Mobile Ordered To Begin School Desegregation

School Board Eyes Ouster Of Meredith

OXFORD, Miss. (AP)-A fourman committee of the Mississippi State College Board meets today to discuss whether to ask federal court permission to expel 30-yearold Negro student James H. Merelith from the University of Mississippi because of his public state-Rumors

There had been repeated rumors the board was under heavy pressure from segregationists and some Ole Miss alumni to try to prevent Meredith from becoming a graduate of the 114-year-old institution in August.

Meredith declined to discuss the situation with newsmen.

Tom Tubb, one of the four committee members meeting today, said Meredith had been severely reprimanded by dean of students Medgar W. Evers.

Meredith said the blame for the Split Ruling death of Evers "clearly rests with actions."

Rosy Outlook For Business

By PETER EDSON

WASHINGTON - (NEA) - There wasn't single pessimistic prediction from the panel of big business experts analyzing the economic outlook for the second half of 1963 at the U.S. Chamber of Commerce board of directors meeting.

No boom was predicted, just continued good business with steady though slow im-

provement into 1964. This was not just the usual chamber of commerce ballyhoo. The chamber's national headquarters here has been consistently critical of Administration economic policy as harmful to business and

its forecasts have been gloomy. There were a few guarded statements from the panel of economists that continued business expansion was dependent on a tax cut. But the consensus was that Congress ultimately will crash through with favorable tax legislation this year.

Unemployment Still Too High

There was an admission that unemployment is still too high. It was recognized that unemployment might even rise during the last half of 1963 even while employment was

"If we are to get unemployment under the 5 per cent rate during the next five years," said Chase Manhattan Bank's director of economic research, William F. Butler. "business will have to produce 20 million new job opportunities. In the last five years only 13 million new jobs were created. We need a 50 per cent increase in business activity because the labor force is increasing 50 per cent

faster in the 60s than in the 50s." There was a little concern over the coninued unfavorable U.S. balance of payments, which has been running at about \$3 billion a year for the last two years.

But Butler foresees favorable trends in a possible rise in interest rates, a cut in U.S. defense expenditures overseas and some improvement in international trade.

Question Of Inflation

"The fact that Europe is having a little nflation now improves the outlook for U.S. exports," says Butler in summary, "and the prospects for improvement in the balance of payments situation are all on the favorable

"Nine out of ten U.S. economists say there is no danger of inflation in the United States in the next six months," declares Dr. James J. O'Leary, research director for the Life Insurance Association of America.

On the steel outlook, Vice President Irwin H. Such of Penton Publishing Co., Cleveland, believes that "the new labor agreement opens the way for uninterrupted production for nearly two years or, for that matter, the foreseeable future . . . to build a 'new' American steel industry."

Such predicts production of 106 million tons of steel in 1963, the largest for any year since 1957, at generally stable prices. "For the remainder of 1963 and 1964," he says, "I am willing to go along with the optimists."

Brisk Automotive Sales

"A-OK" is the way Robert J. Eggert, marketing research manager for Ford Motor Co. This is steel's best customer and - directly or indirectly - the employer of one of every seven U.S. workers.

He foresees 7.4 million new car sales this year, beating 1961 sales by 300,000 and equaling the 1955 record.

Touching on other business fields, Dr. Emerson P. Schmidt, director of economic research for the U.S. chamber's national staff, points to the new all-time high of the construction industry reported for May as a favorable indicator.

"The second half of 1963 will show less expansion than the first half," Schmidt predicts. "But gains in 1964 will be equal to or better than those in 1963."

At a special election to be held in Marquette County on Monday, July 15, 1963, the matter of continuing the two extra voted mills for general county purposes (\$2.00 per

This IS NOT a new tax. In 1958 a similar tax allowance for county purposes was voted by the people for a five year period. Ever increasing costs, especially in the welfare de-

partments, brought about a huge deficit in county funds that year. The extra millage

voted has now expired and your vote on Monday, July 15th, can keep your county government on a sound financial basis by approving the proposition and continuing the

That portion of county tax represented by the two mills is small as it applies to the average homeowner. When this rate is spread over the entire county, however, it pro-

duces approximately \$180,000.00, or one-half the total cost of operating the Social

Welfare Department. County revenues will be cut back somewhat in 1963 and succeeding years because of the reduction in mining valuations and the new system of taxing some of the underground mines which becomes effective in 1964. A further

loss of \$180,000.00 per year for welfare purposes, should the proposition fail, would

County Board of Supervisors should be contacted about instigating a planning program similar to one being conducted in Gogebic

Dr. Eric A.
