and file are not left uninformed regarding the disturbances in Russia. They are carrying on a ances in Russia. They are carrying on a regular campaign to spread sedition and discouragement among the troops. Letters are daily thrown within the Russian lines, declaring that all Russia is affained with riot and revolt, arguing that the soldiers are shedding their blood in vain and calling on them to surrender or desert. The soldiers eagerly read and discuss the sconding of the state of the certain of the events at St. Petersburg, January 22. The sinceric hope is expressed on all sides that the Russian nation will forego internal differences and not play into the hands of the Japanese.

NO FURTHER DEVELOPMENTS.
St. Petersburg, Jan, 31.—The Associated Press' telegrams from Manchuria, do not indicate developments of importance since Gen. Gripenberg's order to abandon the advance. The Japanese yesterday made a demonstration in the castern district, but apparently it was not serious. The operations on the Russian right will probably not occasion further her heavy fighting at present, unless the Japanese determine to follow up their counter offensive movement, which is not known of the counter of dispatches from Mukden saving the cold is more intense, and cold again and again by word of mouth, as they were the day before by from the people to dispatch of the year of the point of the property of the propert regular campaign to spread sedition and discouragement among the troops. FIGHTING NOT OVER.

St. Petersburg, Jan. 31.-6:15 p. m. Although the Russians have abandoned their advance the latest official dispatches received here indicate that the fighting is not over. The Russians continue to hold the captured villages. The Japanese resumed the offensive January 29 and desperately assaulted the Russians, but were everywhere repulsed. Gen. Kuropatkin, in dispatches dated January 29 and January 30, reports that the Japanese losses in the recent

fighting were very heavy, many being bayonetted and sabered. The total number of Japanese prisoners has not been ascertained, but they already exceed 300. The Russian losses January 28 among the advance posts were five officers and

Gen. Kuropatkin says the Japanese offensive was indecisive and that the Russians, who are in excellent spirits, continue to occupy the villages on the right flank captured during the recent fighting. The Russians continue to successfully bombard Sandepas, where many Japanese have been frozen to death.

RESULT STILL IN DOUBT.

Berlin, Jan. 31.—The Russian offensive movement according to the reports re-ceived by the German general staff from Mukden has not been completed, but continues to develop and the result can not be forecasted. They did not send a dollar into Illinois to stem the Republican tide, nor did they make a pretense at keeping the Republicans of Illinois "busy." The state was abandoned by common consent to Roosevelt as not being much better fighting ground than Pennsylvania. By the way, how does it happen that that state returns so large a Republican majority? Was it also carried by the plutocrats, or did the overwhelming vote in Pennsylvania represent, as in Illinois, only popular sentiment and affection for Republican principles and policies?

Visionaries, cranks and lunatics, marshaled by Mr. Bryan and guided by Debs, Watson, Darrow and their like, will have a lot of trouble in explaining how the Republican vote piled up in states where it was not needed nor expected and where it could not have been influenced by monetary considera-

The radicals are weak, too, when they suggest that the adoption of policies or theories of government directly antagonistic to those which triumphed in the late election will result in Democratic success. There is no sense in saying that because Roosevelt was elected as the representative of certain principles the advocacy of principles utterly repugnant to those which he stood for will bring about Democratic

### Betty's Twilight Chat.

New Year's resolutions! How many of us make them and how few end the twelve months with fragments hardly large enough for identification purposes! Still it is good to make them-it shows a proper sense of our shortcomings and a desire to correct them. A day's imconsidering, and we all hold out longer

There are, probably, a few cases on record where lasting reforms have sprung from New Year's resolutions. I know one, and you could, undoubtedly, tell me others. This was the case of an unpopular girl who sighed for the attention bestowed upon other girls who lacked some of her good points. Obviously there were defects which she must find and correct, and she decided that the best way to do was to study and imitate the popular girls of her circle. It was a difficult task she set herself, but she possessed the necessary pluck to carry through to the end any undertaking she began. By New Year's day she had a collection of valuable notes, representing the qualities that

made her girl friends popular.

I believe that she never found more than one in each person. She determined to combine them and test the re sult. Three months passed away and the entire feminine portion of the best part of that city in which the incident ok place, woke up one day to the fact that they were being pushed into the background by a hitherto unobtrusive member of society, that they were divid-ing masculine attentions with her and giving her the lion's share at that. Things continually grew better for her and worse but I am sure they never guessed the reason.

It is not every woman who is willing to admit faults or shortcomings-that is where men have an advantage. Most masculine creatures glory in their faults and chuckle over their sins. Perhaps that is why women-like even the worst of them. Wherever you find a man frankly confessing his enormous distance from sainthood you will find adoring women in flocks, regular flocks. Men make New Year's resolutions, yes, but they have economy as an object or something personal. They announce their in-tentions with the blare of trumpets and

toot some over their failure to keep them.

There is this to be said. The world is not as observing as we imagine and we are likely to escape unnoticed unless we do something big or loud enough to attract its attention. I fancy our self-esteem would receive a severe shock did we really know how insignificant we are of how very little interest our small doings are to the general public. I thought that today when the postman who has been delivering for months all kinds of queer mail in several names at a house on his route and never appeared to take the slightest interest in the affair beyond getting the packages to their destination. Today one name attracted him by its familiarity and he ventured to ask a question and express an admiration for the articles to which he had often seen it appended. And all the time the family had been picturing him devoured with curiosity and talking them over with his

Well, if we do not talk nobody pauses to listen, and almost anything is better than indifference. I would rather be adversely criticized than Ignored and there are many like me. An occasional rap is wholesome, like the bitters we take to stimulate a failing appetite. Continuel nagging is like a wasting sickness that saps the vitality. So you are all at libersaps the vitality. So you are an at interty to rap me on the knuckles when you feel that you have cause, and if I cannot justify myself I will be meek. I certainly shall not be foolish enough to feel other than interested in whatever impression I make.

If we are going to hold to the timehonored custom of making resolutions at the beginning of the new year-and pray let us keep a bit of old-time flavor in our life-let us pick out ones worth considering. It was not worth while for friend, who dotes on chocolates, to forswear them because she never ate enough to harm her, and cutting them out of her life was cultivating unnecessary misery. She might better have resolved to take more interest in the unfortunate and be more forbearing with those who loved her. There is a deal of charity in the world but not a fraction. charity in the world, but not a fractional part of what is needed. Thousands of men and women are doing a tremend-ous work in that direction and tens of thousands are doing nothing at all. You know to which side you belong and you also know that you can do a little some-thing if no more than giving away a

I have heard of people who spent so much time in trying to be good that they found no time to do good. I don't care how much we differ in creed; there is a common ground on which we may agree with a clear conscience—the simple Christian doctrine of being good and doing good. How can beliefs affect that? Being good is infinitely harder than doing good, and that is why it comes first. One does not have to wait for the new year to put reforms into working order, but there can never be a better time of but there can never be a better time of the year to think of others. Christmas thoughts soften up our natures, that is if we are worth much, and in such a of mind we are ready to promis a good deal. So you see there is a reason for this excellent old custom, after all.—Boston Traveler.

duties, her recreations.

Country girls often hold a mistaken estimate of "hard work." They think it is a "soft snap" to work in the city. They do not take into consideration the They do not take into consideration the country which grinds: the set hours which is taken early, consists of a cup of black coffee and a very small roll, with no butter at all.

"The American woman at that time country fruit and cereals, rolls and are mercilessly maintained; the impure atmosphere which draws the richness their cheeks and dims the brightfrom ness of their eyes, the unnatural stimulus of excitement and activity which ages

prematurely. Here we have a young woman just through her schooling. It has taken some sacrifice and endeavor on the part of her parents to give her this. Now they want her company and help. She feels that it is just like being buried alive to go back to the old farm. She goes. She fills the house with a new light. Her parents are so proud and happy in their accomplished daughter. There is nothing that lasts, they say,
God and the soul.

They have cowls of the mists, and rain for their habits gray;
The world's a dream, where ever the death bells toll.

There is nothing that lives, they say, but God and the soul.

There is nothing that lives, they say, but death bells toll.

There is nothing that lasts, they say, is just like being the control to the old farm. She goes. She hims the house with a new light. Her parents are so proud and happy in their accomplished daughter. Now is she going to fret because she is out of her sphere? She should not, because she is strictly "in" her sphere.

On the part of the parents, if they have recalled her from the possibilities of a wage-earning position, she should be given an allowance, be it ever so small, that she may be independent. Good periodicals should be admitted to the home. If she is musical, an instrument should furnished, if that can be afforded. e should not be asked to do tasks beyond her strength. Because she is on a farm she is not possessor of a man's strength. Many farmer's wives I know do a man's share in the fields. The evil effects will be surely reaped by some one.

But the girl, to be happy, must work outdoors as well as in. There are many light outdoor tasks which may well fall her lot, such as caring for the poulgathering fruit and husking corn And right here comes in the joy of living, the closer communion with nature. To all the village undertakings she should contribute of her ability. She should find some interest and pleasure in every gathering, for the person who feels herself to be out of her place and keens looking forward to sometime some keeps looking forward to sometime, some place, where she will be recognized for her worth and will find just what she wants in the line of sympathy and endeavor, will never see it. If one makes the best of what they have before long it will become the best will become the best.

A girl should make it a part of her ereed to care for her health, and her ooks. The fresh air, plenty of exercise. sound sleep, good water and plain food will do wonders. She takes care to dress well, considered from a front point of view. But she dresses with a special regard for those who shall see her from the rear.

The French woman takes great pride in her shoulder blades. "Let them get fat and you are lost, she says. And so it is. "Let your shoulder blades become stooping and you are ruined," she declares. ### Young Persons' Opinions.

Very few young persons have the courage of their convictions or appear to be able to make up their minds for themselves as to whom and what they like, and to act accordingly. They are so much influenced by each other's views that one wonders sometimes where the original starter of an opinion can be, they all seem so supinely resting on each

"It is a great pity," remarked an older woman recently, "that girls will let such little things prejudice them against some excellent young man who, properly appreciated, might make an excellent husband. ### SPIDER BITES.

### They Are Said to Be Far Less Dangerous Than Is Supposed.

When in doubt, charge it to a spider. That slight creature has been held responsible for deaths and illnesses wherewith she had nothing more to do than the United States has to do with brigandage in Morocco. Yet the familiar newspaper announcement, "Killed by a spider," is before us again, and we read how the suffering Mrs. Wilson of Knoxville died in twenty-four hours as a result. sult of a spider bite, her body being swollen to twice its normal size before she resigned consciousness. If we are to believe the entomological authorities in Washington, who are paid by the government to know, we have only one kind of spider that is really poisonous enough to hurt, and that is a little fellow, marked with red and black, and not all black, as the Knoxville alarmists de-clare. Until last year the total number clare. of deaths actually traceable to spider bites in this country was one. Possibly

it may now be enlarged to two.

We cling to our superstitions, and that of the deadliness of spider venom is one of them. A spider has enough of this acrid chemical to kill a fly, when the web is not strong enough to hold it, but the human subject has on various occasions—sometimes without knowing it— been subject to her surgery without other result than an irritation considerably less than is inflicted by a mosquito. When death results from so slight a cause it does not signify that the spider is dangerous. It means that the subject was in so perilous a condition of health that a pin scratch would have served as well to end life as the spider's trifling wound has done. Not many years ago the tarantula was regarded as sure and sudden death. The southwestern miner who turned in without his boots and who found that half a dozen of these giant spiders had got into bed before him made his will on becoming cognizant of this fact. Now he merely brushes them off, uses a little language and goes to sleep again. Even the rattlesnake has

his apologists. And it is well to know these facts, not merely because we permit some useful animals to live who are doing their share to rid us of insect pests, but be-cause we can amble about the world with a freer mind than our fathers could who suspected death in every moving form to which they were not accustomed. The spider has killed, we will say, two out of the many millions of human creatures that have inhabitated this country, and has destroyed count-less hosts of flies and mosquitoes, bearers of germs, which, but for her inter-ference, might have poisoned 100,000 of us. Observe the spider, then, with equanimity. She will not harm enough to hurt.—Brooklyn Eagle.

How an African Black Becomes Rich A British cruiser swooped down on a slaver off the west coast of Africa, the human cargo was set ashore, and among the "pickanninies" saved was a little boy whom the missionaries christened Richard Blaize. St. Petersburg, Feb. 1.—Emperor Nicholas this afternoon received at Tsarskoe Selo a deputation of thirty-four workingmen, representing the employes of the factories and workshops of St. Petersburg. The deputation was accompanied by Minister of Finance Kokovsoff and Gevernor General Trepoff and proceeded by the imperial railroad to Tsarskoe Selo, where carriages were awaiting them and they were driven to a point near the imperial pavilion.

It is indispensable to guarantee the people their rights. It is indispensable to exercise wakeful vigilance.

No bureaucrate system can accomplish this. The bureaucracy already has forfeited the confidence of the country. Neither any monarch, however great, is able to know everything, act for all, alone be responsible before God and the nation for the destines of his fatherland.

Do not trust, sire, to negligent, willy servants, but repose confidence in the chosen representatives of the nation. Hasten to convoke them in a permanent chamber, endowed with legislative powers, qualified to see that the laws are not broken, that the milliards accumulated from the nation's mites are employed suitably for proper purposes. Allow these representatives to share with your the responsibility for the further course of events in the bloody struggle in the far east.

Sviatopolk-Mirsky Retires.

The retirement of Interior Minister Sviatopolk-Mirsky was officially announced today, ill health being assigned as the reason. M. Dournov, former minister of posts and telegraphs, becomes acting minister of the interior. M. Rouligan, former governor general of Moscow, seems most likely to be Prince Sviatopolk-Mirsky's successor, but no decision has yet been reached. The gossips are saying that Emperor Nicholas has of-fered the portfolio to M. Witte, president of the committee of ministers.

Reprimand from the Czar.

Prince Sviatopolk-Mirsky's desire to retire had been known for weeks, but the manner in which it was announced was unusual, the retirement of a minister being generally accompanied by an imperial rescript. For this reason the form of the announcement is popularly accepted as a reprimand. Among the extreme reactionaries and even among some the moderate conservatives, Prince Sviat-opolk-Mirsky has been blamed for having from the very outset of his career encouraged all sorts of liberal aspirations which, being impossible of immediate realization, brought the present storm about the head of the government.

For Old Land Parliament.

It is extremely significant that following the interview with Grand Duke Vladimir yesterday, M. Souverin, editor of the Novoe Vremya, in that paper this morning comes out strongly in favor of a zemsky zabor (old land parliament), which he declares will not only maintain but will strengthen autocracy. It would be a channel of communication between the sovereign and the people, without which it would be impossible to have lasting reforms. lasting reforms.

Your great forebear, Peter I., said: "It is vain to inscribe laws if they cannot be fulfilled." These words are engraved on the mirror of justice in all government buildings, even in the smallest Russian towns, yet Russia is still governed, not by laws, but by circulars and provisional rules, which evade and violate the laws.

Committee Considers Reforms. The following statement was issued

To Draw Up Imperial Ukase. Having agreed upon these methods of discussion, the committee concluded that it would be advisable to ascertain the views of the chiefs of the different government departments and other non-ministerialists. It also was resolved that an imperial ukase should be drawn up in the briefest terms possible and that steps assuring realization of the reform scheme should be taken.

The committee is of the opinion that success will be rendered surer by the publication of its decisions, which will be confirmed by the Emperor.

The decisions already taken were sanctioned by his majesty on January 22.

Real Desires and Needs of the People Not Voiced in Demands.

Moscow, Feb. 1 .- Count Tolstoi bas made the following comment on the recent outbreaks in Russia, meager reports f which have reached the aged writer at his home in the country:
"Neither the working classes nor the

intelligent classes of Russians are true exponents of the real desires and needs of the people.

"The programme which they submit to the government is not the programme of the people. These elementary measures which they demand of the government such as freedom of person, freedom of speech and freedom of conscience, etc., though essential conditions for a life of culture, do not touch the problem of the crying needs of the people, which lie solely in the nationalization and com-munism of land.

"On this point neither the workingmen nor the educated classes raise the cry, nor do we hear any such cry from the peo-ples of other lands, despite the apparent freedom of those countries. In other countries there exists the so-called independent press, but its independence is

only apparent.

that guarantees freedom from strikes. lockouts and labor warfare is Battle Creek, Mich.

The story? The work people, merchants, lawyers, doctors and other citizens became aroused and indignant at the efforts of the labor unions throughout the country to destroy the business of one of our largest industries-the Postum Cereal Co., Lt'd, and at the open threats in the official union papers, that the entire power of the National and State Federations of Labor was being brought to bear to "punish" the industries of Battle Creek, and particularly the Postum Co.

This sprung from the refusal of C. W. Post to obey the "orders of the unions to take the Postum advertising away from various papers that refused to purchase labor of the labor trust-

the unions. Mr. Post was ordered to join the unions in their conspiracy to "ruin" and "put out of business' these publishers who had worked faithfully for him for years, and helped to build up his business. They had done no wrong, but had found it inconvenient and against their best judgment to buy labor of the labor trust. It seems a rule of the unions to conspire to ruin anyone who does not purchase from them upon their own terms.

An ink maker or paper maker who failed to sell ink or paper would have the same reason to order Post to help ruin these publishers. So the peddler in the street might stone you if you refused to buy his apples; the cabman to run over you if you refused to ride with him: the grocer order the manufacturer to discharge certain people because they did not patronize him, and so on to the ridiculous and villainous limit of all this beyent nonsense, in they do not want

If a man has labor to sell let him sell it at the best price he can get just as he would sell wheat, but he has no right to even intimate that he will obstruct the business, or attempt its ruin because the owner will not purchase of

The unions have become so tyrannous and arrogant with their despotism that a common citizen who has some time to spare and innocently thinks he has a right to put a little paint on his own house finds he must have that paint taken off and put on again by "the union" or all sorts of dire things happen to him, his employer is ordered to discharge him, his grocer is boycotted if he furnishes him supplies, his family followed and insulted and his life made more miserable than that of a black slave before among the best citizens. the war. foot unable to lift a hand to better himself or do the needful things, without first obtaining permission from some haughty, ignorant and abusive tyrant of some labor union.

It would all seem rather like a comic opera, if it did not rob people of their freedom; that kind of work will not be permitted long in America.

Some smooth managers have built up the labor trust in the last few years, to bring themselves money and power and by managing workmen, have succeeded in making it possible for them to lay down the law in some cities and force workmen and citizens "obey" implicitly, stripping them

right and left of their liberties. They have used boycotting, picketing, assaults, dynamiting of property and murder to enforce their orders and rule the people. They have gone far enough to order the President to remove certain citizens from office be cause the "Unions" wern't pleased.

That means they propose to make the law of the unions replace the law of this government and the union leaders dominate even the Chief Execu-This is a government of and for the

men as shown in their defiance of law and support of law breakers. The "union" record of assaults, crippling of men and even women and children, destruction of property and murder of American citizens during the past two years is perhaps ten times the volume of crime and abuse

The only place in the United States | are abused, crippled and murdered in dozens and hundreds by an organization or trust, having for its purpose. thrusting what it has to sell (labor) upon us whether or no.

Suppose an American in a foreign city should be chased by a mob, caught and beaten unconscious, then his mouth pried open and carbolic acid poured down his throat, then his ribs kicked in and his face well stamped with iron nailed shoes, murdered because he tried to earn bread for his children. By the Eternal, sir, a fleet of American Men of War would assemble there, clear for action and blow something off the face of the earth, if reparation were not made for the blood of one of our citizens.

And what answer do we make to the appeals of the hundreds of widows and orphans of those Americans murdered by labor unions? How do we try to being obliged to join any particular protect the thousands of intelligent citizens who, with reason, prefer not to any other organization, and to support join any labor union and be subject to all such persons in their efforts to rethe tyranny of the heavily paid rulers sist compulsory methods on the part of the labor trusts?

Upon a firm refusal by Mr. Post to join this criminal conspiracy a general boycott was ordered on Grape-Nuts and Postum all over the country, which set the good red blood of our ancestors in motion, bringing forth the reply that has now passed into history: We refuse to join any conspiracy of organized labor to ruin publishers, nor will we discharge any of our trusted employes upon the orders of any labor union. If they can make their boycott effective and sink our ship, we will go down with the captain on the bridge and in command.'

This set the writers in labor papers crazy and they redoubled their abuse. Finally one of their official organs came out with a large double column denunciation of Battle Creek, calling trying to force people to buy what it "a running sore on the face of Mich-'organized" and pay in dues to their labor leaders. The usual coarse, villainous epithets common to labor union writers were indulged in.

The result was to weld public senti ment in Battle Creek for protection. A citizen's association was started and mass meetings held. Good citizens who happened to be members of local unions, in some cases quit the unions entirely, for there is small need of them there.

The working people of Battle Creek are of the highest order of American mechanics. The majority are not union members, for practically all of the manufacturers have for years declined to employ union men because of disturbances about eleven years ago, and the union men now in the city are

CONSTITUTION.

ARTICLE 1.-NAME. ARTICLE 2.—OBJECTS.

First-To insure, so far as possible, permanent condition of peace, proserity and steady employment to the eople of Battle Creek. Second-To energetically assist in

maintaining law and order at all times and under all conditions.

Third-To protect its members in their rights to manage their property and to dispose of their labor in a legal lawful manner without restraint or in-

terference Fourth-To insure and permanently maintain fair, just treatment, one with another in all the relations of life.

Fifth-To preserve the existing right of any capable person to obtain employment and sell his labor, without church, secret society, labor union or of any organized body whatsoever.

Sixth-To promote among employers a spirit of fairness, friendship and desire for the best interests of their employes, and to promote among work men the spirit of industry, thrift, faithfulness to their employers and

good citizenship. Seventh-To so amalgamate the public sentiment of all of the best citizens of Battle Creek, that a guarantee can be given to the world of a continuance of peaceful conditions, and that under such guarantee and protection manufacturers and capitalists can be induced to locate their business enterprises in Battle Creek.

Then follows articles relating to membership, officers, duties, etc., etc., etc., This constitution has been signed by the great majority of representative citizens, including our work people. A number of manufacturers from

other cities, where they have been suffering all sorts of indignities, inconvenience and losses from the general hell of labor union strikes, picketing, assaults and other interference, proposed to move, providing they could be guaranteed protection.

The subject grew in importance until it has reached a place where absoute protection can be guaranteed by the citizens of Battle Creek on the following broad and evenly balanced terms which guarantees to the work-man and to the manufacturer, fairness, justice, steady work and regularity of

The new-coming manufacturer agrees to maintain the standard rate of wage paid elsewhere for like service, under similar conditions, the rate to be determined from time to time from well authenticated reports from competing cities. The tabulated wage reports issued by the Government Department of Commerce and Labor can also be used to show the standard rate, and it is expected later on that this government bureau will furnish weekly reports of the labor market from when he is ready to sell his labor and may each have reliable information as to the market or ruling price.

The new-coming manufacturer also agrees to maintain the sanitary and hygienic conditions provided for by the State laws and to refrain from any lockouts to reduce wages below the standard; reserving to himself the right to discharge any employe for

The Citizens' Association on its part agrees to furnish, in such numbers as it is possible to obtain, first-class workmen who will contract to sell their labor at the standard price for such period as may be fixed upon, agreeing not to strike, picket, assault other workmen, destroy property, or do any of the criminal acts common to labor unionism. Each workman reserving to himself the right to quit work for cause, and the Citizens' Association further pledges its members to use its associated power to enforce the contracts between employer and employe by unanimously declared their intent and to act en masse to uphold the law at all times.

> The new industries locating in Battle Creek will not start under any sort of labor union domination whatsoever, but will make individual contracts with each employe, those contracts being fair and equitable and guaranteed on both sides.

Thus from the abuses of labor unions and their insane efforts to ruin everyone who does not "obey" has evolved this plan which replaces the old conditions of injustice, lockouts, strikes, violence, loss of money and property, and general industrial warfare; and inaugurates an era of perfect balance and fairness between employer and employe, a steady continuance of industry and consequent prosperity. there are a Tew Labor Unions conducted on peaceful lines and in proportion as they are worthy, they have won esteem, for we, as a people, are strongly in sympathy with any right act that has for its purpose better conditions for wage workers. But we do not forget that we seek the good of all and not those alone who belong to some organization, whereas even the law abiding unions show undeniable evidences of tyranny and oppression when they are strong enough, while many of the unions harbor and encourage criminals in their efforts to force a yoke of slavery upon the American people. As a public speaker lately said: "The arrogance of the English King that roused the fiery eloquence of Otis, that inspired the immortal declaration of Jefferson, that left Warren dying on the slopes of Bunker Hill was not more outrageous than the conditions that a closed shop would force upon the community. These men burst into rebellion 'when the king did but touch their pockets.' Imagine if you can their indignant protest had he sought to prohibit or restrict their occupation or determine the conditions under which they should earn their livelihood," and to assault, beat and murder them, blow up their houses and poison their food if they did not

The public should also remember be found in the unions and that they deprecate the criminal acts of their fellow members, but they are often in

bad company.

Salt only hurts sore spots. So, the honest, law abiding union man is not hurt when the criminals are denounced, but when you hear a union man "holler" because the facts are made public, he has branded himself as either one of the law breakers or a sympathizer, and therefore with the mind of the law breaker, and likely to become one when opportunity offers. That is one reason employers decline to hire such men,

A short time ago inquiry came from the union forces to know if Mr. Post would "keep still" if they could call off the boycott on Postum and Grape-

This is the reply: "The labor trust has seen fit to try to ruin our business because we would not join its criminal conspiracy. We are plain American citizens and differ from the labor union plan in that we do not force people to strike, picket, boycott, assault, blow up property or commit murder.

We do not pay thugs \$20 to break in the ribs of any man who tries to support his family nor \$30 for an eye knocked out.

We try to show our plain, honest regard for sturdy and independent workmen by paying the highest wages in the State. We have a steady, unvarying respect

for the law abiding peaceable union man and a most earnest desire to see him gain power enough to purge the unions of their criminal practices that have brought down upon them the righteous denunciation of a long-suffering and outraged public, but we will not fawn, truckle, bend the knee, wear the hated collar of white slavery, the union label, nor prostitute our American citizenship under "orders" of any labor trust.

You would gag us with a silver bar and muffle the appeal to the American people to harken to the cries for bread of the little children whose faithful fathers were beaten to death while

striving to earn food for them. ## A VANISHING QUANTITY.

Influence of American Women Abroad Will Amount to but Little.

The future influence of the American woman, at home and abroad: At home, I hold it cannot change. Whatever it has been so far, such it will be in the future. It rests on American imperialism; that is, on the very life principle of the American commonwealth. The American woman cannot form that ultimate unit of the state which the French woman has long succeeded in building up, chiefly through her own exertions. The sociological uni. in France is the family—as in England it is the individual. In America this unit will, as heretofore, continue to be of a commercial or political character. The woman does not enter into its composition. Hence women in America will be neither the subjects nor the inspiration of great male poets or artists. On the other hand, the coming great American poet or artist will be a woman. Much as prophecies are to be dreaded, I do not hesitate to risk this prediction. It will be poetry of a new flavor. future. It rests on American imperialdreated, I do not hesitate to risk this prediction. It will be poetry of a new flavor. It will cause new shivers of poetic delight. It will be as original in poetry as Chopin was in music. It will be appreciated in Europe more than in America. But the main social institutions of America will suffer an elegantic problem.

But the main social institutions of America will suffer no change.

Lastly, the future influence of the American woman abroad is a vanishing quantity. Continental Europe is the very reverse of America, in that it is not, and never will be, imperialized. Continental European women, therefore, being organic parts of their respective countries, firmly control the chief arteries of social life in Europe, and mere lady visitors from America can no more affect continental Europe than can Europeans visiting the orient alter oriental customs. In England, on the other hand, American women change first themselves, then their English husbands.—Success.
