## The SPORTING WORLD

Coe to Become a Fighter.

Wesley Coe, the Massachusetts amateur shot putter, is telling his friends that he is going to seek honors as a professional boxer this winter.

While Coe has never appeared in the ring, he is nevertheless a good boxer and would need but little instruction to make him a dangerous man in the heavyweight division.

He is well built, of good height, and his performances on the athletic field

fellow he is fast on his feet and can hit hard with either hand. He is confident that he would do well even now, but he has no thought yet of being an aspirant for the championship title. It was reported recently that Coe intended to challenge Jim Jeffries.

The American Auto Association. Application blanks for individual

membership in the American Automobile association are pretty generally distributed in automobile centers throughout the country for the use of motorists who recognize the wisdom and justice body. An application blank is not absolutely essential, however. The name and address sent with \$2 to the secretary of the A. A. A. at 31 West Fortysecond street, New York, will secure membership for one year.

The time for the heats was exceptionally fast, being 2:081/4, 2:065/4 and 2:071/2 respectively. Bonalette, a brown filly, won the pacing futurity, worth \$2,000. in straight heats.

Dan Patch, the world's champion pacer, equaled his record of 1:56 for the mile in his trial at the same track. Incidentally he broke the track record for the fastest mile ever trotted or paced over it. He was driven by H. C. Hearsey, and his fractional time was 291/4, 58%, 1:271/4 and 1:56.

#### Yale Loses Leavenworth.

The Yale football team will lose the services of T. W. Leavenworth, the brilliant halfback of last fall. It was expected that Leavenworth would return to Yale this fall and play football, and he expected to do so when college closed in June. He has, however, changed his mind and has just signed a contract to coach the team of the University of Alabama this fall. Leavenworth graduated from the Scientific school in June. He was captain of his freshman class team at Yale, substitute on the varsity for one season and a year ago halfback on the varsity. His home is in Wallingford, Conn.

#### A New Baseball "Deal."

Negotiations pending between the New York and St. Louis clubs of the American league may result in the transfer of First Baseman John Ganzel to the Browns and the acquisition of Outfielder Emmett Heldrick by the New York club.

Manager McAleer of the St. Louis club makes no secret of the fact that he wants Ganzel to replace Tom Jones, who has not hit for the Browns this season. Ganzel is superior to Jones show that he is very strong. For a big in the field and is just as good a hitter.

#### NAUTICAL TERMS.

#### Origin of Some of the Expressions That Smell of the Sea.

The word "admiral" comes from "emir el bagh," which is Arabic for lord of the sea.

Latin "caput," a head; but "mate" is almost identical with the Icelandic "mati," which means a companion or equal.

Cockswain was originally the man who pulled the after oar of the capof every one supporting the national tain's boat, then known as "cock boat." "Cock boat" is a corruption of the word "coracle," and, as most people know, the coracle is a small round boat used for fishing on some of the Welsh rivers, such as the Xye and Usk. So

cockswain comes to us from the Welsh. "Commodore" is simply the Italian "commandatore," or commander, and Dingley, God bless him, and it's good "naval cadet" was originally the horse sense in politics, as it is in poker, French "capdet," which, going a step further back, has the same origin as the word captain. The reason of this apparent anomaly is that originally naval cadets were younger sons of noble families who served as privates previous to obtaining their commissions. There never was such a person as 'Davy Jones," though we frequently hear of his locker. One ought to talk of "Duffy Jonah's" locker. "Duffy" is the West Indian negro term for spirit what it needs to perpetuate itself-a or ghost, while "Jonah" refers to the large middle class of intelligent, proprophet of that name. "Dog watch" is another curious case of a term gradually corrupted out of its original form. Originally it was "Dodge watch," so described because it lasts only two instead of the usual four hours, and thus makes it possible that the same men shall not be on duty every day during the same hours. Sailors call salt meat "junk." It is not a complimentary term, for junk is nautical for a rope's end. Some 3,000 years ago ropes were made out of bulrushes, for which the Latin word is "juncus."

ECONOMIC DISCUSSION.

The Protection Ace Full Is Emblematic of Highly Paid Wage Earners, Prosperous Farmers, Increasing Wealth and Sound Money.

A Democratic contemporary refers to the Central Missouri Republican as "a stand patter in politics."

Feed Pallets For Eggs.

The Care of Colts. Colts are the most easily stunted during the first year, and therefore during this time they should be most carefully and liberally fed, says Andrew Stenson in Farm Home. If I had a colt stunted in growth I would give him skim milk, if I had it, and put some oilmeal and bran into his feed. I would feed him some roots if I could. Colts should be weaned when between three and five months old. A three or four year old should not be worked hard, because he is shedding teeth and is likely to get into a feverish condition. If the colts get badly run down a little flaxseed will be good.

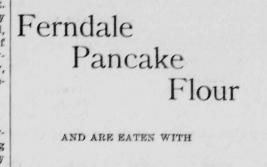

#### The Feeders' Triangle.

Then turn them into a good pas'ure.

The man, the feed and the stock fed form the sides of a triangle. If either side is short, wanting or defective the entire co-operative effort will be weak and disappointing. The wild unimproved hog or cow will not respond pleasantly to feed. We can have no feeders' triangle unless the stock fed is capable of doing its part. The skill of the feeder and the abundance of choice feed will all go to naught unless the animal holds up its side of the business. We therefore stress the importance of carrying improved, responsive live stock to consume feed .-Farm and Ranch.

Boylston Hall was wont to say that there was no such thing as a forger if properly shod. His formula is as follows: For a horse fifteen and one-half the Spanlard. When the first shock of hands high take a shoe about twelve ounces for every foot. Before the blacksmith begins to drive his nail see

#### THE MOOR'S PLEDGE.

A Point of Honor Religiously Observed by Arabs and Saracens.

A Spanish cavalier in a sudden quarrel slew a Moorish gentleman and fled. His pursuers soon lost sight of him, for he had unperceived thrown himself over a garden wall. The owner, a Moor, happening to be in his garden, was addressed by the Spaniard on his knees, who acquainted him with his case and implored concealment. "Eat this," said the Moor. "You know that you may confide in my protection." He then locked him up in his garden apartment, telling him that as soon as it was night he would provide for his escape to a place of safety.

The Moor then went to his house, where he had just seated himself, when a great crowd, with loud lamentations, came to his gate, bringing the corpse of his son, who had just been killed by surprise was a little over he learned from the description given that the fatal deed was done by the very person that the wall and sole are level and the then in his power. Then, accosting the Spaniard, he said: "Christian, the person you have killed is my son. His body is now in my house. You ought to suffer, but you have eaten with me, and I have given you my faith, which must not be broken." He then led the astonished Spaniard to his stables and mounted him on one of his fleetest horses and said: "Fly far while the night can cover you. You will be safe in the morning. You are indeed guilty of my son's blood, but God is just and good, and I thank him I am innocent of yours and that my faith given is preserved!" dividual members the association is growing steadily. At a regular meeting held recently the New Jersey Automobile and Motor club voted to join the national body and also the New Jersey state organization, which was perfected with eight clubs. The New York Motor club, also, has adopted a resolution to join the A. A. A.

#### Put Fortune In Baseball.

Henry V. Lucas, a descendant of one of the oldest families in St. Louis, who lost his fortune about twenty years ago trying to promote the Union Baseball association, of which he was president, was appointed recently to an inspectorship in the St. Louis street department at a salary of \$75 a month. At one time he was worth \$1,500,000. In the palmy days of the Union assoclation Mr. Lucas owned one of the greatest ball clubs that were ever brought together. The Union association was organized as a rival of the National league, and for several years it maintained clubs in eight of the most prominent cities of the country. Fortune went against him. While he made money in St. Louis, he was call-

ed upon frequently by other clubs, which broke up the league finally.

Ethel's Pride, a black mare by Directum-Ethelwin, easily won the Transylvania stakes, a trotting race worth \$5,000, in straight heats at Lexington recently. Turley, a brown gelding, driven by Ed Geers, finished second, and A. Thomas' Mainland was third.

Why Skees Were Invented. The origin of the skee, which may roughly be described as a snowshoe so long that the sole extends far beyond the toe and heel, was purely practical. It was designed to make communication possible between village and village or town and town in northern Europe after a heavy fall of snow. The skate can only be used on ice, but the skee is available wherever there is plenty of snow to traverse. A forward movement of the lower part of the body gives you a start, and you then slip along without raising your feet from the ground, so that the track forms two parallel lines. Even uphill good progress can be made, aided by a long stick or a stick in either hand.

to stand pat on a full hand.

It's no cheap "full" we hold, either. It's a winner-three aces and a pair of tens. Our ace of clubs is high wages in all industries. It's the card which brings plenty and prosperity to the workingmen of America and enables them to have good homes, with happy wives and children. But better by far than this, it gives this free country gressive, independent citizens wholly different from the hordes of pauper laborers that, underfed, dissatisfied and ignorant, are at once the charge and menace of other countries.

Our ace of diamonds we call home markets shows a land filled with well tilled farms, on which live prosperous farmers, rolling in wealth because of a steadily increasing home market, where there is a never failing demand for the products of our fields, orchards, pastures and dairies; where our well paid wage earners secure that which makes their homes happy and the inmates strong and healthy.

Our third ace we call increasing trade and exports, and here we find grand evidences of the wisdom of our Republican leaders. By leaps and bounds which challenge the astonishment and admiration of the civilized world we have developed our industries, improved our methods of production and cheapened the cost of our manufactures until the product of our well paid, intelligent laborers can compete in the markets of the world with the pauper labor of Europe, and we are moving toward the position of the leading producing nation of the world with giant strides. A few more years of development and a few more applications of this great protective policy and we shall stand first of all the countries of the earth as producers and manufacturers.

Along with these cards we hold a ten spot (there are no kings or queens in this political deck), which we call savings bank records. This shows savings banks accounts in every state of the Union, doubled in the last few years, since we began playing this hand, and now reaching the vast total of three billions of dollars and growing daily. our policy which speaks in thunder tones to every patriotic American and wins his allegiance to a party that can and does produce such grand results. Our other ten spot we call sound money and plenty of it. This card carries with it a national credit unexcelled, a stability and development undreamed of before by any people, a chance for investment and advancement never before enjoyed anywhere on earth.

## REAL RECIPROCITY.

#### The Plan Originally Advocated by James G. Blaine.

What profit would there be in enlarging our sales of certain goods to Germany and at the same time diminishing our product of certain other goods to make room for German substitutes? This question is a stubborn one in all reciprocity schemes, the advocates of which almost invariably are divided on the problem of which industry to help and which to sacrifice-the choice, of course, being a matter of conflicting points of view.

All this arises from a perversion of the reciprocity idea from the plan originally advocated by Mr. Blaine, which was this: Not to weaken the protective system, but to continue purely revenue duties on honcompetitive products and hold them in reserve to be repealed only in favor of nations that grant similar favors to the United States, thus helping both countries and injuring This is an evidence of the wisdom of neither. Such is real reciprocity in the view of its first great advocate .--Rochester Democrat and Chronicle.

#### Preparing Hives For Winter.

In packing hives for outdoor wintering any good, dry, loose material which is accessible may be used, such as wheat chaff, dry forest leaves, planer shavings or excelsior, says American is that which is loose enough to allow air to penetrate it and carry off the moisture of the bees. Put over this a tight cover to keep the hive perfectly bees are comfortable.

#### Bran Mash.

Bran mash, often mentioned in prescriptions for animals, is a dough made by wetting of bran or shorts. Americans did make protection their But it should be well made. To three policy and they did have to give to pounds of bran add one ounce of salt their working classes higher wages and and two and a half pints of boiling shorter hours. Lower wages and less water; stir well, cover over and allow to stand fifteen or twenty minutes undeparture from the protection policy til well cooked. Bran mash is used for from 1789 to this day. No wonder the laxative effects and as a means of giving medicine.

#### Feeding the Horse.

If you want your horse to have deranged digestion and colic occasionally and be in poor condition all over, all you have to do is to feed him on some coarse feed from which he can get no nutriment. This is what keeps many horses in this way-they haven't enough to eat. They may have enough in bulk, but there is so little nutriment in it that the horse wears himself out in getting it.

#### Sheep For the Farm,

The best sheep for a small flock on a farm and for domestic use is the Shropshire. This sheep is seen the most often at the fairs and in the markets, and its size and the nature of the mutton and the wool suit the demand for these better than any other sheep. This sheep has a round, solid body and a good fleece of six to eight pounds .--Farm Progress.

#### Cull the Sheep Flock.

The watchful flock owner lets no sheep get very old on his hands. An old sheep that will not get fat is valueless property. Be sure to cull and fatten and sell every year the oldest animals in the flock, and you will keep the whole flock constantly in their prime.

The man who said "There is more in scientific feeding than there is in the strain" came about as near telling the truth as is possible for mortal man. A common hog scientifically fed will yield a larger profit than a high bred H. animal fed on nothing but corn.

#### Increase In Savings.

Deposits in the savings banks of New York state during the past year show an unprecedented increase of \$85,836,855.59. The total amount on deposit is \$1,252,928,299.62. Even in New Hampshire the increase in deposits during the year has been \$4,138,-281, the total deposits in that state being \$70,278,991, while the average amount for each depositor is \$426 as compared with \$87 in the United Kingdom.

#### America with Bad Results.

ST. PETERSBURG, Oct. 25.-(Bulletin.)-A special meeting of the committee of ministers took place late this afternoon under the presidency of Count Witte to consider the strike situation. M. Manukhin, minister of justice, who went to Peterhof this morning to report to the Emperor, could not return by train and drove back in a carriage in a drenching rain to be present at the meet-

ing of the ministers. The Emperor is cut off from railroad

communication with the capital.

ST. PETERSBURG, Oct. 25 .- Over half of European Russia is in the grip of the striking railroad men and the strike continues to spread rapidly in all directions.

Afternoon reports show an enormous extension of the strike. All the Poland lines are tied up and a strike has begun on the Great Southwestern system, cov-ering the territory southward from Kieff toward Odessa.

#### Strike Becomes More General.

A general strike on all the Southwest railways is announced for tomorrow from Odessa. Trains are now only running between Odessa and Kieff. A gen eral strike has broken out at Poltava. The schools are closed and no newspapers will appear tomorrow.

Moscow today resembles a state of siege. The price of meat has trebled and there is great distress among the poor. The post and telegraph offices are strongly guarded by Cossacks. The populace is becoming panicky.

There was considerable excitement to day at all the railroad stations, which are in possession of the troops. Not a train departed. The railroad battalions were called out, and an attempt will be made to man a train to Moscow and the frontier tomorrow. Collisions are feared. The leaders of the strikers on the Moscow and Warsaw lines after a consulta tion have planned a big meeting for October 27.

#### To Feed Passengers Held Up.

The minister of railroads has ordered that an allowance of \$1 per day for food be made in the case of first class pas sengers who are detained en route, and that 50 cents be allowed to second class and 25 cents to third class passengers. In addition to the strike of the worl men of the Obukhoff, Putiloff, Nevski, Alenxandrovski and Kolpino works, all the employes of the factories on the Schlusselburg Chaussee walked out today in sympathy with the railroad strikers.

#### More Blood Is Spilled.

Bloody conflicts have occurred a Ekaterinoslav. The price of food is in creasing.

#### Vienna Road Is Tied Up.

WARSAW, Oct. 25 .- Communication with St. Petersburg is interrupted. Four hundred and forty men in the Vienna railroad have joined the strike. Strong patrols of infantry and cavalry

#### BULLET IN HIS APPENDIX.

Young Robert A. Pope Shot Himself Thirteen Years Ago.

Thirteen Years Ago. The vermiform appendix has served as a lodging place for a multitude of strange and varied foreign bodies ac-cording to the annals of surgery, but the physicians of St. Luke's hospital, New York city, have recently recorded a case which appears to be uffique. The object removed from the appendix, in the course of a regular operation for recurrent appendicitis, was a 22-caliber bullet, which had been imbedded in the patient's body for thirteen years. The subject was Robert A. Pope of Newburynort, Mass., a nephew of Col. Albert A. Pope. Young Pope is a Har-vard undergraduate and an athlete. He visited St. Luke's some time ago and

The operation was performed, and to-the astonishment of the surgeons a small bullet was found in the appendix. When informed of the result of the operation,

young Popo said: "I had forgotten all about that bullet. I shot myself accidentally thirteen years ago. I have not been inconvenienced by it until lately."

Sends Black Sea Fleet Into Macedonian Advance General Strike Move.

The league of leagues has seized the opportunity to come to the support of the railroad men and has adopted a resolution in favor of a general strike of all professions. The telegraph operators professions. The telegraph operators are joining in the movement. The fac tories in the affected districts have been forced to shut down for lack of fuel and Moscow especially faces not only a food but a water famine. Fortunately St. Petersburg will have communication open through Finland.

The British ambassador, Sir Charles Hardinge, who bade farewell to Emperor Nicholas yesterday after a mission on the proposed Anglo-Russian understanding, was unable to start for Eng-land this morning because no trains were running.

The workmen of the Putiloff, Koljoino, Alexandrofski and Nevski works struck this morning.

#### Believe Government at Mercy.

The Social Democrats believe they have the government at their mercy, since with the railroads stopped the au thorities are powerless to transport troops. Blood has already been spilled. The strength displayed by the Social Democrats has annazed the authorities.

Prince Hilkoff, the minister of rail roads, whose appeals to the strikers at Moscow were so unavailing that he could not get an engineer to bring him to St. Petersburg, but who with a fireman stoking drove his own engine, ar riving here black and dust-grimed, is not blamable for the failure of the government to keep its promise made in the spring to increase the wages of the rail-road men. That responsibility rests on the minister of finance.

#### Students May Resume Strike.

Ten thousand students at a meeting here voted in favor of a resumption of the students' strike unless they are al-lowed to discuss political questions. The students joined the railroad men in passing a resolution in favor of the immeconvocation of a constituent as sembly elected by direct universal sufferance, demanding the immediate grant of political freedom, and declaring that thus only can an armed revolution be avoided.

These resolutions were adopted after a deputation which called on Count Witte had reported. The count received the deputation as a private individual. He spoke to them with his usual blunt-The demand for a constituent asness. sembly, the count said, could not be realized nor could universal suffrage be admitted as all the people were not prepared to exercise the right of franchise.

#### Witte Refers to America.

In this connection the count spoke of the power wielded by capital in America, where universal suffrage existed. He thought it possible to meet the demands for an eight-hour day, especially for out-door workers and warmly favored the general measures advocated with the view of helping workingmen, especially with schools

Count Witte warned the deputation that a continuation of the strike would only result in bloodshed, either by compelling the interference of the military or by the famine stricken populaces of cities turning upon the strikers. Remember," he said, "the governthe

## AIRSHIP PROBLEM IS NEARLY SOLVED.

#### Cigar-shaped Balloon Best for Flying Machines-Steering Craft Is Still a Question.

WASHINGTON, D. C., Oct. 25.-A grant of \$500 was made last year by the Smithsonian institution from the Hopkins fund to Dr. A. F. Zahm, professor of physical science in the Catholic university, for a series of experiments on atmospheric resistance to moving bodies, Prof. Zahm completed the experiments some months ago, but has not ceased his

investigations. Dr. Zahm holds that Secretary Lang-ley has fully proven that the aerodrom, as finally constructed, will not only fly, but will carry the weight of one man and the problem now to be solved being the mode of managing the craft when it is in the air.

The \$500 grant enabled Dr. Zahm to prove that the best shape for the bal-loon part of the airship was that following the lines of the modern submarine torpedo.

## DYNAMITE TENEMENT.

#### Black Hand Blamed for Terrific Explosion in New York

Building.

NEW YORK, Oct. 25 .- The sevenstory tenement house on the corner of Grand and Mott streets was shaken last night by an explosion of dynamite which some unknown person had placed on the steps of the butcher shop on the ground floor.

The explosion threw hundreds of tenants in the building and houses ad-joining into a panic. Some fled into the streets half-clad and that part of "Little Italy" was thrown into a fer-ment of excitement which lasted for an hour.

The butcher shop was wrecked by the explosion, but the rest of the house was uninjured save for the smashing of many windows. Dr. Vincenzo Sellaro, who has an office and apartments in the building, in-formed the police that the dynamite probably was meant for him. He has received several threatening letters de-manding from \$5000 to \$100. Finally one came telling him that he would yet "the mighty vengeance of the black hand." Whether it was the blinding effect of the lightning on the horse's eyes or the fright that made him shy in the inky ensuing blackness, he came against the wall. Baylies went over it, and that was the last of consciousness for him till the first glimmer of dawn showed him that he was lying on the grave of Albert Seymour. His horse tood on the other side of the wall, with his nose over it, looking at him. Baylies, horrified at having thus been delayed, got up, staggered to the wall and climbed over to the other side. He knew that when he had started it was long past midnight, so he supposed he might not have been lying long unconscious. At any rate, he hoped not. There was but one course for him-to go forward. One thing arrested his attention-his horse was panting; not as though he had stood waiting for his master to come to himself; but as though he had been galloping and had just stopped. But there was no time for speculation. Mounting, Baylies spurred onward and in half an hour pulled up at the doctor's door. Hunting rattlesnakes for their skins has furnished a new and hazardous occupation for many men who reside among the hills and rocky bluffs of the upper Missouri valley, where the rattler attains perfection as to size and color. The snake must be taker alive and decapitated before he has an opportunity to strike himself, ac cording to the New York Herald, for terize public institution. once the deadly poison is injected the skin loses luster and value.

The price paid for perfect tanned skins is about \$1 each, and in addition the oil obtained from the snake com mands a high price from its supposed value as a cure for rheumatism and kindred diseases. Each rattler cap

tured alive means about \$1.50 to the hunter. Among the most successful hunter:

is Alfred Johnson of this place, whe possesses many large and beautifu skins. His latest capture was nearly seven feet long and carried nineteer rattles. Mr. Johnson has succeeded in domesticating a large number of young rattlers, which allow him to handle them as he will and follow a his call like well-trained puppies. The idea occurred to Mr. Johnson that by obtaining small snakes ant getting them accustomed to his pres ence he could largely increase his profits and reduce the hazards of his

occupation. Following out this rea soning, he has now a colony of nearly thirty rattlers, all of which seem to bid him a welcome whenever he ap pears, but they have no welcome fo:

#### A Use For the Tires.

An automobilist traveling through Castile, in Spain, came out of an inn one day to find his automobile surrounded by the population of the whole village, who were gazing at it with much interest and examining the back wheels, out of which large lumps had just been cut. The damage had been caused by the mother of a large family, who artlessly confessed that, seeing so much rubber on the wheels. she had cut a few pieces out to make toys for her children.

Sending Out Seeds. For many years the work of putting SUPERB FLOUR up the seeds in packages for congressional distribution was done entirely by hand. It was the custom of the senators and representatives to send their franked and addressed slips to the department of agriculture, where the work of counting the slips, pasting them on the envelopes and filling them with seed was done by manual labor. In the past three years, however, a remarkable change in the methods of preparing the seed for shipment has been inaugurated. The work is now carried on in a large three story building in the vicinity of the department, where the latest mechanical devices have been installed. The antiquated methods were left behind when possession of the building was taken three years ago. The laborious hand work has been supplanted by machinery so human in its action that one is almost inclined to believe it thinks.

The process through which the seeds pass from the time of entering the building until they are sent without cost to the public is a marvel of inventive genius. Upon delivery at the distribution bureau the seeds are weighed and taken to the third floor of the prices. building, where they are emptied into hoppers and permitted to filter down into the bag filling machines placed under each hopper. A. A. FREEMAN MILL

There are seventeen of these machines in the building, and they are indeed wonderful pieces of mechanism. Each machine has a revolving wheel containing fourteen small cups, which in turn as the wheel revolves catch the falling seed from the hopper above. As contact with a small paper envelope fed into the machine and automatically opened in time to catch the contents of the cup as it empties. A steel hand then catches the envelope, seals it and drops it through a hole in the floor into the seed bin on the floor below

Waiter Wellman, retired, two prominent citizens of the town, was recently over-heard: "I never buy patent medicine," said Mr. White. "When I feel the need of medical casistance I call our physician. I don't be-lieve in taking a lot of stuff that I know nothing about. I know, however, that a great many do use it, and apparently with good results, but I am for getting a doctor every time." "Your circumstances render this possi-ble," replied Mr. Wellman, "but the major-ity of people must consider the expense. My experience is that some patent medi-cines frequently cure when the doctor's skill is baffled. Take, for instance, an af-fliction; say like constipation and stomach trouble. Did you ever hear of your family physician curing a case like that? If con-stipated, he gives you a physic; but a physic cannot cure constipation, and he will tell you so. It is a temporary relief and before long you need more physic or pills. The doctor charges you \$2 every time you call on him and you have to pay 50c or 75c to have his prescription filled. Pretty soon you have the 'Pill' or 'Physic' habit and your doctor has a steady customer. You cannot read the doctor's prescriptions. You know no more about what he gives you than you do about the ingredients of a pat-ent medicine. No reliable company will put a lot of money into a patent medi-cine unless they are convinced that It will do all that is claimed for it. Usual-ity it is the prescription for some specialist who has devoted his life to the study of a certain disease and has mastered it. I mention constipation and stomach trou-ble because I suffered from that affliction for years. It is the beginning of nearly all diseases. Once it gets a grip on you, it is serious, stubborn and hard to overcome. I never knew a case that was cured by an ordinary practicing physician, but I do

## STEALS \$4000 FROM BANK IN DAYLIGHT.

Man Thought to Be Joseph Killoran, Held in Vienna on Charge-Search for Confederates.

NEW YORK, Oct. 24.-An American, believed to be the noted Joseph Killoran, is under arrest in Vienna, charged with being the leader of a gang which recently stole 20,000 crowns from a Vienna bank. Because of the boldness of the robbery which occurred during working hours and the belief that the man is backed both in the United States and in Europe, the Austrian authorities have sent to several American cities for rec-ords of Joseph Killoran and are search-ing Europe for evidence against the sus-pected confederates.

The robbery was entirely in keeping with his record for daring exploits in this country. He entered the bank dur-ing one of the busy hours of the day. and spoke with a depositor who had just taken 20,000 crowns to the cashier's window. During this conversation the money disappeared. The Vienna police say that his confederates took the mon-ey. When arrested the man gave the name of James Howard. The amount stolen is equal to about \$4000.

Joseph Killoran is the man, who on July 4, 1905, together with the other prisoners in the Ludlow street jail of New York cowed the guard and walked out of jail to freedom with no other weapons than briar pipes, which they made believe were revolvers.

As can be in-ferred from the prices secured from the buyers, black foxes are not plentiful in any part of the world. Less than 100 pelts are taken in a year from the en-tire earth. In some years the number

has dwindled to thirty. Of late the captures have been more plentiful, though a man can hunt a long time in any place without casting his eyes upon a black fox, and, as seeing not equivalent to securing, many men who have looked at black foxes running away have never shot one.

According to the tales of old hunters, there is a black fox which may be seen at rare intervals among the hills of Ded ham and Otis. Men who have placed hounds on its track assert that the animal never stops to play with the dogs by circling, but makes a bee line due east, running rapidly until the last pur-suer drops from fatigue. Perhaps the fox seen of late along the road leading to the Whale's Back is the same animal.-Bangor News.

#### New Products from Rubber.

A French rubber company of some prominence has recently patented a machine whereby the canvas in old rubber is entirely separated from the rubber. The process is quite mechanical, no chem-icals or heat being used. In these days of high prices for rubber scrap such a process is, of course, of more interest than in the old days, when one can remember it was customary to burn inser-tion under the factory boilers.

#### THE SECRET OF YOUTH.

De Soto looked for the secret of youth in a spring of gushing, life-giving waters, which he was sure he would find in the New World. Alchemists and sages (thousands of them) have spent their lives in quest of it, but it is only found by those happy people who can digest and assimilate the right food which keeps the physical body perfect that peace and comfort are the sure results.

A remarkable man of 94 says: "For many long years I suffered more or less with chronic costiveness and painful indigestion. This condition made life a great burden to me, as you may well imagine.

"Two years ago I began to use Grape-Nuts as food, and am thankful that I did. It has been a blessing to me in every way. I first noticed that it had restored my digestion. This was a great gain, but was nothing to compare in importance with the fact that in a short time my bowels were restored to free and normal action.

"The cure seemed to be complete; for two years I have had none of the old trouble. I use the Grape-Nuts food every morning for breakfast and frequently eat nothing else. The use has made me comfortable and happy, and although I will be 94 years old next fall I have become strong and supple again, erect in figure and can walk with anybody and enjoy it." #### MRS. EMMA FLEISSNER Suffered Over Two Years-Health Was In a Precarious Condition-Caused By Pelvic Catarrh.

## HEALTH AND STRENGTH **RESTORED BY** PE-RU-NA.

Mrs. Emma Fleissner, 1412 Sixth Ave., Seattle, Wash., Worthy Treasurer Sons of Temperance, writes:

"I suffered over two years with irregular and painful periods. My health was in a very precarious condition and I was anxious to find something to restore my health and strength.

"I was very glad to try Peruna and delighted to find that it was doing me good. I continued to use it a little over three months and found my troubles removed.

"I consider it a splendid medicine and shall never be without it, taking a dose occasionally when I feel rundown and tired."

Our files contain thousands of testi-monials which Dr. Hartman has received from grateful, happy women who have been restored to health by his remedy, Peruna.

#### A MOSS AGATE

"When are the boys coming out?" "Saturday night. You must come over to 'The Meadows,' Grace, for besides Pierce of Tech, Ralph is to bring Felton of Harvard Medical school, and you must be particularly nice to him." A happy little laugh rippled out, and

then-'Isn't that a beauty? What is it?"

"Isn't that a beauty? What is it?" "A moss agate. Grandma gave it to me yesterday after looking through her treasure box. "Kcep it, dear,' she said, 'and the wish to go with it that when-ever you wear it something may occur which will be a joy to remember." "How interesting! Are we to look for it today, by the way? What shall we do first?"

The speakers, two beautiful girls, pre-

pared to leave the train, which was approaching the northern terminal, and a few moments later were chatting gayly as they wended their way up Washingknows how, and it was nearly 2 o'clock when they were seen, breathlessly and with heads bowed to the wind, thread-ing their way through the crowd aug-mented by the theater habitues on Tremont street. At length, in the shelter of a doorway, the elder, Grace Hamil-ton, turned to look at her companion, Helen Lee, saying as the other joined

#### 'Come, where are you?"

"Coming," was the panting reply. "Why in the world are you blushing ?" was the next suspicious inquiry, but Helen's attention was suddenly at tracted toward a window exhibit, and she attempted to divert her companion's thoughts, but Grace was not to be pat

"Oh, for goodness' sake, come along. "On, for goodness sake, come along. I'h tell you," exclaimed the young girl at last, somewhat annoyed. "I just ran headforemost into a young fellow's arms -yes; literally threw myself at him, she continued, laughingly, as the situa at the shock, but I wonder at it. My head was down against the wind and the first I knew two arms in a brown suit were about me, and somebody breath swept my cheek as he begged pardon'-that's all I saw or know. ust giggled and the people laughed. skin, however, darkened by an athletic life—and two mail companions—Robert Felton and John Pierce. One did not need introduction to dis-

cern the professional type in Felton, whose rather grave but sympathetic face lighted with a smile as he talked, or the brisk, sharp man of affairs in Pierce, who laughed only as the thought impressed him. Just the man for Grace, thought Helen, as she watched her com-panion across the table.

"Are you to specialize, Dr. Felton?" she asked, as the conversation took a new turn.

"No, general practice," said he, modestly

"Ah, he is already a specialist," inter-rupted Lee, laughing, and Pierce joined

the 'College Widow,' Felton," and the laugh was heartier as Felton's discom-

Andrews of Nanaimo has recently killed a good-sized animal, and he also reports a good-sized animal, and he also reports having come across another in broad daylight, which effected its escape. He was on the public road at Englishman's River with his dogs when one animal bounded across in front of him. His dogs treed it, and he brought the panther down with a shot in the shoulder. He followed the trail of another one, the marks of which showed it to be a big followed the dogs were unable to fellow, but the dogs were unable to find it.
