### COCKRAN ON TAFT.

There is a remarkable unanimity of opinion of Judge Taft in all parties and in all sections. Men pay tribute to his remarkable ability even where party polities may exert such an influence as to demand the espousing of the rival presidential candidate's cause. As an illustration W. Bourke Cockran in an interview at Boston the other day said:

"Yes, I shall support Bryan; he is the best candidate the Democrats could put up. Taft. however. is the greatest and best qualified nominee ever offered in any republic in the world. He is a greater man than Roosevelt, and when surrounded by the same environments that made Roosevelt great will prove a bigger man. Taft is a wonderful administrator, the greatest the country has ever seen, and is a wonderful worker."

### Greedy.

Two Englishmen on a holiday in France were dining together at a Paris restaurant. Mr. Smith would order and ask for everything he wanted in doubtful French, while Mr. Cross would offer explanations that were in the nature of criticisms. At last Mr. Smith's temper rose to explosive point. "Will you," he said-in English this time-"be so good as not to interfere

with me in the use of my French?" "Very well," retorted Mr. Cross. "I simply wanted to point out that you were asking for a staircase when all you wanted was a spoon!"-London

### Can't Disaffect the Farmers. The failure of Bryan's desperate at-

tempts to curry favor with the farmers is illustrated by the manner in which he was received at Crookston, Minn. According to Congressman Halvor Stevenson the event went off as follows: "Bryan's speech at Crookston was a

great disappointment. He actually lost ground there for Democracy. Thousands of people were there to hear him, and waited till ten o'clock in the evening before he appeared. The address was a narrow appeal to farmers, a harangue, trying to prejudice them against Republicanism. It didn't take at all. Only once was there the slightest symptom of applause. He spoke te a silent, disappointed audience."

### Democratic Inconsistency.

The Democratic leaders have been for years making loud declarations against corporations and trusts and railroads and have, nevertheless, instituted no legislative steps in all this time for the purpose of restraining abuses. They are now indignant that made his fight for lawful business the Republican party, in carrying out the promises of its own platform, is putting into practice the principles which they, with a superb self-complacency, claim are really covered by a Democratic patent .- Hon. Wm. H. Taft, at Greensboro, North Carolina.

Society Is Sound. In spite of the general comfort, there have been made manifest by signs not to be misunderstood, a quickening of the public conscience and a demand for the remedy of abuses, the outgrowth of this prosperity, and for a higher standard of business integrity. Every lover of his country should have a feeling of pride and exaltation in this evidence that our society is still sound at the core.-Hon. Wm. H. Taft, at Columbus,

### ENEMY OF TARIFF.

Plan of Tariff for Revenue Only. (From the Labor World.)

But while Mr. Bryan is gunning for States, once his proposed tariff law should be in force it would fall alike upon all sections of the country, the only differences between one State and all emergencies, he has proved himself another being in the degree of hardship imposed.

We hear of workingmen saying that this time they intend to vote for Mr. Bryan, because for the past ten months

How will the election of Senators by direct vote start the wheels of industry? Or the publication of campaign contributions? Or the further harassment of the railroads? Or the reorganization of the House, so that the Speaker may be powerless? Why open this country now to the markets of the world when we have not suffielent demand to consume what we ourselves manufacture? Under Republican rule we have just had ten years of unparalleled prosperity. Under Democratic administrations we have never had prosperity for any period, long or

### TAFT'S INJUNCTIONS.

I ask that every responsible and fair-minded labor leader, every responsible and fair-minded member of a labor organization. read these (Taft's) injunctions for himself. If he will do so, instead of condemning them he will heartily approve of them and will recognize this further astonishing fact that the principles laid down by Judge Taft in these very injunctions, which laboring people are asked to condemn, are themselves the very principles which are now embodied in the laws or practices of every responsible labor organization. The principles which he therein so wisely and fearlessly laid down serve as a charter of liberty for all of us, for wage workers, for employers, or the general public; for they rest on the principles of fair dealing for all, of even-handed justice for all. They mark the judge who rendered them as standing for the rights of the whole people; as far as daylight is from darkness, so far is such a judge from the time-server, the truckler to the mob, or the cringing tool of great, corrupt and corrupting corporations.-President Roosevelt.

## NEEDED A PANIC TO WIPE OUT ALL SHAKY BANKS

PRESIDENT OF BANKERS' ASSOCIA-TION SAYS BENEFITS FOL-LOW THE STORM.

### TO REFORM CURRENCY SYSTEM

This Work, He Declares, Must Be Done by Experts and Not Theoretical Financiers.

SCORES GUARANTEE OF DEPOSITS.

DENVER, Colo., Sept. 30.-Today the regular business section of the American Bankers' association opened in the city auditorium and the vast hall, which echoed with the cheers of the Democrats when in national convention when they adopted a platform favoring guarantee of bank deposits by national law or if this is impossible the establishment of postal savings banks, witnessed a scene of a body of men, representing the wealth of the nation, repudiating these ideas as dangerous to the prosperity of the country.

The keynote was struck in the speech of Col. J. D. Powers, president of the association, who declared the bank deposit guarantee was a dangerous fallacy.

President Powers devoted practically his entire time to the recent panic and his opposition to the proposition to guarantee bank depositors, which he said would not have been heard of in the present political campaign had there been no financial panic.

Of the panic he said that few financial storms occur without attending benefits, frequently greater than the disaster wrought. The unhealthy conditions that surrounded many banking institutions in New York required just such HOGS-Steady; closed weak; fair to chalce heroic treatment to allay the money-mad fever which had possessed them.

### Revise Currency System

"Now that the panic is behind us," he said, "let us look to the needs of the present. Let us do this by a calm and dispassionate examination into our gen-eral banking and financial policy and especially our currency system.'

He did not believe this could be done through the ordinary channels of mere legislation. It must be the work of experts and not of theoretical financiers. "They should be," he declared, "men who understand the necessity for and importance of ridding the government of the dangerous legal tender greenbacks by their final redemption and retirement; by a sane and safe means of grad-ual change from our bond-secured currency to a system that has proved sound by the experience of other countries."

### Are Sincere in Beliefs.

The president said he was well aware that many good men, at this time, with-out reference to political affiliation or party tie, believe that the guarantee of bank deposits is just and right, but, he said, many men in the early stages of the free silver heresy also believed that cause just.

"But there was soon a great awakening when the fallacy of 13 to 1 became thoroughly exposed, and so it will be with the guarantee of bank deposits," he

### SON IS DISINHERITED.

Leslie Carter in Will Says No Aid for Young Man Under Influence of His Mother.

CHICAGO, Ill., Sept. 30.—"So long as he remains under his mother's influence I do not desire either directly or indirectly to aid him," Leslie Carter declared in his will, referring to his only son, Leslie Dudley Carter.

The will, which was executed February 20, 1904, was gled in the probate court yesterday. The estate, which is valued at \$75,000, is bequeathed in equal shares to the testator's brother, Ernest Carter of New York, and his sister. Helen L. Carter.

The clause referring to the disinheritance of young Carter, is:
"I leave nothing to my son, Leslie
Dudley Carter, for the reason that he
has left the home which I maintained for him without cause or justification. This, I believe, can only result to his permanent injury, if not his ruin. long as he remains under his mother's influence I do not desire either directly

or indirectly to aid him.
"If he comes to understand the serious nature of his error and separates him-self from his mother I do not object to my said brother and sister, or either of them, acting freely in his or her own judgment, treating him as I would gladhave done if he had been loval and In considering this matter I desire that all feeling of resentfor any ingratitude toward me shall be forgotten and disregarded, but leave my brother and my sister, each for themselves, free to act in the event of my son separating himself entirely from the influence and association of his mother, as they, or either of them, may think best."

The charge against the governor was that he at-tempted to bribe certain members of the

### Seagulls of Auchmithie.

In the fishing village of Auchmithie you may frequently witness seagulls fly-ing into the houses of the fishermen and

of these sea birds was in the habit of staying in a fisherman's house all the year round except at the breeding season, when it left. About a fortnight ago, while the gull was away, the fisherman removed his home some three and half miles from the former place. The isherman never expected to see his old riend the gull again. It was therefore, nuch to his astonishment that he beneld on a recent Sunday the sea bird come walking into his new residence with stately steps to resume his old fa-miliarities and household ways.—Lon-don Spectator.

## WORLD'S FIGHT AGAINST WHITE PLAGUE OPENS

REMARKABLE EDUCATION CAM-PAIGNS FORMALLY INAUGURAT-ED IN WASHINGTON.

### FAMOUS SCIENTISTS ATTEND.

Secretary Cortelyou Welcomes Delegates to Sixth Triennial International Tuberculosis Congress.

SECTION MEETINGS ARE BEGUN.

WASHINGTON, D. C., Sept. 28.-A remarkable educational campaign formally was inaugurated here today. It was humanity's crusade against a most deadly foe-the white plague.

The occasion was the official opening of the Sixth Triennial International Congress on Tuberculosis at the new national museum. A more distinguished Paris on the night of January 14, 1858, gathering, perhaps, has never before met in the national capital. Scientists of international fame, members of the diplomatic corps, philanthropists and representatives of practically every civilized nation were present.

The first day of the congress was marked by simple but unique cere-monies. Preliminary to the formal openmonies. Preliminary to the formal open-ing, the diplomatic corps, the spokesmen of the various countries, the of-ficers of the congress, the honorary presidents and the section presidents met in the office of Sir Henry G. Beyer, chairman of the committee on exhibits in the museum building shortly before 11 o'clock and accompanied by Drs. Beyer and John S. Fulton, the secretary general, proceeded to the stage in the great auditorium.

### Cortelyou Extends Welcome.

There Secretary of the Treasury Cortelyou, the presiding officer and as the personal representative of the President of the United States, extended the official welcome on behalf of the government of the United States. A welcome to the national capital was then extended by District Commissioner McFarland, followed by high responses by the repfollowed by brief responses by the representatives of about thirty countries.

The assembly hall was a prism of colors, the flags of every nation being dis The national anthems of this and other countries were played by marine band. The greater part of the day's session was devoted to responses by foreign delegates.

### Will Assemble October 3.

At the conclusion of this feature, Sec retary Cortelyou closed the meeting, the delegates dispersed and will not assemble in general session again until Saturday morning, October 3.

## INDIANA HAS SCANDAL.

Legislator Signs Affidavit That Bribe Was Offered to Vote for County Option Bill.

INDIANAPOLIS, Ind., Sept. 28 .-Kalb county of the lower House of the Indiana Legislature, now in special session, signed an affidavit today in support of a charge made by him Saturday on floor of the House, when he voted against the county option bill, that Gov. J. Frank Banly, had offered him a position paying \$2000 per year if he would vote for the bill.

The affidavit explains the alleged trans action in detail, naming Senator Wick wire, a Republican, in connection wi the charge and setting forth the alleged conversation with the governor. Senator Wickwire has denied the charge.

Gov. Hanley has declined to make a statement until after he has seen the affidavit which has been placed in the hands of Stokes Jackson, chairman of the state Democratic committee. county option bill was passed by the House Saturday and was signed by the governor.

### SEVEN ARE DROWNED.

Chicago Launch Strikes Bridge and Owner Is Taken Into Custody of the Police.

CHICAGO, Ill., Sept. 28.-Although seven men are believed to have been drowned in the capsizing of a pleasure launch last night in a collision with the Nickel Plate railway bridge across the Calumet river the police are still unable to determine the identity of the victims and no bodies have been recovered. The sole survivor of the launch party, Elmer Westergren, owner of the craft, is under arrest in the South Chicago police station and has not yet given a co-herent account of the circumstances of

the accident.

The gasoline launch containing Wes tergren and seven friends whom he had invited to take a trip on the lake with him was going up the Calumet. A high wind was blowing and darkness added to the danger of the swift current at the

bridge piers. Westergren swam to shore, but trace of his companions was found. He refused to tell the police the names of his companions and was taken into cus-

## CARDINAL MAY RETIRE.

Avanti Says Merry del Val, Papal Secretary of State, Is About to Take This Step.

ROME, Sept. 29 .- According to the Avanti, Cardinal Merry del Val, the Papal secretary of state, is about to retire. This step, it is asserted, is an outcome of representations made to the Vatican by American and English prelates, but particularly Cardinal Gibbons and Archbishop Ireland, who objected to the secretary's severe measures agai modernism. According to the Avan Cardinal Vannutelli received these complaints in London at the time of Eucharistic congress, and trag-mitted them to the Pope. In the event of Merry del Val's retirement, he probably will be succeeded by Cardinal Rampolla, who formerly held this office. Rampolla's return to power would mean a policy of dignified conciliation with regard to France and an attitude of greater reserve toward Italy.

Station Hand Receives Shock on Learning Identity of Stranger Whom He "Sassed."

ST. PAUL, Minn., Sept. 29 .- There is a sadder but wiser employe in the St. Paul Union station-that is, he is there if James J. Hill is forgiving. The employe was on duty when the Taft party came into the station, looking for the special train which had not yet been brought under the shed. An aged, gray whiskered man stepped from the group and approached the station employe. "Where's that Taft special train?" he demanded in an authoritative tone.

"Who are you?" was the rejoinder. "I am Mr. Hill." "Well, what business is it of yours where the train is?" asked the station employe who still did not recognize the questioner.

"I am James J. Hill," said the princi-pal owner of the road and director of its destinies; "where's that special--?" but the station agent had "tumbled." He

### CAN'T ATTEND WEDDING

Matron of Honor to Be, While Cleaning Jewelry in Preparation for Milwaukee Nuptials, Seriously Burned.

CHICAGO, Ill., Sept. 29.-[Special.] -Friends and relatives of Mrs. John Refakes, wife of a wealthy South Water street merchant, including a bride whose wedding she was to attend, may be called upon to contribute skin to be grafted onto her body, as she was seriously burned in her home, 141 Howe street. Mrs. Refakes is now under the care of physicians and a consultation will determine whether the grafting process will be necessary.

Mrs. Refakes was preparing for a

journey to Milwaukee, where she was to be matron of honor at the wedding of Peter S. Lambros, editor of the Chi-cago Greek Star. Her maids had been cleaning the jewelry which she intended to wear at the wedding, and the cleaning material, sawdust and alcohol, had been carelessly placed on the gas stove. Mrs. Refakes lighted a burner, which caught the alcohol vapor and in a mo-ment Mrs. Refake's clothing was in a blaze. Her husband rushed to her assistance, smothering the flames.

## SECONDS SHAKE HANDS

KERN AND SHERMAN MEET IN HO-TEL LOBBY IN CHICAGO.

Democratic and Republican Vice Presidential Nominees Talk of Change in the Weather.

CHICAGO, III., Sept. 29 .- Accidentally, but as a fitting preface to the scheduled meeting of Mr. Bryan and Mr. Taft at a banquet here October 7, John W. Kern, Democratic candidate for vice president and James S. Sherman, Repub-It an candidate, met today.

Mr. Kern in a dark business suit and the latest thing in green fedoras, was standing in the lobby of the Auditorium Annex, when a by-stander rushed up and asked to shake hands with "the next vice president."

"Certainly, with pleasure," said Mr. Kern. "But to make sure you would better shake hands with that man over there-that one with the side whiskers. That is Mr. Sherman."

The stranger did as suggested, and then Mr. Sherman and Mr. Kern began moving toward each other and presently the long sinewy hand of the second man on the Democratic ticket was grasped in the plump one of his Republican opponent. They smiled genially, exchanging felicitations on the drop in the temperature and other commonplaces, and then departed to catch trains.

### FIRM DEFENDED OIL COMPANY. Judge Nagel Admits Connection with the

Waters-Pierce Case. CHICAGO, III., Sept. 29.-Judge Charles Nagel of St. Louis, who, in the absence of Chairman Hitchcock is in charge of Republican national headquarters, today gave out a statement admitting that the law firm of which he is a member is acting in a professional capacity for the Waters-Pierce Oil company. Judge Nagel's statement was called forth by the statement made by Judge Henry S. Priest of St. Louis, a Democrat, who was referred to by President Roosevelt in a letter to Mr. Bryan as a trust attorney supporting Mr. Bryan. Mr. Priest admitted that he had been retained in a legal capacity by the oil company and stated that Judge Nagel, Remarkly of the state of the sta publican national committeeman from Missouri, was similarly retained.

NEW YORK, Sept. 26.—The Times prints a letter from S. S. Hastings, executor of the estate of Grover Cleveland, in which the writer questions the authenticity of a political article purporting to have been prepared and signed by the former President and published by The Times after his death. The article, which The Times explains it had purchased of a magazine writer, made Mr. Cleveland compare Mr. Taft and Mr. Bryan as presidential candidates to the disadvantage of the latter. The publica-tion of the article caused wide comment and not a little discussion as to its authenticity. Mrs. Cleveland at the time was quoted as saying, "I do not believe it is genuine."

Battle in Submarine Compartment a Desperate One and Man's Victory Is Nearly Fatal.

SAN FRANCISCO, Cal., Sept. 28 .-Wrapped in the tentacles of a giant devil ish, Martin Lund, a diver employed by he Coast Wrecking company, fought for ais life, in the hold of the wrecked steamer Pemona, which lies in thirty feet of water, in Fort Ross cove, off the Marin ounty coast. Lund arrived in this city vesterday after an experience which comes to few men and will enjoy a vaation before again donning diver's dress.

Monster in Ship's Hold. The devil fish had evidently entered he vessel's hold during the night and Lund was at work some time before he ecame aware of its presence. A giant tentacle, four inches in diameter, first gripped one leg. Before Lund could realize what had happened another encircles his thigh. The diver began to hop frantically at the rubber-like bonds and at the same time signalled to the barge above that he wished to ascend.

Deadly Combat Ensues. Unable to free himself in time, two more tentacles squirmed out of the darkness and one twined about his neck. The efforts of the men on the surface to com-ply with his signal threatened to pull his helmet off and he was forced to signal them to desist. With only his left arm free, he hacked at the tentacles until they were partially crippled, but he was being drawn toward the deadly beak when he saw the outline of the devil fish's body. Plunging suddenly toward it, he drove the knife with all his force into the head, repeating the blow until he had slashed it into sections. In its death throes, the octupus tightened its tentacles until the diver was almost crushed in its embrace. Lund then cut himself free and was brought to the surface in a fainting condition.

Place Fish on Exhibition. Another diver brought some of the severed tentacles to the surface and it is hoped to raise the body and bring it to this city for exhibition.

### Right Way for Roads to Run.

It has now been discovered that if we want to be happy and healthy we must live in roads which run from north to south. Furthermore, it is affirmed that

those who live in roads which run from east to west are invariably found to be depressed and drooping, like flowers which are not doing well. This is a fact which we can each put to the test by noticing whether those of our friends who live between these two points of the compass are less cheery than those who live between north and south. Without doubt there is something in the heory, which amounts to this, that the roads running north to south get all the morning sunshine and best light, and in the morning human beings, like plants, require these, or their tempers, health and spirits are depressed.—Ladies' Pic-

Mr. Taft has been beaming with good nature all day and does not appear a bit approach by the Foraker attack. When annoyed by the Foraker attack. When the facts are explained, it is promised Foraker's attempt to link Taft with the trusts because of his association with Lewis and Richardson of Toledo will fail. Foraker was not the guest of Lewis on the trip from Hot Springs, Va.. to Middle Bass island. He was the guest of the Middle Bass club, of gene V. Debs, Socialist candidate for which Lewis is the president. The trip was made in a private car for which Mr. Taft paid the regulation price. Richardson was unknown to Taft until the night the candidate went aboard Richardson's yacht for a run up the lake from Toledo to the island. As a mem-ber of the club Richardson votunteered to take Mr. Taft on the trip. Mr. Taft's statement will deal with the specific cases raised by Senator Foraker and will be a sweeping denial and explanation of every charge.

### HASKELL BACK TO GUTHRIE.

Former Democratic Treasurer Quick to Leave Chicago.

CHICAGO, Ill., Sept. 26.—C. N. Haskell. to all intents and purposes no longer treasurer of the Democratic campaign fund, today is on his way back to Guth-

rle, Okla., after a forty-five minute conversation with W. J. Bryan.

At his desk in Democratic headquarters sits J. B. Doolin, the assistant treasurer, on whom the routine business of the office will fall until a successor to Haskell is appointed.

Mr. Haskell, still treasurer in name though not in fact, went to the train alone. His hurried departure, he said, was due to the necessity of his presence at the state capital on Monday, when the state tax board meets. Asked if he would prosecute those who had made charges against him, he wrote in an-

Haskell of the Democratic national committee of the Democratic national committee who resigned at a nearly hour today in Chicago, probably will not be made by National Chairman Mack for several days. The names of Col. Moses C. Wetmore of St. Louis, chairman of the finance committee; Mayor J. N. Adam of Buffalo, and E. H. Goltra of St. Louis, are under consideration of the national chairman for the treasureship. Mr. Mack said today that he had received Mack said today that he had received a telegram from Chicago that a letter containing Haskell's resignation was on the way, and added that the resignation

would be accepted when received. HITCHCOCK OBEYED THE LAW. Secretary of Interior Explains Pipe Line

Leases. WASHINGTON, D. C., Sept. 26.-Secretary of the Interior Garfield today made a statement concerning relations of former Secretary Hitchcock with the issue of leases authorizing the Prairie Oil and Gas company to lay pipe lines through Indian lands in Oklahoma. The records of his department, he declared, show very clearly that Secretary Hitch-cock simply complied with an act of Congress authorizing the construction of pipe lines and that nowhere, clared, is there any record or other evidence that the President at any time either overruled Mr. Hitchcock or was at variance with him in the course he pursued in the issuance of these permits.

BRYAN WORKING ON REPLY.

Is Working on His Answer to Roosevelt Letter.

HARVARD JUNCTION, Ill., Sept. 26.—The actual preparation of his reply to the letter of President Roosevelt regarding the charges against Gov. Haskell was begun by William J. Bryan today on the journey from Chicago to Madison, Wis. As yet Mr. Bryan is unable to state when it will be completed. He positively refused to discuss the Haskell case.

Chief Statistician of Census Bureau Writes on "The Assets of the United States."

The nation's wealth is not in the bands of a few, according to L. G. Powers, chief statistician of the census bureau at Washington.

Writing on "The Assets of the United States" in the September number of the American Journal of Sociology, issued recently from the University of Chicago press, Mr. Powers has the following to say of the concentration of wealth in America:

Here is a positive declaration by William H. Taft which should reassure the friends of President Roosevelt:

"If elected I propose to devote all the ability that is in me to the constructive work of suggesting to Congress the means by which the Roosevelt policies shall be clinched."

THE STATE TICKET.

On Tuesday the state convention at Detroit nominated the following ticket. Justice of the supreme court, Flavius L. Brooke, of Detroit; Secretary of state, Fred C. Martindale, of Detroit; State treasurer, Albert E. Sleeper, of Lexington: Attorney General, John E. Bird, of Adrian; . Auditor General, Oramel B. Fuller, of Ford River; Land Commissioner, Huntley Russell, of Grand Rapids; Superintendent of public instruction, Luther L. Wright, of Ironwood; State board education, W. K. McKeone, of Albion.

The contest of most interest to Delta county was that for auditor general. For this office there were three candidates, Nate Simpson, Puss Palmer and our own O. B. Fuller. The first ballot was: Fuller, 287; Palmer, 306; Simpson, 321. Second ballot: Fuller, 318; Palmer, 296; Simpson, 300. On the third ballot Fuller got considerably more than the other two combined, Calhoun, Genesee, Ingham, Isabella, Jackson, Kent, St. Clair and Washtenaw being some of the counties that swung to him on the third ballot. Before the result of this ballot was announced one of Palmer's managers moved that Fuller be declared the unanimous choice for probably a little more delighted at landing Fuller than any of the others. The Wayne delegation of 129 plumped for Fuller on all three ballots. There were Boxer, Senator Johnny MacKay, but by applying the unit rule, the Bradleyites, Boxer and all, were made to vote for the Warner candidate.

### -0-1-0-Trained Philanthropy.

Itself can ponder.

Not long ago the hospitals were beback. The graduate nurse is too plentiful, the probationer is scarce, accordingly, and the fad is past. Library work, similarly overcrowded, is similarly passing through a dull season in consequence. But a novel field is opening now to the girls who, ten years ago, to his satisfaction. would have been studying for library work or to be trained nurses—a field more wide and, beyond question, more interesting than either—the great field of trained philanthropy.

There was a time when anybody could be turned loose to visit the poor. But now only a really desirable district visitor is encouraged to do it, and actual results, either in improvement of conditions or research work, are expected. There was a time, also, when a gentlewoman who had seen better days was encouraged to apply for the position of matron in the nearest charitable institution. Today matrons and even assistants are trained in schools of philanthropy. The social specialist has, so to speak, supplanted the general practitioner. sociology is the study of the day, its service demands many young, energetic, and trained workers, who must be cated along the special lines which they

intend to follow Here are several advertisements from one column in a periodical devoted to charities: "Wanted—Woman to teach intermediate work and take charge of the chorus singing in an institution in the west. One who is a good disciplinarian needed." "Wanted—Woman as a house director in a Y. W. C. A. home in a medium-sized city." "Wanted—Woman to demonstrate the value of organized charity in a city of 20.000, where the funds for the support of the society are funds for the support of the society are already available." These advertisements do not need to add, "Only trained workers need apply." That is quite evident, even without the emphasis of the advertisement of the School of Philanthropy and its special eight-months-long courses, in the next column.

The new field is not yet filled, and offers a good opportunity for the women quick enough to take it. It remains to be seen what its possibilities are.-Harper's Bazar.

### -0-100-A Noble Work for Women.

of the last national encampments of the Grand Army of the Republic has been sounded in the report of W. M. Scott, womanliness and good breeding that it junior vice commander-in-chief. Who, he can do this for any girl. We ofttimes asks, will decorate the graves of the veterans of the Civil war when they are gone? His answer is as natural as his question. He turns, as men do everywhere when there is noble, patriotic home work to be done, to the women. But he does not look alone to the women identified with the auxiliary organizations of the Grand Army of the Republic: his appeal is to all women of the landto the patriotic women of the south, the east, the west and the north.

He hopes that a movement may be started prior to the passing of the Grand Army that will assure the veterans of the conscientious performance after they are gone of the pleasant duty that has for more than forty years been an annual charge upon their organization. The decoration of the graves of the men who fought in the Civil war, whether they fought under the banner of the south or under the banner of the north, ought to be a matter of national concern. And from none may we expect greater fidelity to the memory of the valiant warriors than from the women, once they understand that the bringing of this yearly tribute to the nation's honored dead which make for national integrity and honor. This which the old soldier now asks of woman is not new to her; it is merely the public exemplification of the principles she has always taught. It will be a patriotic duty and it will be

sacredly performed in loving kindness. Through the women of the country and through them only, as the junior vice commander-in-chief of the Grand Army doubtless knows, can come realization of his laudable wish for "a national decoration day, sacred not only to a glorious dead, but as well to a purified, uplifted people."-Woman's National Daily.

### -0:0-More Masculine Hysteria in

Regard to the Education of Women. Another man, this time, President Stanley Hall of Clark university, has broken out in loud lamentation over the training given in women's colleges, which, he avers, tends to belittle matrimony and exalt spinsterhood in the eyes of the students. As Dr. Hall is a pessimistic person who aver green as a few students. mistic person who even goes so far as to groan because the flogging of children has gone largely out of fashion, the world is not likely to take this statement of his in regard to women's colleges very certainly not to the extent of either withdrawing their daughters from the home shall be emphasized as the only desirable career. That women will defer and decline marriage altogether in everncreasing numbers seems more than likely, since matrimony, both as a method of support and as a means for living a happy, worthy life, has now many rival careers to compete with. It is also inevitable that the number of these alluring opportunities outside of marriage for satisfying life will increase, so that if Dr. Hall and other non-progressive persons have tears to shed, they might as well do their wailing now. Surely statistics show that the world is not suffering from too few marriages. The "bitter cry of the children," which humanitarians are imploring the world to hear and to heed, cannot be charged to spinsterhood teachings. Dr. Hall would better moderning himself, before heart as the satisfactory of the children in the satisfactory of the s ize himself before he sets up as an or-

### -0:0-Some Hints for the Sleepless.

Many find themselves unable to sleep until the whole household is accounted for and the house locked for the night, until certain news is received, and the like. The same tendency postpones sleep till all affairs are straightened out in the sieged by girls who desired to learn mind, as well as in reality. A little nursing. Now the pendulum has swung reflection shows how indefinite must be the postponement of sleep under such conditions.

No training is more important for the victim of compulsive tendencies than the practice of trusting something to luck and to the morrow, and reconciling himself to the fact that at no time, in this world, will all things be finally adjusted

Next comes the insistent desire sleep in a certain bed, with a certain de-gree of light or darkness, heat or cold, air or absence of air. This is in line with the desire to eat certain foods only, at a certain table and at a certain time. ### -0:0-Early Marriages.

Taking our countrywomen in general, their attitude toward marriage has somewhat changed in recent years. No precise date for their modification can be fixed. It has come about naturally. Suppose you talk with that delightful wom Judge Blank's wife, or with Mme. P., who has at her finger tips the gene-alogy of the township. These ladies, both over 65, will confirm my statement. Then, too, glance at English literature. There are always books to be read that show very plainly what the current of opinion is in a particular period. For example, in "Sense and Sensibility" poor little Marianne, who has had a disappoinment in love is at 18 a blighted being, who fancies that her happiness is forever gone and her future prospects completely destroyed. In "Martin Chuzzlewit," that utterly abhorrent brute. ly tribute to the nation's honored dead is their particular heritage. It is in the home that the first seeds of patriotism are sown. Mrs. Oliphant's girls always marry young, and the heroines of romance, in poetry and the drama, as well as in novels, are almost without exception in the heyday of their first bloom.

I think it safe to say broadly that in the Colonial period and the earlier years of the republic young women were mar-ried quite usually between their sixteenth and eighteenth birthdays. mother of one of my schoolmates, a woman of remarkable beauty and dignity, who lived to nearly fourscore, was married just before she was 15 to a husband not 20. A Somewhat Different Fish Story from Northern Indiana. Miss Marie A. Gross, daughter of Mr.

She was a guest at the Hanly cottage. at Pottawatomie point, on the Wabasa river east of town, and with some other girls attired in bathing suits rowed to the middle of the river to bathe. A friend suggested that she remove the diamond ring which she wore, stating that it might slip off in the water. ### CONCRETE JACKETS ON LEVEES. New Method of River Protection Promises to Be Successful.

A new use for concrete is in the protection of levees on the lower Mississippi. The usual way of protecting these levees from damage by wave wash is by a wooden revetment, consisting of planks placed vertically at the base or

toe of the riverward slope of the levee.
They are fastened firmly between two rails near their top and to one near their bottom. This makes a sort of tight board fence from 6 to 9 feet high. It is braced by stringers which are an-

Record, it was decided to try a concrete jacket extending from near the top of the levee to the toe of the slope and thence vertically 2 feet into the berme. The curbing at the toe of the slope was to prevent any wash taking place which would undermine the revetment, and also to prevent burrowing animals from making holes through the base of the

The concrete consisted of one part of cement to five parts of sand and eight parts of gravel and was placed 4 inches thick. A reinforcement of wire fabric was used for the purpose of holding the concrete together in the event that the earthen embankment would shrink away from the revetment and also to serve as a barrier to drift logs and timber that would be likely to wear down the concrete surface in places by pounding against it. After this spring's high water had been against the concrete jacket forty days no weakness or defect

Baron Edward Rothschild tells the following good story on himself: He happened to stop at a new hotel in Genwhere he was not personally known. When asked to register, he explained to the hotel keeper that he preferred not to be known, since the publication of his name would cause him to be inundated with begging letters and foolish business proposals. ### A Happy Friendship.

When soap got in my eye.

Can you imagine a time when "Alice in Wonderland" had not been heard of? When no one knew the story of the White Rabbit and the Cheshire Cat, of the March Hare and the Mad Tea Party? When "You are old, Father William," and "How doth the little busy bee' read only one way, and when there was no Mock Turtle's story, no Lobster Quadrille, and the Red Queen and the Duchess and Tweedledum and Tweedledee and not yet been made to live for the pleasure of children, large and small

I fancy that every one who loves the Alice books must pity those unfortunate children who lived before they were written, and who thus missed so much that makes the reading hours of child-

hood bright today. In the great quadrangle or court of Christ Church college, in Oxford, England, many a stirring event has taken place, and many a distinguished man has lived and died. Of all these, no Wonderland," and no person of greater disturbed during their breeding season. interest than its author the Rev Charles Dodgson, whom we know better under his pen-name, "Lewis Carroll." In this bell named Great Tom, which hangs in the Gateway tower, lived the real Alice, a sweet, merry little Oxford girl, one of Lewis Carroll's earliest and best child

friends. Nothing in the dignified appearance of the quadrangle suggests the grotesque creations and the merry fancies of these wonderful nonsense books. All doorways girl promptly gave up her lover to go open into homes of grave professors and back to teaching school to help support students. In the northwest angle the author of Alice found his home in 1862, a few years after he had graduated from Christ church, and had come to be a lecturer on mathematics in the college.

He seems to have been a very quiet orderly, reserved young man, fond of long walks off in the country by himself; fond of books and study; shy and retiring with grown people, except those that he knew very well; but happy and free and merry with all children, whom he tenderly loved He was the oldest in a big family of eleven children of whom he was very fond as they were of him. He made friends with children as long as he lived, and was never too tired or too busy to entertain them.

A little Oxford girl-but she is now a lady, and you can see the roof of her beautiful home in the quadrangle-who was one of Lewis Carroll's best friends, and whom he called "Dear Bee," says: fully arranged around him on the table; and the most cheerful of smiles would welcome you in for a chat as long as

you liked to stay." I suppose that no children ever had a more delightful playfellow than did these little friends. A story is told of a famous general who went to call at a house in the Quad and was ushered into a room where no one seemed to be present, but a great commotion was going on under the table. The general, who loved a romp with his own children, got on all fours and rushed under the table, where he found to his great surprise Rev. Charles Dodgson surrounded by the

children of the family. But of all the little friends whom Lewis Carroll loved, none were dearer than the daughters of Dean Liddell; Lorina, Alice and Edith. They lived on the same side of the quadrangle with him, but at the opposite corner; that is, they lived at the east end of the north walk and he lived at the west end, so that they could run along the flags and visit him and have a cozy time, even on a rainy day. Their father was dean of the cathedral, and one of the authors of the great Greek dictionary which your older brother knows very well, no doubt. The deanery is a beautiful old nome with ivy and trees and a fine garden at the back, and this was the home of Alice. She was not the oldest, but the second daughter, and in the verses at the beginning of the Wonderland book she is called "Secunda" (second); Lorina, the eldest, is called "Prima" (first), and little Edith, the youngest, is called 'Tertia" (third). For these three dear children, Lewis Carroll had a neverending fund of stories which he told them at all sorts of times-in his study, in the garden, while walking in the country or rowing on the river which runs at the foot of the college grounds. And one of the greatest treats that the sisters could possibly have was to go boating up the river to Nuneham or Godstow with Lewis Carroll, have tea on the banks and come home leisurely in the early evening, to Christ church, their host entertaining them all the way with "Alice in Wonderland" was one

delightful fairy stories. these stories, begun as they rowed along the river on a Fourth of July and in the year 1862, when our country was in the midst of the great civil war. Lewis Carroll himself did not seem to think the story a wonderful one. In his diary

for that day he wrote: "I made an expedition up the river to Godstow with the three Liddells; we had téa on the banks there and did not reach Christ church till half past eight." Later on, he added to this: "On which occasion I told them the fairy tale of Alice's Adventures Underground,' which I undertook to write out for Alice."

You can imagine how eagerly the chil-Iren listened while the adventures of the White Rabbit, the story of the Mouse and the Lory, The Caucusrace and all the rest of the tale were told in the gentle, quiet fashion in which Mr. Dodgson always spoke, and rather slowly, perhaps because of a tendency to stammering. The entire story was not told on a single occasion, as you may well believe; were resumed, and a chapter narrated, now on the river, now in the study, now in the garden, now after tea in the meadows or in the cosy drawing room facing the street. The death in Paris a few days ago of Mme. De Provigny has revealed a remarkable story of a woman, rich, talented and influential, to whom, at her expressed desire, no word was spoken for

Mme. De Provigny resided at No. 19 Boulevard Poissoniere, a stately old house of four stories. For fifty years the house has been closely shuttered, although continuously inhabited. During all that time Mme. De Provigny has lived in the closed and shuttered house without a newspaper, without an open-book, without a flower or visitor and without a word to her from a living

A sorrowful tragedy lies behind this remarkable renunciation of the world. Fifty years ago Mme. De Provigny was a bride of twenty summers. On the very morning of their wedding day, and less than an hour after the ceremony. M. De Provigny died of apoplexy. When his young bride recovered from the shock, if indeed it can be said that she ever recovered, she ordered that the house be shut up. She retained her servants on condition that they never confront her with a living being and never speak to her again. Her wedding gown was of white satin. She continued to wear it and others of exactly similar design as the years went by, always dress-

ng in nothing but pure white to the end. She knew absolutely nothing of the rend of public life. She did not know that France was a republic. She never heard of the Dreyfus case, of the death of Queen Victoria, or of any other national or international events. Motor cars were unknown to her. When she died it was found that in her will she had left her entire fortune to men and women aged over 60 years of good character. She left a large house country as a home for them and \$2,-000,000 for its support.

### TREE DWELLING ANTS.

### Curious South American Insect That Acts as Plant Guardian. Ant defenders of plants and trees are

some of nature's pretty marvels. The cecropia adenopus is a remarkable tree of South Brazil widely distributed through the tropics. Its slender trunk is crowned with long leaves at the ends of the branches. A few active ants run continually

along the branches and the leaves, but if the tree is shaken slightly an army of ants rush out by small apertures ready for a savage assault on the intruder. The ant is the terrible guardian that the tree has retained to protect it from its formidable enemy, the leaf cutter ant. The defenders rarely leave their re

treat, where they live on small whitish egg shaped bodies about one-twelfth of an inch long, known as Mueller's cor-puscles. These are formed of delicate tissue, rich in proteids and oil, as rations for the garrison of defender ants to feed upon. The curious arrangement by which entrance is made to the hollow stem has been studied by W. Schim-

Just above the point of insertion of each leaf extends nearly to the superior node a superficial groove, at whose end is a rounded depression. There the tissue is thin, like a diaphragm in a tube, and it also is soft. The hole by which the ant enters is always pierced at this spot. The ants seem to have made their entrance through the groove originally because it was at the top. In the course of this plant's further development natural selection augmented these natural advantages so that finally the thin, frail diaphragm as it exists to-day was developed.—Chicago Tribune.

Demand for Trained Farmers.

The last ten years has seen an enormous increase in the demand for men trained in agricultural lines. The number of such men has enormously increased, but the demand is not yet supplied.

Many of us can look back twenty years to the time when untrained men about the size of a man's pocket handwere at the head of agricultural instruction in most of our agricultural colleges. These men had to be employed because they were the best that could be found.

### Save the Rotten Trees.

When the trunks of cherry trees have started to decay probably the best way of checking it is to clean out the dead wood, paint the wound thoroughly with whitewash, or, better yet, with Bordeaux mixture, and then cover the whole wound with grafting wax or clay, so as to keep the water out. While this may not result in an entire healing over of the bad wounds, it will probably stop the decay, and make the trees last longer than they would if left without treatment. Don't be afraid to remove all the rotten wood, as it adds nothing to the strength of the tree and has a tendency to promote rot in the new tissues. It is quite likely that this rot started in the tunnel of a borer and has gradually spread until it is serious.

## Civil War Stories

"I wonder," said one of Bragg's men, what became of Lieutenant Wagstaff of the Eightieth Ohio Infantry. I often think of Wagstaff. I was taken prisoner by Captain Botham of the Third Michigan Cavalry on the 28th day of April, just three weeks after the battle of Shiloh, down the ridge toward Hamburg. I was taken to General Pope's headquarters, and, after being thoroughly interviewed by that commander. I was forwarded to Hamburg and turned over to the provost guard, the commander of which was Wagstaff. That night Wagstaff came around to look over his new recruits and I had a talk with him. In that first meeting I formed a friendship which has never died out so far as I am concerned. Wagstaff came around to see me every day, and often brought along cigars or other things which were not dealt out to the prisoners promiscuously. "There was a sutler at Hamburg

whom the Eightieth Ohio boys thoroughly detested, but they could not talk back to him as they wished on account of regulations. One evening early W-ag staff came to me and laid the case before me, and said, 'Now, you are a pretty good talker. I want you to go with me. I'll introduce you to the sutler. He has never seen a live rebel and he'll jump right on to you. I'll have a lot of the boys in his tent, and we want you to give him the devil. We'll stand by you, and if you go at him the right way you can scare the hat off his head. Come on, now, and give it to him."

"I didn't want to go, but Wagstaff insisted. We went to the tent, where about a dozen of the Eightieth's boys were waiting for the show, and I was introduced to the sutler as one of the worst of the whole lot of Bragg's outlaws. their impregnable position, and they answered good-humoredly to the effect that their officers had assured them that nobody could climb up the precipitous sides, and here they were. After the battle of Missionary Ridge one battalion of our regiment was sent with those prisoners down to Bridgeport. The prisoners outnumbered us four to one, but we went jogging along with no thought of trouble, and became well acquainted. The prisoners were formed in four ranks, with one rank of men in blue on either side, and a guard in front and rear.

"Rests were ordered to suit the prisoners. They did not march well; every few minutes they complained of fatigue, and the officer in command at first thought this was an excuse for delay or for making trouble. He spoke impatiently and peremptorily to some of the men who were complaining, when one of the sergeants looked up and said, 'You must remember, colonel, that we have not been eating much lately.' Instantly the haversacks of the guard were at the service of the prisoners, and that night, when they went into camp, full rations were issued to every man, and our boys loaned them coffee buckets and tin cups, that they might have their fill of really good coffee. I will never forget the eagerness with which these Confederate prosiners formed in line for rations. I can never forget the good comradeship that prevailed over their first taste of old government Java coffee.

SCARE FOR RESIDENTS.

FOND DU LAC, Wis., Sept. 26 .-[Special.]-Fire which threatened the business section and a large portion of the residence district of Fond du Lac, destroyed two churches, several residences, an automobile garage and damaged more than a score of homes and other buildings at an early hour this morning.

The conflagration, the largest that Fond du Lac has experienced since the destruction of the Moore & Galloway Lumber company's mills and yards and the plant of the Fond du Lac Iron company, started in the garage, the property of the Crescent Auto & Machine company, Marr and East Second streets, shortly before midnight, and before the last spark was extinguished the following buildings were completely destroyed. St. Joseph's Catholic church; loss, \$68,

loss is about \$250,000.

The cause of the fire is a mystery John Jambor, the manager in charge of the garage, declared that it was due to crossed electric wires, while a street rumor this morning said that an explosion occurred in the gasoline tank of the Connor automobile which had been run nto the garage but a half hour before the fire started.

Those who were near the corner of Second and Marr streets when the fire was first seen, declare that there were five or ix distinct explosions in the garage. They believe that it was the fuel tanks in the cars which were stored there.

St. Peter's Lutheran church is located west, on Marr street, and the entire stee ple and part of the roof were destroyed The huge clock struck the hour of 12 when the conflagration was raging, and then, as the immense tower fell, the gong, buried in the debris, struck seventeen times and stopped.

Many Water Pipes Burst.

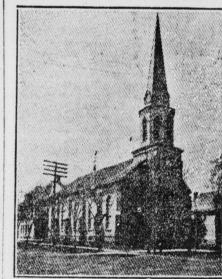

Fond du Lac for years has depended upon pressure from the mains of the from the garage and nothing could save that edifice from complete destruction.

Old Landmark Destroyed.

The residences which were damaged lay direct in the path of the flames and it required heroic measures to keep the sparks from working havoc on the dry roofs. The Mayham residence, one of the city's landmarks and the home of the late Dr. T. F. Mayham, mayor of Fond du Lac for five terms and a Democrat of the "old school" in Wisconsin, was located just east of the garage. It was beautiful and costly residence and contained some of the most artistic paintings from the brush of the late Mark Harrison and Edward G. Mascraft.

Last night when it was seen that the water supply was running low, the leather company turned the water from its large artesian well into the city mains and the additional pressure replenished the supply so that some progress could be made in checking the blaze.

To Propagate the Golden Trout

The United States fish commission announces that within a few years one of the gamest and showiest species of the fish kingdom probably will be caught out of a thousand streams in all parts of the country where it is now to be found in but one, and that a most remote brook. The rare fish has been named the Roosevelt golden trout, because of President Roosevelt's efforts to preserve President Roosevelt's enough to preserve it from threatened extermination. The Roosevelt golden trout at present is the product solely of Volcano creek, a turbulent water course of fifteen miles in length on the slopes of Mount Whitney, After repeated efforts the commission obtained a number of the trout which were sent to the fish cultural station at Bozeman, Mont., and Lead-ville, Colo., for propagation. Encourag-ing news has been received from these stations to the effect that a sufficient quantity of eggs has been obtained for hatching the stock through streams in different parts of the country.—Portland

## MY OWN FAMILY USE PENSION ROLL GROWS SMALLER

ARMY OF GOVERNMENT BENEFI-CIARIES CONTAINS FEWER NAMES EVERY YEAR.

ONCE REACHED A MILLION

Many Veterans of Wars Have Returned to Native Lands to Spend Declining Years.

UNCLE SAM A GENEROUS PROVIDER

There are fewer persons on the United States pension roll today than at ing the fish for market.

It is sold in cans and advertised as the Brooklyn Eagle. The army of the "highly recommended by physicians for any time for the past fifteen years, says the Brooklyn Eagle. The army of the beneficiaries from the government's bounty at last seems to be on the downward grade, in point of numbers. There are now only 951,687 left, and at the rate at which death is cutting into the ranks the total will have shrunk to 900 .-000 before another year.

Million Mark Reached.

The high-water mark in the pensions period there were more than 1,000,000 persons on the roll. The spectacle of this enormous number of persons drawing monthly checks from the govern-ment frightened the Republican leaders for a while. So long as the army was kept within six figures it was found comparatively easy to defend the liberal pension policy. No mention will be found in the report of the commissioner of pensions of the fact that at one time more than 1,000,000 pensioners were on the roll. The figures are given for fiscal years only, and the high-water mark was years only, and the high-water mark was touched in August. Before June 30 came around again the figures had gone back into the hundreds of thousands, so that so far as the official reports go, the highest point reached was 999,446.

The pension roll prior to the present year, had been growing larger and developed from the lower California coast In 1889 it was said 300 tons were in one year, 50 tons being handled by one man in a month's time. Uncle Sam's generosity toward the lebt. In recent years the annual disbursements for pensions have been in the neighborhood of \$140,000,000. This is more than the annual cost of the navy, and is enough to build a fleet of fifteen Dreadnought battleships.

Thousands of persons who draw pensions from this government never spend a penny of it here. They live abroad. Congress has never attempted to require congress has never attempted to require pensioners to pass their remaining days at home, although the amount paid to those residing in foreign lands aggregates nearly \$1,000,000 a year. Two Revolutionary Pensioners. There are now only two persons on the rolls as pensioners of the Revolutionary war. They are daughters of soldiers who fought with Washington and Lafayette, and were pensioned by special acts of Congress. They are Sarah C. Hurlbutt, aged 90, the daughter of Elijah Weeks, who served with the Massachusetts troops, and Phoebe M. Palmeter, aged 87, the daughter of Jonathan Wooley, of the New Hampshire troops.

Mrs. Palmeter resides in Brookfield, N

The last surviving widow pensioner of the War of the Revolution was Esthe S. Damon of Plymouth Union, Vt., who died in November, 1906, aged 92. The last survivor of the War of the Revolution was Daniel F. Bakeman, who died in Freedom, Cattaraugus county, New York, on April 5, 1869, at the ripe old age of 109 years. There are more than five hundred widows of the War of 1812 remaining on the pension roll.

ABALONES.

Japanese Divers Get Millions of Them on the American Pacific Coast.

The abalone industry has reached such commercial value on the California coast that it has been necessary to enact a law to protect these boneless mollusks by limiting the size of the shells collected.

The consumption of abalones as food by Americans has been rather tentative, but lately, according to Out West, there has been an active demand for this article, largely due to the manner of prepar

its strengthening and invigorating qualities." The contents of the can are tiny cubes or dicelike bits of shellfish, and these with the liquid are made into soup chowder, fritters, salad, etc.
As an export the fish is dried rather

than canned. Before the abalone fishery became such an industry strings of dried abalones were sold in Mexican stores in Los Angeles. They were nearly oblong The high-water mark in the pensions in shape, from three to four inches long was reached in 1904, when for a brief and like leather in appearance; they formed a fine contrast to the long strings of bright red chili peppers that hung beside them. As the liver, head and mantle of the abalone are removed, only the immense foot it has but one) and abductor muscles are utilized in drying. The flat, oval shells are too well known to need describing. Their beautiful play of color make the finer specimens objects of admiration as mother of pearl curios. In the early '60s of the last century, when the industry was developed

developed from an industry in shells to one of considerable importance as a food

on this coast, it was the shell alone that

export.
The fish commission for 1901 reported the Japanese as carrying on the aba-lone fishery in Monterey county, having diving suits, air pumps and latest accessories for collecting the mollusks. The products at the fishery amounted to 108,-375 pounds of dried abalone meat and 63,293 pounds of shells. San Diego also had its exportation of abalones, the dried meat being sent to San Francisco before it was chipped to Chip Francisco before it was shipped to China.

The shell and animal part of the abalone are of about equal weight when collected, but after the liver and other organs are removed from the meat and it is dried for the market, only about 10 pounds of meat is produced from 100 pounds of shells and meat, a shrinkage

of about 90 per cent.

Another fishery of some importance on the northern coast of Mendocino county collected as many as 2300 abalones a day. Here also diving suits, galvanized helmet, etc., are a part of the collecting outfit. The collecting of abalone fish by using diving armor is an innovation in the United States in the fishery industry. The diver goes down to a depth ranging from 20 to 75 feet of wa-

is washed, salted and the following day maimed soldiers and sailors and their widows and dependents has cost the country a pretty penny. Since 1866 \$3, 600,000,000 have been paid out for pensions. This is nearly four times the amount of the interest bearing public debt. In recent years the annual discover weeks, the boiling probably as many hours. The fish are dried on

Absalom Foote, an eccentric old man, who had grown tired of lif in the city, decided to move to some smaller town, free from the roar of traffic, the bustle of confusion of the thronging multitude, where he could end his days tranquilly, as became a man of his age. In casting about for a location his eye chanced to light upon the advertisement in a village paper, of one Thomas A. Foote, who wanted to dispose of his boot and the story of the story shoe store, at a bargain having made up his mind to remove to the city. Tramp with Manicure Set.

A real aristocratic tramp honored the Twenty-fourth district police station with his presence last night, when Joseph Gregor of Russia applied for a night's lodging. Though his clothing was sadly out of repair, Gregor looked as though he was not a stranger to soap and water, and he said he had seen better days. His fastidious tastes were shown in the property taken from his clothing. It included a manicure set, a razor, two cakes of toilet soap, a mirror, razor, two cakes of tonet soap, a mirror, a shaving paper, a lead pencil and a pad of paper. The two last-named articles Gregor said he employed in taking observations of his travels through America. He had also a \$100 bill in his possession, but it was of the stage variety. Gregor, who is about forty years old has Gregor, who is about forty years old, has been working on farms around Brides-burg, but he got out of employment and was obliged to appeal for shelter. AN ENGINEER'S SPARROW.

Has Fondness for Railroad Men-Queer Nesting Place. Jim is the name of a sparrow which is

the pet of the engine drivers and firemen at one end of the railway centers in the north of Scotland.

He was hatched within the noisy precincts of a busy locomotive stable, but falling out of the nest before being fully fledged was placed in a cage and tender-ly cared for in the railway office. On the third day he began to be friendly, and in a very short time was flying al over the room, and even allowed himself

to be petted.

In fact, he quickly became so tame that one day when his owner (the local railway engineer) was writing he flew onto his hand and quietly fell asleep, and when about six months old began to accompany him on his daily rounds among the engines in the yard, perched jauntily on his shoulder, or hopping con-

tentedly by his side.

He chooses very queer places for his nests, the oddest and most awkward so far being the inside breast coat pocket of his owner, whom he would follow wherever he went, stuffing the selected pocket with miscellaneous nesting material. Jim is now six years old.—Animals'

The greater number of the cremations in this country, it is claimed, take place in the case of foreigners. Germany has fifteen crematories, which last year incinerated nearly 3000 bodies. Dammer Market Ma Jack Morewood stood upon the plazza tapping the floor with the tip of her daintily booted foot and slapping at her habit skirt with a silver mounted crop.

It was a perfect day for a ride. The sun kissed the peaks of the low chain of hills to the west, and in between was the bright green of early summer. Nature was in her kindliest mood, but Jacqueline did not share it.

The groom was slow about bringing her mount around, and while she waited a dozen couples had cantered past waving their hands gayly to Jack. But no cavalier waited to assist her, and no smart cob whinnied impatiently over the delay in the appearance of her own horse.

Presently the groom would lead her horse to the block, he would assist her in the saddle with the perfunctory care of a hireling, and she would go cantering off alone to her ride.

It was this fact and not the slowness of the stable hands that brought the frown to Jacqueline's face. For the first time in her life she was tired of being the boy of the family.

When stalwart John Morewood had leaned over the cradle to look down into the blinking eyes of his fireborn the baby had seized the proffered fin-22 W., Michigan Meridian, has filed notice of in- ger in sturdy clasp and her father had chuckled with delight.

"She's shaking hands like the little gentleman she is," he declared. Then and there he had named her Jacqueline that he might call her Jack. He seemed to find comfort for his dislittle daughter as boyish as possible.

In her youth, thanks to his training, she had been given over to tomboy tricks. When she was thirteen and a baby brother came to share her'reign she regarded the newcomer's appearance with contempt.

"I'm the best boy," she declared with emphasis, and she took pride in indeed. Jimmie became his mother's pet, while Jack still chummed with her father, and as the boy grew up delicate and pallid Jack seemed to mannishness by contrast.

She was the golf champion of the country club, not in the ladies' class, but by virtue of having beaten all the men. She could ride wherever a man went, could shoot straight and handle cue. She was voted a "good fellow." but now, on the eve of her twenty-second birthday, Jack turned rebellious.

Her thoughts were interrupted by the appearance of the groom with her horse, and presently she was cantering down the drive to the highway. Once on the road she eased the horse into a Notice is hereby given that Gust Nelson, of trot. the scene. Phil Minturn had cantered past with Bess Farley just before she had start-

wounded her. She had been good chums with Phil ever since she was a little girl, and he had always given her the same careless greeting of fellowship, but this morning it had jarred. She knew that he did not really care for Bess.

He had said so more than once, but Mrs. Farley would not let Bess ride who could keep a watchful eye on her mount, so Phil, being a neighbor, had

Jack could not recall a tender speech ever made to her, and, carrying her introspection further, she did not blame the boys for regarding her as one of themselves. Even in the evening her thick dark hair was severely done and her dress was in keeping.

It came upon her with all the suddenness of a revelation that she had August, A. Fever and Wet Clothes.

General Baden-Powell in his book, "Scouting For Boys," writes of the dangers that come from wet garments and of the best way to dry one's clothes: "You will often get wet through on service, and you will see recruits remaining in their wet clothes until they get dry again. No old getting your wet clothes off and drying them, even though you may not unless there was some one with her have other clothes to put on, as hap-

pened to me many a time. "I have sat naked under a wagon while my one suit of clothes was drying over a fire. The way to dry clothes over a fire is to make one of hot ashes and then build a small beehive shaped cage of sticks over the fire and hang your clothes over the cage, and they will very quickly dry; also in hot weather it is dangerous to sit in your clothes when they have got wet from

perspiration. "On the west coast of Africa I always carried a spare shirt hanging down my back, with the sleeves tied around my neck. So soon as I halted I would take off the wet shirt I was wearing and put on the dry, which had been hanging out in the sun on my back. By this means I never got fever she turned her horse's head toward when almost every one else went down

Sacred Birds of the Aztecs.

Imagine a bird the size of a pigeon, its back, head, wings and breast dazzling metallic green with golden sheen, its entire lower parts vivid scarlet, a soft, recurved crest curling over the bill and ferny, curved plumes, lapping over the wings, while two or three slender green feathers a yard or more in length extend over and beyond the glossy black and white tail. Such is the Quetzal, or resplendent Trogon, sacred bird of the Montezumas, national emblem of Guatemala and the handsomest and most striking of all the gorgeous Trogon family. Although found in nearly every republic of Central America, this superb creature is confined entirely to the heavy oak forests of the higher mountains. In these localities his shrill scream may be heard at any time, yet it is a difficult matter to even catch a glimpse of his brilliant form as he flits from tree to tree, and far more difficult is the task of securing specimens. Apparently fully aware of their beauty and value, these royal birds are exceedingly shy and suspicious, keeping entirely to the topmost branches of made as though to follow them, but he the tallest trees, frequently far out of shotgun range. ## THEY WILL LAST

Articles bought at a hardware store, as a rule, have two important requisites; that they shall do good service, and that they shall do good service for a long time. We strive to keep our stock high-grade; only lines being represented that have a reputation to maintain. Whatever tool, implement or utensil you select here, you take home with the knowledge that it will show its quality every time you use it.
