BIRD SUPERSTITIONS.

Queer Beliefs That Were Held by the Ancient Mariners.

Birds as inhabitants of the air were naturally chosen by the ancients as oracles and augurs of future happenings. The sensitiveness to atmospheric changes shown by many birds aided in establishing these notions. The real indications often furnished by sea birds of a coming storm or calm were doubtless magnified by the anxious, superstitious sailor.

The custom of hanging the sea swallow so that the bill may point to the wind arose from the old time custom of suspending the bird by the feet, expecting it would renew its feathers as if alive.

Divination by the flight of birds was ing winds. As they were thought to fly through the air to heaven, they easily became messengers of the will of the gods.

The albatross is believed by Jack tar to sleep on the winds. It was at one time thought that the petrel hatched its eggs under its wings.

The kingfisher was at one time kept in chests to keep away moths. The fishhawk was esteemed a bringer of good luck; it boded good or evil

as its cry was to the right or left.

There was an old superstition that gulls were never seen bleeding. Shooting stars were then supposed to be the half digested food of winter gulls.

CLEOPATRA.

The Story of Her Death From the Bite of an Asp.

It is admitted that Cleopatra killed herself to avoid being exhibited at Rome in the triumph of Octavius, who had made war upon her and Antony because the latter had divorced his (Octavius') sister on the queen's account. But did she die from a snake's bite? It is better to think not. "If her death small viper would rather have been ed herself in the royal ornaments and being found dead without any marks

or suspicion of poison on her body." Death from a serpent's bite could not have been mistaken, and her vanity would not have allowed her to choose one which would have disfigured her in so frightful a manner.

Other poisons were well understood and easy of access, and no boy would July, nineteen hundred seven. ave ventured to carry an asp in a basket of figs, some of which he even offered to the guards as he passed, and even Plutarch shows that the story of the asp was doubtful. Nor is the statue carried in Augustus' triumph, which had an asp upon it, any proof of his belief in it, since the snake was the emblem of Egyptian royalty. The statue (or the crown) of Cleopatra could not have been without one, and this was probably the origin of the whole story.

Deaf Dogs Are Rare.

People have been known to excuse the ground that the dogs might be hard of hearing. This excuse ought not to go. A veterinary surgeon of Cleveland remarked that in his thirty-five years' experience he had never 21-24 heard of a deaf dog. His remark led to inquiries among two or three other veterinaries and not one had ever heard of a dog that couldn't hear. When a watch dog or any other dog doesn't hear a man that is prowling about the house it is because it doesn't want to hear. Horses are frequently treated by veterinaries for deafness. and even cats are hard of hearing occasionally, but deaf dogs seem to be unknown in Cleveland at least.-Cleveland Plain Dealer.

STANDARD TRUST IN GLOOMY TALE

NO CHANCE FOR JUSTICE AND YET COMPANY'S HONEST, SAYS STATEMENT.

JOLT ROOSEVELT AND LANDIS.

One Stirring Strife for Political Purpose and Other Declared Unfair in Trial.

NEW YORK, Aug. 20 .- [Special.]-The Standard Oil company came out with a long statement to its employes and stockholders today relative to the fine of \$29,240,000 imposed by Judge Landis at Chicago recently in the Chicago & Alton cases. While the pamphlet is not addressed to the public it is the evident intention of the company to secure its publicity. It comes out on sent the Cullinan diamond to King Edthe same date as the President's speech at Provincetown, Mass.

The Standard company still pleads its innocence and goes on to declare that nearly impossible to get justice in this country when the administration, chiefly the President, continues in his "persecution," for political reasons, of large corporations. The pamphlet talks about the newspaper editors, who under influence of Washington, help the President wield the hammer. Some of these editors have changed their minds says the statement, because they investigated the Standard company and found it an honest sort of a proposition. The statement gives a number of incidents where the Standard sees the hand of the President trying to influence public opinion and the courts, particularly through the "inaccurate" reports of Herbert Knox Smith.

What motive underlies the campaign of defamation need not here be discussed, but for all, friends and foes, it is reiterated that the Standard Oil company is carrying on a widespread business of great moment to the prosperity of the American people in absolute obedience to the soundest principles of business and to the spirit and letter of the law. Attacks upon it of the kind described are aimed at the nation's in-dustrial and mercantile life," says the

The pamphlet contains a statement from President Hoffett, president of the Standard Oil company of Indiana, and a number of editorial articles favorable to the company, taken from various American newspapers.

Still Pleads Innocence.

The especially noteworthy feature of the pamphlet is its introductory statement which is as follows:
"The directors of the Standard Oil company in printing this pamphlet desire to emphasize for the half million people directly interested in its welfare the assurance of the company's absolute innocence of wrongdoing in any of the prose-

cutions lately instituted against it in the federal courts. Particularly is this so in the present Chicago & Alton railroad case, made notorious by the sensational fine of \$29,240,000 imposed on the Standard Oil company of Indiana.

It should be known that the verdict was obtained by the Samuel Gowners and Frank Morrison. government upon the most hair-splitting technicality, aided by the rigorous exclusion of evidence that would have removed all presumption of guilt.

Raps for Judge Landis.

"If the judgment in question be allowed to stand the company will be forced to pay \$29,000,000—that is, fifty times the value of the oil for every carload carried over the Alton road during two years at an open 6-cent rate-a rate used over three competing railroads from ten to fourteen years. The trial judge refused to allow proof that the G-cent rate had been filed by the Chicago & Eastern Illinois, and was therefore a 'legal rate.' He refused to allow proof that linseed oil, for instance, was carried at 8 cents, and other bulk commodities as low as 5 cents. He insisted that 18

cal pressure from above." No Chance for Justice.

"As proof of the latter it may be noted that in the President's message of May 4, 1906, attack was made on the Standard Oil company for the purpose mitting the duty on denatured alcoholof forcing the passage of the bill a measure in which the company was not interested.

Transvaal Chief Accused of Pushing Plan by Which Party Friends Would Profit Financially.

LONDON, Aug. 20.-The plan of Premier Botha, of the Transvaal, to pre ward meets with much criticism both in England and the Transvaal. The finances of the colony are in bad condition, and many people think that the expense

Moreover, the magnates of the Premier Diamond Mining company haves found the Cullinan diamond to be a white ele phant. There is no market for such huge stones. The Premier people are supporters of Gen. Botha's party, and critics say that if the stone belonged to the De Beers company, which is an op ponent of Gen. Botha, there would have been no thought of presenting the dia-mond to the King, adding that the Botha party want to gain the credit for a pa triotic act while putting money from the treasury in the pockets of their friend at a time when the colony can ill affore such luxuries. France Thoroughly Alarmed. PARIS, Aug. 21.-The Moroccan situation is regarded here as having as-

sumed a distinctly more serious aspect. The ferment in the interior of Morocco, the proclamation of Mulai Matig, the Sultan's brother, as Sultan by a section of the rebels, and the appearance of a new Moorish army before Casa Blanca have created the fear that the whole country will soon be ablaze with fanat-

Gen. Drude, commander of the French forces at Casa Blanca, has now practically asked for reinforcements, pointing out that his men are worn out with be ing constantly under arms and insisting that he is losing the advantage gained by his successes because the small force at his disposal prevents him from following up his victory.

More Troops for Drude.

The government appreciates the justice of the arguments, and although orders to forward additional troops to Morocco had not been issued up to noon today the government expected to decide on this step before night. More than 1000 colonial infantry, cavalry, and troops of other arms, have been mobilized at Oran, and are ready to embark on board transports, and other transports and warships are in readiness at Mediterranean ports to sail immediately for Morocco.

Newspapers for Quick Action.

Public sentiment in France is become ing stronger against the present half way measures, which it is feared will only lead to disaster. The papers insist that the world must support France if it is decided to send a military expedition to Fez for in no other way, newspapers claim, can the existing state of anarchy in Morocco be ended. The government, however, is resisting this pressure, desiring to keep within the bounds of the Algeeiras convention and the reports that negotiations are on o secure an enlargement of the mandate of the powers are denied. Nevertheless, even in official circles it is admitter that something might happen which place an entirely new complexion on the situation and compel France, in the name of the powers, to chastise Mo

NEW YORK, Aug. 21.-The officers and crew of the big trans-Atlantic steamer Kaiser Frederich der Grosse had an exciting few minutes with a stubborn fire which started in the ship's laundry last Monday night, according to a report made upon the arrival of the steamer

here today.

Before the flames were extinguished they destroyed thirty bags of linen and spread to the bakery. The blaze was confined to those two apartments, and the loss was not heavy. At first the passengers were in a panic but officers succeeded in quieting them down when it was found there was no

GRAVE IS OPENED IN OLD PLATT CASE.

Where He Expected Wax Figure.

CHICAGO, Ili., Aug. 21.-James Donovan, an attorney with offices in the city confirm the report of the proclama- Ashland block, who for several years has waged a peculiar battle against Senator Thomas C. Platt, succeeded yesterday in having the grave of La Fora S. Baker in Big Rapids, Mich., opened in order to support his contention that the former Michigan lumberman had not died, but had fied to Europe to avoid responsibility in several financial fail-

ures.

The exhumation proved to the satisfaction of Big Rapids city officials and of Harry H. Wykom, the husband of Baker's only daughter, that the skeleton was are those of the man whose remains are those of the man whose name appeared on the grave stone; but Attorney Donovan continued his asser-tions that a wax image had been buried field in fright into the streets, creating a in the grave. the Baker estate-and, it is hoped by relatives, a final one—was the climax of one of the most unusual series of acts ever accredited to an able business man. He and Baker had been partners man. lumber business at Big Rapids several years before the latter's death. Shortly before that occurrence several ventures in which Senator Platt's name figured had gone to the wall

Donovan contended that Baker's op-ponents had induced him to flee to England under an assumed name, while they forwarded to his house a false corpse. The injury resulting to him, he claimed, came from the entanglements of his af fairs with those of the dead man, which never were straightened out. One feature was the ownership if 33,000 acres of Wisconsin timber land, from which. Donovan asserted, \$3,000,000 worth of lumber had been cut without an account ing to him.

Suit Against Senator Platt.

Among many suits he began in the Chicago courts was one demanding that amount from Senator Platt. Repeated attempts to have this question settled were made, but almost without exception

the courts rejected the cases.

Another effort made by Donovan was to get Baker's divorced wife and his only child, Mrs. H. H. Wykom of Grand Rapids, to co-operate with him in the struggle for the estate. For a time both assisted him, but later Mrs. Wykom refused to recognize his labors and it only after a great hue and cry had been raised by Donovan that she consented. for the purpose of securing peace, to the exhumation of her father's remains. Locally Donovan has been known as an eccentric character. One of his methods of fighting was the circulation of peculiarly jumbled handbills setting forth his theories and contentions. VICTORY FRUITS TOO MEAGER.

Former Senator Chandler, Plaintiff's Counsel, Sees Little Immediate Advantage if Clients Did Win.

CONCORD, N. H., Aug. 21.-[Special.]-Relatives of Mrs. Mary Baker Eddy, the venerable head of the Christian Science church, today withdrew their suit for an accounting of her property. Former Senator Chandler, for the relatives of or "next friends," declared that his clients could not see any immediate advantage by victory and said that he had filed with the clerk of the superior court a petition of dismissal.

Mr. Chandler made this notification to he masters who were appointed by Superior Court Judge Chamberlain to ascertain the competency of Mrs. Eddy to

manage her own affairs. Gen. Streeter, for Mrs. Eddy, •bjected to the dismissal, saying that the fight must go through to determine the wom-an's sanity. He declared that the action of the plaintiffs simply preceded are ac-tion to be brought on the death of Mrs. Eddy, contesting her will and seeking a large share in her property, which is

said to be worth millions.

The masters refused to go further and will report to Judge Chamberlain of the superior court that the plaintiffs have filed their notice of dismissal. Mr. Streeter took an exception to the ruling.

Lawyer Asks Dismissal. This was the second day of the second week of the masters' hearing upon the competency of Mrs. Eddy. Upon the masters taking their seats William E. Chandler, senior counsel for the next

friends, addressed the court, saying:
"May it please the court, it will doubtless be a relief to the masters to be in-formed that the counsel for the 'next friends' have this day filed with the clerk of the court a motion for the dismissal of the pending suit and that they hereby withdraw their appearance before the masters without asking from them any finding upon the question submitted to them by Judge Chamberlain. There are many reasons for this action. BANK FAILS AT PORTLAND, ORE.

Trust and Savings Institution, Patronized by the Poorer Classes-

Blame Cashier. PORTLAND, Ore., Aug. 21.-The Portland Trust and Savings bank of this city whose deposits ten days ago amounted to about \$3,000,000 did not open for business today. A notice posted by order of the board of directors announced the inability of the bank to realize on securities, and another notice stated that the bank was closed by order of the circuit court for Multonomah county, Thomas C. Devlin, formerly county auditor, having been appointed receiver. The bank is capitalized for \$100,000. A statement

issued May 7, shows that its deposits then were \$2,464,420 and its liabilities \$2,638,420. That the directors of the institution, of which W. H. Moore is president and E. F. Lytle vice president, knew of the impending crash several days ago leaked out by an announcement today that a meeting of the bankers of the city had been held last night to consider the situation. The other banks called upon for support did not respond to the appeal. The conference of banks adjourned at

2 o'clock this morning.

In an interview Vice President Lytle placed the responsibility of the failure upon the shoulders of W. Cooper Morris, the cashier. Lytle asserted that without authority of the board of directors Morris bought securities for hundreds of thousands of dollars and sold the securities for large sums, and last Thursday, without authority. Morris took home bonds of a telephone company amounting to \$1,300,000 and went to New York to dispose of them, evidently with the idea of obtaining funds to place the bank on

better financial basis. While Lytle is severe in his condemnation of the business methods of Cashier Morris, friends of Morris, however, say he acted within his rights, and had the bank been allowed to do business for a few more days Morris would have placed it upon its feet. It is known that the bank owned valuable real estate and other securities. The depositors are mainly of the poorer and middle classes.

Ours is not and was not intended to be a pure democracy. It is impracticable that the people should administer the government directly. They govern through representatives. For their protection they have by direct legislation created constitutions fettering the power of their representatives and establishing safeguards by which they are secure in their personal liberty and in

We note with satisfaction the increasing sense of responsibility to the people on the part of those who

represent them. Efforts to dominate legislation for selfish purposes and attempts through the form of popu-

lar election to place in office those who in the guise of executing public trusts serve private interests, are less successful than heretofore. The people have become intolerant of such traitorous representation. And it is entirely within their power to put a stop to it altogether. Political leaders who have performed the function of

clearing-houses for legislation, and who while posing as party workers have served under a retainer of special interests, careless alike of party principles or public justice, are passing from the stage. The people demand leadership, and parties need effective organization to advance their principles.

But the time is rapidly passing when any one can long maintain a position of wide political influence who is under suspicion of maintaining a double allegiance.

GREATEST DISCOVERIES STILL TO COME.

By Justice David Brewer.

Some years ago Lord Kelvin, that master mind of British science, remarked to my uncle, the late Henry Field-I cannot quote his exact words, but the substance of them was this: "Great as have been the discoveries of the past fifty years, those that are coming will make the next half century as far ahead of the last as it was in advance of the previous period. We are on the brink of discoveries greater than have been dreamed of, and of high-

est importance to mankind." I can see the forerunners of some of the marvels that are in store for us. What a weird thing is wireless telegraphy, sending our messages mysteriously over the sea! The airship seems to be a practical possibility of the near future. The telegraph and the telephone already have enabled us to accomplish a valuable saving of time. Think what it means, this one thing of saving time in our human existence. It gives us more opportunity to think, to study, to work, to accumulate wealth, to carry on trade and commerce, and more time also to devote to helping others and promoting peace and happiness in the world.

The merchant of the past was confined principally to his isolated community. The merchant of the future may deal with the whole world, reaching out into every country, buying, selling, trading in faraway lands, carrying on enormous transactions that could not be undertaken but for the inventions of science that save his time at home and bring the other side of the world instantaneously to his door.

We have millionaires to-day and billionaires to-morrow. Perhaps we shall have trillionaires next. Let us personal touch with the life of the poor.

YOUNG MAN'S SALARY NOT MAIN THING.

By John A. Howland. Thousands of young men are starting out in life with the salary magnet the only attraction to them. "A job" that shall pay sufficiently to meet his small necessities and pay for as many of the small luxuries of the time as the young man feels more and more are parcel of his necessities becomes at once the young man's objective aim. I have a business acquaintance who started

in life as a clerk in a general store in a small town. He could have had more money in another store whose specialty was shoddy goods of all kinds. He decided to stay by the better man at the smaller salary, with the result that to-day in his own business, aggregating millions annually, he says that some of the basic principles of his house were found in the methods of that country store where he first sold goods for an honest man,

With the young man at the outset this question of salary seems all important. To the extent that it shall not humble his pride to have to accept so little, this salary has distinct bearing. But as between \$1 and \$2 on the salary roll, many a young man who in the beginning lived well on half as much finds himself in debt with twice the money in his pay envelope. He discovers suddenly that a salary of whatever size is subject to new perspectives.

Considering the young man venturing into business as an individual, training for business, he is fortunate if he shall have some level headed counselor who may help him see the full stature of Opportunity in sharp and lasting contrast to the petty salary of a day.

WORK FOR THE EDUCATED WOMAN.

By Ambassador James Bryce.

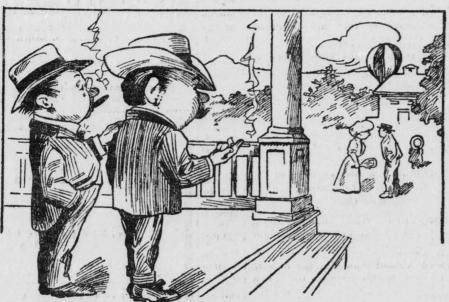

There are two fields of work which the average educated citizen of the male sex does not find time to enter, but into which women have more time to enter. One is the cultivation of a thorough knowledge and a fine taste in literature-the habit of reading that which is not ephemeral, the habit of study, the acquisition of a critical faculty which discovers and enjoys what is of permanent literary value.

The other field includes the study of economic and social phenomena-how to mitigate the contrasts of wealth and poverty; how to adjust more fairly the burden of taxation; how to deal with intemperance, with unhealthy dwellings, with discharged criminals, with vagrants, with neglected children-how in various ways to help those who need

All these questions have a double side. They need to be studied in their principles as a part of economic science. They need even more to be studied in practice by getting into actual touch with the evils inherent in the growth of dense centers of population.

And if the antagonism of rich and poor which exists in many parts of Europe is to be averted from American cities, it must be by keeping the richer people in close

APPLETON, Wis., Aug. 20. - [Special.]-A \$1000 diamond robbery was committed at the Henry Kamp's jewelry store, Appleton, at 6 o'clock last evening, two crooks managing to get away with at from \$150 to \$200 each. Henry Marx was in charge of the store at the time of the theft, but was busy waiting on a cus tomer when the two crooks entered. Aroused at their suspicious actions Marx, after disposing of the customer, walked past the two men. Observing a corner of a red velvet ring t.ay protruding from the pocket of one of the men he grabbed for it, removing about \$1200 worth of diamonds that had been stolen. As soon as the crooks saw they had been discovered they made a dash for the door Marx hastened to the diamond case to see if anything else had been stolen and discovered that the men had taken another tray. The police were promptly notified but had no clue as to the direction the men went after leaving the store Two years ago the Kamp's jewelry store was robbed of \$2000 worth of diamonds.

Alexander Jester Succumbs in Southwest at the Age of 90-Hid Identity for Years.

AURORA, Mo., Aug. 19.-Information has reached this city through Postmaster J. J. Burke of Norman, Ok., of the death of Alexander Jester, alias William A. Hill, aged over 90 years, who was tried at New London, Mo., in Jifly, 1900, for the murder of Gilbert W. Gates, brother of John W. Gates, the New York and Chicago steel king and multimiliance the street of the street of John W. Gates, the New York and Chicago steel king and multimiliance the street of the lionaire, the crime having occurred in February, 1871. The old man died on August 7 at the home of his daughter, Alice Jester, and was buried at Shaw-

nee, Ok.

Jester in the winter of 1871 departed from Wichita, Kan., with a "prairie schooner" in which was a trained buffalo calf, en route to his former home in Indiana. He left on his ranch a family consisting of a wife and two children. On reaching the Missouri state line he came up with Gilbert Gates and togethcame up with Gilbert Gates and together they traveled until reaching a small er they traveled until reaching a small town called Mulberry Grove in Audrain county. At this point the young man mysteriously disappeared and from there on old man Jester was seen with both his own and Gates' outfit. Gates was traveling to his home in St. Charles, Ill., and had written his parents that he was en route. His last letter to his parents was realled only a few hours bewas mailed only a few hours be-

fore his sudden disappearance.

Through Illinois and on into Indiana Jester traveled, exhibiting his buffalo calf, disposing of some of the property that was Gates', and reached Bedford, Ind. After resting a few days he resumed his journey back to Kansas, taking with him his sister and family, they driving the Gates outfit. driving the Gates outfit.

Begin Search for Missing Man.

Azel A. Gates, the father of the boy, became alarmed at his nonarrival, and fearing that some disaster had befallen him, left his home in search of his son. For days he failed to find any trace him, until at last it was discovered that he was traveling with Jester, and on reaching Hannibal, Mo., he found that Jester had both wagons. From that point on to Indiana it was easy to trace the outfit. On arriving at Bedford he found that Jester had returned to Kan-sas, and A. A. Gates reached Wichita before Jester arrived. He had by this time concluded that his boy was dead and that Jester was the murderer.

Jester arrived at his home late in the afternoon, and awaiting him was the sheriff and Azel A. Gates. Jester was immediately put under arrest-even before he was allowed to enter his home. The Gates wagon was with him and so were practically all the trinkets that the boy had taken with him. On the head of one of the children was Gilbert's hat, and even Jester was wearing the Gates The team was taken to vest. Wichita. Jester was given a preliminary hearing, at which he stated that he had purchased all the things of the Gates boy and that Gates had gone to his

Jester was taken to Mexico, Mo., and placed in the Audrain county jail to await trial. A few months later he, with several others, escaped jail. He returned to Wichita and remained only one night, when he left his family forever, never seeing but one of them since. He went to Texas, changed his name to William A. Hill, and took up life anew. He was past 50 years of age. He was married three times while living twenty-five years in Texas. He entered the ministry and was noted for his fervid piety. and it is a matter of record that he dedicated at least one church. But his neighbors were always suspicious of him, and many looked upon him as a crim inal.

Jester's Identity Discovered.

After Jester's divorce from his fourth his identity became known to his sister, Mrs. Street, with whom he traveled from Indiana, and as she was growing old and having quite a sum of money she agreed that if he would not marry again she would purchase a home for both of them and they would spend the remaining days of their lives in comfort and ease. To this plan Jester agreed and the property was purchased. When the deed was made, instead of being made out to the rightful owner, Mrs. Street, Jester had it made out to him-Only a short time elapsed until self. for the fifth time Jester began preparations for entering the matrimonial state, and when the fact became known to Mrs. Street she insisted that their compact be carried out, but this Jester refused. Exasperated at the thought that in her declining years she should be the victim of her brother's duplicity, she ad a tray of mounted diamond rings valued dressed a letter to John W. Gates telling him of the rightful name of the ac cused murderer of his brother and where he lived. This information was the first that the authorities had received of Jes ter since he had escaped from the Mexi

co jail twenty-eight years before. Mr. Gates chartered a special train, took with him the proper officers, and succeeded in placing the old man under arrest. At first he denied his identity, but later admitted that he was Alexan der Jester, and gave a lurid account of his life since his escape from jail. Faces Trial for Ancient Crime.

A change of venue was taken from

Audrain county and the case sent to Ralls, and Jester confined in the jail at New London, where in July, 1900, over twenty-nine years after the crime had been committed, he was brought to trial. John W. Gates secured as counsel to prosecute Jester Gov. Charles P. Johnson of St. Louis, W. S. Forrest of Chicago, and several others. Jester had as counsel P. H. Cullen of Mexico, Mo., J A. Allison of New London, and J. S. Mc-Intyre of St. Louis, and after five weeks of trial was acquitted, the state being unable to prove that Gilbert Gates was dead, the corpus delicti being lacking.

NORWAY NEUTRAL RULERS AGREE.

Chief Topic of Discussion at Recent Meeting of Kaiser and Czar at Swinemunde.

LONDON, Aug. 21.-It was learned in diplomatic circles today that one of the principal questions discussed by Emperor William and Emperor Nicholas during their recent meeting at Swinemunde was the neutrality of Norway. The subject was thoroughly gone over and an agreement was reached under which Germany and Russia undertake to regard Norway as neutral territory. This is in accordance with the desire of Great Britain, which has been heartily supporting Norway's endeavors to secure

guarantees in this direction.

Emperor William also intimated that Germany would not seek to thwart the policy of Russia in carrying out her ourse with France and Great Britain.

DIED.

Mrs. Marie Praiss, grandmother of Mrs. T. D. Springer, of this city, died in Wells, Minn., on Friday, August 9. Mrs. Springer was with her grandmother many weeks before her death, and returned from Wells this week. Mrs. Praiss was aged about 108 years. She was born in Poland, but while the exact year of her birth is not known, it is pretty definitely established by the year of her marriage and circumstances. She distinctly remembered visiting a Napoleonic battle field just after the battle, in 1812, and was then a large girl.

She was married at 27 and had seven children, three coming to America with her forty years ago. She never wore glasses and could thread a needle, and walked erect and never was childish. Her hearing was not in the least impaired. She attended the Catholic church, of which she was a member, up to a year ago.

fect is excellent.

Although usually regarded as a sign of age, gray hair, or canities, as it is called in the language of medicine, is not always so. It may appear early in life, even in the teens. In that case it usually affects young women rather than young men.

A peculiarity about the gray hair of the young is that it is almost always entirely white, and becomes so suddenly. All the hairs are equally affected, and one seldom sees the mixed color, or iron gray, so common in those of middle or advanced age.

Sometimes in the young, even in children, there is one gray lock like an island in the sea of normally colored hair about it. European Bathing Suits.

In Europe there is no lounging on the beach in bathing suits. On this point the foreigner is apt to criticize the American woman, and to point out that when the women in Europe put on bathing suits it is for the purpose of bathing, and not of sitting on the beach, high and dry, out of the reach of even the largest wave. WIRE STRIKERS

PRESIDENT SMALL SAYS UNION WILL HAVE THIS SUM IN TWO MONTHS.

HINTS AT LONG STRUGGLE.

Operators' Chief Does Not Say Where Money Is Coming from in Address at Chicago.

CHICAGO, III., Aug. 17 .- Two million dollars for a strike fund President Sylvester J. Small of the International Telegraphers' union declares that the telegrapers will have that sum in their war chest within the next two months.

It was the first time an officer of the union had expressed an opinion that the struggle would be a protracted one. It indicated that the national leaders appreciate the gravity of the situation, if the rank and file do not, and are making prepations for it.

Mr. Small furthermore observed that talking would not win the strike; that plenty of hard work would be demanded of the officers and members.

When Strikes Are Justified.

In an extended statement issued later Mr. Small enunciated his doctrine of the

right to strike, as follows:
"I do not believe in strikes any more than I do in murder, but I do believe in justice and in the first great law of nature, which is self-preservation, and when justice cannot be had nor self-preservation maintained without, a resort to either or both of these harsh remedies,

then harsh measures will be justified.
"I have a right to kill you, when, and only when, you are about to kill me, in order that I may preserve my own life. This is the law, the external law, the first great principle of human existence. So, too, in times of great commercial or industrial strife when you have combined your power and your wealth to en-stave and to destroy me wholly. I have the right to combine my power and my wealth (which is my labor) to destroy

Companies Make Boast.

The strike today had all the appearances of a waiting game on both sides. The companies claim to be in better shape than on any preceding day, and they certainly were handling more business at their main offices here. The officials of the union asserted, as they have since the commencement of the strike, that the telegraph companies are hope-lessly crippled. The peacemakers were making no progress in any direction.

The general strike order issued yes-

UNSOLVED MYSTERY OF MISSING BOY.

Disappearance of Upper Peninsula Child Recalls Famous Dickinson Case-No Trace of Lost Lad.

LAKE LINDEN, Mich., Aug. 17.-Special. 1-The parents abandoning just a year ago at this time all hope of ever seeing the child again, the mystery of the disappearance of the 3-year-old son of John Karvela, whose home was at the Allouez location in Keweenaw county, is still unsolved. The child vanished as if in thin air. Not a trace of the youngster has ever been found.

Boy's Strange Disappearance.

It was on July 31, 1906, that the boy lisappeared. With others he had start ed off along a road leading through a thick woods, happy in the thought of soon meeting the father, returning from work. Becoming tired, the youngster sat down, while the others went on, admor shing the boy to remain where he was arrival of the party at the spot where t child had been left the youngster was not seen. For days the woods were horoughly searched by large forces o men, but without avail. No clue to the whereabouts of the boy was ever dis covered and the fate of the child doubt will never be satisfactorily explained. The kidnaping theory has greatest number of believers, but there

s no evidence to support it. The unsolved mystery of the fate of his Allouez youngster recalls a similar bsappearance twenty-six years ago on he Menominee iron range—a mystery which has baffled scores of detectives and he police of many cities and to fathom which a fortune has been spent in trac-ng down clues, in following false hopes and in finding stolen children that proved be not the one sought. It was as if e had been swallowed by the earth the Willie Dickinson dropped from sight November 1, 1881. He was the son of the late Capt. William E. Dickinson, superintendent of the Commonwealth Iron

Believe Lad Was Kidnaped.

The boy was 6 years old : tending the Commonwealth villag school, distant about a mile from th Dickinson home. This latter was at th mine, between which and the to self was a lonely stretch or road. When the younger children were dismissed a 3:30 o'clock in the afternoon, young Dickinson started for home. He never reached the mining location. There was a light fall of snow during the evening, and a large force of men from Com and a large force of their from Commonwealth and the adjoining town of Florence searched the woods all that night and for days afterward, but without avail. A band of 100 or more In lians were also employed in the vai earch. There was not a foot of groun or miles around that was not examined while every old test-pit was thoroughly explored, yet no trace of the boy was

There was strong belief almost from the start that the child had been kid naped, and the mother, who now live Milwaukee, has continued steadfast n that theory.

A few months preceding the youngster's disappearance Capt. Dickinson had broken up a disreputable joint located on the company's land at the out-skirts of the village. He had prosecuted the gang and ordered them to leave the town. The men swore vengeance, it is and it has always been the belief of Mrs. Dickinson that her boy was stolen. The child was of too timid a nature to wander away, in fact he was

traid of the woods, she says.
While following one of the hundreds of clues subsequently developed, the mother, not long after the disappearance of her son, learned that a little white boy, who presumably had been kidnaped was in charge of a negro family in Vir ginia. She visited the place as soon as she could get there. The child was gone but she found a pair of trousers that she asserts Willie had worn the day of his disappearance; in fact, she says she recognized a patch that she herself had sewed on the trousers.

Cives to Missing Child.

The negro woman said that the box had been brought there a few weeks previously by a strange man who had paid well for the care of the youngster. and who had suddenly appeared in great hurry and taken the boy away only a day or two before Mrs. Dickin son's arrival. A little son of the negro woman described the Dickinson hom and incidents relating to the village of Commonwealth which he claimed to have learned from his mother's charge

Mrs. Dickinson has met with many adventures during her search of a quarter of a century for her missing son. She has visited nearly every state in the Union, following false clues, and has been systematically defrauded by persons who have worked upon her sympa-thies. She has personally seen dozens of boys who were kidnaped from their homes, and has been instrumental in restoring a number to their parents. But her own son, who if now living would be 32 years of age, has completely dropped

HASTEN WORK ON CANAL FRENCH REPULSE MOORS IN BATTLE.

TRIBESMEN ATTACK TROOPS AND ARE DEFEATED BY ARAB SPAHIS.

MACHINE GUNS EFFECTIVE

Fanatics Are Mowed Down and Only a Few of Soldiery Are Injured, Cne Being Officer.

CASA BLANCA, Morocco, Aug. 18 .-A large force of Moors suddenly descended upon the French camp this morning but were driven off after a sharp conflict. The tribesmen advanced to within 800 yards of the city when Gen. Drude sent against them, under cover of the guns of the warships, a detachment of fifty Algerian spahis (Arab horsemen in the French service). The Moors permitted this small body of cavalry to advance for a half mile unmolested, when they suddenly ambushed them and in a wild charge got right among the spahis.

French Officer Wounded.

The head of one spahis was cut off one swoop of a big Moorish sword. The French officer in command and sev eral of his men were wounded, but the officer rallied his force and slowly retired, fighting, until a large body of spahis from towns succeeded their comrade and routed the Moors.

Fight All Morning.

The fighting covered a front of about sixteen miles, and lasted from 7 to 11 o'clock. The French used field and machine guns with deadly effect in repelling the attack of the Moors and shells from the cruising Gloire also rendered efficient service.

The spahis and sharpshooters each lost one man killed and several wounded, including Capt. Coud, of the spahis. About a dozen horses were killed.

Story of Battle.

The first alarm was sounded when galloping groups of Moors were observed on Gen. Drade's western flank. French sharpshooters and light cavalry were dispatched to the front, followed by a detachment of spalis. At 9 o'clock the engagement began after which several volleys from the French and spahis sup ported by the guns of the cruiser Gloire soon cleared the beach of the enemy. In the meantime the French artillery had been exploding shrapnel among bodies of horsemen further south. Towards 11 o'clock the Moors broke and scattered directions and disappeared. Gen Drude's headquarters the attack was regarded as a reconnissance as the main body of the hostile tribesmen remained behind a ridge.

DYNAMITE SHIP CAUSES TERROR.

Explosive and Fog Combined to Demoralize Shipping Off Philadelphia. Sailor is Panic Stricken.

PHILADELPHIA, Pa., Aug. 19 .--Six hundred tons of dynamite on board the British steamship Westhampton, bound for Colon, and a heavy fog on the Delaware combined to throw sailors on river and bay into a panic early Sunday. It was sighted about 2 o'clock Saturday morning from Reedy island in the Delaware and from that point all following vessels were warned of the floating mine ahead of them.

The minute the news reached a ship its rate of speed would be lowered and the foghorn started going at a lively rate. Many vessels stopped altogether and only started again on receiving an exact description of the ship, its probable speed and location. Shipowners in the city who got wind

of the danger to their vessels kept the wires to Delaware breakwater and Reedy island humming with inquiries as to the whereabouts of their cargoes. Even after the fog questions did not cease and it was not until the merchants had been assured that their ships could not possibly have been blown up that ceased their inquiry. was reported by several boats that the night had been one of great terror for the men. KARLSRUHE, Aug. 29.-Members of the Molitor family have published several letters intended to break down the efforts of Karl Hau's counsel to find evidence exculpating him of the charge of murdering his mother-in-law, Frau Molitor. The letters throw light upon the case as regarded by the defense. Prior to the trial, Dr. Dietz, counsel for the prisoner, wrote to Hau's wife, April 12, saying: "As matters stand today there is no hope of acquittal."

Dr. Dietz added that he hoped that the

opinion of Prof. Aschaeffenburger of Co logne, the expert in mental diseases, would set forth that Hau was responsible for his acts only in a diminished degree and that the jury would render a verdict denying that he committed the murder with premeditation.

by Cuticura. 'My baby was about nine months old when she had rash on her face and ners when she had rash on her face and feet. Her feet seemed to irritate her most, especially nights. They would cause her to be broken in her rest, and sometimes she would cry until she was tixed out. I had heard of so many cares by the Cuticura Remedies that I thought I would give them a trial. The improvement was noticeable in a few hours, and before I had used one box of the Cuticura Ointment her feet were well and have never troubled her since. I also used it to remove what is known as 'cradle cap' from her head, and it worked like a charm, as it cleansed and healed the scalp at the same time. COMMON SENSE

Leads most intelligent people to use only medicines of known composition. Therefore at is that Dr. Pierce's medicines, the makeled of which print every ingredient em upon the bottle wrappers and attest its correctness under oath, are daily growing in favor. The com-position of Dr. Pierce's medicines is open to everybody, Dr. Pierce being desirous of having the search light of investiga-tion turned fully upon his formulæ, being confident that the better the composition

of these medicines is known the more will their great curative merits be recog-nized. Being wholly made of the active medicinal principles extracted from native forest roots, by exact processes original with Dr. Pierce, and without the use of a drop of alcohol, triple-refined and chemically pure glycerine being used instead in extracting and preserving the curative virtues residing in the roots employed, these medicines are entirely free from the objection of doing harm by creating an appetite for either alcoholic beverages or habit - forming drugs. Examine the formula on their bottle wrappers—the same as sworn to by Dr. Pierce, and you will find that his Golden Medical Discovery," the great, blood-purifier, stomach tonic and bowel regulator-the medicine which, while not recommended to cure consumption in its advanced stages (no medicine will do that) yet does cure all those catarrhal condi-

This will be the center of attraction for the Iowa people at their State expo-sition this year, says the Clinton Herald. Formers interested in swine breeding have been urging his improvement a long time. Last year they brought 2700 hogs to the exp sition and many others were sent back for lack of space. This is a larger exhibit of hogs than at all other State fairs together. With these improvements the Iowa State exhibit will be kept not only at the head of the list but far in the lead of all others.

"There was a certain club which did not permit gambling, but four members, at a loss one night for something to do, decided to have a quiet game of bridge-a small game—half a crown a hundred, or something of the sort.
"So they sought out a secluded corner

and fell to. Soon, though, they noticed one of the club waiters hovering around them, casting stern and suspicious glances at their table. He was a veteran waiter, a club landmark, and they grew a little alarmed. He might tell. Finally

they called the man over.
"'Joseph,' said the general, 'what you suspect is true. We are gambling. And we want you to keep mum. After all, Joseph, you have been with the club a good while, and I don't suppose this is the first time you have seen the rules broken.

WHAT'S THE USE?

To Pour in Coffee When It Acts as a Vicious Enemy.

Fasters have gone without food for many days at a time but no one can go without sleep. "For a long time I have not been sleeping well, often lying awake for two or three hours during the night, but now I sleep und every night and wake up refreshed and vig-

orous," says a Calif. woman. "Do you know why? It's because I used to drink coffee, but I finally cut it out and began using Postum. Twice since then I have drank coffee and both times I passed a sieepless night, and so I am doubly convinced coffee caused the trouble and Postum removed it.

"My brother was in the habit of drinking coffee three times a day. He was troubled with sour stomach and I would often notice him getting soda from the can to relieve the distress in his stomach; lately hardly a day passed without a dose of soda for relief.

"Finally he tried a cup of Postum and liked it so well he gave up coffee and since then has been drinking Postum in its place, and says he has not once been troubled with sour stomach." Even after this lady's experience with coffee her brother did not suspect for a time that coffee was causing his sour stomach, but easily proved it. Coffee is not suspected in thousands

For Polite Correspondence

There should be no more slighting of the tone or correctness of a lady's stationery, than of her clothing, hat or shoes.

Styles in Papers Vary:

With the years. What was in style last year seems out of place today. Everybody likes to receive letters on new style grades.

WE HAVE "CORRECT" STATIONERY

-Correct for every use and occasion and correct in price. Boxes and Tablets, many grades.
