11.50 PER YEAR IN ADVANCE

Number 21

The new pay day law, which takes effect September 1, requires employers to pay for each two weeks of a month on or before the first or the fifteenth of the succeeding month. This will not make so much difference to Gladstone, where most pay days are semi monthly now, but will involve a readjustment by the Soo Line for its road employes, and by the Cleveland Cliffs Co. The Cliffs company will pay on the tenth, and probably the twentieth or twentyfifth, the date not yet being determined. fifteenth of each month.

The Rhodes cleared this morning from the Soo docks. The St. Paul will arrive Monday night.

treatment is to be sure you are get- spring. ting something that will not injure you or kill you. There are only two safe ways-one is get a prescription from a good physician, then have it put up by a registered pharmacist, ment has undertaken to conduct a suitwho will correct any mistakes that could possibly happen by an error of the physician. The other way is to get the remedy made for what ails you made by the Rexall Diug Co. The Rexall remedies are prescriptions for each ailment, written by the best physicians, carefully checked and put up by the most competent druggists and Store in each city.—Advt.

WANTS ROAD WORKERS The county road commission met Friday and rejected all the bids for the Portage road. The engineer was accordingly instructed to grade and ditch the road by day labor, or hire it done by the rod. He will therefore receive proposals for doing this work at any point on the road. The contract for clearing half a mile of the Maywood road, to meet the Alton road, was awarded to Gabriel Lindgren for \$415.

finished the survey of the road from several places straightened, or given a their residence here. better grade, above Rapid River. Some work will be done this fall to improve the road as it now stands. The Beaver road is now nearing completion, and this is practically all that will be done

FULLER FOR GOVERNOR.

We notice that some of the southern Michigan newspapers are suggesting O. B. Fuller, the present auditor general, as a possible republican candidate for governor of this state, Barring the fact that Mr. Fuller comes from the upper peninsula we know of no good reason why he shouldn't be engineer figures \$1.40 a foot including chosen. He has made a great record Fourth street sewer, which is to drain Moreover he knows the whole state of much of the time in recent years may count in his favor in the lower peninsula and maybe they won't hold his

HARD TIMES FOR QUACKS.

The Delta has received a letter from Prosecutor Strom, uniform with others sent out to publishers of the county. Mr. Strom calls attention to the statute of 1911, prohibiting advertising quack doctors, and which has been upheld by the supreme court in the conviction of a firm of the most notorious ones in the state. Says the prosecutor:

"There is a concerted movement throughout the state on the part of the people and the State Board of Registration in medicine to prosecute and punish persons engaged in this business of advertising fake and impossible and improbable cures, especially on the part of traveling specialists who never stay in one locality long enough to be held responsible for their acts." This is true, and it is a hopeful sign. The Delta many years ago declared and adhered to its policy of rigidly excluding this noxious advertising, and the peripatetic fakir has been unable to secure admission to these columns.

The Delta's rate card plainly states that "no medicine or medical advertisements are inserted." Few, perhaps, have noticed this, except the physicians, but it has been noticed by them in the meetings of their organization. The newspaper which advertises the wandering quack is no better than the quack himself and needs to "feel the halter draw" whatever may be its opinion of the law.

GOOD FOR BILL!

ENVOY AT CAPITAL

JOHN LIND ARRIVES IN MEXICO CITY-NO OUTBREAK MARKS HIS ARRIVAL.

WILSON TALKS TO SENATORS

President Tells Three of His Proposals as Lind Reaches Mexico-Conference Discloses That Executive Has No Definite Plan.

Mexico City, Aug. 11.-The Huerta demonstration, which had been awaited with great fear by the foreign residents of the Mexican capital, took place without any untoward incident occurring to justify the gloomy predictions that had been made.

As a manifestation of confidence in the encouragement for Huerta, the whole affair fell flat. The "visas" that marked the triumphal entry of Francisco I. Madero after he had crushed Porfirio Diaz were completely lack-

During the entire parade there was no evidence of anti-American feeling. It is believed that the leaders were warned that the relations between this country and the United States were too unsettled to permit any outbreak at the present time. Lind Arrived in Mexico City.

John Lind, personal envoy of President Wilson to investigate conditions in Mexico, arrived here. He was accompanied by his wife. Neither the envoy nor Mrs. Lind showed any nervousness, despite the rumors that had reached here that Mr. Lind might be attacked on the train bearing him to the capital.

"There is absolutely nothing I can say as to my actions and plans," he stated to a correspondent. "I shall be guided by circumstances. I cannot tell how long I shall stay."

There was not even a casual meeting between Mr. Lind and the author-

ities of Vera Cruz. A message from the state department at Washington was handed to Mr. Lind when the battleship New Hampshire arrived. With William Bayard Hale, who also is in Mexico as a personal representative of President Wilson, he went over it carefully. Both appeared to be impressed with its contents. An official understanding of the Mexican situation was reached later by the two.

Sends Warship to Americans. Responding to urgent appeals for assistance from Americans at Laguna del Carmen, Admiral Fletcher sent the U.S. S. Michigan to that port late Thursday. The report was that Lagunda del Carmen was threatened by rebels and bandits. The admiral has received no report from the Mich-

Wilson and Senators Meet.

Washington, Aug. 11.-What is officially described as a "get-together" meeting on the Mexican situation was held at the White House at night. The president met both Democratic and Republican members of the senate for- Senator Presents Bill to Make Large eign relations committee and talked with them an hour and a half. Secretary of State Bryan also was present.

The meeting failed to show that in mind for the solution of the Mexican problem.

At the conclusion of the conference President Wilson said it had been held to exchange views and information and to clear up mistaken impressions that have resulted from the publication of incorrect reports. He indicated his belief that party lines will not be drawn in congress in the matter at issue and that both parties will consider it a matter of honor to act together as all are Americans.

Wilson Reveals Three Things.

Three points were made known by the president to his visitors. Those points in order of precedence are:

That under no circumstances will the Washington administration recognize the Huerta government, for reasons which the president deemed it unnecessary to state.

That former Gov. John Lind of Minnesota has gone to Mexico without any credentials to advise the embassy as the direct personal representative of the president and also to make a special report to the president regarding the situation in the country as he gathers it to be, and give his views as to what can or ought to be done.

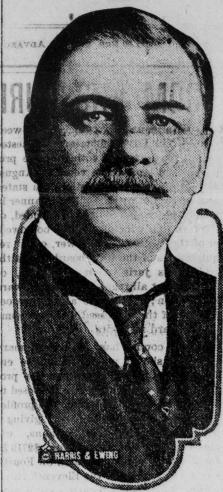

That in all probability de facto President Huerta eventually will recognize the peaceful intentions of the United States-this is the president's belief at least-and thus pave the way for the holding of an election and the installation of a government in the City of Mexico which this government consistently can recognize.

Mexican Lobby Is Denied. That the president was justified in having the heart to heart talk he had with the members of the senate foreign relations committee was shown by the debate which occurred in the senate.

The outburst came when Senator Smith of Michigan declared that S. G. Hopkins, a Washington lawyer, as representative of the constitutionalist forces, "had the ear of the state department," and "had much to do with the removal of Ambassador Wilson."

Hopkins and Felix Summerfield, he charged, who "had charge of the Maderista propaganda on the border for the last two years," were engaged now in Washington attempting to influence the action of the United States toward Mexico. Hopkins, Smith said, received \$50,000 from the Madero government for services to that cause. and "had the ear of the Taft government, and, he believed, still had the ear of the state department."

DR. A. D. MELVIN

Dr. Melvin, chief of the bureau of animal industry of the department of agriculture, has gone to the rgentine republic to investigate slaughter house conditions there because so much beef is now imported from that country. He will also visit Brazil, Uruguay and Paraguay.

the senate, Mr. Hopkins said:

"The charges of Senator William Alton Smith are deliberating and ridiculously false in every respect. Felix A. Sommerfeld, special agent of the constitutionalist government, has had no discussions on this subject with anyone connected with the United States government."

Wilson Sees Plot to Force War. President Wilson let it be known here that he was inclined to believe there was an organized desire-proceeding from sources unknown to him-to bring on a war between the United States and Mexico.

The president does not regard the movement as extensive, but as very troublesome, and referred to misrepresentations in some individual news papers. He indicated that he shared somewhat the views of Senator Williams, who declared in a speech that an organized lobby existed to involve the United States in war.

the Mexican situation had improved in many respects.

PLANS NATIONAL RURAL BANK

Sums Available on Farm Security.

Washington, Aug. 11.-A national President Wilson has any definite plan | rural banking system was proposed in a bill by Senator Fletcher, chairman of the American commission on rural credits and also of the federal commission on rural credits appointed by the president.

The bill proposes: System of local national rural banks owned and operated by farmers. A rural national bank in each state. to be owned and controlled by the

local banks and stockholders. National rural bank of the United States, to be located in Washington to be owned entirely by the state rural

MORE REGULAR ARMY MEN

Chicago Recruiting Stations Asked to Use All Possible Means to Increase the Enrollment.

Chicago, Aug. 11.-United States army recruiting officers are taking Lippett of Rhode Island. every possible means to recruit men for the regular army. The action is in accordance with urgent orders from trine that New England must be cod-Washington to increase the enrollment.

"We have had orders to get more men," an official who is acquainted with the recruiting situation said. "There are of course no reasons given in such an order and a man can draw only his own conclusions. We have been having orders right along to try to increase the army and no undue significance should be attached to the order coming at this particular time."

12 KII'ED IN CANAL ZONE

Quarry Slide Near Colon, Panama, Is Fatal to American Engineer and Eleven Other Men.

Panama, Aug. 12.-News of the killing of 12 men in a quarry slide at Porto Bello, east of Colon, was received here by wireless. Among the dead is Charles Nyland, an American enered and rescue parties are digging for the others. Porto Bello has been age stamps and a litle loose change. the principal source of rock supply for the canal work.

Former Canal Chief Fails. New York, Aug. 12.-The John F Stevens Construction company, whose president, John F. Stevens, was appointed by Theodore Roosevelt chief enginer of the Panama canal, filed American embassy at Berlin, in suca voluntary petition in bankruptcy. The liabilities are listed at \$318,743. His selection has been approved by When told of the charges made in | and assets at \$301,552.

TO ANSWER CHARGES

BARTHOLD NOTIFIES HOUSE LOB-BY QUIZ HE WILL REPLY TO MULHALL STORY.

REFLECTIONS ON COX UNTRUE

A. B. Marshall, in Letter to Chairman Overman, Says Note He Wrote Regarding Ohio Governor Was Wrongly Interpreted.

Washington, Aug. 12.-Representative Richard Bartholdt of Missouri notified the house lobby investigating committee he would be glad to reply to all charges by Col. M. M. Mulhall, but on account of his wife's illness would be unable to return from Germany before September 30. Bartholdt denied he ever yielded to pressure from the National Association of Manufacturers in its votes against labor measures.

Mullhall was the first witness and said Marshall Cushing engaged him to employment did not become regular

Had Secret List of Employes. Mulhall was questioned about other ness was to get information and do lobby work. He said that Cushing had a secret list of employes on which they were merely designated as No. 1, No. 2, No. 3, and so on up to No. 15. Mulhall said he was No. 11.

Mulhall said he did not know for a certainty that anybody on this secret list was on the pay roll of the N. A. M. except himself. He knew that Representatives Littlefield of Maine and Jenkins of Wisconsin were on the list.

Reflection on Cox Unwarranted. Chairman Overman of the senate lobby inquiry committee read a letter from A. B. Marshall of Dayton, O., stating that the interpretation placed upon a letter produced by Col. Martin M. Mulhall reflecting upon James M. Cox, now governor of Ohio, was unwarranted. According to the letter, produced by Mulhall and bearing Marshall's signature, the acquisition two terms, and had been a member of a postoffice site in Dayton was held up by a real estate combine of which

Note Reiterates Treaty Has Been Violated-Action by U. S. Is Needed to Preserve Friendly Relations.

Washington, Aug. 11.-The govern-There is no occasion for alarm in ment of Japan has not relinquished its the opinion of the president, who told purpose to compel the United States callers that within the last 48 hours to grant the same privileges to its subjects as are accorded to other foreigners.

Information received at the state department is to the effect that the Tokio authorities have prepared a strong rejoinder to the latest communication of Secretary Bryan. It reiterates that the treaty has been violated by the California land law and by action by other states, and that in the interest of the friendly relations of the two countries it is necessary for this government to act.

It is evident the two governments are struggling in a deadlock which it will be extremely difficult to break Because of the sentiment on the Pacific coast and because the question of state rights is involved, the administration feels it can go no further than refer Japan to the courts.

Aged Alabama Statesman Succumbs to Pneumonia in Washington City After Long Illness.

Washington, Aug. 9 .- Senator Joseph F. Johnston of Birmingham, Ala., died at his apartment here. Senator Johnston had been in poor health and had not attended sessions of the senate for a week, but his trouble was not diagnosed as pneumonia until a few days ago. Although the senator's son, Forney Johnston, had been summoned from Birmingham, it was believed Thursday night that the senator was not in any immediate danger.

Senator Johnston was seventy years old, had served through the war between the states in the Confederate army, was governor of Alabama for of the senate since 1907.

The death of Senator Johnston Cox, then in congress, was alleged to weakens the Democratic majority on be the representative. Marshall dis- the tariff bill, though party leaders claimed all intention of reflecting upon figure they still can pass the measure by one vote, 48 to 47. The previous calculation had been 49 to 47.

> In the event that any western senator, who does not strongly favor free sugar, should vote against the bill, the Democrats had been counting on the vice-president to carry the day in the event of a tie. Senator Johnston's death, provided his seat is not filled before the vote on the tariff bil!, removes the vice-president from the range of possibilities.

Danger of the Democrats losing their majority may be obviated if the legislature of Alabama, under the seventeenth amendment to the constitution, provides quickly for the filling of the vacancy caused by Senator John-

ston's death. Senator Johnston already had announced his intention to be a candidate for re-election. Representative Hobson had taken the stump against him and the names of Representative Clayton and Representative Heflin have been mentioned also as candi dates. Majority Leader Underwood of the house also is a possibility.

PAVILION FALLS: MANY HURT

Terrific Storm Sweeps Philadelphia-Baby Is Slain and 100 Hurt-\$1,000,000 Loss Is Reported.

Philadelphia, Aug. 11.-Two hundred persons were caught in the collapse of a band pavilion in Fairmont park Sunday afternoon, when the worst storm of many years struck this city. Rain, bail, lightning and a 60mile wind did great damage all over the city, but the worst accident was that at the park. One baby was killed and 15 of the most severely injured are in hospitals near the park. More than 100 of the injured man-

aged to drag themselves to their homes. The storm lasted four hours, when

the city began to take account of its loss of life and property. The latter, based on a conservative estimate, will reach more than a million dollars in

CORN NEAR FAILURE MICHIGAN NEWS

GOVERNMENT CROP REPORT SAYS WINTER WHEAT MAY LIGHTEN LOSSES.

300,000,000 BUSHEL DROP

August Federal Figures Show That Yield Will Be 2,672,000,000 Bushels-Kansas and Oklahoma Are Hit Hardest.

Washington, Aug. 11 .- A loss of 300. 000,000 bushels of corn, the nation's greatest farm crop, has resulted from the great damage wrought by drought and other conditions since July 1, the government's agricultural experts estimated on Friday in their August crop report. A total production of 2,672,-000,000 bushels of corn was predicted. The government crop report given

out on Friday from Washington was one of the most sensational that the country has seen. It reduced the estimated yield of corn 300,000,000 bushels from the July figures to 2,672,000,000 bushels, or 452,000,000 bushels less than last year's harvest.

Kansas and Oklahoma have been hit harder than any other states, while their prospects earlier in the year were regarded as excellent, but they have suffered practically a crop failure except in a few spots in eastern Kansas and in northern Oklahoma. The official returns show a loss of 98,-000,000 bushels in Kansas and 52,000,-000 bushels in Nebraska. There is a reduction of 246,000,000 bushels on practically 50 per cent. of the corn acreage of the country.

Kansas, Oklahoma and Nebraska have 19 per cent. of the country's acreage, and their combined losses are the worst since 1901, when Kansas raised only 61,000,000 bushels. In 1894 Interstate company has harvested 75,drought made a crop failure in the states west of the Mississippi river, here. and the country had a crep of only 1,212,000,000 bushels.

A record winter wheat crop will help to lighten the losses made by corn, but as the country consumes nearly 3,000,000,000 bushels annually it cannot completely make up for the defect | ron will address a pioneer meeting in in the greatest feeding crop, notwithstanding the fact that corn is selling higher than wheat in the market west of the Missouri river.

The winter wheat crop is 511,000,000 bushels, against a previous record of 493,000,000 bushels in 1906. The spring wheat crop increased 15,000,000 bushels in July and the three northwestern states have 174,000,000 bushels, which is almost an average. The total wheat crop of the country of 744,000,000 bushels is only 4.000,000 bushels below the record of 1901 and 14,000,000 bushels more than last year's yield.

bumper returns, there is a loss of 886, 000,000 bushels, or 16.1 per cent., but as compared with 1911 the gain is 180,-000.000 bushels, or 4.1 per cent.

Owing to the large reserves carried into the bay at that point. over from last year of corn, oats, hay and rough feeds, the losses in this year's crop may be partially offset. A drop of 40,000,000 bushels was susbraska and Missouri suffered heavy losses, the former being off 52,000,000 bushels during the month, and Mis-

prospects for the month. Comparisons

by states follow:	
	Estimate
State.	Aug. 1, 1913.
hio	156,600,000
ndiana	
llinois	. 322,900,000
owa	. 339,200,000
lebraska	
ansas	
fissouri	. 189,000,000

A record crop of winter wheat has been harvested, the aggregate being 510,519,000 bushels, an excess of 111,-000,000 bushels over last year's final returns and 9,000,000 bushels larger than the bumper crop of 1906.

243,904,000

A heavy loss was shown in the hay and white potato crops of the country, the condition of the former being lowered almost ten points last month, but the indicated crop of 64,000,000 tons is only 9.000.000 tons less than the bumper returns of last year, and 9,000,-000 more tons than the short crop of 1911. The white potato crop of 339,-000,000 bushels is 82,000,000 bushels less than last year's final returns, but 46,000,000 bushels in excess of 1911. With the exception of rice, all minor crops are less than last year, but gen- | and order detective arrested on erally in excess of 1911.

UNCLE SAM SEEKS RAIL DATA

Asks Regarding Dispatch of Soldiers to Border-Trains on Way Twelve Hours After Notice.

Washington, Aug. 11.-That the United States government is getting ready to act in the event of being forced into an intervention move, is evident from the fact that inquiries were made of the Santa Fe railroad people, and to how quickly cars could be provided for troops destined for the southwest. The war authorities received a re-

sponse from the Santa Fe road that in twelve hours after notice trains could be provided for carrying the first installments of troops.

Switzerland for Peace Plan. Washington, Aug. 11.-Switzerland has accepted in principle Secretary Bryan's peace proposal, making the twenty-seventh nation so recorded.

TERSELY TOLD

Lansing.-Indications of rabies were found by State Bacteriologist M. L. Holm in the head of a dog which was sent for examination from Menominee. The animal is said to have bitten several children before it was killed.

Battle Creek.-General clean-up orders were issued to all local bakers by City Food Inspector Barnard. All of the bakeshops were visited and conditions that were far from sanitary were found.

Saginaw.—James Rogers, twentyseven years old, was electrocuted at the Dow Chemical plant, Midland, when he stepped into a vat of brine, charged with 3,000 volts of electricity.

Lansing.-Fifteen minutes after he had been officially appointed a policeman, John H. Moore arrested a member of the police and fire commission for driving his automobile without a,

Cummings, a chum of the dead lad and a bellboy at the Despite the immense loss sustained clubhouse, received a message anby the corn crop, the aggregate yield nouncing the critical illness of his of the five principal grains is the third | mother in Albion and he was obliged to largest on record, being 4,647,000,000 leave his dead friend and go to the bushels. As compared with last year's bedside of his parent. It was learned that several persons have been drowned in the same spot where Souter went to his death, and it is believed a spring of cold water bubbles

Battle Creek.-While at Graham lake, 12 miles from here, with a party of boys, seventeen-year-old tained by Illinois during July, while Harold Lucas was accidentally shot Iowa dropped 11,000,000 bushels. Ne- and killed by Clarke Eccles, a companion. Young Lucas was sitting on the side of a row boat, while Eccles was attempting to adjust a 22-caliber souri declined 37,000,000 bushels. Ohio rifle, when the weapon was discharged. and Indiana fairly maintained their Lucas fell to the bottom of the boat. Eccles was not taken into custody. The boy was rushed to Nicholas hospital, where it was found that the bullet entered the back, near the spine and came out at one shoulder. He died a few minutes later. Lucas is the son of Constable Henry Lucas of the police department and had gone to the lake to shoot turtles. He was an only son, and the mother is prostrated.

> Frankfort. - Business men of Frankfort, Elberta and Arcadia have united in planning a road building "bee" for August 15, when farmers, merchants and laboring men will unite in wiping out the Gilland hill and incidentally completing the last stretch of the trunk line road, "Chicago to Mackinaw," between Manistee and Frankfort. The Gilland hill is at present a great sand mountain, over which a strong team can scarcely draw an empty wagon. It is directly in the path of the fruit grower, and by making it passable the growers will save thousands of dollars each season in time and horse flesh.

> Kalamazoo.-Dirk Hinga, the law a charge of intoxication, pleaded not guilty when arraigned in court and demanded a jury trial. Bail was fixed at \$400, which was furnished. This is the largest amount ever demanded in municipal court in a case of this kind. When Hinga was taken to the court from jail, a crowd followed, hooting and yelling at him. Hinga is well known all over Michigan because of the system he used in securing convictions of saloonkeepers.

> Detroit.—Three men were killed and two others severely injured when an automobile carrying them to Toledo left the road a short distance from Ecorse, a Detroit suburb, and plunged into a deep ditch and turned over.

> Port Huron.—Thirty-five members of the St. Clair County Bar association were the guests of Burt D. Cady at a farewell banquet at the Elks temple, in honor of Clifford W. Crandall, who has left the city to take up his new duties as a professor of law in the University of Florida.

WATCH MARKETS FOR DOPED MEATS

STATE INSPECTORS ARE BUSY ENFORCING THE PURE FOOD LAWS.

SAFEGUARD PUBLIC HEALTH

New Statutes Will Greatly Help Work of Food Inspectors and More Rigid Enforcement of the Law Is Planned.

Lansing.-In connection with a vigorous campaign which is being waged against unsanitary conditions in all places where food of any description is sold or prepared, inspectors of the state dairy and food department are paying special attention to the inspection of meat markets.

"In the 'dog days' the meat markets form the biggest problem we have to contend with," said one of the inspectors. "Meat spoils so rapidly that unless close tab is kept upon the dealers, public health is seriously jeopardized. In many instances a dealer will unwittingly sell meat that is near decomposition, but the majority of the violations of the state laws covering the matter are intentional. We are determined to bring the dealers to time.'

After August 15 the inspection will become more rigid, as on that day a number of new laws that will strengthen the powers of the department go into effect. The more important of the new laws are: Insanitary milk and cream statute, which provides for the inspection of creameries, prohibits the sale of unclean milk or cream, and provides that milk bottles and other containers in which milk is sold shall be cleaned before being returned. The law also provides that ice cream cans shipped outside the city must be thoroughly cleaned before being shipped back; a misbranding law, similar to the national law covering the same subject.

The pure sausage law, which provides that sausage shall be made from meat and cereals, and prohibits the use of dyes, acids or any preservatives in the manufacture.

There is also a weights and measures law, which gives the state dairy and food commissioner the power to prescribe rules and regulations defining the standard weights and measures to be used in the state; the hotel law, which among other things provides that all beds must have sheets and bedbugs must be exterminated.

On August 21 a car containing a board of health, will arrive in the city be held here for three days.

"Blue Sky" Warning Out.

State Treasurer John Haarer, who is a member of the sethis sort of literature may encounter into effect, August 15.

There is a good crop of the same organization, and Cyrus of pumpkins on the prison farms, and W. Phillips, member of the New York the canning of these and apples will legislature, will be among those who follow the beans and tomatoes.

City Itself Must Decide.

After reading the decision of Judge Murphy of Detroit, in the moving picture theater cases, State Fire Marshal Winship gave out the following state-

"With regard to the press dispatch from Detroit, indicating that Judge Murphy has denied the demurrer of the state authorities to the restraining order preventing us from closing certain moving picture theaters in that city, operating on the second floor, I have only this to say:

"The decision, as rendered by the Detroit judge takes up only one phase of the law, and seems to indicate that the state law is annulling the local ordinance.

"He does not go into the merits of the case, as to whether these theaters are dangerous to life and we are pleased to note that the newspapers of Detroit stand with the state authorities absolutely, in condemning these theaters as dangerous. If this decision of Judge Murphy's stands as the law, and the people of Detroit are satisfled with maintaining such dangerous places of amusement it is more their concern than ours. We are attempting to do our duty, as state officials, in enforcing a law designed for the protection of life and limb.'

Health Conditions Good.

Secretary Dixon of the state board of health, received word that there are three well developed cases of small pox in Saline, Washtenaw county, and he will go there and order a general vaccination if conditions are as reported.

"Through the state in general," declared Doctor Dixon, "health conditions are better now than at any other time since I have been secretary of the board. The summer resorts are cleaner, the railroads are respecting the state law better, and, generally speaking, the health of the people of the state, much improved.

"Although the months of September and October are the typhoid months, still it is possible to predict with a fair degree of certainty, that the typhoid death rate will be smaller this year than ever before."

George Dumphy Named.

George Dumphy of Rochester has been appointed state veterinarian by Governor Ferris. The appointment is for five years, beginning September 2. O. J. Howard of Coloma, Berrien county, is the incumbent.

Many File Applications. State Labor Commissioner Carton is in receipt of more than 1,300 applications from St. Clair Flat settlers who desire to take advantage of the law passed by the last legislature, giving the state land department power to issue 99-year leases to the residents feet long and that all cockroaches of the Flats who are now occupying lands upon which they pay no taxes, and to which they have no title. Comomprehensive pure food exhibit, that missioner Carton says the leases are has been arranged by the state dairy being executed, and in a short time and food department and the state the state treasury will be enriched several thousand dollars. For years over the Pere Marquette. The car will the land at the Flats has been a source of litigation and contention. Commissioner Carton states that more than \$64,000 has been spent by the state in making surveys and trying to get the matters adjusted so the curities commission of the last lands could be turned over to the setlegislature, calls attention to the fact tlers, many of whom have occupied that companies offering stocks and them for years, yet have never had a bonds for sale will not be under same title. The tentative plans for Escanaba's new city charter provide for three commissioners to conduct the business affairs of that municipality, If the scheme goes through, we predict that the Journal will have something like real graft to expose after such a plan has been in operation for a few years. -Soo Times.

The Michigan crop report for August shows that crops are without exception in better condition in the upper peninsula than in any other part of the state.

The average estimated yield of wheat per acre in the State is 15.05, in the southern counties 14.99, in the central counties 14.81, in the northern counties 14.77 and in the Upper Peninsula 18.88 bushels. Crop correspondents, quite generally, report wheat of fairly good quality. The estimates at present in dicate that the State yield will be very close to 12,000,000 bushels. The yield per acre of hay and forage in tons is 0.98 in the State, 0.95 in the southern counties, 0.94 in the central counties, 0.97 in the nothern counties and 1.41 in the Upper Peninsula. Almost all other produce is in similar proportion.

It's an ill wind that blows nobody good. In reporting the few forest fires of the summer, which burned over only four square miles, the northern forest protective association remarks that the comparatively small blueberry crop has removed one of the sources of grave danger. The large timber holders plan to post their lands and to issue camping and hunting leases which will permit only persons whose carefulness is vouched for to come upon their lands.

According to a statement from the auditor general's office, there are 453 mineral right reservations taxed in Delta county at an assessed valuation of \$2,425. Of these, the taxes on 44 are unpaid. The fewest were in Chippewa county, three totaled at forty dollars; the most valuable in Iron county, \$468,153. The greatest number is in Dickinson, 8881. The total for the peninsula is 35,833 assessed at about \$42 apiece, on the average. In this end of the peninsula, of course, mineral reservations are of little value, and serve but to clutter up the description books and embarrass purchasers. The state has adopted the pernicious example, too. In many cases, however, the assessor has only returned the property as "value unknown" which defeats the purpose of the law, to discourage the holding of reservations on land.

Mayor Kartheiser has ordered all dogs in Menominee killed or muzzled, as the result of the outbreak of a mad one last the tolks don't appreciate Thursday. Its brain was analyzed at Lansing, showing that it had rabies in a advanced form. The animal had bitten three children, one seriously. COST OF LIVING.

To reduce the cost of living is the slo gan of Free-Trade Democracy now. did not always sound that war cry. I 1896 William Jennings Bryan, then candidate for the Presidency, said:

A general fall of prices is but an other definition for hard times. If th people cannot buy, the retailers canno sell; if the retailers cannot sell, th wholesale merchants and manufactures must go into bankruptcy.-Los Angele

GOVERNOR FULLER.

Down in the lower peninsula, when politics is prevalent the year round, they are begining to speculate on Governor Ferris' successor. A Clare county editor has this to say about one of our well known state officers.

" Oramel B. Fuller, our present auditor general will do more to unify P. J. LINDBLAD, PROP. PHONE 51. and harmonize all factions of the party than any one else who was suggested. Mr. Fuller is in the prime of life, has had years of experience in state affairs, and for many years has been one of the most active and prosperous business men in the upper peninsula. He was a member of the house in 1893, 1895 and 1897; of the senate in 1901, 1903 and 1907, and is serving his third term as auditor general.

"As a legislator he was conservative but absolutely fearless in the discharge of his duty as it appeared to him. He always had the courage to stand by his convictions, and worked for what he believed was for the best interest of the whole state. As auditor general he placed his department on a thorough business basis and politics have not been allowed to interfere with the efficiency of the work of that department of the state government.

"Mr. Fuller, from his experience as a business man, a legislator and as auditor general, is thoroughly equipped for the office and knows just the needs of the state. He is no theorist, but a practical business man of tried and educated judgment. The republicans of Michigan can find no better candidate for gubernatorial honors in 1914 than Oramel B. Fuller."

KING OF GAMBLERS Cloverland

Who Bought Monaco.

THEN STARTED MONTE CARLO.

A Bold and Reckless Soldier of Fortune, He Instituted the Gilded Gaming Palace That Now Wins Millions Yearly For Its Wealthy Owners.

Homburg, bought the principality of Monaco, boots and baggage. The genius of gambling had claimed many an daily. individual, many a noble and his estate and not infrequently an entire city, but it had never before undertaken such a conquest as this.

Francois Blanc is one of the most remarkable of all soldiers of fortune. Of his early history little is known. He was seized by the authorities of Homburg for having made fraudulent use of the telegraph in relation to stock exchange news received from Paris. His method was one of the very oldest -namely, the corruption of the employees. It seems that at this time the German law did not precisely cover this species of swindling, and he and his twin brother escaped with a sentence of seven months.

Francois Blanc was not discouraged. He had accumulated 100,000 francs, and with that sum he established the Kursaal at Homburg. The Kursaal flourished, and Blanc might have gone on there to the realization of his ambitions but for the national sentiment he was shrewd enough to foresee. Blanc realized that the time was not ! far distant when the German people would put down the sort of gambling in which he was engaged, so he began to look about for some new country in which to set up his temple of fortune.

On the coast of the Mediterranean, between the kingdoms of France and Italy, there was a little independent principality. It was not more than two miles and a quarter long and hardly three-quarters of a mile wide, but it was an independent kingdom, with an old and royal house.

Charles III. was the reigning prince, but he was a tattered monarch, and his court was a beggarly make believe. In | his desperate situation it is said he applied to a shrewd Parisian for counsel, who advised him to set up gaming tables and thereby "ruin other people's subjects since you have already ruined your own."

Charles III. followed that pregnant advice. He sold a gambling concession in the principality to two adventurers, Duval and Lefevre. These men built the casino, but their venture was not particularly successful. They asserted that Charles' avarice could not be satisfied, and when Francois Blanc arrived on the Mediterranean, around 1860, he bought the concession and moved his gambling establishment from the Kursaal at Homburg to Monaco.

Francois Blanc was a bold and daring adventurer. The little principality was divided practically into three towns-Monaco, Condamine and Monte Carlo. It was the last that Francois Blanc occupied. He employed the best architect to be had, built a great casino, laid out beautiful gardens and terraces and expended over \$3,000,000 upon the mere prospect of making Monte Carlo the gambling headquarters of Europe.

Francois Blanc, the ex-convict from Homburg, was no ordinary man. Lord Brougham said that Blanc was the greatest financier of his time. At any rate, his great financial adventure justified itself. Blanc came to live in splendor. He married his daughters to princes, he accumulated a fortune of 250,000,000 francs, and he left behind him an establishment that nets at least \$5,000,000 a year in profits.

More than this, Francois Blanc bought and paid for the principality of Monaco. He paid Charles III. 500,000 francs a year and all his expenses, with a percentage of the profits; he kept up all the roads and gardens for the principality; he paid the police and magistrates and all fixed charges of the kingdom. Moreover, when the merchants of Nice endeavored to persuade the French senate to resist gambling at Monte Carlo and when the subjects of the principality threatened to revolt Blanc, daring and full of resources, had Charles issue an edict abolishing all taxes in the principality, and out of his concession, in addition to what he had already paid, Blanc paid all the taxes

When Albert Honore Charles, the present Prince of Monaco, came to the throne he remained under the thumb of the famille Blanc, and in 1898 the concession they had obtained was renewed for fifty years upon the payment of 10,000,000 francs down, 15,000,-000 to be paid in 1914 and other vast sums, together with practically all fixed charges of the principality. All this is done by a company called La Societe des Bains de Mer de Monte Carlo.

And so the genius of gambling ate a king and his court, a monarch of one of the oldest reigning houses in Europea palace, an army, a principality with its subjects, and a bishop and cathedral to boot!--Melville Davisson Post, in the Saturday Evening Post.

Kept Him Posted. "Conscience is what tells a man when

he is doing wrong." "That may be true in your family," replied Mr. Meekton, "but my wife's name is Henrietta."-Washington Star.

Thou shalt not rise by grieving over the irremediable past, but by remedying the present.

EGGS FROM THE FARM OATS AND BARLEY STUBBLE

Should Be Gathered Often and Kept in Dry Place.

in Handling, Marketing and Shipping They Should Not Be Exposed to Draughts and Should Be Properly Protected.

(By N. E. CHAPMAN.) The common causes of loss may be classed under several heads: Small eggs, dirty eggs, breakage, shrunken and rotten eggs, moldy and flavored eggs. Eggs must weigh two ounces or over to be classed as No. 1. Lighter eggs should be consumed on the farm, rather than be sold at a reduced price. Like eggs too small, eggs abnormally large or misshaped should be used at home, for such will be easily crushed in the case, and are always classed as "seconds."

About five eggs out of each hundred marketed are classed as "dir-

Out of Every Dozen Eggs That Leave Delivered to Customer.

ties." These are stained, smeared, muddy, or covered with filth. The odor of whatever soils the egg will soon penetrate the shell and flavor the contents. Market eggs should never be washed, as they take odors more rapidly and soon are stale. Eggs may be washed, however, for use at home. Eggs carried to market in bran are generally classed as "dirties." The bran adheres to the shell, and is difficult to remove.

It is estimated that eight per cent of the eggs are broken in moving from producer to consumer. Checked, dented or leaking eggs soon sour, and must be marketed at greatly reduced prices. If checked or broken on the way to market, they should be taken home for use in the family.

Eggs should be gathered often and kept in a cool, dry place until the first opportunity for marketing. Broody hens should be taken from the nests at once, and confined by themselves, unless needed for hatching purposes. After the hatching season is over, all roosters should be sold or confined, and not allowed to run with the laying flock during the summer. Hens will lav more eggs. and be in better health without the male birds. Infertile eggs are far superior for preserving, shipping and storing.

Sixty-five per cent of the contents of a fresh egg is water; and because of a porous shell this evaporates rapidly under most conditions, resulting cell appears, which increases in size as the contents shrink from evaporation. Shrunken eggs may be detect ed by "candling," or by gently shaking when held to the ear. When the "gurgle" of the contents is distinct, the egg is questionable. The membrane of such eggs is often ruptured "frothy" eggs, of poor quality. In the summer eggs should receive the same care and consideration as sweet milk and cream, and be marketed daily, if possible. They should not be exposed to draughts of warm air,

Laying Stock.

handling, marketing and shipping. Moisture is the main cause of rotare mainly responsible for this congrain or strong-flavored vegetables,

Custing Cowpeas.

Cowpeas may be cut with the mower, and after getting at least a full day's sun the vines are raked up and of two put into larger bunches and when they are drawn to the barn.

Land Should Be Plowed in August tr Allow Sufficient Time for the Weeds to Rot.

If the oats and barley land is to be

drilled to grain in the fall, it should be plowed in August to give time for the weeds to rot and the ground to settle. says a writer in the Baltimore American. If the ground is dry and so hard as to make it impossible to plow, put three horses in the sulky cultivator. A better implement is the steel cutaway disk. Set the teeth to run deep and cut the ground over. By harrowing the field lengthwise and then across, most of the weeds can be turned under and the hard surface broken up, making it much easier to plow as soon as the August rains set in. The stubble and weeds should be plowed under and not burnt, as these, when rotted, add to the fertility of the soil and tend to make it capable of holding more moisture. Long stalk or strawy manure should either be spread evenly over the field and plowed under or used as a top dressing after the grain is drilled in. If the manure is rotted and fine, spread it on top of the plowed ground and harrow it in as soon as spread. The quickest and most economical method is to use a spreader, as it can then be spread evenly and just the right quantity to the acre. One of the great advantages in the use of the spreader is in cutting up the lumps and strawy portions as it is being spread. Two men with a two-horse spreader will haul and spread more manure than four men will spread the Farm, but Ten Are Fit to Be from wagon or cart. The manure should not be put out in little piles, but spread direct from the wagon and harrowed into the top soil before it dries. There is then no loss of fertility.

DAMAGE BY ALFALFA WEEVIL

Larvae From Eggs Laid in Stems of Plants Work Much Injury by Feeding Upon the Buds.

Although in the middle west no alfalfa harming insect has yet caused widespread damage, Utah farmers have a serious pest to contend with known as the alfalfa weevil. It made its first appearance in 1907, coming from Europe. The adult weevil is a hard shelled beetle, about 3-16 inch long, brown in color with a darker

Adult Male of the Alfalfa Weevil. Greatly Enlarged.

winter in sheltered places much the same as chinch bugs and in the early spring lays its eggs in the alfalfa stems. The larvae from these eggs do the damage by feeding upon the buds for a period of about six weeks if unmolested.

Control methods recommended by the Utah station include keeping the alfalfa growing rapidly in the spring by disking or spring toothing, removing the first crop as soon as serious injury occurs, followed with thorough spring tooth and brush dragging, and rotation of alfalfa every four or five years. As with chinch bugs it is advisible to keep out of the way places clean of sheltering grass and refuse and securing the co-operation of whole communities in fighting the pest.

Horses for Deep Plowing. Deep plowing is essential to good farming to increase fertility and moisture for better crops. Heavy draft horses, says the Live Stock Journal, are the first essential for deep plowing and big loads. Deep and shallow plowing has had a long time controversy and the deep plowing has won the victory for better farming by the scientific experts at the agricultural colleges, and farmers who have good draft-horse teams plow deep, and the farmers with light scrub teams must still skim along and put up with light crops until they can get the heavy draft teams that can pull a big 16-inch plow down to the bear

A Stitch in Time.

that will produce big crops.

Don't forget to fix the fences. A trip around the pasture and field fences now and then will often save trouble, strength, and the time of having to drive the cattle back into the pasture. Animals are almost human when it comes to going where some one does not want them. Remove the suggestion, therefore, by not allowing any sags in the wire or any loose or decayed posts in the line. A wellkept fence is an indication of a good lower its quality. Eggs should not farmer .- C. P. Bull, Associate in Farm Crops, University Farm, St. Paul.

Feeding Effects Wool.

Proper and intelligent feeding adds to the quality of every kind of live stock or product the feeder may have to decaying meat or substances that to put on the market. Even the wool will flavor the product and impair that comes from the back of the sheep is good, bad or indifferent, according to the manner in which it has been

SOME GOOD EATINGS.

An ideal breakfast dish or for a cool night when something hot is relished

Rice Waffles-To a cup of freshly boiled rice add two tablespoonfuls of butter and the yalks of three well beaten eggs. Add two cups of sour milk or cream, a weaspoonful of salt and a teaspoonful of soda. Combine the two mixtures, add enough flour to make a good drop batter and fold in the whites of three eggs beaten stiff. Bake on a well greased waffle iron. Serve with maple sirup.

Cheese Puff-Melt a tablespoonful of butter in a saucepan, stir in two tablespoonfuls of flour and when well blended add a half pint of milk, cook until smooth, season and add a half cup of grated cheese, and the beaten yolks of five eggs. Cook long enough to set the eggs, remove from the fire and fold in the beaten whites. Pour the mixture into a well buttered dish and bake fifteen minutes in a moderate oven. Serve piping hot.

Mint Sherbet-Soak half a cup of chopped mint leaves in the juice of two lemons and three oranges half an hour. Boil two cups of sugar and a cup of water tive minutes, then pour over the other ingredients. When cold strain into a freezer, add the rinds of the fruit finely grated and the white of an egg beaten stiff and a cup of whipped cream.

Date Crackers-Put a pound of seeded well washed dates with a cup of granulated sugar and a half cup of water into a saucepan and cook together until the dates are soft. Cool. Cream a cup of butter add a cup of brown sugar, add two and a half cups of roiled oats and two and a half cups of flour well mixed, stir and mix well, add a half cup of hot water and a teaspoonful of soda. Divide the dough into two parts and roll. Spread with the date mixture and place a second layer on top. Cut with a small cutter and bake in a moderate oven.

It is better to follow even the shadow of the best than to remain content with worst. And those who would see won Secful things must often be ready to cravel alone

-Henry Van Dyke.

SUITABLE BREAKFAST DISHES.

Breakfast is the troublesome meal to prepare, as the appetite is not at its hest and it is so easy to fall into a rut and prepare the same things over and over. Breakfast dishes should be simple, wholesome, and easy of digestion. The hurried breakfast is all too common. Take time to eat a substantial meal, have it well served and a sufficient change to avoid monotony.

Toast-As common as this dish is it ha seldom served in perfection. The bread should be sliced and warmed in the oven to dissipate the moisture then browned quickly on both sides hefore a good heat. Toast should be crisp all the way through, well browned and free from burnt corners or moist, soggy places in the center of the slice. Dry toast should never be piled but served in a rack, buttered toast may be kept hot for a short while over hot water.

Sausage Cakes-Take a pound of sausage meat, add to it a tablespoon ful of chopped parsley, a little lemon rind and grated onion, a bit of nutmeg, and cloves, make into round flat cakes and put into a well greased baking tin and bake for twenty minutes. These sausages may be served with tomato sauce and friend potatoes or plain without any accompaniment.

An omelet is always a good breakfast dish and one may vary them indefinitely with the accompanying sauce or with different seasonings.

Eggs and Mushrooms - Cook as many eggs in the shell as there are persons to serve, remove the shells when cold and chop fine. Cook in a small amount of butter a few mushrooms, add to the chopped egg and turn them all into a rich white sauce made with the top of the milk, a cup and two tablespoonfuls each of flour and butter cooked together. Serve hot on crisp slices of buttered toast.

Bacon should be sliced thin, be thor oughly chilled and be fried crisp and dry, tipping the frying pan to drain the bacon before serving. Bacon is one of our more easily digested fats nila and should be often on our breakfast tables

tad their effect. It is a fact, however,

NICE THINGS TO KNOW.

A cut lemon or a Bermuda onion may be kept fresh a long time by turning the cut side down on a plate and covering with waxed paper.

In a small kitchen where every inch of floor space is valuable have a camp chair, and when not in use hang on a

Dishes to cool on the ice are often most unstable, use a few old can rubbers on the ice to keep the dishes from slipping.

When filling salt and pepper shakers use an orange spoon. It will save spilling the salt or pepper.

When traveling with young children and the stocking is torn or needs mending use a piece of court plaster, it will serve splendid for a time. Apply the plaster dampened to the wrong side of the hose.

When adding water to a vase of flowers, many spots on polished furniture would be avoided by using a small funnel.

Tennis shoes are fine for wearing about the house when scrubbing or cleaning floors.

A short piece of uncooked macaroni put into a berry pie in the opening made for the escape of steam will serve for a chimney and the juices will not waste, but boil up in this small funnel.

When glass stoppers are obstinate about being removed a drop of oil and a quick tap will loosen them.

Cut the round sandwiches with a baking powder can. Several may be cut at a time.

Bath mats may be made from old bed spreads when they are of heavy quality. The lighter weight makes good wash cloths.

A small towel and a holder with a cord attached, both fastened to the apron belt are great helps to a busy house mother, when cooking.

Transplant a few asters into the vegetable garden and when the vegetables are gone in the fall there will be something worth while to look at.

To try is better than the thing you try

To hope is higher than the height attained. To love is greater than the love you

sigh for. To seek is nobler than the object gained, "To wrestle with the angel"-this avails Although the motive for the wrestling fails.

WAYS WITH CHOCOLATE.

Chocolate in nearly all forms is few choice recipes may be appreciated.

Dainty Chocolate Custards - Melt four tablespoonfuls of grated chocolate in a saucepan, add a cup of milk, and cook in a double boiler until smooth. then add three more cupfuls of milk and when hot, pour over a cupful of sugar which has been mixed with the volks of four eggs. Return to the heat and stir until it begins to thicken, but not boil. Add a flavoring of vanila and the whites of the eggs beaten stiff. Pour into small glasses. A meringue may be made of part of the whites and with the addition of sugar

cover the top of the glass. Chocolate Sausage - Blanch and chop a fourth of a pound of almonds. Beam the whites of two eggs in a saucepan, add a cup of grated chocolate and a cup of sugar the almonds and stir over the fire until hot. Remove from the fire, add three teaspoonfuls of vanila, pour the hot mixture into a half cup of powdered sugar and knead it on a baking board. Form into a large sausage and allow to dry

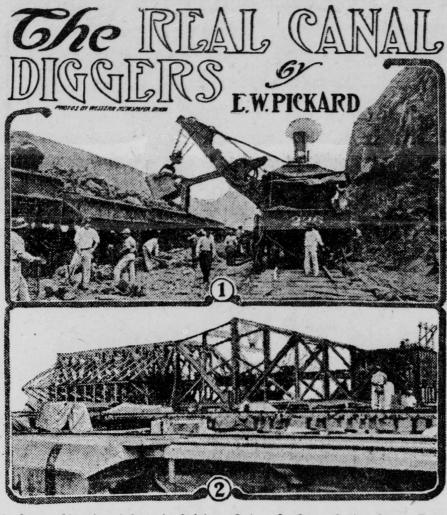

several hours then cut into slices.

Chocolate Pie-Mix a cup of sugar and three tablespoonfuls of flour, add a cup of boiling water. When smooth add two ounces of grated chocolate and stir over the fire until the chocolate melts. Remove the pan from the fire and add the yolks of two eggs add a tablespoonful of butter. Set the sauce pan in a dish of hot water and cover, cook for ten minutes, stirring occasionally. Cool and flavor with the whites of the eggs and two tablespoonfuls of sugar beaten until stiff, cover the mixture after filling a pastry shell previously baked.

Bush, the assistant manager, owing regions of cheap lands, but they are to the absence of Mr. Campbell on enough to be convincing when fully account of the illness of his daughter digested. They open the way to a more complete consideration of the What does the development of the situation. In this more complete conunoccupied and undeveloped areas made by Wisconsin in the National acres of good agricultural lands. The nized international contest; the undeveloped water powers of the weather records and other unquesnorthern portion of the state, that in tionable data. It is thus seen that be generally developed except concur- paigns for development-likewise rently with agricultural development, why we get scores of letters complimenting us upon our methods. The state is to be congratulated that it is These vacant and undeveloped unnecessary to do otherwise than questionable facts. I have spoken of everyone's inter-

est in development. I believe that we have too long looked only to the people who sell land for farms or sites for factories, assuming that they were the only ones receiving benefits from the transactions. For illustration, we will take an ordinary Wisconsin town. A factory is located by some enterprising real estate man. Is that the end, or is it only the beginning of the benefits resulting from the sale of the site? Or, taking the farm land situation, we find that the man who sells a tract of wild land for a farm merely starts a chain of transactions that end, or rather never end, with the merchant, banker, printer, doctor, lawyer, and all others in profits, and to the community. county and state in taxes. The landman spent most of his profits getting his customer and is through in the single transaction, while the others had no initial expense and are never through. Who, then, as a matter of fact, is the most interested in the matter? It is so with new factories A few years ago the undeveloped and in practically every move caicuwould be the effect upon the facsay a good word for this great region. sin, if scores of water powers were tion of the state were doubled (for

> I believe that many, if not most, of the cities and towns of this state should enter the publicity field. We are in an advertising era. Everywhere publicity is shaping largely the destinies of people and communities. The pessimistic will harangue against it as a useless expense, the lethargic will ignore it, but the fact remains that the successful are awake to the dynamic effect of publicity. I believe that if the concerns that find their way into the bankruptcy courts could be catalogued it would be found that few of them are advertisers-thoughtful, persistent advertisers. A casual survey discloses a hurvant, should be offering their advantages to the public. The same may

WOMAN TOOK FRIEND'S ADVICE

And Found Health in Lydia E. Pinkham's Vegetable Compound.

Windom, Kansas. - "I had a displacement which caused bladder trouble and

I was so miserable I didn't know what to do. I suffered from bearing down pains, my eyes hurt me, I was nervous, dizzy and irregular and had female weakness. I spent money on doctors but got worse all

"A friend told me about the Pinkham remedies and I took Lydia E. Pinkham's Vegetable Compound and was cured. I cannot praise would have been well if I had not taken it."-Miss MARY A. HORNER, Route No. 2, Box 41, Windom, Kansas.

Consider Well This Advice.

No woman suffering from any form of female troubles should lose hope until she has given Lydia E. Pinkham's Vegetable Compound a fair trial.

This famous remedy, the medicinal ingredients of which are derived from native roots and herbs, has for nearly forty years proved to be a most valuable tonic and invigorator of the female organism. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

FOOD THAT IS FORBIDDEN

No race possesses so many laws relating to the consumption of food as do the Jews. Shakespeare make Shylock say, "I will buy with you, sell with you, walk with you, and so following; but I will not eat with you, drink with you, nor pray with you, and the trait of being very particular as to what food they eat is still characteristic of the present-day Jews.

The large number of these Mosaic laws with regard to the eating of food is somewhat unconventional and disconcerting to modern Hebrews, but more than 90 per cent, of the Children of Israel still stringently adhere to all the dietary laws that Moses ever

Animals not slain by a ritual slaughterer, called a shochat, must not be eaten by Jews; neither are animals without parted hoofs or cloven feet, or who do not chew the cud, consumed as food by Jews. The pig is not eaten by them because it does not conform with all the above essentiais.

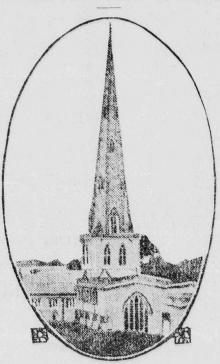

Only fish with scales and fins are permitted to be eaten according to the Law of Moses. Hence oysters, crabs, shrimps and lobsters are not eaten by Jews.

It is very peculiar to note that a Jew niust not partake of milk or anything possessing the essence of milk until four hours have elapsed after eating meat or anything connected with meat-i. e., meat pies, sausages, etc. This law, as written in the Old Testament, is very different, for Exodus xxiii, 19, says: "Thou shalt not seethe a kid in his mother's milk;" but the Jewish tradition has ordained that the mixing of meat and milk should be prohibited.

Only a very few birds, amongst which is the dove, are allowed for Jewish food.

Eminent modern physicians have corroborated the boast of the Jews that they are very healthy because of their dietary laws, but it seems very strange to other people that a whole race should abhor good old bacon and

BEAUTIFUL CHURCH IN PERIL

Ashbourne church, in Derbyshire. one of the most beautiful in England and visited by thousands of tourists every year, after withstanding the wear and tear of centuries, is pronounced by architectural experts to be in danger of collapsing. This your remedies enough for I know I never | thurch, known as "the Pride of the Peak," has many interesting associations. Boswell and Johnson have worshipped there, the former described it as "one of the largest and most luminous churches that I have seen In any town of the same size." Its tuneful peal inspired Moore to write "Those Evening Bells," and George Eliot made Ashbourne "that pretty town within sight of the blue hills," the Oakburne of "Adam Bede," and referred to the church as "the finest mere parish church in the kingdom."

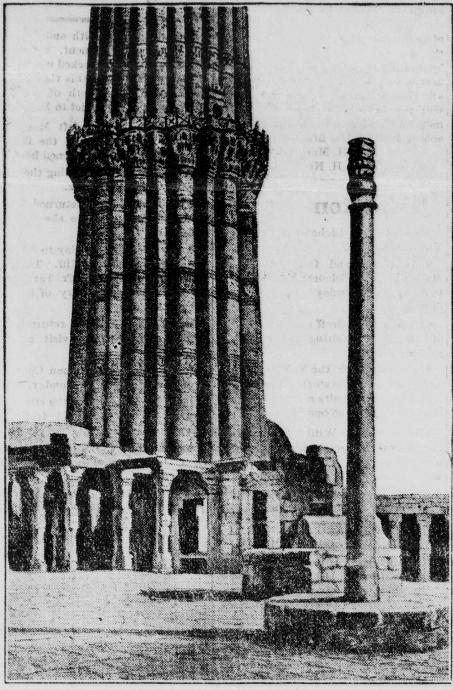

NATIONALISM AND FEET

National characteristics are apparently impressed upon every part of the body; even the feet are found to vary with the nationality. The French foot is narrow and long. The Spanish foot is small, and elegantly curvedthanks to its Moorish blood-corresponding to the Castilian's pride of being "high in the instep." 'The Arab's foot is proverbial for its high arch. The Koran says that a stream of water can run under the true Arab's foot without touching it. The foot of the Scotch is high and thick, says the Family Doctor, that of the Irish flat and square, the English short and fleshy. When Athens was in her zenith the Grecian foot was the most perfectly formed and exactly proportioned of any of the human race. Swedes, Norwegians and Germans have the largest feet, Americans the

SHAVING WITHOUT A RAZOR

In Jamaica, the negroes, some of whom are great dandies in their way, make a soap out of cocoanut oil and home-made lye; and a fine soap it is, smooth and fragrant. This cocoanutoil soap is used for shaving. When a man wishes to shave in the morning he starts out with his cocoanut-shell cup and his donkey-tail brush and a bottle. He goes to a convenient pool in the mountain stream, where the water is still, and there is his mirror. He breaks his bottle on a stone, and picks out a good sharp piece. Then he lathers his face profusely and begins to scrape away with his piece of glass, which works almost as well as a sharp razor

Kutab Minar, at Delhi

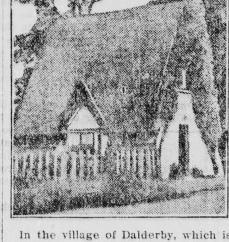

Among the architectural wonders of India is the Kutab Minar of Delhi It is a sandstone tower 238 feet high and was begun by Kutab-ud-din Aibak, general and slave of Mohammed of Ghor, as a tower of victory some time after the latter's capture of Delhi in 1193. The Iron Pillar which stands near it is a solid shaft of wrought iron about 24 feet high, dating from 400 A. D. It was brought to Delhi in 1052 by a Rajput chief of the Tomaras.

NATIVE LIFE IN THE CONGO TEAPOT HALL, LINCOLNSHIRE

Native agriculture in the Congo is of the most rudimentary type. A piece of bush adjacent to the village is selected, and the smaller trees and tangle of vegetation cut down and left to dry, after which they are burnt. Manioc, bananas and plantains are then planted after a perfunctory hoeing of the surface ground Nature does the rest, says British Consul Lamont in a report. Rotation of crops, manuring and deep cultivation have no place in the farming regime, and what labor is required is usually provided by the women. The only industries prosecuted by the native resulting in the production exportable products are those of rubber and gum copal collecting, palm oil manufacture and hunting, which has for its objective the ivory of the elephant. His methods in all of these are of the crudest, as is also the method of extracting the oil from the palm fruit crude and wasteful, the valuable inner nut being invariably thrown aside and wasted. Equally undiscriminating is his chase of the elephant; he traps or spears regardless of whether it is young or old, male or female, of commercial value or not.

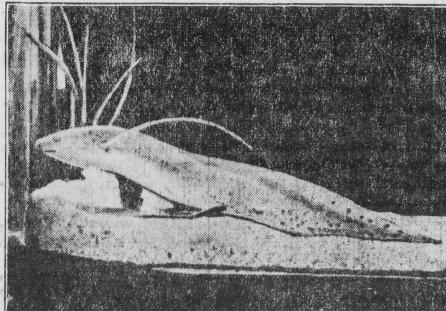

THREE FEET ON ONE LEG

perfect in detail.

now incorporated in the parish of Scrivelsby, Lincolnshire, there is a cottage popularly called "Teapot Hall," standing picturesquely against a background of fine trees, and interesting as belonging to a type of which examples are very rare. It is built of two pairs of straight crutches, or trunks of trees, which extend from the four corners of the house to the ridge-tree, and which support the ridge-tree, the framework being further strengthened by wind-braces. The | ling. length, breadth and height of the A two-year-old heifer with three house are alike, nineteen feet, and perfectly formed feet on the left fore- the walls are of wood intertwined with leg was a freak discovered at a pack- twigs or branches, and overlaid with ing plant at Fort Worth, Tex., by Dr. mud or plaster. According to local tradition, the cottage is five hundred years old.

Queer African Lung-Fish

The American Museum of Natural History recently received from the Gambian region of Africa the living lung-fish here pictured. It was found coiled up in a kind of a cocoon, deeply sunken in a large clod of earth which months before had been part of the bottom of a dried-up stream. A little tunnel-like opening was left through which the fish secured its supply of air for breathing. Soon after the "cocoon" was placed in tepid water the fish broke its way out. Scientifically speaking, the lung-fish belongs among fisher that lived millions of years ago.

GOOD RESULT OF SUGGESTION

Chance Phrases and Ideas That Have Been Utilized and Found to Have Real Value.

Richard Mansfield told me that when he was a lad in London he often nearly starved. There was a certain bakeshop where he would go and feast upon the odors coming from the door. The boyhood notion gave him the idea of putting those lines in his play, "Beau Brummel," about "dining on the names of things"—a suggestion be used with powerful dramatic ef-

This idea of sugestion has done many a good deed. About ninety years ago a thirsty man walked up getting a thirst no longer prevails a suppressed voice." there, or maybe it is only the manner of allaying it—and pumped a tincup full of water from his own well. "Not so good as I used to get from my fafect he remarked to his wife. "A pretty idea for a song," said she, and so he sat down and in an hour wrote "The Old Oaken Bucket."-Philadelphia Ledger.

ITCHING TERRIBLE ON LIMB

R. F. D. No. 3, Clarkfield, Minn .-"My trouble was of long standing. It started with some small red and yellow spots about the size of a pin head on my leg and every morning there was a dry scale on top covering the affected part and when those scales were falling off the itching was more than I could stand at times. The first year I did not mind it so much as it was only itching very badly at times, but the second year it advanced all around my leg and the itching was terrible. I had to be very careful to have my clothing around the affected part very loose. At night time I often happened to scratch the sore in my sleep. Then I had to stand up, get out of bed and walk the floor till the spell was over.

"I bought lots of salves and tried many different kinds of medicine but without any success. I got a cake of Cuticura Soap and a fifty-cent box of Cuticura Ointment and when I had used them I was nearly over the itching. But I kept on with the Cuticura Soap for six weeks and the cure was complete." (Signed) S. O. Gorden, Nov. 20, 1912.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address postcard "Cuticura, Dept. L, Boston."-Adv.

Exact Statement.

Some one has said that the man who laughs is the man who is secure in superior information, wisdom, wit or sophistry. The naivete of the Sudani supplies plenty of food for this kind of laughter.

There is the story of a telegraph clerk in an outlying district of the White Nile who, finding the desolation upon his nerves, telegraphed to headquarters: "Cannot stay here: am in danger of life; and surrounded by lions, elephants and wolves."

The hard-hearted operator at the other end wired back: "There are no wolves in the Suran.

He received a second wire: "Referring my wire 16th, cancel wolves.' -Youth's Companion.

Too Candid an Agreement.

"Lovers are prone to self-depreciation," said he tenderly, as they sat looking at the stars. "I do not understand what you see in me that you love so much."

"That's what everybody says," gurgled the ingenuous maiden. Then the silence became so deep that you could hear the stars twink-

A RESOURCEFUL REPTILE.

The Pesky Joint Snake Cleverly Fooled

At the village grocery the evening gossip had turned upon snakes. There had been the usual tales of dens of reptiles unearthed by excavators, of hoop snakes taking their tails in their Henry" Carpenter sat silent, with a look of tolerant superiority upon his

"Have you ever had any experiences with snakes, Uncle Henry?" asked one of the listeners.

"Waal, I did have a queer thing happen to me about thirty year ago," Uncle Henry responded. "The minister happened in to dinner one day, and Sary Ann had me go to the chicken yard and kill our last rooster. While he was floppin' round, as chickens do with their heads off, he started up one of these pesky joint snakes. In no time I had him broke in two at every joint. I'd heerd tell, though, how they go together again, if ye leave the pieces layin' round, so I jest took the piece with Mr. Snake's head on it and burned it in the stove.

"Waal, we was enjoyin' our dinner unusual, and the minister was callin' for another helpin' o' chicken, when a rooster began to crow out in the chick-

en yard. "'Land's sakes, Henry,' says Sary Ann, 'what rooster's that? I'm sure the only one we've got is right here on the table-and he's in no condition to

"The minister and me, we hurried right out into the chicken yard, and sure enough we heerd another crow, sort o' husky like, before we got there. "Waal, it was simple enough when ye stop to think. The j'ints of that snake had all j'ined together again, and when they couldn't find their own head they jest took the rooster's, which I'd left

layin' handy." There was a moment's silence. When the conversation was resumed it no longer dealt with snakes. - Youth's Companion.

SHE WANTED A MASTER.

The Way a Woman of Montenegro Selected a Husband.

The Montenegrin woman wishes not master in his own house.

Here is the story of the wooing of

Gordanne was the beautiful daughter of an innkeeper. Her suitors were many, and it was time for her to wed. She promised to make her choice among three suitors and summoned them all to her father's house.

First it was a youth gloved and cravatted who during a week end at Cattaro had acquired the elegancies of city the church was overcrowded with Jack at a "thimble bee." life. "Excuse me," he said, with a polite doffing of his hat as she met him at the doorway. "Will you let me pass?" Gordanne stepped aside, but as she did so she murmured, "You will never be my husband."

The second, a comfortable farmer, was less polite, "Let me in," he said, pushing past the girl. "Neither shall you ever call me wife," said the girl to herself.

Then came the third, who said nothing, but, seizing Gordanne by the arm, flung her aside and entered the house as if already its master. "That," sighed the innkeeper's daughter, "is a true Montenegrin. He is the husband for me." Of such stuff, after all, are the mothers of heroes made.-Paris Letter in London Telegraph.

The Domestic Economist. There are other housewives who are as calculating as she who is celebrated in the Manchester Guardian, but not many of them have the daring to carry

off their frugality so triumphantly. An excellent Manchester lady frequently invites her friends to tea, but she does not furnish her table lavishly. When her guests have eaten all the bread and butter and cookies and realize that the meal is over, she looks brightly at the empty dishes.

"Well, now," she says, in triumphant tones, "haven't I judged your appetites exactly?"

Left Handed Drinkers.

A commercial traveler says that he can identify members of his profession in the hotel dining rooms by their habit of drinking their coffee "left handed." He says that many traveling men have adopted this habit because when they drink "left handed" they drink from the side of the cup that isn't generally used. This is one of those customs the value of which will lessen as it becomes more general-or as dishwashing becomes more of a fine art.-Exchange.

Right Up to Date. "In regard to the custody of the

child," said the judge in handing down his decision in the divorce case, "I'll let the young lady decide for herself." "Oh," replied the worldly wise young thing, "if mamma is really going to get all that alimony I guess I'll go with her."-Brooklyn Life.

Sacrifice For Art's Sake. "You say you have devoted your life to art," said the man who tries to be

polite, even when surprised. "Yes," replied Mr. Cumrox. "I have devoted myself to an effort to become rich enough to own a gallery of genuine old masters."-Washington Star.

More Trouble Coming. Ambulance Surgeon-Cheer up! You are not going to die! Motorist (looking at wrecked machine)-I don't know about that. That was my wife's auto. -Chicago News.

home in Stevensville, in the same state. her family. Miss Marion succeeds to

"The longer that a plum tree grows, The blacker grows the plum: The langer that a souter sews, The blacker grows his thumb!"

-Auld Scots Sang

The longer that we buy and sell shoes, the better grows our experience. You know our suit judgment is good, our garments endure the hardest service: but you may not have observed how well our shoes stand

We have picked from all America's shoe market several brands - not extravagantly advertised, but sound, dressy, and well shaped—and we put our guarantee above the makers'. "If you buy it of THE HUB it must be good. We make it so."

We haven't a cut to show you—they are all of this fall season's lasts—of the newest English models of the

FOSTER SHOES

All the manufacturers have sent us is the goods, and you can see and judge them better at THE HUB than from the best picture ever made. Call in: we have lots of time and like to show them.

THE NORTHWESTERN COOPERAGE AND LUMBER COMPANY

SEND IN YOUR ORDER NOW

Give the workman time to do a good job by daylight. Get the job moving as soon as you can. Get the type set as soon as you can. Get the proofs back to the printer as soon as you can.

Don't hold on to the proof until the day before the job is wanted, for only a part of the work is done when you see the proofs—sometimes the smallest part.

Fuss over your copy before it goes to the printernot when proof is submitted. Then you will not have to russ with the printer about alteration charges and

If you want to see how the job looks in colors, go over to the printing office and have the printer show you press proofs. Don't have the printer hold an expensive press and employee while the proof is sent.

In printing, haste usually makes smeared copies, smudgy-looking cuts with no makeready, dead colors that do not have time to dry before handling; and last, but not least, it makes poor printing, and poor printing is dear at any price--Printers' Ink.
