This measure is designed to enable the city of Detroit to buy the Detroit United railway lines on contract.

Of the other bills passed, all save Senator Covert's bill to detach Lapeer county from the Sixth judicial district, were of an amendatory nature and of minor import.

The house has killed Representative Wolcott's bill calling for secured bank deposits.

The senate cleared up the larger part of its calendar within the space of two hours and then adjourned to wait on the house, which, with its long roll calls and larger membership to continue arguments, faced work that kept it in session until midnight.

The senate passed 14 bills in committee of the whole and then suspended the rules and considered four of them on the third reading, passing them all. The most important of these was the Barnes bill, aimed at fake mendicants, and setting penalties for false claims of blindness as a means of obtaining public alms.

The Roberts bill to permit the holding of moving picture shows in second floor halls, where the operator of the film machine is working in a firethe bills passed in the committee of

Ferris Urges Tax on Site Values.

The chief feature of the meeting in Lansing of the Michigan tax reform conference was a speech by Governor ten-round boxing bouts in the state, Ferris in which he reiterated his oftwith eight-ounce gloves, under the di- expressed opinion that the single tax theory was the proper one. He insisted that there should be

but one tax. His arguments were emphasized by Professor Lewis J. Johnson of Harvard university, who declared that the "fundamental blunder in our tax

ings to pay its expenses." "This blunder springs from failure to realize that the community has a

ues, the values of sites due to nearness to centers of trade and populameans of transportation, etc.," he said. "The current 'ability-to-pay" doc-

trine fails because it makes no distinction between ability to pay due to having served the public and ability to pay due to having plundered the public.

"Owners of improved real estate, including farms, would usually be more than reimbursed for the increase of the tax on their sites by the exemption of their buildings and oth-r improvements on or in the land, and of personal property. The farmer's advantage, in common with that of other workers, is clear when it is realized how very little site value he is now enjoying."

Morning, afternoon and evening sessions were held and there was much argument over the proposition of amending legislation to provide for home rule taxation.

Holes were picked by the score in the present Michigan tax laws.

Ferris Liberates Three Convicts. Three inmates of the Michigan state prison at Jackson were granted executive clemency by Governor Ferris

as follows: Carl Bossick, sentenced from Ingproof "coop" that meets the require- ham county August 26, 1912, for from ments of the city council, was among 71/2 to 15 years on the charge of assault to rob.

MORE ATTENTION TO BRIDGES

Greatest Menace to Tractor Which Could Be Put to More Use on Many of the Small Farms.

We will never be able to readily make much use of the gas or steam tractor on the farms until we make up our minds to pay more attention to our roads and bridges. Especially the bridges. They are the greatest menance to the tractor and the tractor's driver, and there has been little improvement in the type of bridges since the engine was put to work on the farms, writes William E. Rose of Iowa in Farm Progress.

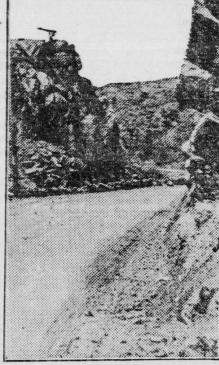

It is rather strange that we are willing to use the traction engine to pull our road plows and our road graders and still refuse to build bridges and culverts strong enough to allow the same engine to pass in safety when pulling a threshing outfit or a train of farm wagons. But it is the truth, nevertheless.

In spite of all the possibilities of the tractor, or the old-fashioned traction engine, a lot of people look upon it as an ugly contraption that ruins road surfaces, smashes culverts, breaks has been married three times. His down bridges, scares horses and sets first wife died and Mrs. Reicks says fire to meadows and rail fences.

It is altogether wrong. We could troit in June, 1913. make splendid use of the tractor on any and all farms of more than eighty acres. Some day we will make these engines do much of the work, the of \$40,000. Sparks flew half a mile heavy hauling done by horse teams, and we will save money by so doing. But that time will not come until we north of Newago. Burning grass carhave better roads. And that cannot comes to pass until we get a better su- much other property. State Happenings

Hastings .- All previous records for attendance were broken at the annual conference of the Ministerial association of Wesleyan Methodists of western Michigan, just ended at Clarksville. Prominent Weslevan pastors from all over the state delivered addresses. Statistics showed great increases in congregations. Officers elected were: President, Rev. J. A. McPherson, Coldwater; vicepresident, G. L. Densmore, Owosso: secretary, Rev. J. B. Thompson, Rives Junction; treasurer, Mrs. Ethel Ovenshire Marshall.

Grand Rapids.—An attempt to burn the Bishop furniture store was prevented by the police and William Lutz, alleged incendiary, jailed. Lutz was arrested, say the police, as he was leaving the furniture store. Finding the grating of the outside door filed through, the officer investigated and discovered a blaze rapidly eating its way along the inner wall. He stamped out the fire. Lutz is said tobe a discharged employee of the furniture store

Alpena.-Chris Reicks, formerly of Alpena, who was arrested in Detroit by Sheriff Simons on a charge of bigamy, arrived in Alpena. He will have a hearing before Justice Perkins. Mrs. Mary Reicks, wife of the man, swore out the warrant. According to Mrs. Reicks she was married to Reicks in Alpena October 4, 1902. She says he that he married Minnie Tebo in De-

Newaygo.-Fire destroyed the new factory of the Henry Roe Manufacturing company, inflicting a property loss over the city and set on fire two barns across the river and a dwelling ried the flames uphill and menaced quette depot was threatened for a time, but the direction of the wind

Kalamazoo.-It has been noticed during the last few days that everyone guilty in Judge Faling's court of drunkenness has been sentenced so

Hastings .- In raid at Long Lake, The tractor has a right to use the Deputy Game Warden Yeider arrested with selling in Kalamazoo quantities

Charlevoix. - The United States

Northville. - Fire destroyed the barn on the farm of George B. Yerkes at Northville and cremated 13 blooded Holstein cows. Loss to the stock and the building is placed at \$15,000, covered by insurance.

Paw Paw.-The warehouse of the Paw Paw Basket company, owned by J. J. Schuur of Kalamazoo was destroyed by fire. The warehouse contained thousands of baskets for this year's fruit crop.

Grand Rapids.-Because he feared he was losing his mind, Ira Rice, aged thirty-five, a furniture worker, shot himself. The body was discovered in a box car. West Branch.-The home of John

Thomson and a warehouse owned by

Charles Neilson were badly damaged

by fire. The latter fire was caused by sparks from an engine. Battle Creek .- That she may marry her childhood sweetheart in Europe, Judge W. H. North granted divorce to Mrs. Clara Lenart of this city. Mrs. Lenart will leave at once for Europe. Charlotte.-Accidents are being diminished by sign posts placed at

hicles Keep to the Curb." Grand Rapids.-Frederick Krekel, aged eighty-three years, oldest shoe merchant in Michigan, died at his home here.

have repaid such a communication with a knife-thrust. The whole court is honeycombed.

"While the prince was still hesitating, he suddenly became aware of an unusual sound, coming from the far end of the gallery, where it ended in the disused apartments I have described. The sound appeared to be that of a door slowly turning on its hinges. In an instant Boris realized, or thought he realized, the situation. The personage of the garden had arrived in the vacant suite by means of a secret stairway from the garden door, and was now about to pass through into the gallery, with the object, no doubt, of making his way finally into the imperial corridor.

"There was not a moment to lose. Unarmed, as he stood there, Boris fortunately recollected that in the little chamber, which I have spoken of as set apart for the use of the pages, there were a pair of loaded pistols and a sword. He darted in through the open door of the room, snatched up the sword and one of the pistols, and had got back nearly as far as the threshold, when he was arrested, and his very limbs were rooted to the ground, by the sight of the figure which passed noiselessly along the corridor outside.

"Imagine a tall and somber apparition, with long black robes sweeping the floor, the head shrouded in a deep cowl, from whose recesses gleamed out, pallid and spectral in the light of the moon, the features of the dead monarch. Alexander III!"

At this point his excellency pretended to perceive for the first time the change which had taken place in the position of the chessmen.

"Ah! You have moved your king," he exclaimed, and promptly shifted his attacking bishop so as to give me a fresh check. Then he returned to the

"A moment passed. The first shock of terror over, the awe-struck page ventured to the door of the chamber and glanced out into the gallery. The ghost had disappeared, as suddenly and as mysteriously as it had come."

"Were there no other rooms off the gallery into which it might have passed?" I demanded, not to appear too credulous.

"There were none. The only other door in this part of the gallery was that which I have already described as closing off the imperial corridor.

"Be sure that I put the same question myself when my young friend told me the story. His manner convinced me that he was not lying, and that he really believed himself to have seen the specter he described.

"As you know, I am not a believer in the supernatural. I sought to shake the boy's superstitious state of mind. "'What you saw was some illusion, some trick of the imagination,' I said

'I am as certain of what I saw as if "The imperial suite, comprising eight | it were before me now,' he replied. 'My mother will tell you that I am not sub-

> "The princess confirmed this statement with a nod of her head.

"'I am sure that my son must have seen something like what he describes,' she said to me, 'though it is evident to me that it must have been some living person, masquerading as the ghost of the tsar. The question is for what purpose such a disguise could have been assumed, and on this point I confess I feel uneasy. What do you say, my friend?"

"I shook my head.

"'I fear that the first suspicions of Boris were correct,' I replied, 'and that the enemies of his majesty have resumed their infernal schemes.'

"Both mother and son appeared struck by this view of the circumstances. But Boris was by no means supernatural character of what he had

"'It may very well be that this was comrade at nine o'clock. He had sim- noissance, to discover the nature of explosive machine or other, and the out of sight for a few minutes. Doubtless he returned immediately, only you

> "'But there is an easy way of putting the matter to the proof. If I am everybody at this ball, will be his most favorable opportunity, as he may confidently expect to find the imperial suite deserted. I propose to you that page who has replaced you tonight comes off duty, and if this mysterious personage again presents himself, I will compel him to disclose his

> identity. "Boris welcomed this idea. I could see that he was secretly ashamed of his story of ghost-seeing, and that he was anxious to re-establish his charnot become me to repeat to you. In

> "Throughout the progress of the ball -during which the Grand Duchess Olga condescended to become my partner in a waltz-I kept my eyes and ears open, and observed that Boris' general topic of conversation. The more highly-placed officials were evi-

suspicions. I ventured to approach the envoy of a foreign power, my person interval between the dances, and to ford to risk an indiscretion. sound him delicately on the subject. His reply was characteristic of his na-

tion and government. "'My dear baron,' he said sharply, 'there is nothing so detestable as court gossip. It is most annoying to his majesty to have his late father's name connected with the wanderings of a moon-struck boy. Take my advice, and dismiss the affair from your

mind.' "His manner convinced me that more importance was attached to the incident than he pretended. However, I feigned to be perfectly satisfied, and returned to the grand duchess, who was anxious to know whether her robe would have been approved in Paris. But the hour agreed on for the rendezvous was approaching, and I had to make the best excuse I could think of to tear myself away from the imperial

lady. "Boris met me, as we had arranged, mous haunted gallery. The page on

duty was just leaving as we arrived. "I had come armed with my revolver, which I had loaded carefully with my own hands. I took advantage of the interval, while we were waiting for the approach of the apparition, to make my companion provide himself. with a similar weapon out of the pages' room. Lest our presence in the gallery should serve as a warning to the mysterious visitor, and prevent his approach, we concealed ourselves in this room, which was plunged in profound darkness.

"Half an hour passed in this way, without anything occurring. I began to grow impatient, and to accuse Boris in my own mind of having invented some fable. But when I hinted this to him he became so indignant that I was compelled, in spite of myself, to believe that the boy had really some grounds for his story.

"At last, tired of this useless performance, I rose from my seat and moved cautiously out into the gallery. I glanced up and down it without perceiving anything in the least resembling the figure of the previous night. All at once, however, I did see something which caused my heart to give a of the gallery, where the deserted apartments of which Boris had told ceived a faint glow of light along the

"Instantly I turned to the threshold of the room in which I had left the young prince, and beckoned to him to come out into the gallery. He saw by my manner that I had made some important discovery, and obeyed my gesture with shaking limbs. No sooner had he emerged from the doorway, and followed with his eyes the direction in which I pointed, than he gave a great gasp of terror.

"The deserted suite!' he exclaimed in a hoarse whisper. 'There has never been a light there in all the years that I have known this part of the palace!" "I nodded my head.

"It is what I expected you to tell me,' I whispered back. "But what is to be done?' he murmured. 'Shall I summon the guards,

or inform Volevitch, of the secret po-

"I considered well before answering. One of those subtle intuitions which are born of a long experience in secret politics warned me that I stood on the threshold of some discovery of no ordinary kind, one which I might perhaps regret having to share with the secret police, and which, for many reasons, it might be better that Boris himself should not be made acquainted

"'No,' I said at last, 'we have no right to act precipitately. Whatever ways had the reputation for worming we may suspect, we as yet know noth- out more secrets than any other man ing that would warrant us in communi- in Europe, and I ought to have fore-"I chanced to be dining at her man- might have been a secret Nihilist, and there were not a few who shared my cating with the authorities. tsar's confidential chamberlain at an is inviolable, and I can therefore af-"'Remain here, I beg of you, while

I go forward and effect an entrance into the apartment from which that light proceeds. Should I not return by the end of fifteen minutes, I authorize you to go to M. Velovitch and inform him of the affair.'

"The lad was at first disposed to be indignant at my thus proposing to exclude him from the perils of the enterprise. But by dint of an appeal to the authority of his beloved mother, I succeeded at length in winning his

consent to the plan I had suggested. "The light I had observed streamed out under an ancient and massive door, set in a deep stone arch at the extreme end of the passage.

"I laid my fingers on the oaken handle, and turned it with infinite delicacy and slowness. As soon as it ceased to revolve under the pressure of my hand. I gave a gentle push to out this design it was necessary that I the door. To my delight it yielded. I should take five persons into my confiin a small passage leading out of the gave another push, equally slight, and dence, my wife, my son, two physianteroom, and we made our way unob- the door responded with a horrible cians of whose personal loyalty and grating sound. Further concealment was useless; I boldly flung the door open, and stepped through.

"The first glance was sufficient to tell me that I had merely gained an ante-chamber, forming a sort of general approach to the various rooms of which the suite was composed. This anteroom was deserted, but immediately on the right lay a room of which the door was partly open, and from which proceeded the light that had filtered out into the gallery. Hastily closing the outer door behind me, I made two steps into this inner room.

"Never shall I forget the thrill, the absolute stupor of amazement, which overcame me at what I beheld. There, half-risen from the chair on which he had doubtless been seated when aroused by the creaking of the door, I saw the very figure which Boris had described to me, the tall form, the dark robes, and, above all, the pale and terrifying countenance of the monarch whose death had cast half Europe

into mourning. first caught sight of this startling ap- any questions on his part by a few parition I do not recollect. But when the personage before me thrust his hand into his pocket and drew out a revolver, it was impossible for me to flesh and blood. Like lightning I proclaiming:

"'Hold! I am the envoy of France! In the name of the tsar, who are you?' "He lowered his revolver, took a steady look at my features which he no doubt began to recognize, and replied in mournful tones: "'I am Alexander III.'

"At the same time he sank down again into his chair, while my pistol dropped from my hand, and I had to cling to a table for support.

"'Sire!' was all I could gasp out. 'But-but-pardon this intrusion, I imagined your majesty to be-

"'Dead? Yes, I know it,' he responded, still in the same melancholy voice. 'But sit down. Since you are here, and chance or fate has put you the board, and made the move which I into possession of my secret, you had better know all. Sit down, M. le Baron, I am no longer an emperor.

"I obeyed, still struggling with my astonishment.

"'First of all tell me by what means you have penetrated to my hidingplace, in which I imagined myself secure from all mankind,' said the ex-

"In as few words as possible I related to his majesty the incidents which I have been telling you. He listened with deep attention.

"'Ah, well, baron, I remember you of old, he remarked, with a faint smile, when I had finished. 'You al-

you into my confidence. It is .fortunate that you have come alone, and that your rigid honor is not less celebrated than your dexterity."

"I bowed deeply at these compli-

ments. His majesty continued: "'The only return I can make to you for a fidelity of which I assure myself beforehand, is to explain to you my reasons for what must seem to you an extraordinary state of things. The fate of my father, Alexander II, slain by a bomb in the streets of St. Petersburg, is, of course, familiar to you. But it is not easy for you to realize the effect produced by that fearful event on my mind.

"The perils of a battlefield may be faced by a brave man, in the enthusiasm which battle calls forth. But the perpetual secret peril which dogs one day after day and year after year, and never slackens for a single momentthat is a very different thing.

"'I am not ashamed to confess to you, baron, that from the moment I ascended the bloody throne of Russia. my life was one long haunting agony. Never once did I have one hour of perfect freedom from care. And I could do nothing. I was helpless, a martyr bound to the stake of my autocracy. They prated to me of reforms. You are a man who knows Russia as few men know it, and you can tell me whether the first step in the direction of reform would not have drawn down on my head the vengeance of men beside whom the Nihilists are bungling apprentices?"

"I could only bow my acquiescence in this sorrowful truth.

"For years, proceeded Alexander, 'I had secretly set my heart on abdicating. I only waited till my son Nicholas was of an age to face the dangers and difficulties of his task. But by the time that the hour of release drew near. I had learned that abdication would earn me no respite from the hatred with which I was pur-

"'I had acquired the knowledge that there were those who had sworn that, on the throne or off it, I should not be allowed to die a natural death. To give up my imperial state would simply be surrendering my safeguards, without for a moment disarming the enmity of those who sought my life. It was these considerations which ultimately forced me to entertain the idea of a deception which I lament, but to which I owe the first peaceful days I have spent for twelve years.

"'I resolved, as you have gathered by this time, to go solemnly through the forms of death and burial, and thus acquire the right to retire to some unsuspected retreat, where I might pass the remainder of my days, shielded from the vengeance of my relentless pursuers. In order to carry friendship I had had many proofs, and an old trusted body-servant on whom was cast the duty of arranging for my future privacy, and attending on me in it. He is at this moment away procuring supplies of food."

"These words of his majesty reminded me that Boris was impatiently awaiting my re-appearance. I glanced at my watch. Twelve minutes had already passed.

"'I must leave you now, sire,' I exclaimed, rising hastily, 'or my comrade will be seeking me. Rest assured that I shall not prove unworthy of the trust you have deigned to repose in me. But I venture to advise your majesty to discontinue your visits to your son's apartments for the present. Should you desire to lay your commands upon me at any time. I shall be found at the French embassy.'

"With these words I took a respectful but hurried leave of the ex-tsar, who bade me a cordial farewell.

"I rejoined Boris just as he was about to set off and give the alarm, "What exclamation I uttered when I and was successful in putting a stop to judicious words.

"'I am forbidden to tell you what I have discovered, I said, with a slightly jocular air, 'but I may tell you in congreat bound. Looking at the far end doubt that I was dealing with a man of fidence that I think you must have mistaken the son for the father. Next duced my own weapon, which I leveled time you intercept his majesty on a me were situated, I distinctly per- at his breast, at the same time ex- midnight excursion, you will perhaps be able to assign reasons of a less mysterious character for his visits to the very charming bachelor apartment which I have just explored. "The young prince accepted this ex-

planation readily enough, and its effect was confirmed the next day by the issue of an order discontinuing the guard in the gallery altogether. As I have told you, all trace of the incident quickly disappeared from the society of St. Petersburg. And at the end of a few weeks the unlucky page received the honor of a lieutenant's commission in a regiment which happened to form part of the garrison of Vladivostock on the coast of the Pacific."

His excellency stopped, glanced at had been dreading for some time: "Checkmate!"

"But surely," I remonstrated as the ambassador rose from his chair and stretched himself, "you heard something more of this strange business?"

His face instantly became grave. "There is nothing more which I feel at liberty to mention, even to you. Had his majesty been still residing at the winter palace, I should not have told you the story. He honored me so far as to avail himself of my services in providing himself with an asylum in which his enemies are not likely to reach him, and which is, indeed, outside the borders of the Russian empire. But what do you say? Will you play me another game, and let me try M. Lasker's celebrated attack?"

A reputation for being a good printer is harder to get and easier to lose than in almost any other line of business. The reason for this is that the public is not a good judge of good printing, but a good critic of poor printing. The job has to be way above the ordinary to excite favorable comment, but it has to be but little below the standard to be criticized. The buying public has become so accustomed to not paying for printing talent-the art that goes into the composition and press work—that it is hard to convince the buyer that it is just as much-entitled to recognition when the price is fixed as any other ingredient. When figuring on a job this very essential ingredient is ignored, forgotten, lost sight of, and altogether neglected. In truth it doesn't always appear in the job. Sometimes the customer is to blame for this, by insisting that certain lines be set in certain type to the detriment of the artistic balance, and sometimes the exact type for the line is not available in the office. The buyer of printing may not know the difference, but many receivers of printing do, and the favorable comment is just as potent if coming from the one who receives it through the mail, as when coming from the one who pays the bill .-- The Printing Trade News.

NEW DEVICE ENDS PERILS OF THE RAIL

By ROBERT H. MOULTON

HE introduction of steel passenger cars on the railroads having been the means of saving hundreds of lives, the interstate commerce commission now proposes to find some device that will make derailment, collisions and wrecks impossible. A nation-wide

search is being conducted under congressional order, and to Anatol Gollos, a Chicagoan, has fallen the honor of being the first inventor in the country to procure an official investigation. the reward coming after three years of work on an automatic train control and recorder. Tests are made by the government only after the preliminary inquiry has shown that the device is

The tests of Mr. Gollos' invention will be made on the main branch of the Chicago, Burlington & Quincy railroad, a stretch of six miles of track having been equipped for the purpose. They will be held under the personal direction of H. J. Lyon, inspector of safety appliances for the commission, who has reached Chicago prepared for a six months' study of the subject.

The Gollos automatic train stop device consists of a charged third rail, about one hundred feet long, placed at every block. The energized track comes into contact with a shoe fastened on the tender of the engine which is susceptible to the slightest influence. If there is another train within a radius of one mile and a half, if there is a break in the track, or anything wrong at all, warning is given to the engineer by a shrill whistle placed near his seat. If he does not slow down his train at this warning, the air brakes automatically set. This air is applied quickly, but in a way that stops the train gradually. At private tests given by Mr. Gollos recently trains of all weights and speed were stopped in 150 to

Aside from the fact that the demonstrations ulready given have proved the practicability of the devices, the inventor claims that they are

more economical than automatic installations made according to present practice. In addition, they have the advantages of, first, train control; second, visible and audible signals; third, automatic record to check engineers, thereby holding them to a close observation of sig-

An important feature of the system is that it is so constructed, on a closed circuit principle, that any break, failure or disarrangement of any part of the main track or contact rail connections, or the failure of the electric current, or any disarrangement of the locomotive attachments, will cause the most restrictive indication, when the train will be brought to a stop, until corrections or re-

control and at a predetermined speed only. The wiring is specially constructed so that any crosses or grounds will cause a danger condition. If repairs cannot be made immediately by the engineer, he may cut out the instruments, when the train can proceed, but if this is done a record

and adaptability to the movement of any and all kinds of trains, irrespective of their motive power or frequency. The system will work equally well on trains operated by steam, electricity, gasoline, or compressed air, and whether such application is direct or by means of the trolley, third rail or storage battery methods.

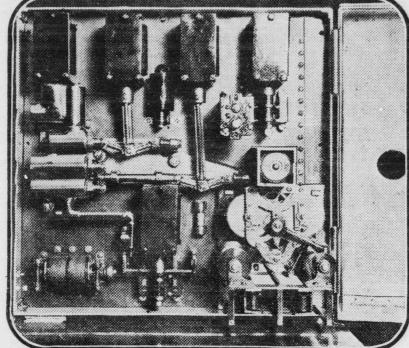

railway operation and to eliminate all danger from lapses of memory on the part of the engineers or others connected with the operation of railways, and to make such a record as will provide an exhibit of proper or improper opera-

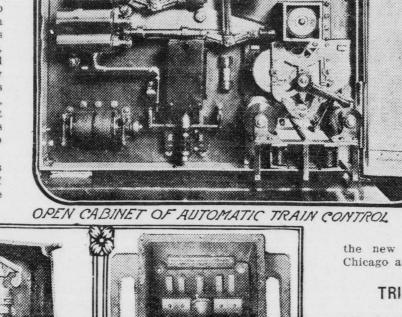

hands of the engineers just as long as they observe the restricting signals provided for their guidance, but any failure to do so immediately and automatically relieves them of said control. As soon as the conditions permit of safely doing so, the control is again and automatically

type, with the engine apparatus clear or inoperative while running between points of indication. When the engine shoe makes contact with the contact rail, the engine apparatus is still held clear or inoperative, provided the contact rail is energized. If it is desired to make the control intermittent, particularly in congested terminals, the desired object is accomplished by making the contact rail continuous. Both the contact rail and the shoe on the engine are so constructed as to keep them within the limits of the safety clearance requirements, and personal contact with the contact rail is not injurious.

tem is carried out is as follows:

any other point, the automatic apparatus is in such condition that the train can only proceed at a predetermined reduced speed. When the engineer opens the throttle to proceed, it automatically starts a whistle in the cab. This whistle continues to sound and the reduced speed regulation continues until the train contact shoe engages with a clear contact rail. This rail being fully energized supplies a current which sets the control in position to permit the train to proceed at full speed, and also stops the whistle. The contact with this shoe is recorded by a recording apparatus and the contact also causes the lighting of a signal lamp in the cab. The passage of this rail is acknowledged by the engineer, who presses a button which puts out the TESTING GOLLOS AUTOMATIC TRAIN CONTROL

GOVERNOR WHICH CONTROLS SPEED OF THE TRAININ CAUTION TERRITORY

pairs are made, when it can proceed, but under

Another feature of the device is its elasticity whistle will stop.

The initial purpose is to promote the safety of tion and observance of signals and orders.

The control of the movement of trains is in the restored to the engineer.

The system is of the intermittent contact rail of the speed of the train continuous, instead of

The manner in which the purpose of the sys-

When a train is standing at a terminal, or at

lamp and this acknowledgment is also recorded by the recording apparatus.

SHOWING SHOE WHICH IS

OF LOCOMOTIVE

ATTACHED TO THE SIDE

The next action which may be described, is when the contact shoe engages with a partially energized contact rail, which indicates a caution condition. When this occurs, the engine apparatus is again set for reduced speed as when starting out, and the whistle blows continuously. If, in the meantime, the train in the advance block has moved on, or any other obstruction has been removed, so that the next contact rail is in "clear" condition, the cab system will be automatically returned to normal, full speed condition when it passes such contact rail, and the

On the other hand, if the danger condition continues and the contact rail is de-energized, denoting danger, the train will be automatically stopped when its contact shoe comes in contact with this de-energized rail. This stopping will also be recorded, and at the same time a chime of two whistles will be sounded to warn the engineer that this is a stop application.

If the engineer desires to proceed, he must press a button on the cabinet door, which resets the automatic apparatus to caution or slow speed condition. Having reset the instruments he may now proceed as in the first instance, at controlled reduced speed.

If the engineer has observed a danger signal and stops his train before the contact shoe comes in contact with the de-energized rail, he may, if necessary, in an emergency, pass the de-energized rail. In order to pass the de-energized rail a separate and distinctive switch is provided, which must be held down continuously while passing the rail. The pressing of this switch is also recorded. However, if he should attempt to pass a rail by pressing on this switch before the train has stopped, he would cause a stop application. After passing the de-energized rail, as before described, the train may proceed under caution operation at a predetermined, controlled, reduced speed.

While an automatic control system has many advantages, some of these advantages would be lost, if the system could be freely manipulated. unless such irregularity is automatically detected and recorded. In order to insure the proper operation of this system, and to record the action thereof, as well as to record whether the engineer is properly observing his signals, certain portions of the system are inclosed in a box or cabinet. This box or cabinet is made to contain the valves, magnets, relays, clock and recording mechanism, and is provided with a lock and a special door. The cabinet is about eighteen inches square and six inches deep and may be mounted in any convenient place in the cab.

This system is intended to actuate or co-operate with any suitable form of mechanism on the car or locomotive which is used for stopping the same, such as brake actuating mechanism, and it is particularly adapted to actuate or co-operate with the air brakes which are now commonly

employed for this .purpose The inventor, Anatol Gollos, was born in 1877. Early in life he showed a marked interest in mechanical subjects, and after a general education was sent to a manual training school. There he studied for six Electricity, though then in its infancy, had attracted much attention and Gollos dropped all other subjects for a special course in electrical engineering.

ANATOL

GOLLOS.

After serving a rigid apprenticeship, Gollos went to Germany. There he stayed for four years, during which time he superintended several big government jobs.

In 1903 he came to America, and the following year found him in charge of the main switchboard at the Louisiana exposition in St.

Opportunities in Mexico attracted him and, after the close of the exposition, he went to Mexico City. There he remained for a year, serving as superintendent on various electrical installations. He was in charge of the electrical installation in

the new Northwestern passenger terminal in Chicago and other important works.

TRICKS THAT BULLETS PLAY

Life Saved by the Hook of a British Officer's Helmet Chain.

It has been truly said that, once you fire a bullet from a modern rifle, none can forecast what ander, using as much of the celery as it will do or where it will ultimately come to can be pushed through. Put this into rest. Even when a bullet has an uninterrupted course, says Frank Scudamore in the London Globe, it is capable of upsetting all known calculations of its flight and range. Before the battle of Omdurman a sick officer was taken across the Nile and placed under an awning at least 5,500 yards from the nearest point of possible fire. This should have insured him an ample margin of safety, but none the less a stray bullet ate up the intervening three miles of desert, struck him in the head, and killed him.

Shortly before the battle of Giniss, in the Sudan, Gen. Sir Archibald Hunter, Colonel Hacket-Thompson, C. B., and another officer whose name escapes me, were reconnoitering through an opening in the wall of a disused sakeeyeh, or waterwheel. The hole in the wall was so small that the officers had to stand one behind the other to see anything. The officer whose name I forget was in front using a pair of binoculars, while Sir Archibald Hunter was in the rear. The glint caused by the setting sun shining on the glass of the binoculars attracted the attention of a dervish who, together with others, was retiring along the Nile. He stopped, took aim, and fired. It was a very good shot for it sped through one lens of the binoculars, through the brain of the officer holding them, killing him on the spot, through the shoulder of Colonel Hacket-Thompson, and finally lodged in the breast of Sir Archibald Hunter, where, I believe, it rema'm to this

The vagaries of a bullet when it touches the human frame are almost beyond belief. During another Sudan battle I saw an officer, a friend of mine, go down apparently shot through the head. To my surprise and relief I met him walking about after the battle apparently none the worse, save that his head was bandaged. Then he showed me how a bullet, striking and deflected by one of the hooks of his helmet chain, had run right round his forehead, cutting a groove under the skin, and had then glanced off the helmet hook on the other side.

'TWIXT BULL AND BEAR

How Two Californians Released Themselves From a Critical Situation.

E. S. Collins, postmaster at Knight's Ferry, Cal., and Samuel Baugh, a blacksmith, have just escaped from an encounter with a bull and a ter. Drain and arrange in layers with bear which they will not soon forget, the New a rich white sauce and a generous

Collins bought a bull and had him in a corral just above Knight's Ferry. He and Baugh went brown. out to inspect the purchase when the angry animal started after them and gave chase. Collins reached a nearby tree in safety, but Baugh was not so lucky, and crawled instead into a nearby cave, just in time to escape the charge of the Bake slowly in a moderate oven. Serve | Mellie Maywell.

He emerged hastily, however, and again the bull charged him, and he sought refuge in the hole a second time. Finally Collins warned the blacksmith to stay in the cave, saying that the bull would tree them both and keep them in the field all night. For answer, Baugh again jumped in and out of the cave and a moment later, as the bull charged past, grabbed the animal's tail

As both men climbed the fence, Baugh explained why he didn't remain in the cave. There was a bear inside which disputed his ownership. The two men returned later and succeeded in dispatching the bear and two cubs.

SOME SOUPS WITHOUT MEAT.

The purpose of a soup at the begin-

ning of a meal is mainly to prepare the stomach for the heavier foods which will follow by warming it and stimulating the flow of gastric juices. When soup is given as a food, taking the place of other dishes, it should be prepared with

that end in view. A

cream soup is one of these-a meal with bread and butter. A puree of beans or peas is another satisfying soup

Asparagus Soup.—Take a bundle of asparagus, cut off the heads and put them aside for a more delicate dish or to be used as a garnish for the soup. Cover the shoots, after cutting in small pieces, with a quart of water; boil up and drain off the water, throwing this away. Cover with boiling salted water and cook until the asparagus is tender. Rub through a colander, add this to the liquor in which it was cooked and with a pint of milk put on to heat. Cook together two tablespoonfuls of flour and butter, add to the heated soup and cook for five minutes. Serve very hot with crou-

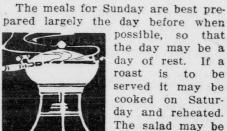

When you have boiled cabbage for dinner, save the water in which it was cooked for

Celery Soup .- Put two tablespoonfuls of butter in a saucepan, and when bubbling hot add a slice of onion; cook until brown, then add the cabbage water (a pint) and four goodsized carrots, put through the meat grinder (fine). Stew gently for an hour in a tightly covered kettle, then add two tablespoonfuls of butter; put the puree through a sieve, reheat, season with a dash of lemon juice and salt, and serve piping hot.

Cream of Celery Soup .- This, perhaps is the soup which is the best liked of all the cream soups. Take three bunches of celery, wash and cut into small pieces and cook slowly for half an hour; press through a cola double boiler with a quart of milk. Cook together three tablespoonfuls strain the stock and reduce by slow the puree. Cook until smooth: add seasoning of salt and dash of paprika.

Men who look on nature and their fellow men, and cry that all is dark and gloomy, are in the right; but the somber colors are reflections from their own jaundiced eyes and hearts .-

APPETIZING DISHES FOR SUNDAY MEALS.

pared largely the day before when possible, so that the day may be a day of rest. If a roast is to be served it may be cooked on Saturday and reheated. The salad may be prepared, all ex-

cept putting together. A dessert is often better to serve if made the day before, especially gelatin desserts.

Veal With Sour Cream.-Take a loin of veal for roasting and lard with strips of fat salt pork, lay some in the pan before putting in the meat. Brown in a hot oven or sear over in a hot pan on top of the stove, dredge with flour and season and baste freely with sour cream the first half hour, then cook slowly. The flour will thicken the gravy suffciently and it may be served either poured around the roast or in a sauceboat.

Cherry and Grapefruit Salad .- Cut the chilled fruit in halves. Take out the pulp with a spoon and dress with French dressing. The juice of the cupful of raisins and half a teaspoongrapefruit may be used in the place ful of cloves. If after mixing it seems of French dressing. Serve on lettuce leaves or return to the skin from which the pulp was removed. Take half a cupful of canned cherries or maraschino cherries and add to the grapefruit.

Italian Potatoes.—Cut potatoes in cubes and cook in boiling, salted wa- the juice with a bit of lemon juice and sprinkling of cheese. Bake until the buttered crumbs over the top are

Grape-Nuts Pudding.-One cupful of grape-nuts, one quart of milk, two the one who is enjoying the dish. eggs beaten until light, half a cupful of sugar and half a cupful of raisins.

with sauce as follows: Two tablespoonfuls of flour added to two of bubbling hot butter, add the juice of one lemon and enough water to make a thick sauce, sweeten to taste. This will serve eight guests.

I will make the day worth while, I will play the game today with a warm heart and a cool head. I will smile when I feel like frowning. I will be patient when I feel tempted to scold. I will take personal command of my-

GOOD THINGS FOR THE TABLE.

The pea soup is not as often served as its merits demand, as there is no more tasty, dainty

soup than this if well prepared. Cream of Pea Soup .- Drain and rinse a can of peas. add a teaspoonful of sugar, two slices

of onion and cold water to cover (one pint), simmer 15 minutes, rub through a sieve, heat, add two tablespoonfuls each of butter and flour rubbed together, add two cupfuls of milk and a half cupful of cream, whipped, and seasoning to taste. A yolk of egg beaten and added to the cream adds both to the taste

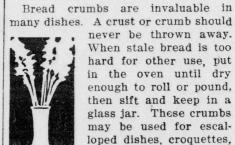

and nutrition of the soup Parisian Potatoes .- Wash, pare and soak in cold water a half hour eight potatoes. Boil in salted water 15 minutes. Drain and place in a deep pan, basting three times with a third of a cupful of melted butter. Serve with

broiled steak. Soak bread crumbs in the milk half an hour, add soda, salt, and melted butter, flour and beaten eggs. Fry on a hot greased griddle. Serve immediately with hot maple sirup, or butter and sugar.

Braised Liver With String Beans .-Wash calf's liver and lard with fat bacon. Roll in flour, season with salt, pepper and celery salt. Cook liver in a hot pan with a little hot fat, tried out of bacon. Turn until the surface is well seared, then add five slices of carrot, one-half an onion, two sprigs of parsley, bit of bay leaf, one clove twelve pepper corns and two cupfuls of brown stock or water. ('over closely and bake in a moderate oven two and a half hours, basting five times during the cooking. Remove the liver, each of butter and flour and add to cooking. Add two tablespoonfuls of orange juice, pour over liver. Serve surrounded with seasoned, hot string

> Celery and Cheese Salad .- Mix a half cupful of very finely chopped celery with one of cream cheese, moisten with thick cream, season with salt and paprika and form into balls Arrange on lettuce leaves and garnish with rake ishes cut in tulips.

TEMPTING DISHES.

if soaked long enough. Bread Crumb Pancakes .- Mix together two well beaten eggs, one-half tablespoonful of melted butter, onequarter of a cupful of flour, one pint of sour milk, one cupful of bread crumbs, one-half teaspoonful of salt, and the same of soda.

cutlets and in puddings.

Kings' Pudding.—Take two cupfuls of bread crumbs, soaked in half cupful of water a half hour, squeeze dry and add a half cupful of suet, one-half cupful of molasses, one egg, one cupful of milk, one teaspoonful of cinnamon, salt and half a teaspoonful of soda, a too thin add a small amount of flour. Steam three hours and serve with a hard sauce.

When you have a peach or two left from a can and a cupful of the juice, use them for a pudding sauce. Rub the peaches through a sieve, add to a tablespoonful each of butter and flour that have been cooked together. Serve this sauce hot on steamed sponge cake, cut in squares. These are leftovers, but the fact need never be mentioned and will never occur to

Elk in Farmer's Barn.

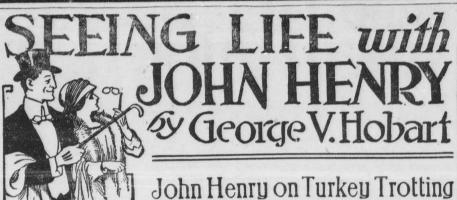

Denver suburb, went out to get some feed for his horse and found a big bull elk eating breakfast in a box stall. He slammed shut the door and made Mr. Elk a prisoner. As he left the barn he saw another elk, also a bull, streaking away over a hilltop. The animal the farm hand saw and

"Of course not, child. What makes "I heard pa say that when you OWN REGISTERED LIVE STOCK

Practical Knowledge of Business Should be Obtained Before Starting With Pure-Breds.

The desire to own registered stock is praiseworthy, but until a man is well fitted by experience and inclination to handle registered stock he will IS A HARBINGER OF SPRING find it better to go cautiously until he has gained a practical knowledge of the business.

There is no mystery regarding the breeding and management of purebred stock, still they require materially different treatment than is usually afforded the common scrub stock. These improved animals do not require pampering or babying but they do require good care and enough to eat and that they cannot obtain when wintered around straw stacks and fence corners.

The farmer who has made good success with a grade herd or flock will not find the transition to pure breds very difficult. If a man knows absolutely nothing about breeding registered stock he will do well to gain the necessary experience by grading up his scrub animals before he invests in pure-bred stock. At least he should gain the actual experience in some way before he makes the plunge.

There are many men who buy purebred stock who should never be in the business and the result is that their stock is a byword and a derision-a very disgrace to the name pure-bred. Some men have jumped suddenly into fame by breeding improved live stock, but usually we will find that these men gained a practical knowledge of the science of breeding while handling their grade animals, that made their success possible.

CELERY FOR SMALL GARDENS

As a Rule It Is Only Moderately Profit able Crop-One of Most Delicious of Vegetables.

(By L. M. BENNINGTON.) Celery is a fairly good market crop, but there are many other crops that pay better. In the famous Kalamazoo district in Michigan, where the crop is grown exclusively on hundreds of acres by experts, it is stated that the average profit after rental of land, growing and marketing expenses are paid does not exceed \$100 per acre. Occasionally we hear of a phenomenal crop, but as a rule celery is only moderately profitable.

It is a fine crop for every farmer to grow because it is one of the most delicious vegetables produced. It is not ceedingly rich land, some commercial

In the Kalamazoo district, where found: Blackberry, chokeberry, juni- very fine celery is grown, the soil is a very black, rich, spongy sort of loam, but good celery is grown on sandy land

The ground must, however, be put into thorough cultivation and very

13 Is Also Denied That Bluebird Preys Upon Crop.

In Selection of Food Bird Is Governed More by Abundance Than by Choice -Insects Form Important Part of Its Diet.

(Prepared by the United States Depart-

ment of Agriculture.) Although the bluebird frequents our orchards and gardens and builds its nests in cavities of trees, there seems to be no evidence that it is a fruit thief. Neither does the bird seem to prev upon crops.

The eastern bluebird, one of the most familiar and welcome of our feathered visitors, is a common inhabitant of all the states east of the Rocky Mountains from the Gulf of Mexico to southern Canada. In the Mississippi valley it winters as far north as southern Illinois, and in the East as far as Pennsylvania. It is one of the earliest northern migrants, and everywhere is hailed as a harbinger of

It is evident that in the selection of its food the bluebird is governed more by abundance than by choice. Predaceous beetles are eaten in spring, as they are among the first insects to appear; but in early summer

Bluebird-Above Azure Blue, Throat and Breast, Cinnamon, Belly White. by grasshoppers. Beetles are eaten at

all times, except when grasshoppers are more easily obtained. So far as its vegetable food is concerned, the bluebird is positively harmless. The only trace of any useful. product in the stomachs consisted of difficult to grow celery. It requires exa few blackberry seeds, and even these probably belonged to wild rather than fertilizer and great care in cultivation cultivated varieties. Following is a and bleaching. list of the various seeds which were per berry, partridge berry, greenbrier, Virginia creeper, bittersweet, holly, strawberry bush, false spikenard, wild and on clay loam. sarsaparilla, sumac (several species) rose haws, sorrel, ragweed, grass and asparagus. This list shows how little the bird depends upon the farm or gargen to supply its needs and how eas-ny by encouraging the growth of some of these plants, many of which are highly ornamental, the bird may

be induced to make his home on the premises! Two species of bluebirds inhabit the western states—the mountain bluebird and the western bluebird. In their food habits they are even more to be commended than their eastern relatives. Their insect food is obtainable at all times of the year, and the general diet varies only in the fall, when some fauit, principally elderberries, is eaten, though an occasional blackberry or grape is also relished. Grasshoppers, when they can be obtained, are eaten freely during the whole season. Beetles are eaten and comprise mostly harmful species.

The new Farmers' Bulletin (No. 630) of the United States department of agriculture describes this and other American birds useful to the farmer. it may be had by dropping a post card to the Editor Division of Publications, United States Department of Agriculture, Washington, D. C.

CHOLERA IS GERM DISEASE be well fertilized for at least two years

Domestic Animals, Such as Dogs and Cats, and Also Birds Are Frequent Carriers of Infection.

Hog cholera generally is recognized as a very contagious, infectious, germ disease. It is caused by an organism described as small enough to pass through any kind of filter and still retain its disease producing power.

No one has been able to identify the

germ which is the specific cause of the disease. It is contained in the all weeds must be kept down. blood of sick animals, and is given off in the urine; thus contaminating the yards and pens in which such animals are kept. It may be carried by streams, on the shoes of persons who ener the yards or pens, or by horses or cattle from one farm to another. Dogs, cats, rabbits and birds also are frequent carriers of the infection.

Temporary Hog Pasture. If you are short of hog pasture you

can make a good temporary one by sowing a mixture of oats, barley, wheat and rye. Sow all of them or a few. Do not be afraid to put in plenty of seed.

Uses for Peppers.

The large and hot peppers can be used for many purposes and are good to grind and mix with the chicken food in winter. One packet each of two or three good varieties will sur-

MILWAUKEE SUFFERER POETRY OF THE CELT

FLUENCE IN LITERATURE.

Shows Possibility That the Institution of the Nomad Troubadour Had Its Origin in the Country of Wales.

Anatole le Braz of the University of Rennes, Brittany, in a lecture on had given up hope of ever getting well the Celtic influence in literature, at the University of Cincinnati, distinguished between two classes of Celtic populations, those Celtic in origin, but with an intermingling of French and English blood, and those more purely Celtic. The second class, he said, is found in France, among manent results for stomach, liver and the Bretons, and in England, among the Celts of Cornwall, the Welsh, and whatever you like. No more distress the Irish. To it we must look for any remains of the Celtic genius and for the means by which Celtic influence was brought to bear upon European literature. Ireland, which M. le Braz chose as his starting point, possessed, at the time of the Scandinavian invasion, an old civilization that had been little influenced by Rome or Germany. Christianity, however, left a profound imprint upon the Gaelic soul. It is in the religious domain that Ireland first influenced the European world. Her saints evangelized barbaric Europe; and it was at the time of her religious awakening that she produced her artists and philosophers. The influence of her epic poetry was no less felt than that of her evangelization.

The Celts of Cornwall and Wales, he continued, superior in culture at the time of the Saxon invasion, refused to be absorbed by their more savage conquerors. The two chief Celtic passions, love of country and love of independence, found expression in the legends of King Arthur, who, they believed, would reappear to free them from the Saxon yoke. Through poetry and music these legends were kept ever fresh in the Celtic mind. Music and song were an essential part of their education, and the bard was a privileged character among them, from the sixth century through the

twelfth. Gradually, as the Celts and Saxons united, the latter learned to appreciate the Celtic poetry, and the Celtic literary themes passed into Saxon possession. But, as the new social state evolved, formed of this alliance, the art of the bards ceased to be an official institution, and they were compelled to find a means of support. They became wandering singers, go-

ing to assemblies, feasts and abbeys. "I should not be surprised," hethe middle ages, had its first originathe nomad bard, then, Celtic poetry was disseminated, sung in the three

Xerxes and the Hellespont.

We can imagine our sailors applywe can imagine our sailors applying alliterative epithets to the Dardanelles when one of the weather interruptions occurs, remarks the London Chronicle. But we cannot imagine Admiral Carden doing that sort of thing officially, as Xerxes did when a transport of the sailor of the sai storm wrecked his bridge of boats from Abydos to Sestos. Not content with having the engineers decapitated, he ordered the infliction of 300 lashes upon the strait and the letting down into it of a set of fetters. Herodotus discredits the story that Xerxes also sent irons to brand the strait. But the historian does give the non-Hellenic and blasphemous terms which the scourgers were ordered to use: "Thou bitter water, this is the penalty which our master inflicts upon thee because thou hast wronged him though he has never wronged thee. King Xerxes will cross thee, whether thou wilt or not; but thou deservest not sacrifice from any man, because thou art a treacherous river of salt water."

She Gently Swore. One of the new skeleton-trimmed hats worn by women caused merriment in a New York subway train and cost one man the price of a new pair of eyeglasses. The wearer of the hat, a short, stylishly gowned, good looking young woman, was seated between two tall men, both of whom wore eyeglasses with a cord attached. Every time the woman fidgeted around the trimming would catch the strings attached to the eyeglasses of the two men. Suddenly one of the men started for the door as the guard called his station. When he arose he jerked the girl's hat almost off her head, and as the hatpins pulled her hair she gave a little cry of pain. The man confusedly murmured an apology, at the same time clutching at his glasses, which had been loosened by the concussion and which fell to the floor and were broken. The young man beat a retreat for the door, while the young woman adjusted her headgear and gently swore beneath her breath.

Mistaken Influence. "Pop, why doesn't the anticruelty society get after Wall street?"

"Why should it?" "Don't they have bull fights and bear pits there?"

Something of One. "Is your son anything of a sprinter since he went to college?" "Well, he holds the family record

for running up a bill."

JOKE WAS ON INVESTIGATOR

rant Proprietor, but It Turned Out Otherwise.

The late Norman B. Ream, the organizer of the steel trust and many other important corporations, once said to a New York reporter about a trust investigation:

"Maybe these investigations will have the same luck as the game warden.

"A game warden heard that a restaurant was serving a game out of season. He disguised himself with a false beard, visited the place and ordered a pheasant.

"The pheasant, delicately high like roquefort cheese, as well as all good pheasant should be, was served to the game warden, and he devoured it to the last morsel, at the same time inflicting severe punishment on a bottle of rare old Burgundy-for the state, of course, paid for all.

"At the end of his repast the game warden summoned the proprietor and

"'I arrest you, sir, in the name of the law!'

"The proprietor's mouth opened in astonishment. He swallowed two or three times, then he gasped: "'Wh-what for?'

"'For serving me a pheasant out of season,' said the game warden. "A look of relief appearel on the

proprietor's face. "'Oh,' he said, 'that wasn't pheasant. It was crow."

Plan Humane Sunday in May. Dr. Wm. O. Stillman, president of the association, Albany, N. Y., will send literature to all persons interested in the work of humane societies.

Knew Where He Was Headed.

The story is told of a very crusty, gouty old gentleman who lost his patience with his doctor, because he did not make enough fuss over the pain he suffered.

"Doctor," he cried out, twisting and turning because of the agony, "you don't understand! You don't seem to grasp the case! You talk as though there were nothing the matter with me, whereas, I assure you, I am enduring the torments of the lost!" 1 "What, already?" replied the doctor.

Probably the most worthless opinion is the average man's prediction as to the result of a prize fight.

A flaming necktie is no sign that there is red blood behind it.

WAITING FOR YOU

Yes, waiting for every farmer or farmer's son - any industrious American who is anxious to establish for himself a happy home and prosperity. Canada's hearty invitation this year is more attractive than ever. Wheat is higher but her farm land

just as cheap and in the provinces of Manitoba, Saskatchewan and Alberta 160 Acre Homesteads are Actually Free to Settlers and Other Land at From \$15 to \$20 per Acre

people of European countries as well as the American continent must be fed—thus an even greater demand for Canadian Wheat will keep up the price. Any farmer who can buy land at \$15.00 to \$30.00 per acre—get a dollar for wheat and raise 20 to 45 bushels to the acre is bound to make money—that's what you can expect in Western Canada. Wonderful yields also of Oats, Barley and Flax. Mixed Farming is fully as profitable industry as given in the barley and for the provider of the profit of the provider of the profit of the prof itable an industry as grain raising. The excellent grasses, full of nutrition, are the only food required either for beef or dairy purposes. Good schools, markets convenient, climate excellent.

Military service is not compulsory in Canada but there is an unusual demand for farm labor to replace the many young men who have volunteered for service in the war. Write for literature and particulars as to reduced railway rates to Superintendent Immigration, Ottawa, Canada; or to

Settled a Great Question. When Thomas H. Benton was in the when the roll was called. At last | out an end to these legislative larks.

"No, sir; no, sir; no, sir!" shouted of the customers we started the venerable Missourian. "I will not be went and stayed there until the vote. I have no right to vote. This is no siege was over. house, and I am not a member of it."

"Then, sir," said Speaker Orr like a flash, with his sweetest manner, "if house the sergeant at arms will please put him out." And so this vast *constitutional *ques-

tion settled itself.

Billboard Irony.

Wentworth Higginson's life, writes Mrs. Mary Thacher Higginson in her biography of Mr. Higginson, was his keen sense of the ludicrous. He once wrote to his Aunt Nancy:

Worcester, June 29, 1858 I spoke in Springfield on Sunday to the Spiritualists. My name was paraded in the streets in the largest capitals I eve had as the Rev. T. W. H., "eminent cler gyman, popular author (!) and eloquen lecturer." Directly over it were the re mains of a theatrical handbill, in Jarge letters "The Fool of the Family."

The Reason.

Mr. Harold Begbie quotes in "The Happy Irish" an amusing story that he got from the doctor of a little town that he visited in the course of his tour

I was rung up pretty late one might by a peasant from an outlying village. fifteen miles away. It was in the days before I had a car. The wind was blowing horribly, the rain was sweeping against the house, and it was deadly cold. The peasant asked me rather shamefacedly if I would come and see his mother. I invited him to come "Patrick," I said to him. "your mother is a very old woman."

"I know that, doctor," he admitted. "She's over eighty, Patrick." "She's all that, doctor."

"And nothing that I could do tonight would be of the smallest use to her.' "Sure, doctor," said he, "I know very well it's the truth you are telling me; but me poor mother, do you see. would have me come and fetch you because she does not want to die a natural death."

Too Early.

When Ollie James, the world's largest United States senator, was a youngster down in Kentucky he went one summer to visit some relatives on

On the morning after his arrival little Ollie was awakened by a rude pounding on the door of one of the boys in the family. It was the father, and he made a remark that startled and totally unnerved Ollie.

"Git up," said the father. "You've overslept yourself. It's almost 4

Ollie couldn't get over that "almost o'clock." That afternoon he made some excuse to return home.-New York Sun.

SHACKLETON'S CIGAR.

And Why the Ship's Doctor Could Not Appreciate It.

Sir Ernest Shackleton was once a very junior officer on a passenger boat. silk handkerchief and kept it as a shed, cherished memento of his friendship with the great man.

On subsequent voyages he developed a habit of exhibiting his treasure to favored lady passengers, recounting at the same time how he and Lord Rothschild had been "quite pally, you know." The chief engineer, a dour old Scotslesson, so he conspired with the doctor | Tribune to steal the cigar and replace it with one of a much inferior kind-in fact. with a weed that had cost him two pence at the last port. They wrapped the impostor carefully in the silver paper and in the silk handkerchief. and they bore the real Rothschild moke to the chief's cabin.

With a five shilling cigar in their possession for the first time in their ives they found it difficult to decide "If, as you, say, you are not ill," said | who should have the smoking of it, the man of pills and potions, "then tell and so they tossed a coin. The doctor me in confidence why you won't get | won and bore his prize off in malicious triumph to his own room, there to enjoy it in solitary state.
