GLADSTONE DELTA. THE

Volume XXVIII.

WATER BOARD MEETS

The water board met Thursday evening, and gave the Soo line a rebate of \$6.94 on its water tax, it having supplied power during a brief shut down of the pumps for repairs.

Opening of bids on main extensions was deferred till Saturday.

The Cloverland company was requested to muffle the pump of the flour mill, which for years has been quite audible along the mains for some blocks when the boilers are taking water. It was decided to secure an expert recommend. and his creditors, were besieging the ed by the state railroad commission to city for their money, and therefore he estimate the current for which the city had called the meeting a week ahead should pay the Escanaba Traction Co.

The fire alarm system has been in bad condition and subject to many interruptions of late, the wires being made regarding the road, and that weathered and needed considerable he had secured information from the change. The water board has instructed the superintendent to estimated the cost of replacing it.

MISSIONARY TO NEGROES INCIT-ED THEM TO TRY TO WIPE OUT WHITES IN MISSISSIPPI.

HE AND WOMAN FACE DEATH

Mobs May Lynch Them on Proof That They Gave Drugs to Slayers of Ten-Two of Wounded Succumb, Bringing Death List to 12.

Harriston, Miss., Sept. 30 .- The race riot and lynching of Sunday, which had its death toll increased to twelve persons by the death of two more victims, was incited by a negro "prophet," and Johnson Prophet of Champaign, Ill., is under arrest as the one who drove two members of his race to begin a campaign of death in the belief that they were martyrs in the cause of racial equality.

Prophet is known to have formed a secret society known as "The Council of Good Friends," and he made Willis and Walter Jones, the two who started the trouble and were afterward lynched, his chief "disciples." Saturday night a meeting of the "council" was held and Prophet is said to have worked his audience into a frenzy by attacks on the white race and by giving a general invitation for all the "persecuted" to migrate to Illinois, where, he promised them, they would be given every advantage of equality.

Woman Caught After Flight. Prophet was living here with the mother of the two Jones brothers, and after the lynching it was found that this woman, Maggie Jones, had fled. She was captured at Port Gibson, 20 miles from here. She is charged with having given the negroes cocaine, and it is reported that a mob is being secretly formed to go to Port Gibson, take her from jail and lynch her.

Two thousand negroes, practically all there are in this county, were rounded up by armed bands of white citizens. They were driven like sheep into Harriston, where they were forced to pass singly before the bodies of Willis and Walter Jones, riddled with bullets and with bits of rope still about their necks. The living negroes were solemnly warned to beware lest a similar fate overtake them, and then were permitted to return to their homes

Race War Danger Ended.

Aside from the threats to take Prophet from the jail and lynch him, there has been no indication of violence since Sunday night. The National Guard is still on the ground. and the danger of the situation has blown over.

Eye Alone Detects Icebergs.

There at present is no absolute method of detecting icebergs, except Captain C. E. Johnson and A. S. Gamble of the cutters Seneca and Miami. which patroled the route of the transatlantic liners from April to May.

Captain Johnson refuted the prevalent theory that a sudden drop in temperature meant the proximity of icebergs. Little or no change in temperature was noticeable, he said. Nor can icebergs, as generally supposed, be detected with any certainty by an echo from a ship's whistle or bells, as, according to Captain Johnston, a perpendicular berg may give an echo from some directions, but a slanting face reflects the sound. About ninety per cent. of the Seneca's efforts to get echoes were futile.

The presence of murres (a kind of auk), the officer declares, indicated the presence of icebergs, but he advises mariners to pay no attention to other birds.

Real Excitement.

"Yes," said the meek-looking man, 'I've no doubt you've had some great hunting experiences in your travels abroad.

"I have, indeed." "Buffalo hunting-" "Yes."

hunting-" "And bear "Of course." "Well, you just come around and let my wife take you house hunting and bargain hunting with her. Then you'll begin to know what real excite ment is.'

man the white victims of the battle with the frenzied blacks, was one of tion. Governor Brewer attended. accompanied by members of his staff, and residents of four counties attended the services.

The affray started when two negroes, Willis Jones and his brother. Walter, eighteen and twenty years old respectively, ran amuck after getting drunk on cheap whisky and cocaine at Harrison and killed four white men and eleven aegroes before being captured by a posse of armed citizens and hanged to a telegraph pole opposite the railroad station.

While the drink and drug crazed negroes were at the depot a train came in. They fired several shots at the cars, injuring the conductor and the flagman and throwing the passengers into a panic.

Shortly after midnight Sunday morning the Jones negroes went to an eating house conducted by a negro woman and when she served them an order they did not like they shot her dead. The woman's ten-year-old boy attempted to interfere and was killed. A crowd of bystanders was next attacked and out of twelve in the crowd, officers say, only three got away alive.

Fire at Everybody in Sight.

The negroes ran down the main street of Harriston, firing at everything and everybody. Several passengers waiting for a late train were slightly wounded.

Sheriff Hammet was notified and went to Harriston in automobiles, taking deputies with him. Being informed of this, the negroes ran to an outhouse in a cotton seed oil mill and barricaded themselves behind heavy boxes and some strips of sheet iron.

The officers ordered their surrender and were met with a volley from automatic pistols. Three men fell dead at once and the fourth was shot before he could get away.

Three hours later the brothers were captured in a negro's house. They had tied the owner to a bedpost, threatening his life if he attempted to warn officers of their whereabouts.

Willis Jones, seeing the house they were in surrounded by a mob, made a dash for liberty and was shot dead. His brother was captured alive. Both were taken to the telegraph pole and strung up. The rope around Walter Jones' neck broke, but the mob grabbed him and tied his head in another noose.

Their bodies were riddled with bullets and left hanging to the poles all day, only being cut down after nightfall by orders of Judge Truly of Fay- of the case. ette.

THE GLADSTONE DELTA.

equivalent to the ad valorem rates provided in the house bill. A specific rate has been placed on lithographic views of scenes and buildings located in the United States instead of the advalorem rate provided by the house. This amendment results in an increase in the rate of duty. Roman, Portland and other hydraulic cements, limestone, rock asphalts, asphaltum, and bitumen have been transferred to the free list. The house rates have been reduced on lenses. surveying instruments, telescopes, microscopes, photographic and projection lenses, in increased on strips of glass for lenses and gauges, opera and field glasses. A new classification has been made for unmanufactured mica and a rate of 4 cents per pound placed on all valued at not more than 15 cents per pound, and 25 per cent, on that valued at more than 15 cents. This results in an increase

over the house rate of 30 per cent. on the cheap glass of mica, costing less than 14 cents, and a reduction of all that is valued at more than 15 cents per pound.

Cotton Manufactures. The senate classification of cotton cloth, according to the average number of the yarns contained therein. was accepted, instead of the house provision for the highest number. This slightly decreases the rate of some fancy weaves and novelty cloth, but on the greater bulk of cotton cloth the rate is not affected. The rates on bleached and dyed colored yarns are increased and on cotton yarns and cloth made of yarn, from numbers 79 to 99. The rates on handkerchiefs or mufflers, not hemmed, have been deduced from 30 per cent., as provided by the house, to 25 per cent.

Washington .- According to estimates completed by the treasury experts, 425,000 American citizens must keep such accurate account of their incomes this year that they will be able to report to the income tax collector next spring exactly how much they owe the government under the new income tax law.

So far as the taxable American is officers, and other federal agencies. concerned, the income tax law is now However, the fact that he does not re-

of carrying on business, actual losses depreciation allowances, and tax exempt or tax paid money. Living expenses cannot be deducted, nor can money spent for permanent improvements to property.

Forms to Be Ready Soon. "The form that is to be filled out by the taxpayer will be drawn up soon by the commissioner of internal revenue. The taxpayer will have to give his gross revenue and then specify and claim the deductions to which he feels entitled.

"Unless a man's income tax is 'paid at the source' he must hunt up a tax blank, fill it out, and see that it finds its way to the proper federal official in his district before March 1, 1914.

"Firms, corporations, and the like having the handling of interest, rents, salaries, or other portions of the income of any citizen are compelled to deduct the tax for the individual and pay it to the government. The individual then will receive a receipt showing he has paid his tax."

WEALTH IN MIDDLE WEST

Investigations by Commissioner of Internal Revenue Reveal Large Fortunes There.

The commissioner of internal revenue made public the estimates on incomes for the middle west.

These estimates show that far more wealth is distributed in Illinois outside of Chicago than in the city. The commissioner of internal revenue is inclined to believe the reports are so far from correct that he will not use them to any extent in his plans for the collection of the income tax.

According to his statement, 12,000 citizens of Chicago have incomes ranging from \$3,000 to \$20,000 per year, while 12,800 citizens of the Eighth district, which has its headquarters in Springfield, have incomes within this scope. Only 5,000 individuals in the Fifth district, with headquarters at Peoria, are listed.

Likewise in Indiana there is a great variance in districts. The collector for the Sixth district reported over 20,000 taxable incomes, and the collector for the Seventh district reported only 6,000.

Large Fortunes in Iowa.

Iowa's incomes will be largely taxed, the collector for that state reporting nearly 17,000 taxable fortunes. Wisconsin has a few over 10,000, Michigan close to 12,000, and Minnesota about 4,000.

A feature about the Minnesota income estimate is that the collector declares there are 150 men in the state with incomes upwards of \$100,000 annually, while in Chicago the collector reported only 35 persons with incomes above the \$100,000 mark.

general information before the public Large fortunes seem to predominate will be to distribute income tax blanks in Minnesota, for there are 1,000 men through postoffices, internal revenue rated with incomes between \$20,000 and \$50,000, as against 500 in Chicago and 1,000 in the whole state of Illinois; 500 with incomes between \$50,-000 and \$100.000, as against 175 in Chicago and 275 in Illinois, and 150 over \$100,000, as against 50 in Illinois.

of Congress Has Been Working.

MARKED CHANGES IN THE AVERAGE DUTIES

Democrat's Confident That the Country Will Be Benefited by the Alterations, and That Business Will Remain Unaffected - Ad Valorem Rate in the Bill Is From 27 to 29 Per Cent., in Payne-Aldrich Bill They Are 40.12 Per Cent.

Washington .- The Democratic tariff revision bill, first on the program of reforms mapped out when President Wilson came into office, advanced to its last congressional stage when it was brought back to the house from the joint conference committee with the unanimous indorsement of the Democratic conferees.

The measure, of course, has both its friends and enemies. According to the administration, it carries out four of the party promises. Tariff reform, reduction in the high cost of living, campaign against the trusts, in that duties have been taken off of many trust made article, and the income tax.

The measure, consequently, has a larger importance than that of a mere tariff reform bill, and its effect must be widespread, both on business and industry, and also in connection with politics. Democratic leaders are confident that business will suffer no untoward effect; that consumers will be benefited.

Changes in the Rates.

The bill imposes an average ad valorem rate of from 27 to 29 per cent. The average for the present Aldrich law is 40.12 per cent. The average for the Wilson-Gorman act was 39.45 per cent.

Duties generally have been reduced on all of the articles that enter into the necessaries of life, including the products of the farm as well as manufactured products.

Trust made products in many cases have been transferred to the free list or the duties at present imposed have been substantially reduced.

The income tax feature of the bill is expected to net some \$83,000,000. It will call for a tax on net incomes of unmarried persons of \$3,000 and upwards and on net incomes of married persons living together, where the wife or husband is dependent, of \$4,-000 and upwards.

Experts' estimates indicate a surplus of \$16,000,000 over all expenditures at the end of the present fiscal year.

A rate of 40 per cent. is imposed on stockings and half hose valued at rates agreed to are approximately pealed.

"The customs revenues will be larger for the current year, 1914," Senator Simmons said, "because the rates of the Payne-Aldrich law have been for the force quarter, and will continue in force on wool and woolen goods until January 1, and on sugar until March 1. When the next fiscal year begins, July 1, 1914, all the rates of the new law will be in operation and the tariff duties collected will be smaller.

The income tax which is collected for the calendar year can be collected for only ten months of the present year, as the law specified that collection shall not go back of March 1, 1913. The estimated decrease in the total expenditures of the government for 1914, \$5,000,000, is based on the fact that smaller expenditures are expected for the army and navy estimates."

The balance of the total estimates, as given in the treasury estimates, is made up of postal receipts, internal revenue receipts, the profits from public land sales, and other sources of federal income.

Agricultural Products and Provisions. Cattle, sheep and other domestic animals suitable for use as food, wheat and wheat products and eggs, have been transferred to the free list. Reductions have been made on oats, butter, beets, frozen eggs, peas, greenhouse stock, zante currants, chocolate and cocoa sweetened and extracts of meats from the rates provided by the house. The rates have been increased over those provided by the house on broken rice, fish packed in oil and ground spices. A rate of 20 per cent. ad valorem is placed on ground spices in addition to the specific rate provided by the house on unground. The senate receded from the reduced rate placed on flaxseed and its amendment placing a duty on bananas. The house classification on lemons and other citrus fruits is accepted.

Schedule H, Spirits, Wines and Other

No changes of importance are made in this scheduly. The rates on ginger ale and similar beverages are slightly decreased on bottles containing not more than one-half pint each. The senate receded from its amendment placing an internal revenue tax on grape brandy used in fortifying sweet wines.

Papers and Books.

The house rates have been reduced on common paper, box, boards, papers partly covered with metal leaf or gelatine and plain basic papers for albumenizing for photographic printing. The rates provided by the house for surface-coated papers suitable for covering boxes has been increased from 35 to 40 per cent. The senate amendments placing specific rates graduated according to thickness and size have been agreed to with several reductions in the rates provided. The

Increases from the house bill include: Angora wool and .articles made from it. Silk ribbons and narrow fabrics from 40 to 45 per cent.

Lithographic views of American scenes. Surface coated paper suitable for covering boxes, from 35 to 40 per

cent Many kinds of acids. Some kinds of paints. A new classification for woolen stockings gloves and mittens makes reduction from the house rate on those valued at less than \$1.30 a dozen and an increase on those above Reductions from the house rates in-

cludes: Common paper boxboards.

Papers used for photographic prints Wearing apparel made of cattle or goat skins. Fur hats.

Rough forms of dog and goat skins. Camel's hair press cloth for use in cotton oil mills Cotton stockings and half hose. Perfumed and medicated soaps. Crude chicle. Linseed oil. Chlorate of potash High-power lenses, surveying instruments, telescopes and the like. Oats. Butter. Beets and other vegetables. Extracts of meat.

Currants. Chocolate.

House Rates Changed. Through a reclassification rates will be slightly reduced from those fixed by the house on fancy grades of cotton cloth.

The tariff on automobiles, fixed by the house at 45 per cent. and radically cut by the senate, was compro mised by making a new classification of automobiles valued at less than \$2,000, for which a rate of 30 per cent. was fixed.

The 5 per cent. rebate in 'tariff made by the house bill on goods brought in American ships was retained with the added provision that' it should not "be so construed as to abrogate or in any manner impair or affect the provisions of any treaty' the United States has.

That portion of the house bill re quiring foreign manufacturers or exporters to submit their books to American custom agents was amended so that if the exporter refused to allow such examination an additional duty of 15 per cent. ad valorem can be imposed on his exports.

Section 8 of the Cuban reciprocity treaty, which provides that Cuba should have a preferential rate of 20 per cent. on sugar and that the general tariff of the United States should not be reduced below the figures of the Dingley tariff law of 1897, is re-

practically in force against him. While the tariff law in which the law is embodied will not be signed until next week, the first returns do not have to be made to the internal revenue collectors before March 1, 1914. But when the returns are made they will cover the income of citizens from March 1, 1913, to December 31, and the first payment of tax will be for money received during this period.

Every single person (citizen or foreign resident) whose annual income exceeds \$3,000, and every married person with an income above \$4,000, is expected to report his or her receipts in detail to the government agents March 1 of each year.

To Produce \$82,000,000.

The estimate completed indicates that the income tax will produce \$82,-298,000 from the 425,000 persons taxed. To this will be added the \$35,000,000 or more produced by the present corporation tax, which is continued as part of the law. President Wilson, the federal judges of the Supreme court now holding of-

fice and employes "of a state or any political subdivision thereof," are the only persons specifically exempted from the tax by the new law. The president and judges now in office were made exempt to escape any questions of the constitutionality of the law, and their successors in office will be compelled to pay the tax.

First Burden is on Citizen.

The general public is expected to give close study to the new law in the next few months, as the first burden of the tax payment rests with the individual citizen, and his failure to report his income is punishable by a

It is admitted that when first returns are made many taxable persons probably will escape payments, but with each year the government's lists of persons with taxable incomes will

Methods of Collecting Tax.

Two primary methods of collecting the tax are contained in the law. One is that the individual return made by the citizen; the other the returns by corporations and other employers who pay their employes' taxes "at the source." Under the law as it will be signed by President Wilson next week. every large company employing labor will be compelled to report any regular salaries it pays in excess of the \$3,000 figures, and will pay the taxes for its employes and deduct the tax

from their pay envelopes. This "payment at the source" will apply to salaries, rents, interests, royalties, partnership profits and some other sources of income, and persons receiving such incomes must be prepared to show that the money has

paid its tax at its source. In Aguring up his net income for the taxpayer, the American business man, after deducting \$3,000 for himself, or \$4,000, if married, will have

ceive a blank or a request to pay the tax will not exempt a taxable person from the penalties of the law.

Representative Cordell Hull of Tennessee, who drew the income tax provision of the tariff bill which will soon become law, made public a detailed explanation of the tax plan as it will touch the individual citizen.

"The treasury regulations soon to be prepared will make clear to every taxpayer the requirements of the law and its application to income derived from the various kinds of business," Mr. Hull said. "Any person who keeps familiar with his business affairs, during the year should have no difficulty in executing his tax return.

How Tax is Divided.

"The income tax is divided into two phases, the 'normal' tax of one per cent. on the whole income above \$3,000, and the additional tax that begins with an extra one per cent. above \$20,000 and is graduated to six per cent. above \$500,000. Wherever the income tax is paid 'at the source' by a corporation for its employes or in similar cases, only the one per cent. normal tax is so paid.

"The individual has to pay any aditional tax himself. The provisions of the law requiring the tax to be withheld at the source does not take effect until November 1, 1913.

make return to the local internal revenue collector before March 1, 1914, will apply on the full calendar year.

\$3,000, or if the tax upon same is withheld for payment at the source, or if the same is to be paid elsewhere in the United States, affidavit may be made to such fact and thereupon no

Covers Incomes of All Citizens.

"The tax covers all incomes of citizens of the United States, whether living here or abroad; those df foreigners living in the United States, and the net incomes from property owned or business carried on in the United States by persons living abroad.

"The net income includes all income from salaries or any compensation for personal services; incomes from trades, professions, business, or commerce; from sales or dealings in personal property or real estate; from interest, rent, dividends from securities; for all business carried on for gain.

"Bequests will not be considered income, nor will life insurance paid to a beneficiary or returned to the insured person as a 'paid up' or 'surrendered policy' be taxable. Interest on such property will be included as income, however.

"The amount that may be deducted from a total income includes the cost he had half a street's start."

Indiana and Michigan are also reported as having large income bearing fortunes over the \$20,000 mark.

Figures for the Middle West.

The following table shows the various taxable incomes in six middle west states:

ILLINOIS. \$3,000 to \$20,000 to \$50,000 to Over \$20,000 \$50,000 \$100,000 \$100,000 First dist....12,000 Fifth dist.... 5,000 500 175 35 Fifth dist. Canadian Fox Industry.

Much money is involved in the Canadian fox industry. Since the opening of this season 219 live foxes of various hues including silver gray, valued at \$320,000, have been shipped from Edmonton to points in eastern Canada and the United States for breeding purposes. Included in this lot were ten young black foxes which were sold to a New York firm for \$30,-000. Many young foxes die soon after capture. Several black pups have died after being sold for \$1,500 to \$2,500. A western raw fur company which has been supplying the eastern markets with young live foxes announces that it will discontinue the eastern shipments, having decided to establish a farm in western Alberta, where 40 foxes are already domiciled. A decrease of 25 to 50 per cent, has taken place in the prices paid for these animals, which is attributed to the large number which have been supplied from the northern country of Alaska, Yukon territory, and the northwest territories. The supply has been plentiful because the young foxes were dug out of their holes before they were able to escape. In a short time the young foxes will leave their dams and it will then be impossible to catch them otherwise than singly in traps, and the prices will probably rise.

The Winner.

Senator Key Pittman was talking in Tonopah about two lobbyists who had quarreled.

- "But there's no fear," he said, "of their maining or mutilating one another. They are like Bluff and Stuff.
- "'Who came out ahead,' a man asked, 'in that street row between Bluff and Stuff?'

"'Stuff did,' was the answer, 'but

"For the first year the citizen will as to his earnings from March 1, 1913, to the end of this year. The collector will notify him June 1 how much he owes and the tax must be paid by June 30. After next year the tax

lowed the troops of either to invade the territory of the other when in the pursuit of hostile Indians fleeing across the border, James Tracy was a second lieutenant in the 19th cavalry. It was during the height of the Geronimo trouble, and Tracy, with his troop, dismounted, and

after a soul and body wearying march on the trail of the wily Apache, found himself in the heart of one of the dreariest, most God-forsaken mountain countries in the whole range of the southern country.

The troop was exhausted and practically without water, the men having not a drop to drink save what was in their canteens. They had cut loose from a river in the early morning, expecting to find another when the day was done, but not as much as a rivulet had they found. There was no coffee that night and there wasn't a light heart in the whole outfit.

Tracy was unhappy. It wasn't wholly his suffering condition and that of his men which weighed upon him. Just before leaving the Arizona post he had received news that his younger brother. John, had been committed to state's prison in a far northeastern state. The officer had seen his home only once since his graduation. He had stayed away purposely. His brother had been a trusted bank employe. Then came suspicion, then conviction and a sentence. John Tracy protested his innocence of the crime charged against him, and his family, knowing the lad, believed in him, but the circumstantial evidence was overwhelming, and in spite of the efforts of the aged father, who spent his time and his money in the boy's defense, he went to prison.

Before the troop had left Fort Banks with its nose to the red-hot trail of Geronimo there had joined as an enlisted man a strapping young offleer who said that he came from St. Louis. His name was Barlow, and he was assigned to the troop of which Tracy was the junior officer, and he went with it on its chase across the border after the Apache chieftain.

Barlow on every occasion possible attached himself to Tracy's person. Whenever there was a scouting party detached from the main body

and put under the second lieutenant's command Barlow asked that he might be assigned to it to share in the scouting duty. He was a reserved fellow and apparently of superior education. There were no camp jokes for him. He was grave and taciturn. Tracy had noticed the evident attachment of the man to him, and as he was a capable soldier and willing to dare and to do anything he was glad to have him a part of his outfit when on detached and dangerous service.

On the morning following the night that the troop was practically without water and in a country devoid of all green things save the forbidding cactus, the troop commander told Tracy that he had better make a short reconnoissance. feel out the country for the enemy and, above all, try to locate water. To attempt a march under that hot Mexican sun with the men, and with any idea of effective service, was foolhardy.

Tracy told his captain that he would take but one man with him; that they would strike southwest, where it was thought a better prospect of water lay, and that they would return as soon as a find was made. He selected Barlow for his companion, and the two struck out through the black, sun-seared country.

They went on for three hours. Not a drop of the element of which they were in search. Their tongues were blistered. They drank sparingly of the water in their canteens, pressed on for another hour and then knew that they must return.

Back they started. They followed their onward trail as well as they could, but at times it was lost, and then circling was necessary to take it up again. At noon they lost it and could not find it again. There was a great jagged rock rising to the westward which neither recognized.

"Lieutenant," said Barlow, "we're going wrong. We nover came this way. The sun doesn't bear right. It should be more to our right. I believe that we are going almost directly at right angles to the camp."

They circled again and again, but no trace of the trail. Then the conclusion forced itself on Tracy that they were lost. They wandered on until the sun went down beyond the black rocks. Then they each drank sparingly of the precious contents of the canteens, and lay down on the gray desert to sleep.

The sun came up like a red-hot round shot. Tracy and Barlow ate the last of their single ration, and took one swallow of water aplece. Then on they went again. Twenty-four hours passed. The sun came up once more, and with its coming they staggered forward. The canteens were empty. They looked for the cactus whose leaf yields a juice that helps fight off the demon of thirst. They could not find it. The only vegetation were occasional clumps of stunted prickly pear cactus, the juice of whose leaves accentuates thirst

Another twenty-four hours. The men cheered each other on like the soldiers they were. Tracy began to feel the coming of delirium. Oh, for a draught of water! He looked at Barlow. The man's eyes were burning, but they had a courage in them, and something else in their depths which Tracy never before had seen there. On and on and on. They could go no further. Suddenly Barlow turned to Tracy and said in a voice that was choked from the clutching of thirst's hand at his throat: "Lieutenant, I was afraid that we might be tempeted to drink this long ago, so I saved it for the last extremity. Lieutenant, I have one good drink of water aplece left in my canteen."

Barlow shook the canteen, and Tracy heard the splash of the water within. "Drink, Barlow," said Tracy. "Drink; you

saved it and it should be yours. Drink, drink it, I say. It may give you strength to go on. If you get back, boy, and the men strike water, ask them to come after my body."

Tracy was reeling. His brain was awhirl and his whole system on fire.

"Lieutenant," said Barlow, "I had more in my canteen than you had in yours when we started. Men in an extremity like this should share and share alike. I'll take my cup and we'll divide the water.'

"Is there enough for the two and to do any good?" asked Tracy.

"Yes," said Barlow, "one good drink for each." "Drink first," said Tracy. "I'll not touch a drop until my command is served."

"All right, sir," said Barlow. Tracy turned away for a moment. He heard the gurgle of water. Would it never come his turn to drink? Barlow spoke: "Lieutenant, I'm afraid I took more than half. Here is what's left.

He poured the water gurgling from the canteen into the cup. There was a good round drink. "Take it, lieutenant," said Barlow. "I had more than that.'

Tracy seized the cup and drained it. Oh, the joy of it! New life went surging through him. His eyes cleared. He looked at Barlow. There was no new life in the man's eyes. His lip was drooping.

"Barlow," said Tracy fiercely, "you deceived me. You never drank a drop."

We find it difficult to believe the cable report

that Liverpool physicians are very much exer-

cised over the case of the traveling salesman

with delirium tremens induced by too much

beef tea, says a writer in the New York Times.

Food analysts and nutrition experts have long

been aware of the high stimulating power of

meat proteins, which, Dr. Chittenden says, are

approximated by one sort of protein from the

vegetable kingdom, that of oatmeal. The vege-

tarians, in fact, base their most effective argu-

ments in the fact that the stimulation from meat

is in a way like that from alcohol, effecting tis-

sue change or metabolism rather than affording

nutriment. Beef tea is the highest stimulant

among the meat juices. Physicians have long

since abandoned the notion that it is a food cap-

able of repairing tissue, for laboratory tests have

proved that it causes more rapid wasting of the

body than no food at all.

Something like a smile came into Barlow's face.

"Forgive me, lieutenant." he said, "but there was only enough for one." And then he staggered and fell forward. Tracy caught him in his arms, and, weak though he was, managed to support his burden.

"Lieutenant," whispered Barlow, "go on. You are strong enough and may reach camp. If you do, just come back and bury me here.'

Then the man drew his officer's head close to him and whispered something. Barlow almost let fall his burden. "Yes, it's true. I was the guility one and your brother was innocent and a sacrifice. 'Take this," and he drew a paper from his blouse and put it in Tracy's hand. "Forgive me, lieutenant," he said, and as he spoke his empty canteen swung from his side and struck against Tracy's knee.

"Forgive you? Yes, Barlow," he said.

The enlisted man looked up, smiled and died. Tracy let his burden gently to the earth, and then he pressed on, for now there was an added life in his veins and an added interest in living. He reached the top of the ridge and looked down. The camp was below him. Not the old camp, but the old troop and a new camp and by the bank of a stream.

precious water, Tracy recovered. The paper which Barlow had given him contained proof of his brother's innocence. Tracy led a squad back to the point where he had left Barlow. They found his body. There was peace in the man's face. He was given a soldier's burial, and on the little wilderness grave Lieutenant Tracy planted a cross and a little, fluttering flag.

BIG DIKE IS TO BE REMOVED

This Will Mark the Practical Completion of the Big Waterway After Nine Years of Labor by an Army of Men.

Colon, Panama, Oct. 1 .- The Panama canal stands today virtually complete.

The preliminary steps toward the destruction of the Gamboa dike, which until the present time, has held the waters of Gatun lake out of the Cuvalves in four great 26-inch pipes credit for carrying this portion of the fever and pest-ridden country. which pierce the dike were opened and the waters of the lake began flowing into the Culebra cut. Within a few days, it is expected, enough water will have flowed into the cut to form a cushion and prevent the damage that might be done if the dike were blown up and the waters allowed to rush into the empty cut. The final destruction of the big dike is scheduled for October 10, when charges of dynamite placed in holes already drilled in the dike will be exploded. The explosion of these charges will not completely destroy the dike, but will weaken it and loosen the dirt so that the force of the waters from Gatuan lake will carry it away. Steam shovels will remove the remnants of the dike, leaving an open passageway from ocean to ocean.

The final voyage through the canal is | ed his task without the assistance of scheduled for some time during this such men as Col. H. F. Hodges, Lieut. month. Within another month it is Col. David Du B. Baillard and Lieut. expected the waters in Gatun lake Col. William L. Sibert, army enwill have risen high enough to bring gineers, who have had charge of vathe waters in the entire canal up to rious phases of the work, but Col. Goethe deep water level required for the thals is recognized as the real builder passage of the largest ships. of the canal.

It is said that as long ago as the Under Colonel Goethals the greater early part of August, assurances were part of the \$375,000,000 which the cangiven Washington officials that if the al will have cost when it is completed emergency should, arise, the entire has been spent. It has been by far Atlantic battleship fleet could be put the costliest engineering project in through the canal into Pacific waters the world. Nearly three-fifths of a within 60 days from that date. WILL SUCCEED THE LATE JAMES SCULLY AS RAILROAD COM-MISSIONER.

To Go Over the Seventy-Five Railroads in Michigan on a Personal Observation Trip - Knows Much About Railroading.

Lansing .-- C. S. Cunningham of Detroit was named by Governor Ferris as a member of the state railroad commission to succeed the late James Scully.

In making the selection Governor Ferris said Mr. Cunningham made no personal application for the position, but was recommended by friends who furnished the information that the Detroit man was formerly connected with the Grand Trunk railroad system, is now engaged in the real estate business in Detroit and is well qualified for the position.

The new commissioner is a Democrat.

The new state railroad commissioner was in Lansing and said that he was prepared to take up the duties of his new office at once.

Commissioner Cunningham is not a relative of Labor Commissioner James Cunningham of Detroi. Although he is not familiar with the detail work of the state railroad commission, he knows railroading from every angle.

Since George Dickinson retired from the railroad commission, there has been no practical railroad man on the board, as Hemans and Scully were lawyers and Glasgow a merchant. The law provides that one member of the commission shall be a practical railroad man. Until the first of the year he was

superintendent when he retired. Mr. Cunningham is a railroad man

of lifelong experience. He was born in Ohio fifty-two years ago and entered railroad service as a boy. For nine years he was superintendent of the Grand Trunk and Wabash south-

cessity," declared Mr. Cunningham. "I

Medical Fees Are Fixed.

With a view of fixing a fair standard of medical fees to be allowed by the state industrial accident board for service to injured workingmen, a committee of the State Medical association, headed by Dr. Bret Nottingham, of Lansing, conferred with representatives of the accident insurance com panies in Detroit.

The result of the meeting was the arranging of a schedule of fees that it is hoped will come to have general vogue. The schedule will be published NEW OFFICIAL PLANS WORK in the state medical journals and physicians urged to follow it in making bills. While the industrial accident board has not said it will recognize the State Medical association price list, it is reported as heartily in sympathy with the effort to fix some standard of fees.

The schedule as fixed is not so high as some physicians have charged in cases of industrial accident lately, but it is higher than the schedule pre-

pared previously by the insurance companies. For amputation of a foot. leg, arm or forearm, as example, the surgeon is allowed \$25 for first attendance, \$2 for every home visit to the patient thereafter and \$1 for each office call. For amputation of a finger or toe the price is \$5 with \$1.50 for each home visit and \$1 for office calls. For mending a fracture of one bone in the forearm \$10 is allowed. with \$12.50 for setting two broken bones in the same arm. Ror repairing a broken rib the fee is \$5, with \$1.50 and \$1 the minimum fees for house calls and office calls respectively in each case.

The members of the committee of doctors, besides Chairman Nottingham, appointed at the recent meeting of the medical association at Flint. are as follows:

Dr. Charles W. Hitchcock, Detroit; Dr. Charles T. Southworth, Monroe; Dr. Charles H. Baker, Bay City; Dr. F. C. Warnshuis, Grand Rapids.

'The question of fees to be paid under a workingmen's compensation law has been a hard question to solve wherever the laws are operative and Michigan is no exception," said Dr. Nottingham. "In Massachusetts, for instance, it was necessary to appoint an official state commission to fix the schedule. The Michigan industrial board has spent a great deal of its time listening to disputes between insurance companies and doctors over the fees to be paid. There is no trouble where the insurance companies see the physician before treatment is given, but physicians, called in for first aid before the companies could be notified, have shown a marked tendency to boost the prices out of sight and then take a chance on get ting away with as much as possible.

Canal Really Complete Now.

Although the canal will not be officially declared completed for some time, and the formal opening of the waterway to the commerce of the world more than a year distant, the canal engineers look upon the destruction of the Gamboa dike as marking the real completion of the canal. The big engineering feats have all been accomplished, the excavation work practically has been completed, and the great locks have been constructed. The work that remains to be done is largely detail, and is but child's play as compared with that which has been done. More dirt is to be removed from the channel, but this will be done with suction dredges floating upon the waters of the canal. There still remain some finishing touches to be placed upon the locks, but this work will take comparatively little time and presents no engineering difficulties such as have been encountered in the past.

The fact that the canal stands practically complete more than a year before the time originally set as the date for its completion is one of the remarkable features of the work. When Count de Lesseps, the great French engineer, abandoned his efforts to build the Panama canal after eight years of labor, he had scarcely made a beginning upon the gigantic task. In nine years, the American engineers, starting almost at the same point as de Lesseps, for the latter's work was of little value to the Americans, have virtually completed the undertaking. When the work was started the world scoffed at the idea that it would be completed within the time limit set, but hats are now off to the American army engineers who have more than kept their word, despite unforseen difficulties that have beset them at every hand.

with the copper country strike "But does this mean there will be no 1914 session?" the governor was asked.

He replied: "I would not say that. I was greatly interested in procuring passage of the blue sky law in the regular session this year. This law is now being attacked on the ground that it is unconstitutional. If it were thrown out, I should feel like taking steps to have it made constitutional. Other conditions may arise that would make a 1914 session advisable. I should say that it is among the possibilities."

Governor Ferris' attention was directed to the action of the American Federation of Labor in declaring a national assessment for the men

headed the state sleuths, and he on strike in the copper country. "It will be a wearying fight," he commented:

baking.

Biscuits No matter how successful keepers become with poultry, they are trying at all times to find how they may in-Baked crease their profits. To increase their profits means to increase egg production. Poultrymen are now debating whether a hen or a pullet is capable of the greatest egg production. There is good argument on both sides. Some claim that while hens lay less than oullets, they lay larger and heavier eggs and because of the fact the eggs command a better price than those laid by pullets. This is true, but in many sections of the United States, consequently the small egg is able to command as good a price as the larger ones. Others are in favor of pullets because they lay eggs which are claimed to possess a better flavor

Prize Winning Plymouth Rock.

than those laid by hens. No one disputes the fact that the pullets lay more eggs than hens, but their eggs are never so large.

Leghorn pullets commence to lay when about six months of age, while many of them start at five months. Therefore, it is a very easy matter to raise pullets so that they will be laying the winter after they are hatched. Pullet eggs do not hatch as well as those of hens. Not only that, but the chicks do not seem nearly so strong and lively as those hatched from hen's eggs. For this reason, the writer would advise pullets for market eggs and hens for breeders. The question of which is the better, depends upon whether you are using your eggs for market or for breeding purpose .- Better Farming.

One Man Spared No Expense in Stocking Place With Animals and Machinery, but Made Failure.

City people with money are pretty keen after good farms these days, and some large sums of money are being invested in land with a view of having a pleasant country home that will pay for its keep. But too many city men go into this line of business without looking far enough ahead. I know a man with plenty of money who thought he would like to be a farmer so he looked over all of the likely land near his city, finally selecting one that just suited him. But he had to pay a pretty stiff price. Then he ordered the best equipment put up. eggs are sold without grading and He did not care for the cost as long as the barn and the other buildings were of the most approved pattern. Advertisements of machinery caught his eye and regardless as to whether it was suited to his locality he bought heavily.

No expense was spared in stocking the place with the best animals. Price was no consideration, quality was everything.

Finally he organized a splendid farm. Then he looked around for a man who would take charge and in a few years make enough money to repay his investment. But that man was not to be found. The best manager he had could not make a fair profit on the money sunk in that farm. The man was not living who could make money on the enormous overcapitalization. Many farmers make the same mistake on a smaller scale. They will pay too much for their house or will put fancy fixtures on their barns and in other ways invest more money in their business than its limit of expansion would reasonably allow. And then they wonder why each succeeding year sees them no further advanced. -C. M. S.

SHEEP ARE MUCH NEGLECTED

No Animal More Capable of Responding to Different Methods of Treatment-All Make Money.

Too many farmers are overlooking a good opportunity by neglecting to have sheep on the farm. Men who do not like sheep must either learn to like them or keep out of the business. Men who do like them will take care of them, and when they are taken care of they are no more liable to disease than any other farm animal

The sheep is the most modern animal in creation. By that is meant that he has left no fossil remains in Hand Picking is Good Remedy for his own kind of ancestry. He is a

Captain of Pacific Coast Schooner Tells of Strange Bombardment of His Vessel.

Capt. A. Sunderberg of the steam schooner Wasp, which plies between Seattle and California ports, reports a strange experience at sea on August 7. In a report made to the Hydrographic office Captain Sunderberg says that at 10 p. m., when six miles east by south of Point Conception, his vessel ran into a thick fog bank which hung close to the water.

Without the fog rising in the least, a violent electric storm broke out, and for one hour and 14 minutes the blanket of heavy mist was pierced continually by discharges of atmospheric electricity and vivid flashes of angular zigzag and forked lightning. At 12:15 a. m., August 8, the steel foremast of the Wasp became charged with electricity from the top down to the spring stay. Captain Sunderberg says this

was not the usual display of St. Elmo fire, as the mast gave out loud reports as if from a powerful wireless apparatus While the vessel was bombarded by

lightning which coursed down her main mast, her officers and crew did not venture on deck.

Big Sleep.

-A middle-aged couple were preparing to leave for a week-end with a daughter in the city, and their last instructions to their grown-up son, who was a heavy sleeper, were to be sure and wind his alarm clock, so that he would be in time for his work the next morning.

Monday noon they got back to the house and were surprised to find the blinds closed exactly as they had been left the Friday previous on their departure. As they let themselves into the house they heard their son's voice coming sleepily from his bedroom: "What's the matter? Did you miss

your train?"

He Was on Duty. Herbert stood on a chair. The chair

stood in the pantry. The jam stood on the shelf. Her-

bert's mother stood on the threshold. Herbert stood his ground. "My son," said the mother, pointing

at him with astonishment. "I a-m s-u-r-prised! To think that my little boy would do a thing like that."

Herbert, resourceful and not at all abashed, looked at his mother straight in the eve. "Please do not interfere with the 'minnuvres' of a boy scout," he said.

"A boy scout?" "Yes, mother, after supplies."

Improving Constantinople. Constantinople's scheme for a metropolitan electric line is well under way. It includes the formation of what is known as the Ottoman Metropolitan company, capitalized at \$5,000,000 for the purpose of building and operating the line. Work is

Made Him Tired.

Robert is small, but rapidly leaving behind the baby age that tolerates sentiment. Not long since he overheard a young married couple of his acquaintance billing and cooing, not, be it noted, for the first time. The grown folk present smiled, but Robert's face remained solemn. Only, as he bent over the childish task that apparently absorbed him, he was heard to murmur, scornfully: "Goodness! Loving again!"

Literal Ones.

A Stroke of Business.

known, a shopkeeper who tried to keep up with the times thought he would outclass his rival across the street and purchased a thousand pounds of fine "cool" ice, paying about \$12 for it. He did a wonderful business the next day. All the town trade came to get a cool and had about 800 pounds of ice left. The next morning his brilliant black boy, who opened up the shop, greeted him with a happy grin. "Morning, boss," he said. "I's done a good bit of business this morning, sah." "How's that, boy; how's that?"

"Well, sah. I sold that fool nigger in | deal for Michigan." the store across the street all that stale ice that was left for 4 shillings, and he never knew the difference, sah!"-Everybody's.

Content With Little.

Some murmur when their sky is clear And wholly bright to view If one small speck of dark appear In their great heaven of blue.

And some with thankful love are filled If but one streak of light, One ray of God's good mercy, gild The darkness of their night.

In palaces are hearts that ask In discontent and pride Why life is such a dreary task And all good things denied,

While hearts in poorest huts admire How love has in their aid-Love that not ever seems to tire-Such rich provision made. -R. C. Trench.

Must Have Been a Terror. Gene Stevens, being asked if he knew a new story, deposed and said that he did not, but that he had a friend who was very sick and that the friend had had a good doctor, but that the doctor was puzzled about the case. So a consultation was held. Four other doctors came, looked wise, shook their heads, talked it over together and went away. Then the first doctor summoned the patient's wife.

"I am sorry to tell you that your husband is in a bad way," he said. "If he is religiously inclined I should advise that you send for a minister without delay."

"Yes, doctor. Shall I get just one minister or will he need a consultation?"-Cleveland Plain Dealer.

thing he knew was that he was in the ton she may dine with anybody she hands of four stalwart attendants, who caught him from behind, swung him allows her to walk through a quadrille out of his chair and carried him out of with a high official, but no lady of the the casino into a small room adjoining. Refusing to listen to his angry protests, they hastily laid him on a sofa, forced his jaws open and poured a strong emetic down his throat.

The consequences were so immediate beyond speech. By that time it was too late for his explanation that the lozenge was merely a sulphate of quinine and that the casino authorities were idiots for jumping to the conclusion that he had lost his last penny and taken poison.

Curious Glowworm.

A mammoth glowworm has recently been found in the Santa Cruz mountains. The specimen is about four and a half inches in length, and when placed in the dark the rings encircling the body produce a gorgeous effect.

driven to the devil. I accepted the amendment -- President Lowell in Harvard Graduates' Magazine. An Insulting Offer.

A well known but broken down Detroit newspaper man who had been a power in his day approached an old friend the other day in the Pontchartrain hotel and said:

"What do you think? I have just received the prize insult of my life. A paper down in Muncie, Ind., offered me

"Do you call that an insult?" "Not the job, but the salary. They offered me \$12 a week."

"Well," said the friend. "twelve a week is better than nothing." "Twelve a week-thunder!" exclairaed the old scribe. "I can borrow more than that right here in Detroit."-I.etroit Free Press.

Names of the Grapefruit.

The grapefruit is simply a variety of the shaddock. How it got the former the district conference of the mission name is a question, but how it got the latter is a matter of history. The tree was named after a Captain Shaddock, who early in the eighteenth century took it to the West Indies from the Malayan and Polynesian islands, of which it is a native. Perhaps no other tree or fruit has so many names or so many queer spellings of a single name. Besides its full dress name of Citrus nesday evening by Rev. F. M. Field at aurantium decumana and its common the Latimer home on Minnesota avenue. name of "forbidden fruit," it is called pompoleon, pampelmoes, pompelmoes, pompelmous and pompelmoose.--Boston Transcript.

The Lady of the White House. The president's wife has a definite legal status, and strict rules are laid

down for her behavior during her husband's term of office. The lady of the White House must not accept general invitations and, outside of the cabinet circle, cannot attend a formal dinner white lozenge into his mouth. Next in Washington Away from Washinglikes. There is an unwritten law which White House has ever been known to whirl in a waltz .-- Chicago News.

FOREST GUIDEPOSTS

Governed by information gathered by the wardens of this Association this in office has prepared a large number of honor of the approaching wedding of destination and direction signs which are being posted generally throughout Basil Hawley spent Thursday at his the patrolled ranges for the benefit of those who have business within the Thomas A. Latimer and Miss forest. Many men have spent a night Jeannette Langley were married Wed- in the woods within hailing distance of warmth and comfort. It is not un. common, and the experience has fallen us all, to be wrongly guided to our destination and find that we must retrace weary miles to regain the proper road or trail. Camp fires are constantly built and many of them left burning, when the convenience of a cabin were within easy reach were it but known.-T. 'B. Wyman, secretary Forest Protective Association.

> CORNELL COUNTY ROAD. Sealed proposals for clearing and grubbing a portion of the Cornell county road extending from Southeast corner of Section 7, township 40 north of range 23 west, along the south line of Section 12, township 40 north of range 24 west to the southwest corner thereof, a distance of two miles, Delta county, Michigan, will be received by the Board of County Road Commissioners of said county at the office of the County Clerk, at Escanaba, until ten o'clock Wednesday, October 15th, 1913. Specifications are on file at the County Clerk's office. Bids will be received for all above work or for one-half mile or more according to the government half sections.

> All bids to be marked on the outside, 'Bid for clearing and grubbing a portion of the Cornel Road." The right is reserved to reject any and all bids. Dated, Escanaba, Mich., Sept. 29, 1913.

> JOHN A. SEMER, Clerk of Board of County Road Commissioners. 28-29

Is a most peculiar substance. It dries about as fast as paint or varnish, which is quite similar in body. A man who would not expect his painter to give him his buggy for use the afternoon it was painted, will take a couple of weeks to figure how he wants a piece of printing done and then expect the printer to finish it up the same day. This is not conducive to satisfaction on the part of printer or customer.

If you need your stationery replenished, a week is little enough notice to give the printer. A job which is padded or bound requires time for the ink to dry before it is handled, and additional time for the binding.

Look over your supply of printing today. Do not wait to order until you have not even a clean sheet for copy. Give the workman time and his work will suit you better.
