## FOOTBALL.

Had the Gladstone city team played with the same dash and confidence against Escanaba, as they displayed last Saturday in the offense against Marquette, they, and not the Escanaba eleven, would represent the u. p. for state honors.

Marquette won the toss and elected to defend the west goal. Peterson kicked off to Marquette's 15 yard line, the ball was returned five yards, and Marquette gains twelve yards on line plunges. The visitors essayed a forward pass, which was promptly broken up by the locals. Gladstone held for downs and soon placed the opponents' goal in danger. France, shielded by a cloud of perfect interference, swept around Marquette's right end for the first touchdown. Six minutes later, after long gains by Anderson, Peterson, and McKerie, Martin was pushed over for a second touchdown. A third was soon made, Nebel having the honor of bearing the ball over the line, after long gains by Gormsen and "Sandy" Peterson; and just before the half ended France again demonstrated the virtues of the "delayed pass" by running thirty yards for a fourth touchdown. Captain A. Peterson kicked two out of a possible four goals; score, Gladstone, 22, Marquette 0.

The second half was opened by a well-executed and brilliant play: Catlin kicked off to Gladstone's ten yard line, France instantly returned the punt, and O'Connell threw Catlin before he could advance the ball an inch. Frazer succeeded Byrne as quarter for Marquette the visitors played a stronger game than in the first half. However, after ten minutes' play McKerie ran twenty yards, and for the fifth time the ball was carried over the visitors' goal. Just before the game ended, France, as if unsatisfied with his earlier exploits, ran twenty yards for a sixth and last touchdown: Capt. Peterson kicking two goals. Final score, Gladstone 34, Marquette 0.

The local team was handicapped by the absence of Eugene Peterson and Leo Gordon, two of the fastest and most experienced men. Anderson filled Gordon's place at end, and McKerie was shifted to half, O'Connell, the stout little substitute, filling in the position at guard. The Marquette team outweighed the locals, and the soft, sandy condition of the field gave them an additional advantage. The savage line plunges of Madigan, Catlin, Sweet, and Pendill at times looked really dangerous, but lack of team work prevented the visitors from taking advantage of their superior weight.

A pleasant feature was the absence of rough work and wrangling. The decisions of Umpire Tebear were uniformly fair, impartial, and delivered with a promptness that accelerated the playing of both teams.

Gladstone	Line-up	Marquette
Anderson	L. E.	Pendill
Martin	L. T.	J. Madigan
Barrett	L. G.	Belan
Clark	C.	Burrows
O'Connell	R. G.	Rough
S. Peterson	R. T.	Patrick
Nebel	R. E.	Christenson
Gormsen	Q. B.	Byrne-Frazer
McKerie	L. H. B.	G. Madigan
France	R. H. B.	Sweet
A. Peterson	F. B.	Catlin
Umpire, Tebear;	Linesman, Doran.	

### THE DISTRICT LEADER.

There is every indication that the new musical piece, "The District Leader", which is to be presented at the Gladstone Theatre, Thanksgiving Eve, Nov. 29, will be welcomed by Gladstone theatre-goers. The news of its success in the East has evidently preceded it. "The District Leader" is called a comedy with music, and was written and composed by Joseph E. Howard.

The Kansas City Journal in its review of the piece said: "The District Leader" is the brightest and most entertaining musical comedy that has been seen here in a long time, and one of the reasons for the great success of the piece was that Mr. Howard gave it a plot that has substance to it. In fact, the story is one that holds the interest and attention of the audience throughout. It tells of the fight for a senatorship in New York with dependent love stories. The comedy is in three acts, the first scene showing the lobby of the Hoffman House, the second a street in the Chinese section of New York, and last a beautiful mansion on Riverside Drive. Miss Grace Sloan has the role of Flossie Whipple, a New Jersey innocent, and she plays the part most admirably. There is probably no better exponent of child's parts on the stage than Miss Sloan. Her song hits, "A Heart To Let", "The Same Old Story", "Wont You Be My Girl?" were rendered with charming effect. "What's The Use Of Dreaming?" was one of the best liked of the evening. In fact, all the songs which were composed by the author-actor were bright and catchy, and a number of the tunes were whistled

by the gallery gods, an infallible sign of a hit.

The supporting company in "The District Leader" are twelve principals, and a chorus of thirty-eight. A feature with any musical comedy of the present day is its chorus and in "The District Leader" it is said there will be found as attractive a group of girls as have been gotten together in some time. The piece is handsomely staged and "The District Leader's" engagement here promises to be as big a success as in the other cities visited.

For the benefit of those wishing to attend the dances, the curtain will rise at 8 P. M. sharp.

### THE MEANS TO AN END.

During the past few years, press, pulpit, and rostrum have united in stating that the conscience of America has awakened; that success is sometimes not worth the price. Most particularly have educators striven to impress upon their charges that a quiet, approving conscience is better than a Croesus' fortune or a victor's crown. One of the most striking instances has been in the connection of educational associations and organized athletics. The latter, we are told, are purely for the physical and moral benefit of those participating; to give them sound bodies and graceful carriage, together with a just appreciation of the rights of others.

Unfortunately, however, the excitement of competition has preyed as much upon the sanity of youth, as upon their elders, of whom no more could be expected. The methods of the slyster have not been disclaimed; the past season has seen a general storm of protests between the school football teams of the peninsula. Settling championships in board rooms instead of on the field appeals most to the ludicrous; the old prize ring had the one virtue, that no doubt existed as to the victory. It is to be hoped that the local team will be led into no such squabble. An honest and openly won supremacy is enviable; though but one can possess it; but those who did their best and failed may be satisfied with themselves. And there is one thing much worse than meeting defeat; meeting it ungracefully.

### THE ODOR OF SANCITY.

A French Writer's Theory of How It May Be Exuded by Man.

Dr. Georges Dumas is the author of an article in the Revue de Paris on "The Odor of Sanctity." The writer accepts as true the numerous reported instances of saints and mystics of the Catholic church whose bodies after death or during moments of ecstasy emitted peculiarly pleasing odors of various kinds. Then men and women with whom such legends deal, argues Dr. Dumas, were neurasthenes, and it is not impossible that the aroma of sanctity which surrounded them was the product of strictly physiological and chemical changes common to all men, but present in highly intensified form in subjects who, so to speak, burned up the candle of their existence at an unusually rapid rate. He says in part:

"So far, then, we have come across a great variety of perfumes—cinnamon, clove, orange, pineapple, rose, violet, lily of the valley, yellow amber and benzoin. Now, the natural constitution of all of these is well known, and chemistry produces them daily for commercial purposes. We may therefore substitute the equivalent chemical expressions for the ordinary terms we have employed and say that orange, cinnamon, violet and musk owe their perfume to aldehydes and acetones, aromatic liquids derived from the alcohols, just as the artificial essence of pineapple comes from butyric ether. We have, then, to ask whether the human body can produce odorous compounds of the kind we have mentioned and under what conditions. As a matter of fact, it does produce a certain number of such compounds in the destruction of organic matter, which is the constant condition of life, in particular acetones and the volatile fatty acids, butyric, formic, acetic, etc. If the process of combustion is normal all these constituents are burned up, completely oxidized, and give as a residue water, carbonic acid and urea. But let some slackening occur in the inmost nutrition of the tissues and the same constituents will escape through the breath, perspiration and the skin."

### WATER POWER.

The question of taking water power from the Escanaba river is still under discussion; a brief inquiry into conditions may be of interest. This summer the city of Escanaba commenced using such current for its lighting service; and the Escanaba street railway for power which it sells under its franchise.

The Flatrock dam is located between the Soo Line and the Northwestern, with a large and handsome concrete wall, which will hold about seventeen feet head of water. When the water is at the top, there is considerable power. A fall, however, of a foot or so in the reservoir reduces the power. There are two generators in the power house, and two sets of high-voltage wires running into town. One is supposed to be discarded, because of danger (the wires are not insulated).

Under its contract with the city, the power company is bound, in event of failure of current, to start the steam plant, which is to be kept ready for use for a period of ten years. The engine at the car barn is also ready for use, and it is stated from several sources that it has been operated recently, even for several days of the past week, to give power, as the water in the river is comparatively slight and the head in the reservoir is hard to maintain. It is the opinion in Escanaba of men familiar with the situation that the company has not power to spare; as if it had, it could readily be sold in Escanaba.

It is, however, claimed that the company purposes to erect a dam farther up the river, and develop more power thus. Electricians say that the Flatrock dam was not economically planned, and that a similar expenditure could have dammed up and used a far greater head of water. A considerable sum has been spent already, and the question of financing more power plants may be difficult.

The dam and reservoir do not hold enough water to insure a constant supply; it is more like the rush of water from caves than the steady flow of a lake. True, the past has been a dry season, but the constant cutting of timber in the valley of the Escanaba makes its flow more and more irregular; and the winter season always means a very slight flow.

The regulation of the power current sold in Escanaba has not been good; upon the charts of the recording instruments in the city power house at Escanaba the ink line goes back and forth from side to side with appalling variations. An editorial from an Escanaba paper of last Friday is quoted herewith. Even a regulator in the station has been burned out.

The sum needed to make the changes in the power plant was originally estimated by the company at \$1000; \$14,000 have been expended. The city has a

bond for \$5000 for performance of contract; should the company fail or be sold out, a large investment would be rendered useless.

The conclusion, therefore, to be drawn, is that, whatever the future may bring, the company is in no shape to furnish Gladstone day and night service for the present; and that any negotiations should be conducted with the utmost care; that before consenting to any alterations, or binding the city, the water board should demand a responsible bond, covering the largest amount the city can lose, during all its period of relations with the Escanaba Electric Pulp & Power Co.

### TIME FOR IMPROVEMENT.

If it is a fair question, the Journal would like to inquire who is supposed to stand the loss for incandescent lamps and motors which are burning out as a result of the unsteady electric current which is being supplied in this city. That there is a variation which plays havoc with lamps and motors is shown by an inspection of the records in the office of the city lighting plant. The contract under which the current is being supplied to the city requires that there shall not be more than a five per cent variation from 6 a. m. to 6 p. m. and no more than two per cent from 6 p. m. to 6 a. m. but the contract fails to say who is to stand the loss on motors and lamps when the variation is greater. The records at the lighting plant show that there have been variations as great as 20 per cent at indiscriminate times of day and night since the new current began to be used. Of course this makes a market for incandescent lamps, and it furnishes work for the electricians, but it is hard on the fellows who have to pay for it. It is not right that the users of current should have to stand the losses which are constantly resulting from the unsteady current.

No one was disposed to be critical over these matters when the new power was first put into use, as it was supposed that they were incidental to the operation of a new plant. But it is now nearly three months since the current was first turned on, and the conditions which we mention do not appear to be getting any better. The service is not satisfactory to the board of public works, and it has been the subject of several vigorous discussions among members of the board.—Escanaba Journal.

### MERCHANTS, ATTENTION.

Wanted by the Marble Safety Axe Company, several hundred shipping cases. We can use Dry Goods, Boot and Shoe, or Hardware Boxes steadily. If you have a surplus, call us up and tell us what you have. It will pay better than burning them. tf

# FIGHTING FOREST FIRES

The calendar year of 1908 will be memorable as the most disastrous twelve months in history in point of the destructiveness of forest fires in the United States. It is estimated that in ordinary years the average annual loss through forest fires in this country is not less than \$50,000,000, but, great as this has been under what might be termed normal conditions, it appears almost insignificant by comparison with the record-breaking waste of the present period, when the aggregate loss will probably amount to several times the usual \$50,000,000. For a considerable interval this autumn, when the forest fires have been at their height, the flames were doing damage to the amount of \$1,000,000 a day.

The principle cause of this epidemic of forest fires has been found, of course, in the drought which has been general throughout the country; but there have been other adverse conditions which have contributed to the menacing situation. Indeed, as an expert on forestry recently pointed out, it has seemed as though every imaginable unfavorable condition has been present this year to help along the deadly and destructive work. Deadly, because, in addition to the loss of property, there has been an appalling loss of life in connection with this year's fires.

Even in an ordinary year it is estimated that not less than six-five lives are included in the toll exacted by forest fires during the twelve months, and this year in the case of the human sacrifice, as with the loss of material things, the average has been greatly exceeded. Moreover, there will be a sequel to this year's fires that will not appear in connection with any of the statistics of loss at first hand from forest fires. As readers of the newspapers have had good cause to realize, the fires this year have not been confined, as is often the case, largely to the densely wooded and sparsely populated districts, laying waste towns of considerable size and driving great numbers of people from their homes. As a result of the suffering and exposure thus entailed there will probably be much invalidism and many deaths that, not being immediately attributable to the forest fires, will not be included in the statistics that will constitute the chronicle of this year's fire record.

### Climate Conditions Unfavorable.

Another unusual feature of the forest fires of 1908 is found in the wide range of territory visited by the flames. In the Maine woods and in the Adirondacks of Northern New York; throughout the State of Pennsylvania; in Michigan, Minnesota and Wisconsin and other territory adjacent to the Great Lakes the forest fires raged simultaneously, and even on the Pacific Coast the menace has been present, threatening among other things the destruction of one of the finest groves of the prized big trees. Moreover, the forest fires this year have been unusually difficult to conquer, and in many instances the owners of magnificent private forests or hunting preserves provided with the best private fire-fighting systems have found themselves unable to cope with the rapidly traveling flames and have been obliged to appeal to near-by municipalities for aid.

The season's unparalleled record has given the country an unpleasant object lesson as to what may happen any year and has aroused everybody concerned to a realization of the need of some better system of fighting and preventing this immense yearly loss. Not only have private individuals and corporations owning timber lands been stirred to action by the spectacle of the past few weeks, but the United States Government has inaugurated a country-wide campaign that it is believed will point a way to prevent many forest fires and to control those that, despite precautions, gain a start.

As a first step the national Government has had one of the most efficient employees of its forest service, Mr. Raymond W. Pullman, traveling over the burned areas in the Northwest and elsewhere, and not only gathering detailed statistics that will be of value in urging congressional action on the subject, but also taking notes as to the physical characteristics of the fires and all details that might lead to a better understanding of this destructive element and the best means to circumvent it.

At the same time the national authorities have detailed an expert on forestry, Mr. Paul G. Redington, to make an investigation of the whole broad subject of forest fires and to devise ways and means for an improvement of conditions in the future.

In speaking of the line of action to be taken by the government in enlisting co-operation for the common cause Forester Redington said recently: "What is wanted is an organized effort on the part of the government, the states, corporations and individuals. There should be adequate fire laws in every State where any forests are located. These laws should provide for the appointment of fire wardens, who should have authority and the power to enforce such, and to call upon the services of citizens in fighting forest fires which occur. The law should provide a penalty to be imposed upon any man who refuses to give his services in time of need."

It is realized that the railroads through their spark-emitting locomotives constitute one of the chief sources of forest fires and consequently one of the first moves which has been made by Uncle Sam in the present undertaking was to invite the railroads to make common cause with the federal government against forest fire menace. There have been prepared articles of agreement for a co-operative working arrangement between the government and those railroads whose lines traverse the national forests in the West, and this is believed to be but a beginning of a better understanding between some of the parties most concerned. Without the unselfish aid of corporations the United States government will have uphill work in its crusade against the forest fire menace.

### The Forest Patrol.

When it comes down to systematic methods of fighting forest fires, the subject does not, happily, present a wholly unexplored field. For some years past the United States government has been rapidly developing an efficient patrol and fire-fighting system on its own forests, and, inasmuch as Uncle Sam now controls about one-fourth of the forest area in the United States, it can be seen that the national authorities have had an excellent practice ground on which to try out their theories on a large scale. The realization brought by the forest fires of 1908 of the crying need for organized effort in fighting forest fires throughout the entire country, comes just at a time when the government has its own system practically perfected, and there is no doubt that this will be used as a model that will be copied by State and county authorities, corporations and private individuals, who are owners of extensive timber lands.

Under the forest patrol system maintained by the United States government on its own land a ranger or guard travels on foot or on horseback over the district of which he has charge at regular intervals and keeps a careful lookout for any fires that may have started since his preceding patrol. This nomadic fire warden makes especially frequent trips along the wagon roads, trails or other frequented routes of travel through the forest and not only keeps his eyes open for incipient fires, but cautions all persons who may be traveling through the forest to be sure that any fires that they may light are fully extinguished before the camp ground is abandoned.

The arteries of travel through the forest are also extensively posted or placarded with printed notices warning hunters, campers and the traveling public in general against the dangers of starting fires except when absolutely necessary, or abandoning a camp site while the embers of the camp fire are still aglow. Not only do the forest rangers, or government patrolmen, pace their "beats" through the forest, but every now and then each of these guards climbs to commanding elevations or lookout points within his district to survey the whole situation, and, if the existence of a fire is discovered, the ranger either puts it out himself, if he is able, or, if the flames are too formidable for his unaided effort, he summons the assistance of other rangers. A complete system of telephonic communication throughout Uncle Sam's forests enables the rallying of a good-sized fire-fighting force at short notice. Finally, these very busy rangers follow railroad trains— if their districts be traversed by the steel-tracked highways — and extinguish the innumerable small fires that constantly originate from locomotive sparks.—St. Louis Globe-Democrat.

### Outside of His Practice.

"All that is the matter with you, sir," said the eminent physician after a thorough examination, "is lack of nutrition. You don't eat enough."

"I eat all I can hold, doctor," said the attenuated caller.

"Then you need to have your capacity enlarged, and that's a case for a surgeon. Five dollars, please. Good morning."—Chicago Tribune.

### The Making of It.

"If they're both deaf and dumb, I don't see how they could make love."

"No? I should say it was the best kind—all handmade, you know?"—New York Sun.

## TO REORGANIZE DEFUNCT CONCERN

CAPITALISTS ARE INTERESTED IN MICHIGAN-LAKE SUPERIOR POWER COMPANY.

WAS ONE OF CLERGUE'S IDEAS.

Giant Organization Was Capitalized for \$110,000,000 by Eastern Promoters.

HAS HORSE POWER OF OVER 40,000. SAULT STE. MARIE, Mich., Nov. 17.—[Special.]—Backing by leading capitalists of the east, including interests identified with several big railway lines and manufacturing organizations, the first mortgage bondholders of the Michigan Lake Superior Power company have formed a pool for the reorganization of the concern involving the investment of millions. Within three weeks foreclosure proceedings will be started and the plant will be bid in at forced sale at the earliest possible date.

### Big Men in Charge.

The company was one of the results of Francis H. Clergue's operations in the St. Mary's valley and the plant represents an investment of approximately \$5,000,000. When the old Consolidated Lake Superior company went to the wall the power company was placed under the co-receivership of Charles D. Warren of Toronto, who represents the stockholders, and Clarence M. Brown of Philadelphia, representing the first mortgage bondholders. Two years ago an agreement was reached whereby the bondholders agreed not to demand the interest on their claims and it was arranged that the company should be reorganized. The plan was unsuccessful and the bondholders, being unable to enforce their claims, are now seeking a new procedure is the best plan at this time.

### Plant Is a Monster One.

With the exception of some of the plants at Niagara Falls the Sault plant is the largest individual power concern in the United States. The power house proper is over a quarter mile long and the canal leading to it is two and a half miles long, 250 feet wide and thirty feet deep. While the estimated capacity is 40,000 horse power, several engineers claim it can develop 10,000 more.

## SHAKES DICE, WINS GIRL

Miss Elizabeth Nichols of Green Bay to Become Bride After Romance at Cigar Counter.

DETROIT, Mich., Nov. 17.—A romance born over a dice game has taken Miss Elizabeth Nichols away from the hotel where she was employed at the cigar stand and made it necessary to call on the Michigan State police.

## HER NEEDS.

"Man wants but little here below"— "What surely is no sin." "But woman wants that little"— "And the man throws it!"—Town Topics.

charred oak barrels. Neutral spirits require no aging, but may pass immediately into consumption. The maturing of the product in charred barrels modifies and corrects its raw, biting taste. The action of the congener properties of the grain so retained in the liquor on each other and the action of the charred wood on all by the lapse of years results in a flavor, an aroma, a color, a blending of inherent constituents resulting in a beverage agreeable to the taste. In neutral spirits the name signifies the character. There is neither taste, smell nor color, and no amount of aging in charred or uncharred barrels will change it without the addition of foreign matter."

Truman C. Newberry, New Navy Secretary.

Truman H. Newberry, assistant secretary of the navy, who will succeed Victor H. Metcalf as secretary of the navy, is from Detroit, and is an enthusiast with respect to naval matters. He is a man of great wealth and during the Spanish war contributed by his personal efforts and otherwise to the organization of the volunteer naval force which mustered in the service of the government. He served himself as a volunteer officer. His ambition has been to become secretary of the navy, and this he has finally accomplished. He may be continued as a member of Mr. Taft's cabinet.

## ROBBERS GET \$18,000.

Drill Vault in South Bend (Ind.) Postoffice When Clerks Are Working Near.

SOUTH BEND, Ind., Nov. 16.—The biggest robbery in the history of South Bend was pulled off Saturday night by safebreakers, who plundered the South Bend postoffice of \$18,653 and made such a successful getaway that postoffice inspectors and police are without a clue on which to conduct their investigation. The plunder was all stamps.

The robbery was discovered at 8:30 o'clock Sunday morning by a clerk in the employ of the Household Outfitting company, one door north of the room temporarily occupied for postoffice purposes during the erection of the new \$100,000 building.

## OIL CASE IS APPEALED.

Government Will Ask to Have Famous Rebate Case Heard Before United States Supreme Court.

CHICAGO, Ill., Nov. 16.—District Attorney Sims today served notice on counsel for the Standard Oil company of Indiana that on November 30 the government will apply to the supreme court for a writ of certiorari bringing the record of the famous rebating case before that tribunal. This is the case in which the court of appeals reversed Judge Landis who had recorded a fine of \$23,240,000 against the corporation. The notice to the Standard Oil attorneys was signed by Solicitor General Hoyt and was brought to Chicago today by Mr. Sims who returned from a conference with Attorney General Bonaparte at Washington.

## WAITING FOR KAISER.

Germany Believes Situation Will Be Cleared Up When Emperor Meets Chancellor.

BERLIN, Nov. 16.—Emperor William is due to arrive at Potsdam tomorrow at 8 o'clock in the morning. He will have an audience with Chancellor Von Buelow in the course of the day, but the hour of this meeting has not yet been fixed. Whether the meeting will be held at Potsdam or in Berlin, will be decided by his majesty after his arrival. It is pointed out today in well informed quarters that some of the newspapers of Germany have adopted a pessimistic optimistic tone regarding the outcome of this meeting. Much depends upon the personal mood of his majesty, and in this connection the apt remark has been made: "We know how such an audience will begin, but we cannot foresee its conclusion."

## DOGS BEAT RACE HORSE.

Course in Race Is Over Ten-Mile Trail, but Mare Slips While Climbing Hill.

SEATTLE, Wash., Nov. 16.—A dispatch from Nome says: One of the most interesting races ever witnessed on Seward peninsula was a race between a race horse and dog team here Saturday, the dog team winning by fifty seconds in a ten mile course. Ben Froimer on Jake Berger's mare Dolly, noted in Alaska for her speed, raced with Coke Hill's dog team from this city to the mouth of Dexter creek and return, a distance of ten miles. The trail was in good shape and time was made by both horse and dogs. The mare slipped while running on a little hillside and lost some ground.

## BOY BORN TO DUCHESS.

Wife of the Late De Chaunnes, Formerly Miss Shotts, Mother of Her Title.

NEW YORK, Nov. 16.—A cablegram from Theodor P. Shotts from Paris, received here today, announced that a son had been born to his daughter, the Duchess de Chaunnes. The Duke de Chaunnes died in Paris last spring.

# Doings of the Week in and About Gladstone

News Items That Are of General Interest to Our Local Readers.

The Gladstone Delta  
CHAS. E. MASON, PUBLISHER.

Published Every Saturday.

\$1.50 per Year in Advance.

The cement walk of Delta is adapted to the production of an excellent skating rink; as those notice who walk where a shop has just been scrubbed and the water swept out on the sidewalk. When the weather becomes a little more settled, the length of the walks could be flooded, and pedestrians, by using skates, could travel with great speed to their destinations. This should be as successful as the experiment in Paris and Washington, of going home on roller skates in the summer instead of by street car. The walk here is twelve feet wide, certainly enough for any man with a moderate sized skate on. The attention of the cemetery commission is respectfully called to this.

Gladstone's defeat of Marquette Saturday afternoon by a score of 34 to 0 was something of a surprise to the men from the north. A score larger than either Negaunee or Ishpeming scored against the Queen City proves that Gladstone is the equal or superior of any team in the peninsula except the champions. The Marquette team was heavier than locals, but the latter were too rapid in their motions, playing the best game of the season, notwithstanding the lack of two heavy men.

Mr. and Mrs. David Narracong returned Monday from a two week's visit in Marquette with their son Win.

Thomas Inman, who has been working for the past year in the Soo offices at Enderlin, N. D., arrived Monday to visit his parents and friends here. He left again Friday for Enderlin.

The first hunting accident of the season here was not serious: Lee Carpenter, aged 15, rested the muzzle of a .22-caliber rifle on his foot; the unloaded gun was discharged and the bullet went straight through. The accident took place last Saturday, on the edge of the town.

The annual meeting of the Eagles for the nomination of officers will be held next Friday evening; there will doubtless be a large attendance of the feathered.

Wilford & Sons have adopted as their trademark the delta, a blue triangle, for their flour, with the word "Delta" in red, enclosed.

A Thanksgiving ball will be given by the military company Thursday next at their armory in Wasa Hall.

The fire alarm service is being altered to use storage batteries, and a marble switchboard will carry the instruments. The cost of the change is about \$140. The switchboard, which arranged and mounted by Supt. Roberts and his assistants, stands in the electrician's office.

The ladies of the M. E. Church will hold a Holiday Sale and Chicken Pie Supper, at Wasa Hall, Wednesday, Dec. 9th, afternoon and evening. Supper served from 5:30 to 8 o'clock. Price of supper, 25 cents.

Ninety licenses were issued here in town through Empson's before the eighteenth. It is evident, however, that the number will be slightly diminished below last year's.

The city council met Monday in regular session. The bids for Wisconsin Avenue sewer were: Northern Construction & Engineering Co., ten inch pipe, \$1.80 per foot, six inch, \$1.17 per foot, manhole, \$62.00; H. J. Krueger, ten inch, \$1.04, six inch, \$.50; C. E. Nebel, ten inch pipe, \$1.10, laterals, \$.50, manhole, \$40.00. The bid of H. J. Krueger was accepted, the council allowing him \$50.00, for one manhole. Election and registration bills amounting to \$124.00 and \$42.50 for city printing were allowed. The mayor appointed Albert E. Neff to the water board, in place of Hugh B. Laing, whose resignation was handed in and accepted that evening.

The innocent bystander usually suffers. Two local checker sharks, both of the conscienceless type, after a discussion of their respective ability, agreed to play for the cider, the loser to treat the house. The spectators gathered around to see fair play and judge 'twixt man and man. The play was long and deliberate; the advantage seemed to sway from side to side, although the lesser skill of the gazing crowd was insufficient to detect the niceties of the game. At last the opponents up and mutually cried "Draw game!" The sorrow and anguish of the thirsty spectators—it would be well to pass over.

A grave trouble is recently experienced with the water supply for the municipal power plant at Marquette. Beavers are persistently damming the Dewal River, and although several of their works have been blown out with dynamite, they are a source of much annoyance.

16 inch Hemlock wood, full cord \$2.75 16 inch Maple and Birch mill wood \$1.75 per single cord, \$5.00 per full cord delivered to any part of the City. Call up C. W. Davis, phone 7.

W. A. Miller made a second deer-hunting expedition, across the bay Thursday afternoon.

J. J. Hayes, of Chicago, agent for the Equitable Fire Insurance company, and W. T. Benallach, of Detroit, for the Michigan Fire and Marine, were in the city this week, to transfer the local agencies of their respective companies from C. Voorhis to G. R. Empson.

G. R. Empson left Wednesday evening for the west, to be gone until late next month.

A daughter was born Wednesday to Mr. and Mrs. Hans Olson, of Kipling.

The baby daughter of James Campbell is ill with pneumonia.

The Gladstone Military team will play the Escanaba city team a fourth game on the latter's grounds Sunday; and is now negotiating a game with Marquette at that city for Thanksgiving afternoon.

Woodenware camp 8 has been a center for Gladstone hunters lately. Among those who were there Sunday were: W. A. Miller, William Cramer, Charles Walz and son Clarence, John Nelson, John Kinne, Frank Locke, Dan Call, Floyd Duchesne and Albert Tryan. Some of them only stopped a few hours, and others for days. It is claimed Mr. Walz declared that the eating at the camp was so good that there was no use in leaving it to hunt, and his friends feared that he might have an accident and "bust."

A barrel of whiskey, so it was said, fell off a steamer at St. Ignace. Diving operations were prosecuted vigorously until the billing showed that it was sauerkraut, and popular interest immediately flagged.

The Misses Grace and Lou Gordon returned Thursday morning from a brief visit in Minneapolis.

Miss Grace Yenor is visiting friends and relatives in the city.

Among the new brick blocks going up at the budding city of Gwinn is a store, 25x75 one-story building for Henry Rosenblum, who will open up early next year with a stock of dry goods and clothing. At present Mr. Rosenblum has not completed his plans as to the management of the store. He looks on Gwinn as a most promising location during the boom in the iron business expected next year.

Miss Mabel Hood returned Wednesday from a three weeks visit at Rudyard and the Soo.

Joseph Podesta of Appleton, is in the city on business.

The recent zeal of Gladstone's youth to drive about all tin cans with their shiny sticks suggests that if they could be headed toward the dumping ground, much civic cleanliness could be effected without cost to the municipality.

Miss Delia Garvey arrived in Gladstone Thursday to spend a few days.

Mrs. Duncan Macdonald, of Soperton, Wis., is the guest of J. V. Erickson for a week.

Archie Jacobs returned Friday morning to Tremay, after transacting business.

J. C. Hayden, of Escanaba, was in the city on business Friday afternoon.

The Escanaba Mirror tells a story on a well-known sportsman and mounteer: the tale goes on that one Dan Dupuis, having procured a deer license at Garden, found a chance to hunt at Munising. After trailing a wounded buck through the brush, and into a lake; building a bridge into the water to get the body, and transporting it into Munising, he met a game warden, who demanded his license. The latter was made out for a man of 32 years of age, of light hair and blue eyes. The warden accordingly confiscated the deer, and an irate and swarthy son of Gaul headed with sorrow toward Garden to interview the man who sold him the license.

In the basket ball game last night the Seniors met an aggravating defeat at the hands of the Juniors, score 19 to 18.

The Lotus now omits one trip to the head of the bay, going no farther north than Gladstone at noon.

The "Knights of Spearmin" may well be satisfied with the success of their return Leap year party Thursday evening, for it was a most enjoyable affair. The hall was well decorated with strings of pennants in red and green, the colors of the club, and a large "Spearmin" banner adorned the stage. A five-piece orchestra rendered a splendid program of twenty dances and it is assured that all the dancers had the best time ever.

Landlord Joseph Eaton, who has been conducting many improvements about the Commercial this summer, has reopened his famous bar.

Dr. Kee arrived Tuesday morning with his big buck, after a week's campaign.

H. A. Davis started on a hunting expedition, Saturday; but decided that he would prefer to remain where there would be less danger of his being taken for a deer.

The Delta Medical society held its monthly meeting at the Inn last Friday afternoon. Next month the annual banquet will take place.

Miss Emily Murray, the reciter accompanying the Troubadours, entertained the high school Monday afternoon with readings from Silas Marner.

The ladies of the Presbyterian church will give a chicken pie supper, Wednesday, December 2, in the church parlors.

The record car Scranton came in on No. 8 Wednesday morning, returning from the Soo that evening. It is sent out by the L. C. S. The car has recording mechanism connected with the engine, so that it preserves all information regarding the run, the coal used, the state of roadway, the use of the brakes, and many other items. It is an object of much interest to the railroad men.

Receipts of coal have practically ceased, as the dock is piled high, and very little is transhipped, except the commercial grades.

The regular fall trouble has developed at the coal dock, after a year or two of immunity. Slow spontaneous combustion of the soft coal causes "hot spots," and emission of gas. It is no longer necessary to send a pick and shovel gang to work; for the clambells will uncover the scene of disturbance and turn over the affected coal in a few minutes.

The expenses of the Marquette game Saturday were: fare \$39.90, printing, \$1.50, busfare \$5.00; a total of \$46.40 with \$30.25 gate receipts. This brings the season's deficit up to twenty dollars.

Herman Haberman returned from Escanaba Tuesday to wire the new Buckeye mill for electric lighting.

Union Thanksgiving services will be held next Thursday morning at 10:30 in the Presbyterian church, Rev. E. J. Warren delivering the sermon. A cordial invitation to attend is extended to all.

An Escanaba water main has sprung a leak and Ludington is all torn up about it. Tunneling from the sidewalk was unsuccessful and it was necessary to cut through the asphalt and concrete.

The Misses Grace and Lou Gordon returned Thursday morning from a brief visit in Minneapolis.

Miss Grace Yenor is visiting friends and relatives in the city.

Among the new brick blocks going up at the budding city of Gwinn is a store, 25x75 one-story building for Henry Rosenblum, who will open up early next year with a stock of dry goods and clothing. At present Mr. Rosenblum has not completed his plans as to the management of the store. He looks on Gwinn as a most promising location during the boom in the iron business expected next year.

Miss Mabel Hood returned Wednesday from a three weeks visit at Rudyard and the Soo.

Joseph Podesta of Appleton, is in the city on business.

The recent zeal of Gladstone's youth to drive about all tin cans with their shiny sticks suggests that if they could be headed toward the dumping ground, much civic cleanliness could be effected without cost to the municipality.

Miss Delia Garvey arrived in Gladstone Thursday to spend a few days.

Mrs. Duncan Macdonald, of Soperton, Wis., is the guest of J. V. Erickson for a week.

Archie Jacobs returned Friday morning to Tremay, after transacting business.

J. C. Hayden, of Escanaba, was in the city on business Friday afternoon.

THANKSGIVING DINNER.  
The following is the menu of the dinner to be served in Wasa Hall next Thursday from noon until 2:00 p. m., at 25 cents a plate, by the Catholic ladies:

MENU  
Roast Turkey  
Chicken patties Creamed potatoes  
Giblet gravy  
Cranberry Sauce Celery  
Cabbage salad Potato salad  
Beet pickles Sweet pickles Sour pickles  
Dill pickles Olives  
Pumpkin pie Mince Pie  
American Cheese  
Brown bread White bread  
Fruit  
Tea Coffee

NEAT RESIDENCE.  
The new residence of W. F. Hammel, at the southeast corner of Seventh and Wisconsin, will be one of the most commodious in the city. Gormsen took the contract two months ago, and the exterior is now almost completed. The house is from plans by John D. Chubb, architect of the new schoolhouse and many other buildings in the neighborhood.

The building is nearly square, about 39 x 40, with a hip roof descending to the first story, and a sextuple window facing to the side street, upstairs. The porch in front is small, with two columns, square and sided to match the house, it opens at either end upon steps, and the entrance to the house is at the west side, entering the reception room. This is about seventeen by twenty, with the stairs ascending directly to the second floor. The room opens through a double doorway into a second, forming practically a continuation, the length of the house. The second room will be wainscoted in natural oak to a height of six feet, and the fireplace will harmonize. The reception room opens through a vestibule also toward the side street, and to the east into a dining room, a lavatory being located beneath the stairway. The kitchen will occupy the remaining quarter of the lower floor; this and its pantry adjoining being fitted with a number of cupboards for greater storage room and convenience. The entire lower story will be floored with red oak, the second with maple. Down the cellar stairs is the laundry, with stationary tubs, the furnace room, and coal bin, a separate room. Much of the basement will remain unoccupied. The second floor is divided into four bedrooms, each large, with several windows, and a big closet space; and a bathroom.

Springing directly upwards from the first flight of stairs is one to the attic room, which is the length of the house and seventeen feet wide. This will probably be fitted with a billiard table. A closet adjoining it will be lined with cedar, for the storage of furs, and there are two long spaces beside it, for keeping of the many odds and ends usually placed in "the garret". The keynote of the house is light, large rooms, with much available space to put things. The plan of the decoration is not complete as yet; Krueger is putting in the heating system, water circulation; and the plastering will follow. The yard is being filled up, and Mr. Hammel will essay the cultivation of a lawn. At the rear corner is the garage, already useful, a building 20 x 24.

Mr. Hammel's new residence is centrally and conveniently located; will be snug and easily maintained, though large enough to respond to every desire of the family. He hopes to see it completed by the holidays, that he may throw it open for a New Year's reception to his friends.

ROUSE YE, WOLVERINES!

The new constitution of Michigan lays claim to a strip of land now in charge of Wisconsin, that between the north and south branches of the Montreal river, including the celebrated village of Hurley.

Our honor demands that this land be re-annexed immediately, by force of arms if necessary. The quota of Michigan's military forces, on a peace footing, is filled to the limit, and a sudden invasion might disconcert the Badgers. The strongest offensive movement would doubtless be an attack upon Milwaukee by the naval reserve, and capture of the breweries, which would soon reduce the hated despoilers of our land to terms. Still, martial prowess might be in vain, and Congress wring the fruits of our hard-won victory from us, as after the Toledo war. When Stevens T. Mason was our governor, and Michigan ended at Mackinaw (for Republicans were then unknown and Fred Warner had not started running for governor) the youthful state laid claim to Toledo. Governor Mason descended on that town with all the army of Michigan, and scattered the minions of Ohio to the underbrush. But federal intervention robbed Michigan of her treasure and forced on her, in spite of screams and struggles, an upper peninsula without a mine, an assessment roll, or a ballot with a cross under Abe Lincoln's picture. And now, by thunder, we believe the tail should go with the hide.

On to Hurley!

BOYS WANTED.  
A few boys between the ages of 16 and 20 can find steady employment in the factory of the Marble Safety Axe Co.

**BURGLARY INSURANCE**  
The best burglary insurance policy ever written is a checking account with a bank; saves carrying a lot of money around with you and yet you have it any minute you want it. If all persons carried checking accounts and wore a check-book in their inside pockets, the hold-up guys would go out of business.

**3 per cent. on Savings Deposits.**

**EXCHANGE BANK**  
GLADSTONE, MICHIGAN.  
W. L. MARBLE, PRESIDENT. W. A. FOSS, CASHIER.

**FOR SALE.**  
Fruit - Poultry - Resort Farm on Beautiful Lake in Van Buren Co., Mich. - Short distance from Chicago - 30 acres - 1400 feet water front - fine orchard - new modern house - everything up to date - good for an income of \$2000 a year - call or write for particulars at once.

THE BROTHERTON CO.,  
Stack Block - Escanaba, Mich.

**YOU MAY WELL GIVE THANKS**

For the dinner that will be spread before you next Thursday, if you took home a juicy turkey with all its delightful accessories, from the Central Meat Market the day before.

We have ordered a lot of prime young Turkeys (They will be cheaper than you thought) and we have everything else of the best. It would make you too hungry to tell it all.

Olson & Anderson  
Phone No. 9.

**THANKSGIVING**

**RAPID RIVER**

J. H. McDonald took in the Houghton-Escanaba game Saturday.

Joseph Wood and daughter left Rapid River, Wednesday for Minot, and will make their home in Dakota.

Joseph Burgo, an old resident of Rapid River, who went west some years ago, has announced his intention of returning.

Fr. Deschamps and Joseph Beauchamp, of Flatrock, visited her Wednesday.

George and James Flinn drove Tuesday to Escanaba on business, returning via the bay shore road and viewing the "calico factory."

A. Nevev and Jesse Thompson have bought the moving picture show of McKerring and Rowley, who leave for the west.

Messrs. Hamilton and Buchman returned from their expedition this week; but the report that the former had a buck is only hearsay, and will not be given the guarantee customary with all items in this paper.

Jos. Simon traded three stoves with Darrow & McPherson Wednesday for three guns. He says the latter are more in his line.

O. T. Sorenson and A. Nevev were in Escanaba Wednesday on business.

Mr. and Mrs. Soudes left Sunday morning for their western home. They were pleasantly surprised Friday evening by a farewell party of about sixty friends, who gave them their best wishes to take as a remembrance of Rapid River.

Born, to Mr. and Mrs. Charles Archambeau, Saturday, November 14, twin daughters.

Alex Labmbard went down to Escanaba Wednesday night, going next morning to Trout Lake.

Born, Saturday, to Mr. and Mrs. John Rensselaer, a son.

Dolph Nevev is having his building next Demit fitted up by Flinn. Con Bertrand will take charge of it as a restaurant.

Dr. Laing and Perry Pfeifer went up Saturday. Dan Perry expects to get a vacation next week.

Several immense iron girders have passed through here lately, up the branch to Marquette.

Christ Pfeifer, and Miss Eva Remillard of Ishpening, were married Tuesday afternoon at that city, returning to Rapid River in the evening. They entertained their friends Wednesday evening at a wedding dance in the hall.

**DELTA FLOUR MILLS.**

Willford and Sons Company, the new owners and proprietors of the flour mill here at Gladstone, now known as the Delta Flour Mills, are sparing no work or money to make the mill strictly up to date and ready to start up by Monday, November 30. The mill will be completely remodeled, including also the addition of more improved machinery for grain cleaning and tempering, and a Plansifter of the latest type, for the bolting and the dressing of the flour.

J. L. Willford, the elder member of the firm, has been a milling expert for the last thirty five years and promises a flour that will equal the best.

The company will build up a general flour and feed business. They wish to establish a cash market to buy wheat or exchange flour and feed for it and have a complete feed plant for the grinding of all kinds of feed, and hope, by fair dealing, to induce the farmers to market what wheat they now have, here, and to raise more wheat the coming season. Nothing could be of a more direct

benefit to Gladstone and the surrounding country than the successful operation of the mill, with its unlimited possibilities of some day increasing and working into a large merchant business.

Need we ask the people of the city to do all they can to support this new industry? Are we not all willing to buy the local flour; it being, at least, equal to the best, in preference to any other?

**COAT MAKER WANTED.**

Competent man to apply at once.  
 O. T. SORENSON,  
 Rapid River.

**NO WATER**

The temporary loss of power at Rhinelander, Wisconsin which is hampering paper and pulp mills and putting the city's lighting plant out of commission is due to the lowness of the water as a result of the prolonged drought. The industrial establishments will suffer loss of time and the people of Rhinelander may have dark streets all winter and be compelled to resort to other light where electricity has been utilized in buildings, as a higher stage of water cannot reasonably be looked for until spring melts the snowfalls of winter.

The trouble experienced at Rhinelander is doubtless quite common throughout the country, as the drought has been general in the West and Northwest. It reveals a danger that has not heretofore been taken into consideration by communities which have utilized waterpowers for the development of electricity. Water is usually a stable factor, but the prolonged dry spell has shown those who are relying upon it that there may be contingencies in which resort to steam plants and the power of internal combustion engines may be necessary in order to avoid idleness and darkness.

Winter generally shrinks streams perceptibly by freezing small tributaries and the shallow upper reaches of water. Where the trunk stream is wide and deep the supply may be sufficient to last until spring, but where power plants require all the force of small but lively streams trouble is always liable to occur in the winter. This is why the plan of electrifying the transcontinental railroads in the mountain regions is not as feasible as it seems to the tourist who gazes from car windows upon rapid streams which churn their way through the mountain gorge. These streams shrink appreciably during the winter, and many which can develop considerable power during the summer months would be useless in the winter, when all the rivulets that run into them are frozen solid. For this same reason many power plants in non-mountainous regions which have already suffered serious loss of power may have to shut down when winter begins in earnest.—Evening Wisconsin.

**SERIOUS DROUGHT.**

That staunch advocate of the Escanaba Pulp & Power Co., the Escanaba Mirror, says, quoting the Evening Wisconsin's editorial on the Rhinelander situation, the following regarding the local company:

Unless heavy rains visit this district soon serious difficulties for the Escanaba Power company will develop during the winter months. The present season has been marked by one of the longest droughts in the history of the district and since early in the year the water in the Escanaba river was low. The company has been able to operate during the summer without difficulty but with the coming of winter when the streams feeding the river are frozen solid and a heavy coat of ice covers the river itself whether there will be sufficient water to operate the plant full capacity remains to be determined.

**COUNTY CANVASSERS' STATEMENT.**

Statement of votes given in the county of Delta, Michigan, at the general election, held on Tuesday, the third day of November, A. D. 1908.

For representative in the state legislature for the Delta representative district—Peter Jensen received 3720 votes; Victor Laporte received 1101 votes; Otto Stegath received 1 vote; total 4822 votes.

For Coroners—Peter C. Dube received 3338 votes; Louis O. Kirstine received 3317 votes; Bonander Smith received 1108 votes; John J. Meyer received 1102 votes; total 8865 votes.

For county surveyor—Delevan A. Brotherton received 3321 votes; total 3321 votes.

**CERTIFICATE OF DETERMINATION.**  
 State of Michigan, County of Delta, ss.

The board of county canvassers of said county of Delta in the state of Michigan, having ascertained and canvassed the votes given in the several townships and wards of said county, at the National and general election held in said county on Tuesday, the Third day of November, in the year one thousand nine hundred and eight, do determine, that at said election, the following were by the highest number of votes duly elected:

Representative in the state legislature Delta district, Peter Jensen.

Judge of Probate, Judd Yelland.

Sheriff, Frank W. Aronson.

County clerk, John A. Semer.

County treasurer full term, Joseph J. Mallmann.

County treasurer to fill vacancy, Joseph J. Mallmann.

Register of Deeds, Charles W. Malloch.

Prosecuting attorney, Henry R. Dotsch.

Circuit court commissioner Torval E. Strom.

Circuit court commissioner Charles E. Gallup.

Coroner Peter C. Dube.

Coroner Louis O. Kirstine.

County surveyor Delavan A. Brotherton, and the board of county canvassers further determine that Torval E. Strom succeed Arthur H. Ryall and Charles E. Gallup succeed G. Raymond Empson in the respective offices of Circuit court commissioners.

All of which the said board of county canvassers do hereby certify and in testimony thereof have hereunto set their hands and caused to be affixed the seal of the circuit court for said county, this 13th day of November A. D. 1908.

John M. Millar,  
 E. C. Voght,  
 Chas. M. Thatcher,  
 Board of county canvassers.

Attest:  
 A. P. Smith,  
 Clerk of board of County Canvassers.  
 Seal.

State of Michigan, County of Delta, ss.

I, Alfred P. Smith, clerk of said county of Delta, and clerk of the circuit court for said county, do hereby certify that I have compared the foregoing copy of statement of votes cast for the offices hereinbefore named in the county of Delta, at the general election held in said county on Tuesday, the third day of November, A. D. 1908, and the certificate of determination of the board of county canvassers of said county, with the original records thereof, now remaining in my office, and that the above are true and correct transcripts therefrom and the whole of such original records.

In Testimony Whereof, I have hereunto set my hand and affixed the seal of the circuit court of the county of Delta, this sixteenth day of November, A. D. 1908.

(Seal) Alfred P. Smith,  
 Clerk.

**Suffering Humanity.**

"Mrs. Sourmug, who thought she had a mission to look after suffering humanity, is married. Isn't she?"

"Yep."

"I was surprised to learn that she had given up her mission in life."

"She hasn't. Her husband is going to be suffering humanity hereafter."—Houston Post.

**Thanks-giving**

We are ready for Thanks-giving, with a well selected stock of

**Turkeys**

Roasts of Beef,  
 Sausage Meat,  
 Sealshipt Oysters,  
 and the many other good dishes and trimmings. On these we make the best price you can get anywhere.

**ANDERSON & HOLM**

**A DAY OF FEAST**

Has been Thanks-giving for three hundred years. on rocky coast and wintry seas. And those whom The Harbor shelters will observe it in the good old way with Host Steven-son.

**The Harbor**

359 Delta Ave.

**Thanksgiving Concert**

A Phonograph will bring to your home the best music and entertainment—loud, clear and true to life—by the greatest bands and singers and the most popular comedians of the vaudeville stage. We will show you the latest improved Edison machine, that will play the new 4 minute records. We also have a line of Victor machines and records, and what we do not have we will get for you the same or next day. Remember nobody can sell goods in this line cheaper than we, nor give any free records or premiums of any kind.

**ERICKSON & VON TELL**

**Wood! Wood! Wood!**

We are in a position to sell Wood cheaper than anyone in the city.

\* \* CALL UP 45 \* \*

And get our prices before buying.

**NORTHWESTERN COOPERAGE & LUMBER COMPANY**

**We're Flying**

around all the time doing jobs up for our customers and doing them right. When you want anything, phone 265 right off and you won't have long to wait.

**P. L. BURT & CO.**

**THANKSGIVING DINNER**

If you are going out into the woods to get it, let me show you the latest model Rifles and Shot Guns. But if you buy it of the butcher, you will need one of our big Self Basting Roasters.

**NICHOLAS.**
