DAME NATURE HINTS When the Food Is Not Suited.

When Nature gives her signal that something is wrong it is generally with the food. The old Dame is always faithful and one should act at once.

To put off the change is to risk that which may be irreparable. An Arizons man says:

"For years I could not safely eat any breakfast. I tried various kinds of breakfast food, but they were all soft, starchy messes which gave me distressing headaches. I drank strong coffee, too, which appeared to benefit me at the time, but added to the headaches afterwards. Toast and coffee were no better, for I found the toast very constipating.

"A friend persuaded me to quit the old coffee and the starchy breakfast foods, and use Postum and Grape-Nuts instead. I shall never regret taking his advice. I began using them three months ago.

"The change they have worked in me is wonderful. I now have no more of the distressing sensations in my stomach after eating, and I never have headaches. I have gained 12 pounds in weight and feel better in every way.

"Grape-Nuts make a delicious as well as a nutritious dish, and I find that Postum is easily digested and never produces dyspepsia symptoms." "There's a Reason."

Things, Somehow, Didn't Turn Out Just as He Imagined They Would-Moral Not Too Deeply Concealed in Anecdote.

"No," said the painter, "I ain't my own boss any more."

"Why not?" asked his friend. "I remember seing you a couple of weeks ago and you were wild with enthusiasm over getting away from wage slavery and beginning to work for yourself. You seemed to be doing fine. What was wrong?"

"Well, I was enthusiastic about it two weeks ago. You see I wasn't hep then. I'd been working for other fellows all my life and had been kicking myself because I was another man's man. Another man had the right to tell me where I got off at eight hours every day, and that's what stung. I wanted to be for myself. wanted to be free.

"I began to save money. I saved till I had \$50. 'Ah,' says I to myself, "me for my own business.' I quit and began looking for a job to do on my own hook. I found it, painting a sign over one side of a big brewery. Three hundred bucks, and it was a cinch to pull it off in one week with two men. I went down town, bought Story of Englishman Who Was Long some brushes and paint and a scaffold and rope, and went out and hired two of the lads who's been working with me. I'm a contractor now, see? -my own man. Nobody can tell me what to do or how to do it or when to start or quit work. Fine, oh, fine!

"The second day my two men don't show up. Instead a kid comes down and tells me they had gone fishing for a couple of days. I chase myself around to headquarters and get two new men, men I didn't know. They worked all right all day, and at night the point. In line with the general they want their pay-got to have it.

I go and tell the boys how it is. 'We got to have the dough,' they say. 'You're a h----of a boss if you can't pay your men. We'll have to let 'em know 'bout you down at headquarters.' Finally I soak my watch to get 'em their money.

"They don't show up in the morning, either, so I have to do the man hunt over again. I get two more and we start all right, and then the superintendent of the brewery comes out and says: 'Here, those letters are only twenty-feet and the job calls for twenty-five.' 'No, it don't,' I say. 'Twenty is what it says on the contract.' 'Five dollars it's twenty-five,' he says. I take his bet. Then we get out the paper and see. It was twentyfive all right. We had to start the job over again. My mistake.

"The fifth day on the job my two men, who're drawing full pay every night, come to me and say they've got to have something in advance. 'Well, here it is,' I said, and I drives one of 'em in the jaw.

"I got a nice friendly contractor to take the job off my hands, and he only charged me \$50 for the work that I'd already got done for him. Oh, it's worth \$4 a ton, and pig iron, which all right to be your own boss, but when you're the boss of other guys siderably more.

Fortune in Waste Product.

As industries grow older the profits get smaller and human ingenuity is forced to do what it might have done all along if it hadn't been too lazysave the waste matter, or at least make a great reduction in its total. The French people are not more saving than American because they are brighter, but because they have been forced by circumstances and necessity to be. Perhaps that explains why the great steel corporation has just awakened to the fact that it has been throwing away hundreds of thousands of dollars by letting the ore dust from its steel-making operations go to the waste dump and lie there neglected. A process has been discovered by which this ore dust can be compressed into briquettes and utilized for making pig aron. The dust is bound together with a composition composed principally of lime, which acts as a flux in the smelting process. Along the terminal railroads of the Carnegie Steel company, just one branch of the United States Steel Corporation, are 200,000 tons of ore dust piled into dumps. Iron ore is is made from the ore, is worth con-

The Michigan Union is a good thing for a student to belong to, and especially so if he is not a fraternity man and therefore does not enjoy

The union has already outgrown its present quarters, the old Judge Cooley homestead, and while it will cost a pang to part with that old home, still the time has come when that is a necessity, and when the union builds, it must build for a long time, build so that there will be no need to enlarge the quarters in five or ten years. With this

end in view a campaign will be started among the alumni on April 10 next, to last till the 19th, to raise \$1,000,000 of which \$600,000 is to be used for the erection of a suitable building, \$150,-000 for its furnishings and \$250,000 for an endowment fund.

Prohibitionists Freely Cash Up.

The cheerful willingness of the delgates assembled at the state convention of the Prohibition party in the auditorium of the Y. W. C. A. building to contribute cold cash out of their own pockets for the support of the Prohibition candidates in the fall election, was one of the truly remarkable features of the convention.

There were no strings tied to any of the contributions; the money was given for the good of the cause. There were no prospective political jobs to soften the pain of loosening the purse strings. The men who went down into their pockets did so without a regretting sigh and the man who collected the envelope did so without a word of polite consolation.

Oliver W. Stewart of Chicago, a member of the national Prohibition committee and a practised orator, thrilled the delegates with a talk on prohibition. He told of the high standards of the Prohibition party and of the uphill fight for political recognition. He wound up with a fevered appeal for financial help. About \$500 was subscribed.

LITTLE TOO PRIMITIVE

Shower Bath Arrangement Something of a Shock to the Participant.

August Belmont, at a dinner in Saratoga, praised the seaside towns of New England.

"But some of them," he added, "are a little too primitive. "I remember a story about the primitive town of Rockford. Rockford had a rough bathing establishment, with a shower bath. You stood in your bathhouse and pulled a rope and a deluge of cool water descended from the ceiling.

"Well, a lady visitor stood one day in her bathhouse, ready for the shower. She pulled the rope and braced built, principally for carrying lumber herself, but no shower followed. She gave the rope another tug, when the gruff voice of the sailor proprietor of the establishment sounded from aloft. "'Stand a p'int more to the nor-east, mum,' it said, 'if ye want to get the full force.'

"And the horrified lady, looking up, saw the old sailor frowning impatiently through a hole in the ceiling and tilting a barrel of sea water for the shower.

WASTED A FORTUNE ON SKIN TROUBLE

"I began to have an itching over my whole body about seven years ago and this settled in my limbs, from the knee to the toes. I went to see a great many physicians, a matter which cost me a fortune, and after I noticed that I did not get any relief that way, I went for three years to the hospital. But they were unable to help me there, I used all the medicines that I could see but became worse and worse. I had an inflammation which made me almost crazy with pain. When I showed my foot to my friends they would get really frightened. I did not know what to do. I was so sick and had become so nervous that I positively lost all hope.

"I had seen the advertisement of the Cuticura Remedies a great many times, but could not make up my mind to buy them, for I had already used so many medicines. Finally I did decide to use the Cuticura Remedies and I tell you that I was never so pleased as when I noticed that, after having used two sets of Cuticura Soap, Cuticura Ointment and Cuticura Pills, the entire inflammation had gone. I was completely cured. I should be only too glad if people with similar disease would come to me and find out the truth. I would only recommend them to use Cuticura. Mrs. Bertha Sachs. 1621 Second Ave., New York, N. Y., Aug. 20, 1909."

"Mrs. Bertha Sachs is my sister-inlaw and I know well how she suffered and was cured by Cuticura Remedies after many other treatments failed. Morris Sachs, 321 E. 89th St., New York. N. Y., Secretary Deutsch-Ostrowoer Unt.-Verein, Kempner Hebrew Benevolent Society, etc."

Ely's Plan to Help Wayne.

State Highway Commissioner Townsend A. Ely will propose at the next amendments to the good roads law in the interests of Wayne county.

"Under the present law," he said, 'we cannot pay a state reward for more than two miles of good road in each township, and, if Wayne county is going to bond itself to rush the

completion of its roads, it is not fair that it should get no state reward for every mile built. It would mean that, if Wayne county built a continuous line of road, it would get only \$2,000 from the state for each township traversed, while if it built only a mile or two each year it would get a bonus of \$6,000 for each township. Michigan Crops Turn Out Well.

According to the crop report issued by Secretary of State Martindale, the estimated total yield of wheat in Michigan this year was 15,200,000 bushels. The per cent. of acreage sown this fall compared with the average for the past five years in the state is 104. A few correspondents throughout the state report wheat affected with smut, otherwise the quality is good. The estimated total number of bushels of wheat marketed in August and September is 2,750,000.

The estimated acreage of rye harvested is 372,300 and the estimated yield 5,956,800. The per cent. of rye sown this fall compared with the gravel roads, with a wearing surface average for the past five years in the state is 87.

The average yield of potatoes per acre in the state is placed at 86. The estimated acreage is 298,000 and the estimated yield 27.828.000. The estimated yield of beans is 6,113,250 bushels, buckwheat 778,500 bushels and sugar beets 900,000 tons.

In every human being there is a spark of the divine; it is yours to fan that spark into a flame-that is managing a man-it is to get the very best out of him there is to have, and not two women in ten can do it.

Do not think that there is anything unworthy in managing a man-to bring out the best is a high vocation. Only let us see to it that we are worthy of it. There are women who have made angels of men. but at the cost of their own divinity. There is room for more than one unselfish person in a family.

RAPID STORY WRITING.

A Boast That Dumas Made, a Wager and the Result.

For rapidity of composition the prize among novelists must be awarded to Alexandre Dumas, who died with over 3,000 books to his credit, in all of which he had some share. According to Mr. Arthur F. Davidson, one of his biographers, he often declared that when once he had mapped out in his mind the scheme of a novel or a play the work was practically accomplished. since the mere writing of it presented no difficulty and could be performed as fast as the pen could travel. Some one disputed this: the result was a wager. Dumas had in his head the plan of

the "Chevalier de la Maison Rouge," of which he had not yet written a word, and he made a bet of 100 louis that he would write the first volume of the novel in seventy-two hours. The volume was to be formed by seventyfive large foolscap pages, each page containing forty-five lines and each line fifty letters. In sixty-six hours Dumas had done the work in his fair. flowing hand, disfigured by no erasions -and the bet was won with six hours

Danced In Court. An unusual scene was once witnessed in a French law court, the civil tribunal at Nantes. The proprietor of a local theater had engaged a young dancer, whose performances rehearsals did not come up to his expectations. He therefore would not let her appear, and the fair dancer took action against him for breach of contract. The defendant alleged that she had not even learned the first steps of her art, and, here being a plain issue, the judge determined to decide for himself. A space was accordingly forthwith cleared on the floor of the court, and in these unusual surroundings the young lady duly went through her steps and pirouettings. In the result the judge felt justified in certifying that she was quite an expert dancer and decided the case in her favor. Henceforth she advertised herself as the only dancer in the country with a legal certificate of proficiency .- London Tit-Bits.

"Again the governor glanced furtively at me, then, looking at his watch, guessed it was time to return to Utica. He summoned the farm wagon, and it clattered up with the tools in it still untouched. 'Governor Seymour, no matter what you say, you do not owe all of your success in politics to the fact that you never read opposition newspapers, or paid any heed whatever to personal or political attacks upon you.'

Cadillac .- Benjamin Fullmer, eighteen years old, and his dog were hunting in the woods, five miles from home, when Fullmer, who had dropped his gun on a brush pile, pulled it off, muzzle foremost. The trigger caught, and three hours afterward the dog led its master's father to his boy's dead body. The charge had shattered his left arm and penetrated his lungs, causing, it is believed, instant death. Mr. Fullmer was doing the evening chores when he heard his boy's dog barking near the barn. Failing to find his son and thinking the dog would not return without him unless something had happened, he followed the animal across country to the woods, where the accident happened. Kalamazoo.-The Michigan Retail Druggists' association in convention here took issue with the Anti-Saloon league, after a conference with Pliny W. Marsh and R. N. Holsaple and with the opposition of the "dry" leaders framed an amendment to the Dickinson search and seizure act, which provides prosecution for a druggist selling liquor in local option counties. The amendment provides for the abolishment of a physician's prescription and as a substitute the affidavit of the purchases is recommended. HER SAID BY THE YOUNGSTERS Some Bright Remarks Worth Preserving, That Have Fallen From Childish Lips.

A little girl, after listening to the hymn, "In heaven there stands an ever open door," remarked that there must be two heavens, "'cause grandma'd never had any open door where she is." Pinkham's all about 'Paradise Flats.'"

Ecclesiastical modes and matters frequently are puzzling to the little ones. A small Chicago citizen was taken to a fine church, where the music, windows, furnishings, and all accessories were as impressive as the building. The minister, living up to his enviable reputation as an orator, indulged in a brilliant rhetorical flight. "I know," he declared, "who gilds the sun and silvers the stars and paints the flowers and tints the sky and lends to the rivers their beauty, to the ocean its glory, to the skies their perfect light," and so on through long and effective periods. Finally came the interrogatory climax: "Who is it, my friends, who performs all these wonders? Who is it? Who?" From the front pew where the baby listener had been all eager attention

came a shrill, disappointed pipe: "You said you knew!"

Rendered "The Heart Bowed Down" After Horace Greeley Was Nomlnated by the Liberal Republican Convention in 1872.

One of the men who took a very prominent part in the organization of the famous Liberal Republican party movement of the early seventies, which instantly went to pieces following Greeley's defeat for president by General Grant, running for re-election in 1872, was the late Samuel Bowles, for more than thirty years prior to his death in 1878 a powerful editorial inwithout springs, with no other seat fluence throughout the country. Incident of Sherman in 1846

How Henry A. Wise, Then the Minister to Brazil and Later a Confederate General. Entertained Him at Rio Janeiro.

On the morning of Dec. 27, 1846, Henry A. Wise, United States minister to Brazil, and later the governor of Virginia, who signed John Brown's general, went for a stroll to the docks the dining room door. The next moof Rio Janeiro. Some days before he trymen there; hence his daily haunt- flannel. ing of the water front.

On this particular morning he had spied two keen-eyed and alert young being Americans and who seemed to be intensely interested in the scenery fords. Going up to them, Mr. Wise put out his hand.

"You are from the United States," he said. "So am I. Am I right in assuming that you are passengers upon the clipper ship that I see is taking in stores at the pier yonder?"

The two young men replied in the affirmative and then Mr. Wise introduced himself, saving that he was the American minister at the Brazilian court, and adding that he would be pleased to have the two travelers dine with him. Thereupon the strangers expressed their delight at the invitation and immediately accepted it. the younger of the two then introducing the other as Colonel Henry W. Halleck of the United States army. "And," said Colonel Halleck, indicating his companion, "Captain William T. Sherman, also of the United States army,' adding that they had been ordered around the Horn to duty in California.

A few hours later the two officers who were destined to figure so prominently in the world's greatest civil war, were received at the American legation with true Virginia cordiality. When dinner was announced. Minister Wise arose and in his very best man ner apologized for the unavoidable absence of Mrs. Wise, who, he explained, was indisposed temporarily. During

the meal itself, which was protracted by the good time the diners were having, the host occasionally, excused himself in order to inquire about Mrs. Wise, and left the dining room, returning each time after a short in-

grew near the time for me to leave, I ventured to remark that the year before, as a young man who was to cast his first presidential vote. I had been greatly interested in the proceedings of the Liberal Republican convention.

"Ah," exclaimed Mr. Bowles, "I am glad you were interested in our party. I nope all the young men of the country were interested in it. It was really a young man's protest against some of the excesses into which the Republican party was in danger of falling. We were defeated, but the Liberal Republican movement accomplished its

purpose." "Mr. Bowles," I said, "may I ask you one question? I have heard that immediately after the defeat of Charles Francis Adams by Mr. Greeley, Senator Carl Schurz, yourself and some other leaders went to a hotel and that

defeat in November inevitable, and we realized that the defeat would probably be a very sorrowful one. We went into the parlor of the suite occupied by Mr. Schurz and sat down, with the gloom about us thicker than I ever saw it before. Mr. Schurz was especially despondent; his is a very mercurial temperament, anyway. Murat Halstead was the most cheerful member of the party, and he looked a good deal as though he had just come from a dear friend's funeral. And each of us sat there communing with his own glum thoughts; we did not need to speak to let one another

know our feelings. "We had been sitting thus for a quarter of an hour, maybe, when, suddenly, Mr. Schurz sprang from his chair, hurried over to the piano, lifted the lid, sat upon the stool and began to play, as the brief report had it, the familiar air of 'The Heart Bowed Down With Grief,' from the 'Bohemian Girl.' Then, after a little, he began to hum and then to sing the accompaniment, and, I think, some of us joined in the humming.

"I don't believe anyone could have found a better piece of music to express our feelings at that moment. Our hearts were certainly bowed down with grief, for we had failed to nominate our man, and we saw certain defeat ahead. Oh, how funereal that music sounded that day! Yet now, as I recall the incident, I cannot help smiling over the fact that Carl Schurz should have selected a comic opera tune as the one most fitting to serve characteristically a-twinkle, "all I've as the dirge of the Liberal Republican movement."

WORLD'S PANAMA EXPOSITION. VAST RAILROAD STRIKE IN

FRANCE IS PARALYZING BUSI-NESS EVERYWHERE.

Labor Leaders Boast They Will Make Tie-Up Complete - Telegraph Wires Are Cut-Paris Garrison is Reinforced.

Paris, France.-Encouraged by the effectiveness of the strike of employes on the Northern and Western railroads and the extension of the movement throughout the Eastern road and the Paris, Lyons and Mediterranean lines, the leaders of the French workingmen generally threaten a gigantic move to paralyze the activities of the whole country.

The electricians and the employes of the omnibus, metropolitan and subway transportation lines of this city Wednesday considered the advisability of seizing this opportunity to launch a strike for the redress of long-standing grievances. The situation throughout the republic is regarded as grave.

The railway companies are making a desperate struggle to maintain service with the aid of military engineers and men from the navy, but are meeting with little success.

The president of the grain syndicate said that the stock of flour on the Paris market did not exceed 75,-000 quintals, which is less than eight days' supply for Paris.

This does not include the flour in bakers' hands, which, however, is not large. The bulk of meats, vegetables and fruits come in over the Western and Paris, Lyons and Mediterranean lines

The National Railroad union, comprises only 100,000 of the total of 300,000 men employed in the railway service, but a large majority of the nonunion men are participating in the strike

The government is adopting measures similar to those practised in time of war.

The calling of 30,000 of the strikers for army reserve duty is not likely to have any immediate effect on the situation, as the military code allows a man a delay of 15 days before responding to the call.

The strike leaders boast that soon the tie-up will be complete throughout the country. Premier Briand has issued a public statement in which he denounced the strike as an insurrection, purely, built up on criminal foundations.

The garrison of Paris has been reinforced by troops from the provinces and all the principal points along the railroads effected by the strike are

FEARS FOOD FAMINE WHY NEW ORLEANS CITY IS LOGICAL POINT FOR

Its Geographical Position and Many Other Considerations Mark It as Most Suitable Spot for Dedi-

cation of Great Work. Public sentiment has decided that the completion of the Panama Canal in 1915 shall be celebrated with a great International Exposition in which all the nations of the world may participate; and the question of where this Exposition is to be held will be settled by Congress at its ap-

proaching session. New Orleans and San Francisco are contesting for the honor of holding this Exposition, and both cities have guaranteed immense sums of money as an evidence of their ability to finance, so great an enterprise.

An Exposition worthy of the term "World's Fair," such as New Orleans proposes to build, will be a great educational movement. Its success as such, however, will depend entirely upon the percentage of our population who can secure its educational advantages, this in turn, depends upon its location, as the time in traveling to and from the Exposition, and the cost in railroad and Pullman fares, are the most important factors. Considering these matters, New Orleans' claims to being the "Logical 'Point" for this Panama Exposi-

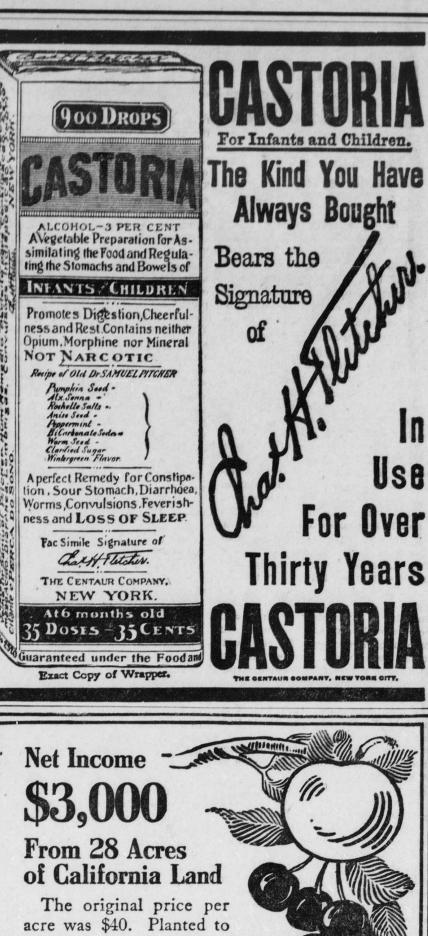

tion, seem to be fully substantiated by the following facts: New Orleans is 500 miles from the center of population in the United States. San Francisco is 2,500 miles

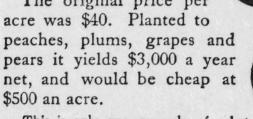

distant therefrom. Within a radius of 500 miles from New Orleans there are 17,500,000 people. Within the same radius from San Francisco there are only 2,000,900. Within a radius of 1,000 miles from New Orleans, there are 65,000,000. Within the same radius from San

Francisco there are only 6,000,000. At an average of 900 miles from New Orleans, there are 70 of our principal cities with a combined population of 20,000,000. Averaging 900 miles from San Francisco there are only 8 large cities, with a combined population of just 1,000,000. The average distance of all these cities to New Orleans is 792 miles,-

to San Francisco 2,407 miles. Over 75 per cent. of the people of the United States could go to an Exposition there at an average expense for railroad fare of \$12.50, as against an average of \$37.50 to the Pacific Coast; and for several millions of our people, the Pullman fare and Dining Car expenses alone, for a trip to San Francisco, would amount to more than all their transportation expenses for a trip to New Orleans.

This is an important public question to be settled by Congress at the session which convenes in December.

This is only one example of what has been done in a climate that draws

Almost every inch of the floor was covered with flattened, twisted bits of lead that had been hullets until they tore through the cabin walls, knocking off splinters from the inside and falling harmlessly to the floor.

"I don't know how I ever lived through it," sobbed Mrs. Dietz. "It was terrible. I sat through it all in a corner of the sitting room with Helen, and we did not move during it all. I did not fire a shot, nor did the children. If I hadn't argued and argued with John we all would have been dead before tomorrow morning."

Dietz himself was so weak he could not stand. He had been shot in the hand, but had kept on shooting his repeating rifle and automatic pistols until the threatened collapse of his wife brought him to a realization that his was at best a losing fight.

Queer Questions.

Queer questions come over the telephone to the newspaper offices. Here was one that the man who chanced to answer the phone had put up to him the other day:

"Say," began the unknown seeker after the truth, "do you-do you remember who it was that killed Abel?" "Why, Cain, of course," replied the newspaper man, who put in several years at Sunday school. "Who'd ju suppose?"

'Well," observed the man at the other end in an annoyed tone, "doggon if I ain't gone and made a fool o' myself. Course it was Cain, now that you mention it, but I made a two to one bet with a fellow that 'twas Goliath, and now I'll have to go without a new overcoat, I reckon, this next winter."-Cleveland Plain Dealer.

A MEDIAEVAL STRUGGLE

That Took Place In the Twentieth Century.

By F. A. MITCHEL. [Copyright, 1910, by American Press Association.]

The Loutons of St. Louis during the winter of 19-, after a summer spent in Switzerland, took a palace in Florence. That they could thus suddenly pick up a palace, that they could afford to hire a palace, is not so startling as might at first appear. Time was when all fine houses in Europe were called palaces. Nevertheless the palace occupied by the Loutons had been during the middle ages the abode of one of those princes among whom Italy was then divided. It stands on one of the many vias, or streets, of Florence, not far from the cathedral called the Duomo. In Florence are various collections of mediaeval weapons, and on the ground floor of the Palazzio V. occupied by the Loutons is a room full of blunderbusses, swords, crossbows, pikes, shields, battleaxes and parts of armor.

The Loutons being wealthy and Jeannette Louton being but twenty years old and pretty, there sprang up at once among certain Italian gentlemen with a great deal of rank and a correspondingly small amount of money a spirited contest for her hand. Among these were Princes Visconti and Strozzi, whose families had struggled with each other several centuries Visconti was forty, tall, thin, ago. bald and wore glasses, being very nearsighted. Strozzi was thirty-two, short, fat, high shouldered and wore his hair pompadour and his mustaches turned up at their waxed points a la Mephistopheles.

The two princes vied with each other in recounting to her the glorious deeds of their respective ancestors. True, they made no mention of the various instances in which they had resorted to hired assassination. But what they failed to give Jeannette read in history and learned of the cowardly as well as brave deeds of those warlike people. Gradually she came under the influence of mediaeval

other and give a hereditary twitch of the right arm that came from those who, thus meeting centuries before, seized the hilts of their swords. One morning each received a note from Jeannette Louton inviting him to call at 3 o'clock in the afternoon

of a certain day. At the appointed hour Visconti appeared, and Strozzi was admitted a few minutes later. They were received in the cabinet of Each started as he saw the arms. other, glared and awaited developments.

"Your highness," said Jeannette,

"you have both done me the honor to propose for my hand. From both I Than the mother by her sick child watchhave listened to accounts of the prowess of your ancestors. You have transported me to those romantic times and kept me there till I almost feel that I am a part of them. As I understand it, the families you represent took an equally important part in Italian history. You are both fine representatives of a splendid race. Few women have been honored by a choice between two such offers. Can you blame me for not being able to choose between the two? I must ask you to decide which shall defer to the other. I will leave you in this room and ask you, when you have decided, to let me know."

She went out of the cabinet and shut the door.

For a few minutes there were low voices, gradually rising till they rang out in trumpet tones.

Meanwhile Ned Sackett, a young St. Louisan, who had been courting Jeannette Louton for several years, fearing that among the princes and dukes abroad she might slip away from him, had decided to follow her, arriving in Florence on the very day the young lady had suggested to the two princes to settle between themselves which should give way to the other.

The same afternoon he sauntered up to the Palazzio V. He was admitted to a surprise. The door to the cabinet of arms was open, and two men were fighting with swords as long as the antagonists themselves, while Jeannette was making frantic efforts to induce them to desist. The two princes had come from words to blows, and each had caught up a weapon. Prince Visconti, having been hurt in the head, seized a helmet and put it on. Prince Strozzi, seeing a piece of armor of the thirteenth century, in order to get even with his enemy caught it up and got it partly on his thorax. Visconti picked up a shield used in the crusades, Strozzi defending himself with an andiron 700 years old, but as Sackett entered he dropped it and replaced it with an immense iron punch bowl that had belonged to a Visconti.

To add to the terror of the scene, Visconti's face was bloody and Strozzi limped from a wound in the leg. Visconti holding the longer sword, his enemy dropped his own and grabbed a ike. This gave him such an advantage that it enabled him to drive his enemy into a corner. But near Visconti in a rack was a gun with a barrel nearly as long as the pike. Seizing it and deriving an advantage owing to his own superior length, he began to poke his adversary with it on something like equal terms. In this way the cornered man gradually forced his adversary to the middle of the room. These changes in the situation required but very little time. It required more time by far for Sackett to recover from his astonishment at this mediaeval struggle in the opening of the twentieth century. He didn't know whether to be the more amused or astonished. The scene may have been absurd, but there was no time for laughter. Jeannette gave Sackett an imploring look. Seizing a battleax, he ran up to the combatants and began to beat down their weapons. He was not so furious as they, and this absence of anger gave him a decided advantage. Finally he secured a position between the two.

times. She wished she might hear the bell clang in the campanile, calling the citizens of Florence into the Piazza Senora for one of those free fights that in bygone days had strewn the pavement with corpses. If she saw a crowd gathered about a fallen horse her fancy pictured a Visconti and a Strozzi had met and fought.

Months passed without either of the two suitors gaining any advantage over the other. Meanwhile each had made inquiries through his bankers of the financial standing in America of John Louton, and the report came back A1. When the meaning of this was explained to them their love waxed exceedingly strong. Consequently their rivalry grew hot and their hatred of each other even hotter.

There are people who do queer things, whose motive is unintelligible to any one else, and often they are ignorant of it themselves. On the one hand, Jeannette Louton had come under the influence of fourteenth century Florentine life: on the other, she was American through and through. There was a bit of spice in her makeup. Her Italian suitors were so wrapped up in the importance of that past from which they derived their own importance that when some ludicrous thought concerning it came to them from Jeannette they did not dream that it could be interpreted save with profound respect for the Viscontis or the Strozzis of old.

In Jeannette there must have been a mingling of currents, on the one hand the mediaeval stream, on the other that up to date American stream so unintelligible to Europeans. At any rate, she went back into mediaevalism in a remarkable fashion and returned to the twentieth century very much alarmed. The feuds of the Guelphs and the Ghebelines were renewed in the two princes. When they met on the banks of the Arno or in the Boboli gardens they would glare at each his wife all the same.

"Gentlemen," he said, "what means this unseemly row in the home of a lady?"

"They don't understand English," said Jeannette. In a word she explained the situation.

Sackett understood no Italian, but he was capital at pantomime. Putting his left arm about Jeannette, he waved his right in the air, while a sublime look rested on his face, as much as to say: "I am the victor in this case. The lady falls to me."

Jeannette, fearful that if she denied his right to her the two princes would renew the fray and kill each other. denied nothing. Indeed, she clung to the party of the third part as her only refuge.

"Senorina," said Visconti, "do we understand that this gentleman is your betrothed?"

This being in Italian, Sackett did not understand a word of it. and the lady was free to say what she liked. "I have loved him since I was a lit-

tle girl," she declared. "Then, senorina," interposed Strozzi, "may I ask what is the use of this combat?"

"No use whatever, I assure you." Both men had words of reproach on their lips; but, to do them justice, they were too gallant to speak them. They threw down their weapons, threw off their accouterments and, making a bow to the lady, in which they nearly bumped their heads against the floor, turned and marched out with all the precision, stiffness and seriousness one sees in the portraits of their ancestors in the Petti gallery

Ned Sackett asked Jeannette what had passed between her and her suitrs after he had separated them. She said she had told them that Ned was her brother and would kill both of them unless they kept the peace. Sackett took her back with him as
