THE SUGAR PLUM.

It Is the Most Ancient Candy, Antedat-

ing the Christian Era. The most ancient kind of candy is the sugar plum. It was the invention of Julius Dragatus, a noted Roman baker family of Fabius. According to the New York Herald, it was in 177 B. C. that he made the great discovery which for twenty centuries has done so much

damage to teeth. These bonbons, called dragati, after their inventor (dragees in French), remained the exclusive privilege of the family of Fabius. But at the birth or marriage of one of that family a great that they should have ever thought of distribution of dragati took place as a sign of rejoicing. ## PACKERS LOSE IN F.GHT.

UNITED STATES JUDGES SUSTAIN THE GOVERNMENT II. THE REBATE CASES.

#### UP TO SUPREME COURT.

Court of Appeals Makes Important Rulings Regarding Interstate Transporting of Freight.

ST. PAUL, Minn., April 29.-Judge Sanborn today filed the opinion of the United States circuit court of appeals, which he had written, affirming the judgments of the United States district court for the western district of Missouri, against the packers, for accepting concession of 12 cents a hundred pounds from the portion of the established rate for the transportation of provisions on through bills of lading from Kansas City to Christiania and other points in foreign countries. Judges Hook and Adams concur in the opinion.

The lower court imposed a penalty of \$15,000 on each of the indicted firms, and these fines have been affirmed.

#### First of Rebate Cases.

The defendants in the cases involved in the decision are the Armour Packing company, the Swift & Co., Morris & Co., and the Cudahy Packing company.

These cases are the first of the so-called rebate cases brought by the United

States against the packers to be de-termined by the appellate court and will form the basis for future action until the supreme court reviews the decision. Conclusions of Court.

#### The substance of the conclusions reached by the court are as follows: Elkins' Act - Rebates - Jurisdiction, erever transportation conducted there-

The giving or receiving of a rebate or The giving of receiving of a rebate of concession whereby property in interstate or foreign commerce is transported at a less rate than that legally filed and published, denounced by the Elkins Act, 32 Stat, C708, P847, is a continuous crime judiciable in any court of the United States having jurisdiction of crimes through whose district the transportation is conducted.

2. Rehates—Juland rates on through ex-

published.

The rates of transportation from places in the United States to ports of trans-shipment and from ports of entry to places in the United States of property in foreign commerce carried under through bills of lading are required to be filed and published by the amended interstate commerce act of by the amended interstate commerce act of 1887, 24 Stat, C104, P379.

1887, 24 Stat, C104, P379.

If carried under under an aggregate through rate which is the sum of the ocean rate and the rate from or to a place in the United States, to or from the port of trausshipment or of entry, the latter rate is required to be filed and published.

If carried under a joint through rate by virtue of a common countral management. If carried under a joint through rate by virtue of a common control, management or arrangement of the inland and ocean carriers, the joint rate is required to be filed and published.

#### Upholds the Indictments.

Rebates—"Device" of Elkius act imma 1—Indictment sufficient without plead-

ing it.

The giving or receiving of the rebate or concession whereby property in interstate or foreign commerce is transported at less than the established rate, is the essence of the offense denounced by the pertinent paragraph of the Elkins act.

The "device" by which the concession or transportation is brought about is not an essential element of the crime and it is unnecessary to plead it in the indictment.

necessary to plead it in the indictment.

The meaning of the clause "by any device whatever," in thet paragraph is, directly or indirectly, in any way whatever.

4. Rebates—Contract to maintain established rate ineffective after higher rate established—no defense to charge of receiving less than filed and published rate.

A contract between a carrier and a shipper to transport the latter's goods in interstate or foreign commerce at the then established rate for a definite time, is ineffective after a higher rate has been filed and published as required by law.

The time during which a rate different from the agreed rate is established by filing and publishing is excepted from the term of such contract by virtue of the national acts to regulate commerce which are a part thereof.

Such a contract constitutes no defense to

a charge of giving or receiving a rebate or concession from the filed and published

5. Criminal intent—Simple purpose to do forbidden act which is not malum in se is

Sufficient.

The only criminal intent requisite to a conviction of an offense created by statute is not malum in se is the purpose to do the act in violation of the statute.

No moral turpitude or wicked intent is essential to a conviction of such a crime.

ROAD MUST ADJUST SCHEDULES TO ACCOMMODATE PUBLIC.

United States Supreme Court Bears Out Commissioners of North Carolina.

WASHINGTON, D. C., April 29 .-The supreme court of the United States today decided in effect that the railroad commissioners of the state of North Carolina can compel a railroad company operating in that state to so adjust its schedule as to accommodate passengers on other lines from any particular part

The case arose out of an order issued by the commissioners directing the railroad company to make connection at Selma at 2:25 p. m. with a train on another line running from the eastern part of the state, with the object of accommodating passengers whose destination was Raleigh.

Douglass and Dennett Believed to Have Realized \$165,000 on Their Robbery.

NEW YORK, April 29.- The big bond robbery, in which the Trust Company of America was the victim continues an absorbing subject in the financial district.

The robbery at first put down as a \$50,000 affair, has steadily grown until today it appears that securities aggregating \$800,000 in value had been taken by William O. Douglass, the bond clerk now under arrest. A member of the executive committee of the trust company said that it took \$165,000 to redeem the saut that it took \$105,000 to redeem the securities hypothecated with brokers for loans by O. M. Dennett, who is under arrest in connection with the robbery, and that the securities were pledged for less than one-third of their value. What has become of the money Douglass and Dennett raised is unexplained. Dennett raised is unexplained

Cabrera was elected president of Guatemala September 9, 1898, succeeding President Barrios, and in March, 1905 he assumed the presidency for a second term. He was said to be very unpopular, was reported to have been shot at and wounded in April, 1905, and the following month it was again rumored that an attempt had been made to assassinate him. Later it was stated that the President had been accidentally shot in the leg.

## Want Presidency by Turn.

The Nicaraguans disregarded their claim and made Gen. Leguel R. Davila provisional President.

Immediately three of the guerrilla leaders—Rosales, Bustillo, and Castro—formed a plot to take charge of the country. They could not agree upon the one to whom the position of President should full so they decided to take turn should full so they decided to take turn should fall, so they decided to take turn and turn about, each being the executive for fifteen days. Castro took the job first, and administered affairs so neatly that no one but the schemers found out he was running the nation.

When Rosales assumed the cares of state he was more bold and established a "presidential palace" in the heart of the city and made a number of appoint ments.

#### Rosales Greedy; War Starts. By the time his fortnight was up he had made arrangements to collect taxes, and then the real provincial President, Davila, sat up and took notice. His spies still were investigating when it came time for Bustillo to assume the execu-

tive chair.

Rosales, however, decided that he was needed to complete the work of taking possession of the government and wouldn't give up his seat. The friends of Policarpo Bonilla, traitor brother of the former President, began shouting for fair play, and sided with Bustillo.

Then the war was on. The troops of both sides, numbering several hundred, massed themselves in front of the "palace" of University place. Rosales leaned out of a window of the palace and cried, "Make ready."

"President's" Command from Ambush. Bustillo emerged temporarily from the a saloon building and

trembling soldiers were killed. About 1100 shots were fired. Suddenly Real President Davila dashed nto the square. "Stop fighting or I shall arrest you he screamed.

Both armies took to their heels at the warning. Unfortunately, the two roads followed by them converged a mile from the city. Here the fleeing troops met again and the battle was resumed in a desultory way. Still more unfortunately a squad of police had been sent out to see that there

was no more trouble. Police Arrest Both Armies. When the rifles began to pop again the policemen dashed up and informed the men of both armies that they were under arrest. The 300 prisoners then were taken back to the capital by the

seven policemen. Neither Castro, Bustillo nor Rosales has been seen since the trouble first began on the city streets. The Nicaraguans have sent troops back to the capital, and fear more trouble if they should withdraw them. The conditions may make it necessary for American gunboats to remain here indefinitely

Pardon or Commute Sentence of Postoffice Robber.

WASHINGTON, D. C., April 30 .-President Roosevelt in a note to the department of justice today expressed the opinion that John William January of Missouri should have his sentence commuted at once or be pardoned outright. January was convicted some years ago of robbing a postoffice in Oklahoma and served the greater portion of a five-year sentence at Leavenworth. He then escaped and after nine years of liberty was rearrested in Kansas City and returned to prison. Many petitions, one from the Missouri Legislature, have reached the President asking for his pardon. He had lived in Kansas City under the name of Charles W. Anderson

during the time he was at liberty. Shortly after his escape January, under his assumed name, secured employ ment and eventually established himself in business, which he was successfully conducting at the time of his rearrest. He married and had a child.

President Roosevelt's action followed visit of Senator Warner of Missouri to the white house early in the day, accompanied by J. M. Kennedy, private secretary to Representative Ellis of Kansas City. After the matter had been explained to him the President made the following indorsement on the statement:

"Department of Justice:

Margaret was bored to death. After three happy years at Girton, and a fourth, almost as pleasant, spent in earning her own living, it seemed a little hard that she should have to spend a month's holiday with an aunt uncongenial to the point of antagonism. An aunt, too, who had outlived the few friends and interests she had ever had, who lived in the middle of the most bleak, flat and uninteresting country. Margaret had ever seen. After the first two days she grew very tired of it. There was not a soul to speak to in the place, and her aunt gave her to understand, on the very night of her arrival, that nothing was allowed to interfere with the strict outline of her life at Willow cottage, and that she should not see her niece more than once a day.

All human companionship was evidently denied her, but she was not quite alone in the world. There was still her bleycle, and although she ha-

ted riding alone, and felt perfectly certain that the roads were as bad as the scenery was hideous, she dragged it out of the coal cellar in which her aunt had ordered it to be buried.

But on the third ride, the monotony was unpleasantly broken by a large puncture in the back tire; ten miles from home, in a perfectly unknown road, not a soul in sight, and with the certain knowledge that she had left the repairing outfit at home!

There was nothing to do but to plod wearly on till she came to somebody or something, and she had tramped at It will be a pleasant change to have a least two miles of the dusty road before help came in sight.

It was not a very promising looking place. A small one-storied wooden building, with a wheel hung over the door and a placard over the gate: "Bicycle repairs promptly executed."

The man went on with his task, without raising his head. Margaret was piqued to notice that he was much less anxious to talk to her than she to talk to him. "Could you tell me any pretty rides about here?" she said desperately; "I've nothing to do but ride-and I am so tired of all these horrid bleak roads. I should like a pretty ride, just for once."

He stopped for a minute and thought.

"There is a little old village about ten miles from the crossroads," he said, "which might be called interesting and, with a stretch of imagination, even Some big man, who was a friend of Hampden's, was buried there, I believe, and there is an old church with a square tower."

#### THING THAT COUNTS IS COMMON SENSE.

JULIET V. STRAUSS.

very original one, perhaps, that the keynote of our existence is common sense, and that the reason why so many likes are "like sweet bells jangled out of tune" is that there is never enough of this invaluable commodity to go around.

I have come to the conclusion, not a

Common sense consists chiefly in going ahead and minding one's business, not to the entire exclusion of the neighbors or the disregard of society, but keeping in view the fact that one's own family and household is the important thing to him. There are very few of us who can do more for the world than behave ourselves and bring up a respectable family. Come to think of it, this is a good deal, and more than many people accomplish.

Of all things utterly devoid of common sense, that which we call society is most so. There is no telling just how far contrary to common sense this element will go if allowed to take its own road, and all for the reason that common sense people, being gifted with that most lovable quality, reticence, will sit back and let it go on

with its fads and its foolishness, to the serious detriment of moral conditions and the complete demolition of that sociability and hospitality that characterizes new countries before the thing called society gets a footing.

Sometimes, in a country neighborhood or quiet street in town, one comes across a home in which there is absolutely no social ambition; a placid sort of stability seems to govern the establishment, there is an abundance of good things to eat and comfortable things to wear. The inmates of the home are deeply affectionate to one another and filled with kindly interest in the welfare of the neighbors. They are not ardent church people or club people, but somehow their fire burns clearer, their coffee smells better, there is a sort of radiant cheer about their kitchen. The men sit in the kitchen while the women get breakfast, and they pop corn and crack hickory nuts around the fire in winter evenings. There is a tone in their voices as they address each other that would wring the heart of a homeless man to hear.

When I have visited a home like this I have come away humbled at the realization of the superiority of common-sense people over those whose lives are warped by petty ambitions and silly striving, how simply they have adjusted themselves to the secret of existence! Kindness, bodily comfort, simple acceptance of life's mysteries, love of daily labor, satisfaction in the quiet accomplishment of manifest duties, without aspirations to seemingly "higher" things. When will the blinded world see things aright, and why has God given some people the knowledge that He has denied to so many?-Juliet V. Strauss, in Chicago Journal.

"I ought to be much more ashamed of myself than I am," she said wonderingly. "I must really be a much less proper person than I thought. At any way. She would risk everything. She rate, whatever else I may be, I shan't be bored any more."

The ride to Merfleet seemed very short. On the return journey the bicycles, as if of their own accord, went more and more slowly. Yet the way seemed shorter than before.

The bicycle man had remembered another pretty village. Why should they not ride over to see it some day-say, to-morrow? Why not, indeed.

They did. A deeply incompetent young man was left in charge of the shop, whose owner thus lost many customers and some sixpences. But, as he said, one can earn money all the year around-and if one can't earn it, one can always do without it. But there are some things one cannot possibly do without.

WHOLESALE PRICES ADVANCING, SAYS GOVERNMENT REPORT.

Seventeen Years-Few Declines

in Commodities.

WASHINGTON, D. C., April 29 .-The bureau of labor has taken another look into the cost of living and it finds it is still increasing. Its latest examination had to do with wholesale prices only. It is now making a study of retail prices. The bulletin just issued shows that wholesale prices, considering 258 commodities as a whole, reached a higher level in 1906 than at any other time during the seventeen-year period covered. The average for the year 1906 was 5.6 per cent. higher than for 1905, 36.5 per cent, higher than for 1907, the year of lowest prices during the seventeen-year period, and 22.4 per cent. higher than the average for the ten years from 1890

Prices reached their highest point during the seventeen-year period in December, 1906, the average for that month being 4.1 per cent, higher than the average for the year 1906, and 6.3 per cent. higher than the average for December,

The average price for 1906 of farm products, taken as a whole, differs but little from that of 1905, a decrease of only one-half of 1 per cent. being shown. Food as a whole increased 3.6 per cent. in average price for 1906, as compared with 1905. The principal articles showing an increase were cheese, fish, fruit, hog products, milk rice and vegetable No change took place in the price of bread. A slight decrease in the wholesale cost of coffee, eggs, wheat, flour,

corn meal, beef, sugar and tea is shown. Of the seventy-five articles included under clothes and clothing, sixty-six showed an increase in price, five showed no change, and only four showed a decrease. In the group, as a whole, there was an average increase of 7.3 per cent. in price. In fuel and lighting, as a 5 per cent.

Commander Tappan's dispatch states that these men with the exception of the ensign, composed a liberty party of the Tacoma and were attacked by the police while returning to their ship at half past one o'clock yesterday morning. No cause is assigned for the attack but it is supposed that the men were perhaps singing, as sailors are apt to do when they have had a happy evening ashore and on returning to their ship.

welcome visitors, they spent a great deal of money in the Santiago shops and mar-kets and contributed much to the social life of the town. The officials at the navy department are at a loss to conceive what may have been the reason for this change of attitude on the part of the Santiago police. They can scarcely be lieve that the men were much to blame and they are certain they would not be aggressors because Commander Tappar reports that they were "attacked" by the police and they were attacked by the police and the character of the injuries sustained by the men is an indication that they were assaulted with clubs and swords or bayonets. No mention is made off any injury inflicted upon the police, which is not surprising in view of the fact that the strictest watch is kept upon the liberty men to make sure that they carry ashore no weapons.

Commander Tapan reports that he is making a full investigation.

Advanced Stages. Rheumatism is a painful inflammation of the muscles or of the coverings of the joints and is sometimes accompanied by swelling. The pain is sharp and shooting and does not confine itself to any one part of the body, but after settling in one joint or muscle for a time, leaves it and passes on to another. The most dangerous tendency of the disease is to attack the heart. External applications may give relief from pain for a time but the disease cannot be cured until the blood is purified. Dr. Williams' Pink Pills are the best medicine for this purpose as their action is directly on the blood, making it rich,

Mrs. Ellen A. Russell, of South Goff. St., Auburn, Me., says: "I had been sick for fifteen years from impure blood, brought on by overwork. My heart was weak and my hands colorless. SHAH'S VISIT TO THE CURIES.

Why the Potentate Gave Only a Small Sum to the Laboratory.

The late Shah of Persia, during one of his numerous visits to Paris, expressed the wish to see M. and Mme. Curie, and to be shown a specimen of the wonderful radium. M. and Mme. Curie, very much against their inclination, had to accede as a matter of course to the

Persian potentate's request.
In order that the wonderful glow of the radium might be seen to the best advantage, says the Girl's Realm, the room was darkened, but the Shah, who was a highly nervous man, was startled when the electric light was switched off, and rising, abruptly from his chair, upand destitution which reigned in the west and northwest many weeks. Accordingly The lights were of course, immediately a personal canvass is being made in all turned on again, and the Shah recovered the cities and coal dealers are being his equanimity; but the Curies had quite lost theirs, so upset were they at the

danger to their precious radium.

The Shah, to show that he was quite as capable as any European sovereign of rewarding genius, proceeded to take from his breast one of his richly jewelled orders to present it to Pierre Curie. The latter, however, declined it, saying that as he had refused the Legion of Honor it was quite impossible for him to accept a foreign order. The Shah next drew a rich diamond ring from his finger, but this also Pierre Curie declined, adding that he would accept nothing for himself or his wife, but that if his Majesty pleased he could give something toward the ex-

penses of the laboratory. By this time the Oriental potentate was vexed that his munificent gifts had been so coldly rejected, and gave the paltry sum of 200 francs for the laboratory.

-The averages wages paid in the Lancashire district, England, to cotton spinners range from about \$1.44 a week for doffers to \$6.72 for men in opening room and \$13.20 for carding overseers.

## A Lazy Liver

May be only a tired liver, or a starved liver. It would be a stupid as well as savage thing to beat a weary or starved man because he lagged in his work. So in treating the lagging, torpid liver it is a great mistake to lash it with strong drastic drugs. A torpid liver is but an indication of an ill-nourished, enfeebled body whose organs are weary with over work. Start with the stomach and allied organs of digestion and nutrition. Put them in working order and see how quickly your liver will become active. Dr. Pierce's Golden Medical Discovery has made many marvelous cures of "liver trouble" by its wonderful control of the organs of digestion and nutrition. It restores the normal activity of the stomach, increases the secretions of the blood-making glands, cleanses the system from poisonous accumulations, and so relieves the liver of the burdens imposed upon it by

Avoid all hot bread and biscuits, griddle cakes and other indigestible food and take the "Golden Medical Discovery" regularly and stick to its use until you are vigorous and strong. The "Discovery" is non-secret, non-alcoholic, is a glyceric extract of native medicinal roots with a full list of its ingredients printed on each bottle-wrapper and attested

#### Matrimonial Ideals.

It is one of the ironies of life that the thing that comes up to our ideal so seldom fires our fancy.

We crave lobster and champagne for supper when we know we ought to be eating bread and milk. We long for chiffons and laces when we are conwould be willing to do without the necessities of life if only we might have the

tends to people, and, generally speaking, no company is so attractive to us as that which is bad for our manners and our morals.

The most important phase of this sub- stand political economy. ject is reached, however, when a man or woman is called upon to decide whether he or she will marry the one who sets his or her pulses thrilling, or the one who realizes every specification of what

a good wife or a husband should be. Unfortunately, those who are most filled with inward graces are most often acking in outward attractions. The girl who is industrious, and domestic, economical, and pious, and possessed of all the virtues that fit a woman to make her a real helpmate to a man generally a knobby forehead, skimpy air, no figure and a taste in dress that makes her every man's heart's desire, even though he knows that he will be

taken in if he gets her.

In the same way, the earnest young the Epworth league and is getting on in business, and bears a visible stamp of being O. K. on his noble brow, and to marry whom would putting your money in the savings bank, ninety-nine times out of a hundred wears his hair too long

Whereas the man who is a hope less detrimental, and whom it would be suicide to marry, is good to look upon, good to talk to, good fun to go a real idea is being tossed around from out with, and knows every short cut and bypath to a woman's affections. It is nature's great law of combestowing virtues

that it would be so advantageous say for him to marry had not the melting eyes and winning ways of the poor girl who had snared his Many a girl has wept salt and bitter into her pillow wondering why widower who was courting her couldn't be young and slim and dance the twostep, like some poor dance the twostep, like some poor clerk that it would be a two-by-fourflat fate to marry.

But, considering that one must generally choose between the ornamental and useful, which should one take in a life partner?

should say that a man should always choose his fancy and a woman

A man starts into matrimony with a capital of love that is more apt to diminish than to increase. If a woman hasn't fired his imagination before the wedding day nothing short of a miracle will enable her to start a com-bustion in it afterward. If in the days is breast, to her dying day, no matter what she does, she will never make his pulse beat one throb quicker. Daily observation shows that even men who were wild about women be-

fore they married them calmed down into mighty matter-or-ract uncentimental, unromantic, unattentive husbands soon as the ceremony was over. Therefore, a man does wisely to choose the woman who appeals most strongly to his taste and raises the most commotion his breast, no matter what drawbacks

Women reverse this attitude toward matrimony, and the woman should pick out the man who satisfies her judgment rather than her heart, if she cannot find a man who does both. This is because vomen's affections are as adhesive as a to anything in their immediate vicinity. Even if a woman marries without being much in love, sne will grow to love her husband if he is good to

Besides, other things than love enter into a woman's life. A good home, and On with the New. comfortable income, a settled position in society are not to be despised, and more than these is the freedom of anxiety. The woman who never has to tear her hair about other women, who never has to get up in the night to open the door for a drunken husband, is happily married, no matter whether she's got any romantic illusions about her husband or not.

there is this also to be sidered-that our fancies are exceedingly fragile things and last a very short time at best. Close acquaintance with a charming scapegrace sheers off the grace and leaves only the scrape into which a woman has gotten by marrying him. you will look about you carefully you will see that the women who are trying to reform husbands are not doing much palpitating over it. They are doing it in tears and disgust.

But the good man grows in grace as the years go by, and hence the woman who marries the man of whom her sound common sense approves never regrets it .- Dorothy Dix in New Orleans Piscayune.

#### Teaching Children to Be Truthful.

A child is old enough to be taught the meaning of the term honor as soon as he is old enough to tell a falsehood. And unless he has been badly trained, it will be easy to impress upon his mind

the thought of truth and honor.

Let him see that his honor is in his own keeping as much as his own per-sonality. Mother cannot give him honor, sonanty. Mother cannot give him honor, nor can father take it away. Let him see that he alone is responsible for keeping it untarnished. If, because of any act of his, he can be made to see that has sullied this fair gem, he will feel a far deeper sorrow than any whipping or scolding could bring him

It is far better to put a child on his honor, and create within him a desire to do right because it is right, than it is to compel him by our superior force do as we think he ought to Plants cannot take root, grow and bring forth flowers and fruit unless the roots are given warmth and moisture; neither can a child develop its better nature unless we allow his selfhood to take nourfrom all the helpful influences around him; then, and not until then will the child's tongue keep truthful and onest. Then, and not until then, will hildren realize that in proportion to the way they preserve their honor will they loved and respected.

If a child can be taught so that he vill have the habit of sticking unswervingly to the exact line of truth he has a far better legacy than if a fortune were bequeathed to him.—Ella Bartlett Simmons in the Housekeeper.

If you contemplate a visit this summer, do not swoop down on some tired woman who is always busy and remain with her for weeks at a time. Mothers sets your teeth on edge. On the other hand, the firty and frivolous maiden, who hasn't got one single qualification to recommend her for the job of wife, is a perfect compendium of charms that makes her every man's heart's desire.

To have a ready answer always at the end of the tongue is not given to every one. And the way to do this for several weeks. She will be surprised, but not agreeably so.

Mother as a Chum. I never like the word "chum." but that s the right word for the mother who is companionable with her daughter. The sweetest thing in life is the love of a mother, but how many girls are denied this because of something which keeps them apart from the mother love and confidence. It seems impossible that any woman should not crave the love and affection of a daughter, accepting it the most gracious gift ever bestowed in er life; but there are some mothers really and truly selfish with their daughters, frequently jealous, and ofttimes very indifferent to all their interests. This is surely the irony of fate. Last winter certain young girl left home because she and her mother could not agree. The girl actually had to pay for the fuel burned when she entertained friends in the evening. The mother charged her for washing any clothing, in fact, she met with a boarding house mistress instead of a mother. Girls love to be petted, to have the sympathy of those of broader minds and experience, and they turn as naturally to the mother as a flower does to the warm sunshine. Deny a girl these surroundings and her nature reaches out for them from some other source. The Above all, practice! #### TELEPHONES IN THE WOODS.

Maine Loggers String Wires Through the Virgin Forest.

A traveler in the forests of northern Maine would be surprised to come across telephone wires strung from trunk to

trunk, just out of reach. The manner in which the lepchone is used to help the men who drive the logs along the west branch of the Penobscot is perhaps the greatst feature of the system. The dams have been built not only to hold water against a time of drought

a big jam, the river driver has his work cut out for him.

Then it is that the man at the tele-phone gets busy. Three long whirls of the crank of his little box calls the dam, and he tells the man who answers to close the gate and stop the logs from coming down until the jam is broken out. These orders given, he sets to work to break the jam.
Usually a stick of dynamite placed with accuracy will start the logs and clear the channel, and if one stick is not

enough there is always plenty more. The channel clear, the man telephones the order to the crew at the dam to let Before the telephone came into use these messages were conveyed up the river by relays of men. The men were stationed at frequent intervals along

the bank and the message was shouted from man to man. The telephone lines are being extended every year and it will not be long before telephones are almost as common in the woods as they are in the city. Considering the country through which the men doing the work have to travel the lines are put up in remarkably quick time, for a small crew of men will put

up many miles of wire in a week. Recently the telephone has been called into use to aid the fire wardens in discovering and extinguishing fires in the northern forests. A station has been established on the summit of Squaw mountain, about six miles west of Greenville.

A man stationed at this point can see the country for miles around, and with the aid of powerful field glasses and range finders can discover and locate a fire anywhere within a radius of sixty

#### A SCHOOL OF DUELLING.

Frenchmen Taught How to Behave on the Field of Honor.

Although duelling has long been laughed out of court in this country, our continental friends by no means share our opinion of this method of settling affairs of honor.

Though the French duel is usually car-

ried through without any serious injury to either combatant, it is regarded with grave consideration, and every detail has to be attended to most punctiliously. In order that gentlemen who may be called upon to defend themselves at the point of the pistol may have some training for the ordeal, says the Wide World Magazine, there has been established in

Paris a school of duelling, one prominent member being ex-President Casimir-Perier. This academy is conducted by Dr. de place there by way of practice. In these mimic duels wire masks are worn to protect the face and bullets made of wax are used, so that no injury may be sus-

tained by the combatants. In all other respects, however, the conduct of the affair is carried through as on the field of honor, so that when the time comes-if it ever does come-for the scholars to take part in a serious duel they may acquit themselves with credit to themselves and disaster to their adversary-although this latter point is not of much importance.

## HERON OUSTS TEDDY BEAR.

Southern Women Adopt New Pet Which May Invade the North.

Faithless to the dog and the Teddy bear it is now the fad of many women in the south to go around with tame herons. Wouldn't it be astonishing if the north should take up the heron fad? Herons to the right of 'em; herons to the left of 'em, with women leading the birds by chains or ribbons. The idea pleased the southern girls, who thought it "too perfect for words" to have their pet herons stop in the street and put up their necks for something to eat.

But if heron leading becomes a craze

n northern cities it will raise many a quarrel among husbands and wives, for the heron is a jealous bird and wants all the attention of its pretty owner.

SECRETARY WILSON POINTS OUT FELLOW WORKERS RISK LIFE IN WHAT GOVERNMENT IS DO-ING FOR HIM.

## RESEARCH WORK WIDE. FIRST ATTEMPT FAILS.

Shows How Foes Are Found to Destructive Bugs and Fuel Supply Furnished by Alcohol.

Mr. Wilson's address was comprehensive, dealing with research work of the government, dry land agri- last night. culture, control of animal diseases, the national forests and, in fact, almost every subject kindred to farm special-

Here is what Mr. Wilson has to say on agricultural education:

Many legislators think that money devoted to training farm people is wasted. The federal government has voted lands and money to educate the children of the farmer money to educate the children of the farmer and the mechanic and has endowed institutions to make research. The states have followed the lead of the Congress, and something is being done in each of them, much is being done in some of them, to teach the sciences of agriculture. The movement among those interested is so strong that the old-fashioned educator and strong that the old-fashioned educator and the hostile legislator are getting into the

He then told of the work of the department at Washington, saying in part; The department of agriculture operates where the state or the individual is unable

where the state or the individual is unabla to do the work or is not equipped to do it to fleetually. The states, as a general proposition, are making research along lines peculiar to each.

We have availed ourselves, after laborious exploration by intelligent scientists, of what these peoples in Africa and Asia have done, and introduced their crops into our dry region from Texas to the Dakotas. A wheat imported six years ago, or highly nutritive qualities, gave us over 50,000,000 bushels last year.

Agriculture succeeds permanent, where without legumes. We found new clovers, grasses, and alfalfas on the seventicth parallel north, in Siberia, suitable to our northwest, that will rotate with grain and avoid the necessity of summer fallowing, as is now practiced in that country.

Animal diseases properly come under fed. and avoid the necessity of summer fallowing, as is now practiced in that country.

Animal diseases properly come under federal control, since the eradication of disease in one state is not enough. Tuberculosis is less prevalent here than in any foreign country, but it is more prevalent here than it should be, and the consumers of meat and milk will soon require its eradication. Beyond all peradvanture, ours is the best meat consumed by any people, as no other nation takes the same care we do or goes to as much expense to secure it.

We have gone too fast and too far in denuding our mountains of their trees. Wood is becoming scarcer and dearer every year. As population increases we shall be compelled to use more acreage in its sustentation. The trees will be planted again on the watersheds, and dams will be built to hold surplus water for use in times of drought, as is done in older countries. Your rivers then will be more serviceable in summer and less dangerous in the spring time.

Insect Friends and Foes.

#### Insect Friends and Foes.

We have friends and enemies in the in sect world. Just now two insects—the We have friends and enemies in the insect world. Just now two insects—the

of the parasites.

Ten years ago the United States made 30,000 tons of beet sugar. Last year 483,000 tons were made. The products were worth \$50,000,000. Seed being developed that has but one germ (most beet seeds have more)—seeds that can be planted as corn is planted, cultivated without hand work, topped by machinery, and lifted by machinery. When this point is reached we shall make our own sugar with machinery from the plow to the factory.

## Denatured Alcohol and Nitrogen.

No more coal is being made, our wood fuel

No more coal is being made, our wood fuel is getting scarce, and the supply of mineral oils will some day cease. It is high time we were looking about for sources of light, heat and power. Alcohol meets the requirements, and starchy plants yield alcohol. One of our explorers last year found the Siberians at Tomsk growing a large variety of potato for the alcohol it yields. He brought back half a ton of them, which will be distributed this spring among the experiment stations. The southern cassava, yams and sweet potatoes will yield alcohol, as will the sugar beet. Corncobs give eleven gallons of alcohol to the ton and sweet corn stalks seven.

One of the greatest agricultural questions in this country is the maintenance of the fertility of the soil. One of the questions involved in this subject is the supply of nitrogen. Prophets have told us in past years that it was only a question of time when America would cease to be a grain-producing country on account of the lack of nitrogen. Prophets have told us in past years that it was only a question of time when America would cease to be a grain-producing country on account of the lack of nitrogen. Prophecles have not come true, for the réason that American genius has found a way to meet the emergencies as they arise and will continue to find a way. Our chief source of nitrogen at the present time is from the various chemicals imported from foreign countries. We also gain considerable nitrogen from legumes. As a means of encouraging the production of nitrogen at home the department is putting forth every effort to induce farmers to grow these legumes. In the south, of course, one kind of legume must be grown. In the middle west red clover is a strandard crop. These legumes gather nitrogen from the air, store it up, and give it back to the soil ard crop. These legumes gather nitrogen from the air, store it up, and give it back

Cotton is pre-eminently the money crop of this land. It is the bone and sinew of the south, and of course, means much to the north. Naturally the department has done much work on cotton. With an annual done much work on cotton. With an annual value of over \$600,000,000, the crop is worthy of our most careful investigation.

Millions of dollars have been saved to the cotton planters through the department's work on insects and diseases which affect the cren'. A number of other address follow Secretary Wilson's.

## CRAZY WHEN HE LOOTED.

Alleged Embezzler's Defense Is That He Stole \$100,000 to Corner the Cotton Market.

BIRMINGHAM, Ala., May 1.-The second trial of Alex R. Chisolm, former paying teller of the First National bank of Birmingham, charged with having embezzled \$100,000 of the bank's funds shock, it is alleged, he lost in cotton speculation began in the federal court today. WATER TO BRING LONG IMPRIS-ONED MEN OUT.

Sheet of Fluid Is in the Way, But Later Is Removed by Ten Immense Pumps.

JOHNSTOWN, Pa., May 1.—Alive and tary Wilson was today the guest of the well, after four days of imprisonment in Americus club. He delivered an address, the Berwind White coal mine at Foustwell, cut off from the outside world by a wall of water, seven miners, who had been given up for lost by their relatives, were brought to the surface at 10 o'clock

> The rescuing party which brought the men out waded for half a mile through water which in some places left only a few inches of air space below the roof of the mine. Both rescuers and rescued were chilled to the bone before reaching the surface, but the chances are that none

> will suffer seriously from the experience. There were affecting scenes around the mouth of the mine as the long imprisoned men were brought out. Wives and relatives seized them, and there was great

#### rejoicing in the mining settlement. Second Attempt Succeeds.

The successful attempt at rescue was the second of the day. The first rescue party, which went down in the afternoon, consisted of four men, headed by John Bolya, a brother of Contractor Bolya, one of the seven entombed men. They penetrated several hundred feet into the | @20c mine, but found the water reaching to the roof and were forced to turn back. They went far enough, however, to communicate with the entombed men by means of rapping on the pipes, and on their return reported that the prisoners

were still alive. The ten great pumps, which, since the accident Friday, had been pumping the water out at the rate of 2000 gallons a minute, were pushed to their full capacity, and shortly before 10 o'clock last night had reduced the water sufficiently to leave a little passageway under the roof, and it was decided to make a second

attempt to enter. When the Bolya party returned to the surface the men were almost dead from exhaustion. In making their way into the mine they were forced to bend low, while water reached their chins.

#### In Water for Hours.

For over five hours the men remained in this cramped position, and were almost overcome when obliged to retrace their steps. Bolya, however, made a hereic effort to reach a point beyond the water where he figured the mine roof was A rope was fastened about h higher. body and he quickly rushed through the water. After a minute he was pulled back by his companions, almost dead from suffocation.

While the attempt at rescue was a failure, it was learned that it is only necessary to lower the water a few inches more in order to enable a second rescuing party to reach the unfortunate

Waiting at the mouth of the mine were several physicians, nurses and ministers ready to tender their services when need-An improvised hospital had been prepared at the pit mouth for use in the event the men were injured or too exhausted to be removed in a special train to nospitals in this city, but these were

The hospital physicians said this morning that the men would be able to be about in a few days but they would be weak and unable to resume their regular duties for a week or more.

## Knew Help Was Near.

"We knew the men on the outside were at work pumping out the water in endeavor to release us. We kept a careful watch and could note the water going down inch by inch. There was nothing we could do to help and we all chafed under this. We could hear the tapping on the pipe and knew it meant us to keep up our courage," said

"We always signalled back whenever we heard the tapping. All the men had full dinner buckets when they came into

## ONSLAUGHT ON ALCOHOL.

British Doctors Reply to Recent Medical Declaration in Its Favor.

LONDON, May 1 .- A counterblast to the recent declaration in favor of alcohol by leading physicians is now published by the medical press over the signatures of a dozen physicians, including Sir Frederick Treves, Sir James Barr and Wil liam Ewart. Referring to the recent manifesto which was dealt with in the dispatches to the Sun, the signatories

We gravely dissent from much of its teaching, nor can we accept it as an authoritative statement of recognized medical opinion on the matter.'

After traversing some of the contentions of their colleagues, who advocated alcohol, the signatories further say: "We strongly believe that alcohol is unnecessary as an article of consumption in the case of healthy men and women, in the case of healthy men and women, and that its general use could be discontinued without detriment to the world's welfare. Further, believing that alcoholis one of the most fruitful sources of poverty, disease and crime, we are pleased to add that it is now sparingly employed as a remedy by a majority of medical men."

#### 200 Narrowly Escaped.

When the flames were discovered fully 200 women including the employes were in the place, and at the first cry of fire a panic ensued. A number of women leaped from the windows of the second and third stories to the street below. By far the greater number, however, rushed to the fire escape. This was filled in a few seconds with a struggling mass women, making desperate efforts to climb down. A number of them lost their holds and fell to the street, and

others were pushed off. The flames which started in the base ment and ran up an elevator shaft with terrific speed, cut off egress for a number of women in the front part of the build-ing and about two thirds of these despite

## Women Tump on Each Other.

Miss Rose Willey and Miss Kate O'Rourke, who were in the lunch room were internally injured. They, in common with others made a rush for the rear window, there being only one opening on the alley. Policeman Daniel Kerr put up a short ladder and running up it, seized Miss O'Rourke, and was carrying her down when several other women jumped from the window squarely upon him and Miss O'Rourke. All of them fell to the ground, Miss O'Rourke, under them all. She was badly crushed, and the result of her injuries is uncertain. Miss Willey was among those who jumped and was badly hurt.

## One Opening of Escape.

"We were trapped in the place," said Mrs. Malaney, an employe of the restaurant, "before we knew what was the matter. The girls were waiting on the customers, and I was doing some office work when a young man walked in and said to me, quietly, madam, I believe that a fire is burning below, and you better get your guests out of here as quickly as possible.

"I hurried about as quickly as I could "I hurried about as quickly as I could telling the waitresses and guests to get out quickly. I should think that there were about 200 people in the dining room at the time. The women were frantic trying to find some way of escape but there was only one. This was a single window that opened on a fire escape. Not more than half a dozen had made their way to the fire escape, when the room was filled with smoke. If all of the people got out it is nothing less than

American Buyers Are Pushing Up Prices in Foreign Markets-Scramble for Gems.

NEW YORK, May 1 .- Diamonds are rising rapidly in price, according to statements made by importers returning from Antwerp, Amsterdam and Paris. These men say American buyers are eagerly purchasing all the fine gems at figures higher than ever before known in

the diamond market. If the demand on the part of society women for necklaces, breastpins, earrings and stomachers keeps on growing cus-toms experts say New York during the year to come will import far more than forty million dollars in precious stones. All the newly rich and the men to whom the prosperity wave has brought big salaries are clamoring for diamonds.

#### Blood Gets Sour.

At this time of year, says a wellknown authority, the Kidneys become weak, clogged and inactive, failing to filter out the poisons and acids, which sour the blood, causing not only facial and bodily eruptions, but the worst forms of Rheumatism, Nervous and Stomach troubles, Backache and painful, annoying Urinary afflictions. It is worth any one's time now to get from some good prescription pharmacy the following ingredients: Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces. Mix by shaking well in a bottle and take in teaspoonful doses after your meals and at bedtime.

This simple home-made mixture will force the Kidneys to normal, healthy action, so they will filter and strain all uric acid and poisonous waste matter from the blood, and expel this in the urine, at the same time restoring the "full blood count"-that is, 95 per cent red blood corpuscles-which is absolutely indispensable to perfect health.

A Washington man on a recent visit to a benighted section of a southwestern state was riding along the banks of the river that waters that section, and al-though he had gone some twenty miles or though he had gone some twenty miles or so he had not in all that distance noticed a single fisherman. Meeting a man lounging near the stream, he asked: "Why doesn't some one fish in this river?" "Ain't no fish," was the laconic response of the native. "No fish in such a beautiful river as this!" exclaimed the astonished Washingtonian. "Why not?" The native lazily shifted his position and answered: "Stranger, ef you could git outer this country as easy as a fish can, do you reckon you'd be here?"—Argonaut.

## "Charity Covereth," Etc.

The man who is charitable, or who joins heartily in the steady warfare now waging against poverty, is the man who is good—that is for the moment the decision of modern opinion. He may sacrifice the nobler objects of life to a rushing chase of fortune, may even pursue business methods which have in them an appreciable taint of cruelty, but if he is "benevolent," in the sense of readiness to make large charitable gifts, the world condones his action, or even regards him with admiration.—Spectator.

## A Bas Kilowatts.

By way of illustrating the rapid increase in the wealth of the country the Leavenworth Times announces that the Kansas City-Western Electric railway has 1700 kilowatts, which is exactly 400 kilowatts more than it had when the power house burned. It is these things that cause social unrest. Here is a bloated corporation strutting around with 1700 kilowatts, and thousands of poor people haven't a kilowatt to their name.—Kansas City Star.

## Art of Conversation.

Conversation, as a fine art, is more difficult only in the sense in which life is more difficult, and proportionately more worth having. Its supreme success demands nowadays in the proficient a wider view of things, a more delicate sense of proportion, greater social genius, sympathy and self-restraint than ever.—

In this nineteenth century to keep up with the march of progress every power of woman is strained to its utmost, and the tax upon her physi-

cal system is far greater than ever. In the good old-fashioned days of our grandmothers few drugs were used in medicines. They relied upon roots and herbs to cure weaknesses and disease, and their knowledge of

roots and herbs was far greater than that of women today. It was in this study of roots and herbs that Lydia E. Pinkham, of Lynn, Mass., discovered and gave to the women of the world a remedy more potent and efficacious than any combination of drugs.

#### UNITED WORKMEN.

Millions Paid to Widows and Orphans. Workshop Notes.

The order has now passed the thirtyeighth milestone. On the 27th day of October, 1868, John Jordan Upchurch organized the first lodge of Workmen. This lodge had but fourteen members. but the lesson of protection and co-operation taught by Father Upchurch spread so rapidly that at this date he has a fraternal following of 10,000,000 souls. The vast array of fraternal protective organizations that are now in existence had its beginning in that little lodge of fourteen members. The \$900,000,000 that has been collected in these years and paid to the widows and orphans has changed thousands of stricken homes into contented homes and has helped to educate the children of deceased brothers. These great bodies founded on the principles of charity and protection have done more toward the elimination of poverty and distress than any other human agency in existence. Let us revere the name of our great Brother Upchurch forever and forever .- Ohio Workman.

Every new member adds a brick to the Workmanship fortress that we are building.

A suspended member employed in a powder mill cannot be reinstated in the order while thus employed.

The A. O. U. W. in Nebraska, as is

pointed out by Grand Master Workman Vandyke, has approximately \$200,000 in its reserve fund at the present time. Each lodge needs the best officers that it can get. Lodge management is a business just the same as anything else, and the better the talent the better the work.

During the first ten months of 1906 death claims were paid on 3,311 members, amounting to a grand total of \$5,805,632.34.

During the period Jan. 1 to Oct. 31, 1906, there were 112,020 new beneficial members admitted. There were 34,660 lapses recorded and 3,470 deaths, making a net deduction of 38,130, leaving a net gain for the first ten months of the year 1906 of 78,890 beneficial members.

April 11, 1907.

Notice is hereby given that in compliance with the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of ZILDA SEAVEY timber lands in the 'states of California, Oregon, Nevada. and Washington Territory," as extended to all the public land states by act of August 4, 1892, Oliver Charboneau, of Garden county of Delta, state of Michigan, has this day filed in this office his sworn statement No. 1665, for the purchase of the lot 1 of section No. 4, in township No. 38 north, range No. 18 west, and will offer proof to show that the land sought is more valuable for its timber or stone than for agricultural purposes, and to establish his claim to said land before County Clerk at Escanaba, Michigan, on Wednesday the 26th day of June 1907.

He names as witnesses: Patrick McPhee, John Bonifas, Benjamin Clark, Thomas Valley, of Garden Mich. Any and all persons claiming adversely the

above described lands are requested to file their claims in this office on or before said 26th day of June, 1907.

Is when everyone begins to think of his

plumbing work. I wish to state to my many customers and friends that I am in better shape today to take care of their wants than ever before. All I ask of you is to get my figures before you give your order. I will prove to you that no else can do better by you. Remember there are two kinds, good plumbing and poor plumbing. I do only the good kind.

DANIEL SEAVEY.

Defendant. Suit pending in the Circuit Court for the county of Delta, at Escanaba, on the 13th day of March, A. D. 1907.

In this cause, it appearing from affidavit on file that the defendant, Daniel Seavey, is not a resident of this state but resides at the city of Milwaukee, in the state of Wisconsin, on motion of Gallup & Gallup, complainant's soicitors, it is ordered that defendant, John Seavey, cause his appearance to be entered herein, within four months from the date of this order, and in case of his appearance that he cause his answer to the complainant's bill of complaint to be filed, and a copy thereof to be served on said complainant's solicitors, within fifteen days after service on him of a copy of said bill, and notice of this order; and that in default thereof, said bill be taken as confessed by the said non-resident defendant.

And it is further ordered, that within twenty days the said complainant cause a notice of this order to be published in the Gladstone Delta, a newspaper printed, published and circulating in said county, and that such publication be continued therein at least once in each week, for six weeks in succession, or that she cause a copy of this order to be personally served on said non-resident defendant, at least twenty days before the time above prescribed for his appearance.

A. H. RYALL, Circuit Court Commissioner, GALLUP & GALLUP, Complainant's Solicitors.
