THIRTY FIFTH YEAR—NO. 81

## ICE RINK IS PREPARED FOR GLADSTONE NOW

BEAL PARK FLOODED TODAY AND NEW ARC LIGHTS ARE INSTALLED

Work was started today in flooding the ball park to form an ice rink for the winter. Water was turned on at 4 o'clock this afternoon by Albert Gagnon, who will have charge of the rink this winter. Elaborate preparations have been made to provide sport and healthful recreation for the young people of the community this winter. The building standing near the entrance to the park has been fitted out with a stove and all open places have been closed so that it will be an ideal place for putting on and taking off skates.

A change also has been made this year. Instead of banking the pool with snow, as has been the custom in the past, an earth embankment has been thrown up and this, it is found, retains the water much better than the old snow wall.

Skating Area Changed  
The skating area has been moved over to include the abandoned portion of the baseball diamond and this is estimated a high spot near the gate to the park which, frequently thawed through last winter.

A space 175 square has been prepared and is flooded. This means that the rink is now large enough for professional races. Mr. Gagnon stated today that he had been in conference with Pete Dube, "the Old Master" from Escanaba and it is indicated that a number of classy races will be staged during the winter. Last year a number of Minneapolis skaters would have come here but the rink was too small. This condition has been remedied for this winter and "Pete" has pledged himself to do everything possible to boost the local rink, inasmuch as Escanaba is doing nothing in the line of preparing for such sporting events this winter.

To Organize Hockey Club  
The organization of a hockey club is well on its way and it is hoped to be able to arrange matches with Ishpeming and other Upper Peninsula towns that have hockey clubs.

The rink will be open every afternoon for school children. This means that it will be allowed to skate free of charge. They can also skate on Saturdays without charge.

A new lighting arrangement also has been made for this winter. Formerly but two lights were used. These were of the "flood light" variety, but this year four are lighted to be placed over the skating area in such a position that no shadows will be cast. The city lighting department Saturday completed the setting of five lights and lights will be installed within the next day or two.

School Board Active  
The board of education is defraying a good portion of the expense in connection with the maintenance of the rink and in return the school children will be permitted to skate free of charge. Others will be charged a nominal admission and when hockey games or exhibition skating matches are arranged, the usual charge for such affairs will be made.

It is believed that once the weather settles down and remains sufficiently cold to maintain a clean body of ice the popularity of the rink will grow by leaps and bounds and that this will be one of the most successful winters in Gladstone history for this great outdoor sport.

## Lacomb's Pool Room Robbed Saturday Night

Lacomb's pool room and soft drink parlor was entered Saturday night, or early Sunday morning, by thieves believed to be boys. The sum of \$100 in cash and seven dollars was taken from the register but further than this Mr. LaComb is unable to figure out any loss. The matter was reported to the police and several lines of investigation are being pursued in connection with the case. The job looks like it was done by youngsters. Entrance was gained by smashing in a rear window.

## Library Association Benefit Is a Success

Members of the Gladstone Library Association were extremely well pleased with the patronage of the benefit picture at the Gladstone Opera House Thursday evening. A substantial sum was added to the library fund and it will help materially in carrying on the work which this association is doing and in providing more and a wider range of reading material for the public.

## Dieter Family Will Be Taken Into Court To Explain Conditions

Conditions in the home of Mr. and Mrs. Jessa Dieter are to be investigated by the Probate Court. More than a month ago Chief of Police Danielson called attention to a rather deplorable set of circumstances, one of the most unusual of which, was a claim that Dieter was the father of a child born to his step daughter, who lived in the Dieter home with several other children. The sanitary condition of the place was revolting but in the absence of any local power to enforce a change in conditions, little could be done other than report the matter to the probate court.

## SMOOTH FACTORY MEETS APPROVAL OF THE PUBLIC

Public comment and eager questioning regarding the new shoe factory which is being erected in this city as a result of the business enterprise and financial support of a bunch of local live wire business men, indicates that Gladstone is tugging at the leash, so to speak, in an effort to keep a forward movement, which will be the foundation of the town's industrial development from this on.

The organization of the shoe company was done so quietly and was so free from publicity that many citizens still have some question as to the authenticity of the thing. It is sufficient to know that a number of the city's big business men are behind the enterprise. It has passed the talking stage. The deal has been made and it is time to get on with the plant which will be in shape to manufacture shoes.

Financed Quietly  
This plant, like the Escanaba Paper Mill, was financed without shiner fans or feathers. A few live wire men, together, made a practical show man, persuaded him that Gladstone was the place to locate and then backed their money. And that's why the shoe factory undoubtedly will be a success. It will be small in the beginning, but so was the Marble Arms Company. The shoe factory has just as many elements of development as the other factory, and with the right kind of management there should be no question but what it is destined to succeed.

Later in the week, perhaps, it may be definitely announced just where the plant will be located. At first it will be a mystery only a small force. The expert men in the business will be brought here from other cities but the majority of the labor will be secured in Gladstone and it will be a 50-50 proposition between men and women.

Although the details have been pretty clearly worked out at this time, there are a few things no definite announcement should be made right now. A site for the plant will be chosen shortly and by the first of March it is hoped that the first production of the company will be ready to go on the market.

## Boat For Gladstone

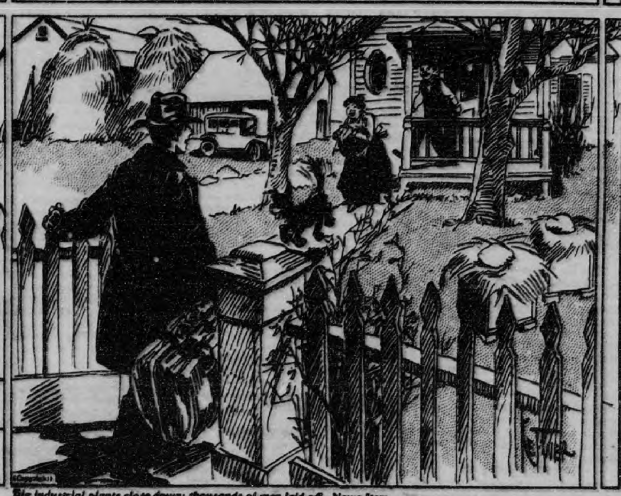

What is regarded as being quite important as the location of the factory itself is the fact that it will attract attention of other manufacturers to Gladstone. They naturally will wonder what there is about that town of Gladstone to want to make a factory locate there, and in seeking for the reason, they will come in contact with an array of facts which cannot but be beneficial to this city.

In other words, if this is a good town for one shoe factory, just why isn't it a good town for another and why isn't it a good town for other industries of a similar character. These are the things which this little coterie of business men are modestly doing for this city and it is up to the general public to catch the spirit of the times and boost for more and larger industries.

No campaign for funds is to be made. The capital has all been pledged and the factory will be started without a great deal of that sort of hollering talk which accompanies ventures which soon fail to earth over to rise again.

This one is different. It is a substantial little industry with tremendous possibilities of development. It is one that, if it is only the entering wedge in an era of development which will give the old town a new inspiration and a new spirit of boostfulness.

## The Prodigal Returns

Big industrial plants close doors; thousands of men laid off—News Item.

## START WORK ON ROOF OF LOCAL CHURCH TODAY

All Saints Parishioners May Be Able To Use New Church By Easter

Building is going along splendidly on the new All Saints church. The favorable weather of the last few weeks has advanced construction far beyond what Architect Arntsen had expected for this time. Workmen today began the first work on the roof and if the present weather holds out for a little longer, the church will be under roof long before the time set for the event.

Another thing which advances completion to a great extent was the arrival of the boilers for the heating plant today. The boilers will be immediately and it is possible that the heating plant will have been completed by the time the roof is on the building, which will give workmen ample opportunity to do the interior finishing long before spring.

## Knights of Maccabees Elect New Officers

A most interesting meeting of Gladstone Tent No. 3, K. O. T. M. was held Friday evening in Washtenaw. Along with the transaction of routine business, officers were elected for the ensuing year as follows: Commander—John C. Young; Lieut. Commander—Myron W. Legg; Record Keeper—Finance Keeper—Jesse Denio; Chaplain—Howard Cameron; Sergeant—Charles Berry; First Master of Guards—Roy Denio; Master-at-Arms—Edward Trudeau; Second Master of Guards—George Young; Sentinel—Joseph Trudeau; Picket—James Lahey.

## Woman's Auxiliary Elects Officers

At the annual election of officers of the Woman's Auxiliary to the August Matton Post last Friday evening, the following selections were made: President—Mrs. T. F. Fitzpatrick; Vice President—Mrs. Claude Hawkins; Secretary—Mrs. Anna Rice; Treasurer—Mrs. John Calder.

## ABOUT THE WEATHER

Cloudy and somewhat colder tonight and Tuesday; Moderate to fresh north-west winds. Temperature for the past half week:  
Friday.....45 38 0  
Saturday.....39 27 0  
Sunday.....36 32 0  
Monday.....38 30 0

## CLIPPER MORAN IS AFTER BRANDY

DENVER BOY WANTS TO MEET MICHIGAN CHAMP IN GLADSTONE ARENA

"Clipper" Moran, of Denver, is seeking a match with Jimmy Brady, champion Michigan lightweight, before the local American Legion Post, according to a letter received recently by Commander Dutton, of the local post. Although the local post has not received its license, there is every assurance it will be here in time to stage a boxing card some time after the first of the year.

Moran is managed by Dr. I. W. Thiele, who writes at length regarding the ability of his protegee and assures the local commander that Moran will put up a fight which will give the greatest satisfaction. Moran already has met Brady and his manager claims he should have had the decision.

Just how far the local club will be prepared to go in securing a match between Brady and Moran, will depend largely upon what the local sporting public might be content upon for in the way of support.

Such a match would be a high class and high priced affair. It would have to be supplemented by several minor bouts but it can all be arranged if the sentiment in this city is sufficiently strong to encourage the local boys to go ahead with the match. Moran has an enviable record. So has Brady. It would be a strong main attraction if it can be arranged.

## R. E. MacLean Loses Leg But Will Recover

R. E. MacLean, general manager of the I. Stephenson interests in this section of the state, probably will recover, according to the latest information available at a late hour this afternoon.

Mr. MacLean was taken to Mercy Hospital in Chicago from St. Francis hospital in Escanaba, several days ago when it became apparent that a blister on his right heel had developed a condition which made the removal of the leg necessary.

The operation was performed in Chicago and for many hours it was feared that Mr. MacLean would not recover. His family went to Chicago to be at his bedside and they are still there. Interest in his condition is deep all over his section of the state where he is regarded as one of the really big men of the lumber industry.

## ROAD BUILDING MACHINERY GOES TO COUNTY SEAT

Caterpillar Tractor Hauls Trucks Rollers And Other Devices

Frank Loeffler, superintendent of the county's road building forces, had a force of men busy Saturday in taking the rollers, trucks, scarifiers, and other road building machinery which has been in use in this vicinity during the summer, back to Escanaba. In going through Gladstone the big roller had to be towed. It was too heavy for the ordinary truck used by the county and a caterpillar tractor was hooked on and the whole outfit hauled back to Escanaba in that way.

Repairs will be made in the machinery this winter and everything will be put in tip top shape for the resumption of road work next spring.

Incidentally, a hope is expressed that the county and state will be able to get at the state road project which means a thoroughfare skirting the bay shore around the edge of town from South Gladstone to Tenth street, up Tenth street to Wisconsin avenue and then across to Ninth street, from which point the road will follow out through Rapid River.

## Junior High School At Menominee Being Investigated Today

Supt. E. J. Williams of the Public Schools and Dr. D. X. Kew, president of the Board of Education, left today for Menominee where they will inspect the junior high school building recently built in that place. This building is erected along lines suggested for the carrying out of what is known as the Gary school system, whereby classes alternately use the same room for recitation purposes and thus eliminate the necessity for a large number of rooms for study and recitation.

This trip is taken with a view of covering, according to statements to the board, the contract for the new junior high school in this city is let. The bonds have already been approved by the people and the building was not built because of the high cost of labor and material. Within the next year, however, it is expected to put up the new school and it is possible that to the visit of the local officials may have a marked influence on the plans which eventually will be adopted.

## Salvation Army To Give Concert Soon

The local Salvation Army will give a special concert at the Army Hall, 645 Delta avenue, Monday evening, Dec. 13th at 8 o'clock. An excellent musical program will be rendered and on the program will be the singing of the hymns by the choir of the local officers. A part of Chicago will be present to take part in a small admission of 25 cents is to be charged and the funds thus raised, of course, will go to aid the poor and needy of this community in the unostentatious way in which the Army operates.

## CIVIC LEAGUE MAKES RECORD SELLING SEALS

REQUISITION FOR MORE MADE NECESSARY BY LIBERAL SUPPORT HERE

Members of the Woman's Civic League are more than pleased with the manner in which the sale of the Red Cross seals has started off this year. It was figured that the local ladies would be able to dispose of 25,000 seals, but the initial demands for the double barred stamps has been a great deal more than had been expected in and it now appears that Gladstone will far exceed the quota assigned to it.

Originally it had been planned to sell at least 2500 worth of seals in this city but it is now believed that this amount will be doubled. Arrangements have been made for putting on a one day campaign in Rapid River, which is a portion of this district, and special drives are to be made in the city of Gladstone between now and the holidays.

Buy Seals Generously  
Residents can do no better or more noble thing than buy a lot of these seals and use them generously during the next month. The sale of seals means that some time within the coming winter a tuberculosis clinic will be conducted here. The length of the clinic will depend largely upon the number of seals sold, as the money goes to pay for the services of the skilled experts and nurses who will be here to make examinations of citizens free of charge. They will be advised as to their real condition and told just what treatment they should take for the preservation of their health.

Help For Children  
Many, many children are furnishing fertile fields for the germination of tuberculosis germs and the parents never know it. Many parents have been suffering with chronic conditions which they term "feeling lousy," and never know they are incipient consumptives. The holding of a clinic here means that all such people will be told the exact condition and given the proper advice and it will not cost them a cent, because in the spirit of Christmas generosity, the people of this city have made it possible to bring here a body of men and women who are qualified to aid and to tell sufferers how to take care of themselves.

## Local Boys Sent to Institutions By The Judge of Probate

Following repeated appearances in local justice's courts and in the probate court in Escanaba, Delmas Kerr and Zevala Smith, boys aged 11 and 13 years respectively, were Saturday committed to institutions by the probate court. The history of these two youngsters is so well known here that repetition of the petty crimes in which they have been implicated is unnecessary.

Both have been warned repeatedly. The school authorities, the police authorities and the influence of every agency available to keep boys from going wrong was invoked without avail. Both have been given repeated chances to "make good" but they broke faith and violated the confidence of officials as often as it was given.

Kerr was sent to the Star Common wealth school at Albion while Smith will go to the State Industrial School for boys at Lansing. These two youngsters have been mixed up in many petty thievery than any ads in the city. The newspapers have repeatedly suppressed the facts in connection with the escapades in the hope that they might "get going" but nothing availed. They set their own pace and insisted on maintaining it in spite of advice, suggestion or rebuke. Now they will be forced to learn some useful trade and take on a different view of life.

## Lake Vessels Laying Up Here For Winter

Capt. Evans, of the Steamer Senator, which arrived here a week ago with a cargo of coal, will lay his vessel up here for the winter. Instructions received after the vessel had reached the port, following the unloading of the cargo, the boat was put in shape to make the winter here. The steamer Colonel, belonging to the same line, is expected to arrive here this week with a cargo of coal and it is possible that the Colonel also will be laid up here for the winter.

# NOLKLIHOOD OF PANIC IN THE NATION NOW

In the midst of all the alarming talk about panics, the possibility of a distressing condition and all that a panic entails, it is refreshing to hear from a man like the Governor of the Federal Reserve Bank System, in a statement just issued by W. P. G. Harding, he characterizes as about the danger of a financial panic and says its possibility is so small, it really is negligible.

Thinking most and women will read the following with a great deal of calm and it will inspire within them a new spirit of cheery optimism and helpfulness.

Here is what Governor Harding says:

"You can liken the business and financial world to a crowd in the theater. When the show is going along smoothly everyone is happy, but if somebody yells 'fire' and in an instant a part of the audience is a mob trying to get out of the doors. It is quite the same in business. It used to be that we would go along happily for about 20 years or so enjoying ourselves in the theater of prosperity when all of a sudden some great bank or banking house would fall, somebody would yell 'panic' and everybody would go to speak, rush for the exit way out of the theater. It would stop business and rush around trying to force debtors to pay up at the same time refusing to pay their own bills. The factories would close down, throwing their people on the streets. The heart of business would stop beating. And just as in the theater there may or may not have been any fire."

Following the same thought, the country established the Federal Reserve banks which not only permit the people to get out in the case of financial fire, but, what is more important, show them beforehand that there are plenty of exits, whatever the emergency, and hence no one needs try to climb out over the back of his neighbor.

**No Danger of Panic**

The danger of another financial panic in this country is so small as to be negligible. And I shall try to explain why.

A depression in business, however, is not to be confused with a panic. Periodic depression in business are as beneficial as rain on a long journey. The general business condition which precedes a period of depression is called a 'crisis' and the average man does not know that there is a crisis until it has come and gone.

A panic is always followed by a period of depression that may be short or long, but a panic never follows depression, for it is impossible to work up the emotional ardeur necessary for a panic unless the blow—the fire—starts when every one is feeling particularly prosperous.

Probably some people will be nervous when bank deposits start to decrease and will think that a new trouble is upon them, yet a decrease in bank deposits is not surprising when accompanied by a proportionate reduction in loans. It is a sign not of disaster but of a return to more normal and stable conditions.

When people feel prosperous they begin to buy and then prices and wages go up, plants are extended and extended to cope with the demand until we find that business men are trying to do more than their capital will warrant. No one pays much attention to costs for profits become very large and the will further stimulates extravagant buying and consequently speculation. People always speculate when prices are rising. Since the armistice, for instance, literally tons of worthless securities have been sold to small buyers, who are lured into believing that any kind of an enterprise will be successful.

**Prices Coming Down**

The moment the mass of the people begins to worry about high prices the temper of business starts to change. The concerns that have over-extended themselves find it necessary to cut prices in order to get money with which to pay their debts. Other concerns must likewise reduce in order to meet the competition and we have a period of falling prices. We are in such a period now. Lower prices mean smaller profits, and although these small profits may really be large the fact that they are less than once they were induces a feeling of gloom.

"As prices continue to go down the inefficient business men have to fall, while the overhanded ones improve their processes, eliminate wastes, and begin to accept things as they are and to make the best of them.

"This depressed period does not normally extend through a very long time. The community has to start buying again and although it may do so gloomily, business is really going ahead normally long before there is a realization of the fact. Once it is realized, another era of prosperity sets in and that prosperity will usually be on a sound basis until the community begins to feel too prosperous, when the whole process is repeated.

"One has to be knocked down every five or six years in order to learn how to fight.

"The disastrous part of depression is not the depression itself, but when

it is suffered in by panic. A panic is an hysteria, an emotional insanity, and is accompanied by a collapse, followed by a long depression. It has to do not so much with the condition of the country, but with the state of credit and finance.

**Federal Reserve System**

In the old days a financially sound bank might be forced by heavy withdrawals to suspend payment, simply because it could not get its assets in to cash. If it had kept all of its deposits in cash it would not have been able to serve its customers, or to help business, for business is conducted on credit not on cash. Under the present system no emergency demand for money will more than inconvenience a well-managed bank, for the facilities exist at all times to convert liquid assets into cash and without loss to meet the demand.

"The Federal Reserve System has not only provided, but also has marked the rate on the people need, so that their way out may be blocked."

"One hears a considerable amount of talk about inflation and about the low purchasing power of the dollar, and there is a lurking fear that perhaps a condition will come out in this country such as exists in Germany—that the value of money will drop that it will take a bale of it to buy at most anything. Inflation of currency exists when a government issues quantities of paper currency that are not based on value. If issued without money, it becomes worthless—as it Russia today. But that condition does not and cannot exist in the United States.

**Credits Building Up**

"There had to be great quantities of credit created to finance the war. The money could not otherwise have been found. If the government had taken all of the savings of the people and taxed incomes to the vanishing point, it would have paralyzed the country, but it could not have raised the necessary money. The money of the country was not great enough to finance the war out of current proceeds, so what the government did was to issue its promises to pay in the shape of Liberty bonds and other instruments, and the people bought these promises to pay, not in cash—for cash to that amount did not exist—but they bought them in installment form—that is, on the promise to pay in the future out of savings as accumulated.

"As each loan on a Liberty bond is paid off, bank deposits fall, and there fore when we see bank deposits throughout the country falling, we may know that credits are being retired by the fruits of work done, and that we are returning to the normal banking condition in which most loans are for short periods and are involved in work in progress.

"If in the United States our currency issues are secured by value. We have not 40 or 50 cent dollars. We have high prices because we have not all of us as individuals, paid up the share of Liberty bonds we offered to support the war. A period in which there is a feeling of depression will thus probably benefit instead of harm the country, for when people feel poor they work and it is only by work which results in retiring credits that credit will be reduced to the normal amount necessary for a normal production. And when that comes along we shall no longer hear talk of panics or depreciated dollars.

It is strange how many ramifications this more or less objectionable subject of work has."

## "JAB" MURRY SUES FOR LIBEL

**ASKS \$15,000 DAMAGES FROM EACH OF TWO MILWAUKEE NEWSPAPERS**

The following story from the *Menominee Herald-Leader* will be interesting to local baseball fans who know "Jab" Murry.

"Richard 'Jab' Murry, Marinette's athletic leader, through his attorney John Frank today filed suit for damages amounting to \$15,000, each against the *Milwaukee Journal*.

"The suit is the result of articles printed last week in the *Journal* and the *Journal* relative to events which occurred at the Marinette-Marquette football game at Marinette on Thanksgiving day.

"The charges which the *Milwaukee* papers are alleged to have made against Murry were that he had led the mob against Referee Orton Kern of Niagara. Murry holds that the statement was false and that he led no mob against Kern nor even joined him in any way.

"The *Journal* in its columns had alleged that Murry was the man who had quit the University of Marquette football team on his way to Omaha, because he was not elected captain of the team.

"Objects to 'Mob Violence.'"

"According to the summons drawn up by Attorney Frank, the chief objection is taken to the charges made that Murry had incited mob violence and that he had misled the referee during the time that the crowd was swarming upon the field.

"The incident will be well remembered here by the fans who witnessed the first half of the game, after which Murry had run out upon the field followed by several hundred Marinette fans. Referee Kern, according to his own statement, was not hurt by the crowd, but had been postured.

"According to statements of the men who stood by the referee, the mob used violence but hesitated to attack the three men, Vincent Bullong of Marinette, Will Doyle of Escanaba, and Orton Kern of Niagara, who aided the police in driving the mob back from the field."

## ABE LINCOLN'S "HOME TOWN" IS TO BE RESTORED

**DESERTED VILLAGE OF NEW SALEM NOW BEING REBUILT AS IN LINCOLN'S DAY**

Springfield, Ill.—Restoration of the village of New Salem, where Abraham Lincoln worked as a grocery clerk, fell in love with Ann Rutledge, carried the postoffice in his hat and whipped the champion of the "Clary's Grove Boys" will be completed by next spring and with the addition of the Old Salem museum, will be thrown open as the Old Salem State Park, according to announcement of State Architect Edgar Martin.

**Rebuild Log Huts**

Log huts as they were in Lincoln's day have been rebuilt. Their location and arrangement is exact. Foundations were found undisturbed except by the wear of time, and the houses reconstructed over them. Atmosphere of 1831 to 1837 in so far as possible is reemulated. The store where Lincoln was clerk, the mill on Sangamon river and all other structures of "New Salem" so rich in memories of the great American have been completely restored and lack only the finishing touches.

Besides reproducing the actual village, the state has added a large frame house of the better class in Lincoln's day, which will serve as a State Museum to house Lincoln relics. This house is modeled after a fine old residence in St. Genevieve, Mo., which village Mr. Martin said is as a town built wholly out of the last century. The architecture is of the best of Lincoln's day.

Contracts for the wiring, heating and plumbing of the museum have just been let.

**Restore 62 Acres**

In restoring New Salem the department was forced to follow the same routes used in restoration of more ancient cities. New Salem changed rapidly after Lincoln moved away, and shortly after 1837 was entirely deserted. When the last general assembly authorized the creation of the Old Salem State Park, only the weather-beaten foundations could be found.

The 62 acres of the restored village and state park are 25 miles northwest of Springfield, in Menard county.

## \$500 Reward Motive Behind An Informer

Mike Inkainen, arrested Monday evening at a lumber camp at Maple Ridge, charged with the murder of three men, is now in Duluth, where no was taken at once.

The prospects of obtaining a \$500 reward offered by Governor Burdick of Minnesota, for the arrest of Inkainen prompted a Finn Woodman, who was employed at the same camp as Inkainen, to advise the Duluth authorities of the murderer's whereabouts, according to the Duluth Herald.

The informer, according to the Duluth Herald, knew Inkainen in Duluth, and ran across him by accident at the Maple Ridge camp. The man returned to Duluth and learned of the reward.

He later wrote the Duluth authorities from Maple Ridge advising them that if they sent an officer there he would show them where to get his man.

## Another Transfusion Of Blood Necessary For Congressman James

K. A. Birk, secretary for Congressman W. Frank James, has advised his friends and the congressman that Dr. Sappington, Mr. James' physician, is so well pleased with the progress of the congressional session that he has expressed the belief that he will be able to resume his seat in the house on Monday, January 3, and that it will not be long before he will be in better condition. Historically, this has been in some years past.

A part of Mr. Birk's letter follows:

"Mr. James has had another specialist examine his blood. The result shows that Mr. James has considerably more blood now than he had on the date of the last examination. To expedite his complete recovery, however, Dr. Sappington deems it best that he be given another blood transfusion and it is expected that this will occur this week."

## Silent Embarrassment "Nobody talks about the 'bathers'." No' replied the beach constable. "They've got to be so improper you dare not let on to you noticed 'em."

## Needed Information For Owners Of Wood

In response to a widespread demand for fundamental and practical information on forestry presented in untechnical language, the United States Department of Agriculture recently published Department Bulletin 863. For every Lesson on Home Woodlands.

This bulletin is in the form of lessons for school use; but it contains a wealth of up-to-date information on the principles and practice of forestry that will need also the requirements of the farmer and the general public. The farmers of the United States own more timberland than all other private timberland owners put together, and the proper handling of their woodlands will go a long way toward checking the shrinkage in our timber supply. A knowledge of how to measure and estimate their timber, how to market it, how to protect their woodlands and improve them, how to use the product to best advantage, and much other information of practical value may be gained from the bulletin by farmers and woodland owners generally.

For the student and the teacher there are copious and clear directions for field and desk study, a simple but accurate key to the species, and a list of 169 important forest trees with remarks on range and on botanical characteristics.

The bulletin may be had upon request of the United States Department of Agriculture, Washington, D. C.

Lower Prices, Less Talk! That's the average thinking man's and woman's platform today. They are right. We're doing it. We consider it our duty to sacrifice personal profits for general good. The way to bring prices down is to put them down. We are putting that policy into active operation. We don't expect to make any money, but we know that our reward in the good will of thousands of men and women will be of far greater importance than mere money.

*In this sale are included Xmas Gift Goods suitable for young and old, all at a discount of 20 per cent from our regular low prices*

For a GIRL	For a BOY	For PA	For MA	For BABY	For a "DEB"	For a CHAP		For the HOME
	<b>20% to 50%</b>				<b>20% to 50%</b>			For GRANDPA

MONDAY EVENING, Dec. 6, 1920.

**THE VIEWPOINT**

A southern colonel at a banquet in Arkansas recently offered the following toast to "water":

"Water—the purest and best of all things that God created. I want to say to you that I have seen it glisten in tiny teardrops on the sleeping lids of infants. I have seen it trickle down the blushing cheeks of youth, and go in rushing torrents down the wrinkled cheeks of age. I have seen it in tiny dewdrops like polished diamonds when the morning sun burst in red splendor over the eastern hills. I have seen it in the rushing stream dipping over pebbly bottoms; in the river surging over precipitous falls and rushing to join the mighty Father of Waters, and I have seen it in the mighty ocean on whose broad bosom float the battle fleets of all nations and the commerce of the world—but before and gentlemen, I want to say to you now, that as a beverage it's a damned failure."

We, too, have seen it on the mighty ocean shores choked with garbage rubbish and decayed fruits, a menace to the health of bathers and the men who man the ships of commerce and war. We have seen it in the mighty Father of Waters supporting bodies of dead animals, raw sewage and other filth. We have seen it in the placid river and in the roaring falls, carrying camp refuse, decayed vegetation, tin cans, papers and spoiled food. We have seen it in the trickling springs where lowly cattle cool their feet and in still pools where mosquitoes come to life. We, too, have seen it on the weary lids of sick children, fevered youths and old folks, on their noses and their mouths, and we want to say now and here that—you are right, gentlemen, as a beverage it is a damned failure—unless you know it's pure. California Health Bulletin.

**WHERE MONEY GOES**

"What is the money secured in the Christmas Seal sale used for?"

That question is very frequently asked in connection with the sale that began throughout Michigan Dec. 1, continuing until Dec. 31. During those eleven days the Michigan Anti-tuberculosis Association, through its 65 county and city organizations and through an extensive mail sale, will attempt to dispose of 20,000,000 seals in Michigan, at one cent each.

The main thing to remember, the Michigan Anti-tuberculosis Association answers the question, is that nearly all of the money remains in the county or city in which the seals are sold. A very small percentage goes to the national and state associations for their parts in organizing and conducting the sale. More than two thirds of the money on an average remains in the local community.

And what is done with that money? depends to a large extent on the local tuberculosis organization. The state association lays down no hard and fast rule as to how it shall be spent, except of course that it shall be used in public health work for the community. It is well established that whatever is done to curb disease in general also helps to curb tuberculosis, since tuberculosis patients are very frequently recruited from the ranks of those who have become run down through some other disease.

Some communities use the money directly for tuberculosis work, some for feeding undernourished children, thereby safeguarding them against contracting tuberculosis, some in more general health work. Most communities have some definite health program for which the money is needed, and a wide latitude is given in this regard.

But the main thing is that the money shall be used for some definite disease prevention, preferably for work that has a direct bearing on the prevention of tuberculosis. The percentage of the money that goes to the state and national associations is used for direct tuberculosis work.

Mr. Baker says in his report, "We must live in this world as it is, while we struggle to make it what it should be." Which indicates that even a pessimist may sometimes learn through experience.

Southern editorial comment following Senator Harding's visit to Dixie while en route to Panama, indicates that a good many people believe the Mason and Dixon line voted for God and prayed for the success of Harding.

**INTENSITY**

Somebody once asked Henry Ward Beecher what he best liked to do of all things in the world.

"Preaching," answered the famous preacher.

"But what do you like best for recreation? That's your vocation. What's your avocation?"

"Preaching," answered Beecher.

"Yes, yes, but surely you need something else. What do you like to do to give you a relief from preaching?"

"Preaching," again came the answer.

Henry Ward Beecher was not a narrow man, but he evidently believed in intensity.

He lived his work so well that he could find relief from work in more work. Is it any wonder that he succeeded in it?

It must be noted, however, that his work was of a very broad kind as well as a broadening kind. By it and thru it he could thereby compass that most admirable definite end of education—"to know a great deal about some one thing and a little about everything."

Nevertheless his answers were a revelation in the value of intensity to achieve accomplishment.

"Preaching" and "preaching" and "preaching" made him a great preacher. Perhaps America's greatest preacher.

**WHY NOT CHRISTMAS?**

In a few weeks the civilized people of the world will be talking of Christmas and its joys. They will be preparing to celebrate the birthday, anniversary of the Redeemer, who liveth.

A long, long time ago there crept into the English language an abbreviation for the word Christmas. Many feel ought to be eliminated. It is the obsolete "Xmas." Why not write it out plainly, "Christmas"? It is only a few more letters. "Xmas" isn't satisfying and gentlemen, I want to say to you now, that as a beverage it's a damned failure.

It is easy to see how the use of the shorter word came about. "X" happens to be the first letter of the Greek word for Christ. The fact that the letter X is cross-shaped also lent color to its use in the abbreviated "Xmas." And history tells us that in the catacombs X frequently stands for Christ. But things that are old are not necessarily good.

In the world in such a hurry that it cannot stop to write out the full name! What would the world say if in some reference to the Savior he called "Christ"? Suspicious and correct by so. The cases seem almost parallel. Let's give Christmas presents this year—not "Xmas" gifts.

**LAUGH AND GROW FAT**

Once a physician was called in a hurry to see a nursing baby that had violent convulsions. In the course of his visit he learned that a servant in the house had not too wild and threatened the cook with a knife and that had frightened the baby's mother.

He took samples of the mother's milk for analysis, and found that its different constituents were all out of proportion—too little of this and too much of that.

The mother's fear had deranged her bodily functions enough to change the baby's indigestion and the indigestion had caused convulsions.

What kind of health would that baby have had if the mother had been kept on edge continually by perpetual family quarrels, or if the child itself a little later had had its stomach turned by endless scoldings and fault finding?

"Better is a dinner of herbs where love is than a stalled ox and baited therewith," Better in every way.

**PEACE PAYS**

The trade of the United States with Mexico this year, according to the government's estimates, will touch the \$2,000,000,000 mark for the first time in history. This is almost three times the trade between the two countries five years ago.

There may be glory in war, in revolution, but there is golden prosperity in peace. Mexico now is learning this. A few years of this peaceful prosperity will do more to wipe out hardy ambitions from peon minds than an avalanche of law and army of police.

Personally we agree with Mr. Bryan that the democratic party should be reorganized for the next battle, but we are in favor of leaving him out of the organization.—Dallas News.

While others are discussing cabinet possibilities this column doesn't care to go further than to say that Mr. Burleson will not be retained beyond his term.—Tulsa Blade.

They say the cost of Columbus' voyage of discovery was only \$1,000, but they fail to add that we've been paying for it ever since, plus war tax.—Knoxville Journal and Tribune.

We mourn the defeat of the demo-crat party, but, if we have for it, we shall always tolerate the ousting of of Hueson.—Columbia Record.

This decision about moving your locker is a good deal like the famous recipe for cooking a rabbit.—Washington Post.

Never bet on a sure thing. It hurts like the devil to see the other fellow walking away with your money.

Every mother knows the good qualities of her children. Her neighbors know the rest.

**SMILES**

**Swallowing His Words**

Little Jimmy, having been punished for naughtiness, started mumbling to himself.

"What are you doing now?" asked his mother.

"The swearer," said the youngster, "but he chews it up so God won't hear me."—Boston Transcript.

**Didn't Break the Meter**

"Figures won't lie!" declared the statistician.

"Maybe you're right," answered the mild-mannered citizen. "And yet, some how, I can't put implicit faith in the numbers that go up on a taxicab register."—Houston Post.

**Case of Necessity**

"A friend in need is a friend indeed," continually said the new broker as he reached for a client's timepiece.

"I'm no friend of yours, Scrooge," said the needy one.

"Maybe not," chuckled the other, "but the fact remains that you're putting up with me."—Buffalo Express.

**In Starch of Rest**

"Going to town again?" inquired St. Similia.

"Yep," replied Farmer Cornstarch. "Got to give my nerves a rest. Summer boarders are making so much noise I have to get where I can sit on a park bench for awhile and be perfectly quiet."—Washington Star.

**His One Chance**

"I believe," said the impatient man as he put aside the telephone, "that I'll try fishing."

"Didn't know you cared for fishing."

"I don't ordinarily. But it's the only chance I have of finding myself at the end of a line that isn't busy."—Boys' Life.

**Trammen Hold Well**  
*Attended Meeting In Eagles Hall Sunday*

Members of the Brotherhood of Railway Trammens held a most interesting meeting in the Eagles Hall Sunday and discussed matters of vital interest to the order.

W. A. McDonald, chairman of the general grievance committee for the entire Soo Line system was here and talked with the men. Mr. McDonald came here from Minneapolis and returned this morning. The meeting, it is said, was filled with interesting discussions of matters which will affect the conditions of the men and it was largely attended.

**State Troopers Make Arrest of Inhonen**

Despite the fact that Detective Hoel of Duluth has been doing a lot of verdanting lately to his capture of Mike Inhonen, who was located at Maple Ridge, and is wanted in Duluth on a charge of murder, it now appears that the arrest of the man really was made by Troopers Sands and Douglas who were stationed at Maple Ridge. Hoel got his first information from a man who was arrested by the \$500 reward. Capt. Archie Downing of Negaunee assigned Corporal Sands and Trooper Douglas to the job and it was Douglas who walked up to Inhonen unarmed and placed him under arrest, notwithstanding the fact that Inhonen had an ace in his hands at the time and the arrest was made in the woods.

**Everett Tupper Home For 15-Day Furlough**

Everett Tupper, son of Mr. and Mrs. S. W. Tupper, is home from Camp Crooks, Nebraska, on a furlough. He joined the army September 13 of last year and was sent to Fort Snelling, Minn. where he was stationed until recently, when he was transferred to the Nebraska camp. He expects to be here among his friends and relatives for a period of about 15 days.

**Shelton Road Work Is Completed Today**

Street Commissioner Danielson today inspected the new portion of the Shelton road, a stretch of about 500 feet long, which has been ditched, graded and stamped and the job has been accepted. It will be reported to the council tonight as having been completed. Louis Cretons had the contract for the work and has made a fine job of it, according to Mr. Danielson's report.

**Goodyear Tubes Also Save Tires**

Underinflation destroys more tires than all other causes combined. When we remove that one source of expense from your tire problem, we have performed a service you will appreciate.

We supply tubes that actually do hold air.

The Goodyear Heavy Tourist Tube with its extra thickness, purity of rubber, laminated construction, and built-in valve patch prevents underinflation.

**S. Kjellander & Sons**  
Phone 210

**Engineers Name Officers For The Ensuing Year**

An interesting and enthusiastic meeting of the Brotherhood of Locomotive Engineers of this city was held Sunday at Eagle hall. Henry Klipp, general chairman, of Minneapolis, was present and made a most interesting address to the men.

Officers for the ensuing year were elected as follows:

F. N. Hood, Chief Engineer.  
C. W. LaFaver, Second Engineer.  
Leo Winkel, Secretary-Treasurer.  
T. D. Springer, Chaplain.  
J. I. Chase, Inside Guard.  
F. C. Fillmore, Grievance man for Local 266.  
C. W. LaFaver, delegate to state convention.  
E. G. Johnson, Alternate Delegate.  
C. W. LaFaver, T. D. Springer and W. A. Cameron, auditing committee.  
W. A. Cameron, Insurance Committee.

**Knights of Pythias To Name Officers**

Members of the local lodge Knights of Pythias will hold their annual election of officers at a meeting to be held in the Eagle Hall Tuesday evening. The year has been filled with a great deal of successful activity and the reports of the committees relative to matters of achievement will be most interesting. Tuesday Night's meeting is to be in the nature of a get together meeting and will be followed by a luncheon and a smoker.

**Shaw Is Stolen**

Mrs. Charles Van Dusen of Cornell reported to the police this afternoon that a gray and black woolen shawl was stolen from her wagon, which was standing in front of the Rosenblatt store. A reward is offered for the return of the shawl.

Come in and look our line over and compare our prices anywhere

**The VARIETY STORE**  
GEO. P. CASEY, Prop.

**Be Careful About Placing Christmas Seals On Packages**

Postmaster Miller has asked the people of Gladstone to refrain from placing Christmas seals and other emblems of Christmas, on the addressed side of packages. The government has a standing rule that all packages of stamps are unmailable but during the Christmas season it is customary to suspend this rule because of the fact that so many people, in the spirit of hurry which always prevails, fail to remember the ruling.

It makes a lot of hard work and confusion for postal clerks all over the country because many of the devices used resemble postage stamps and they should not be placed on the same side of the package as the regular postage stamp.

Put all your Christmas seals and decorations on the side of the package that does not bear the address. Help expedite the delivery of your parcel by cooperating with the postal department.

### Society Notes

#### Birthday Party

One of the most delightful parties of the season was held Friday night at the home of Mr. and Mrs. Thomas Jachor when a number of friends of their daughter Olive called to celebrate the young lady's fifteenth birthday. Various games and music made up the program after which a lovely lunch was served. Miss Olive was the recipient of many beautiful gifts in remembrance of the occasion.

#### Baptist Y. P. Society

The Baptist Y. P. Society will hold a bazaar and fancy work sale at Dehlin's Drug Store Saturday afternoon, Dec. 11. Don't forget the date and place as there will be all kinds of good things to eat and also many pieces of fancy work which will be appropriate as Xmas gifts.

#### M. Ladies Aid

The Methodist Ladies Aid will hold their regular meeting Wednesday afternoon in the church parlors. The hostesses will be: Madeline Gasser, Mrs. Barnum, Mrs. Leimer, and Mrs. Miller. In connection, Company B. of the Ladies Aid will conduct a sale of aprons and fancy work.

#### Aid Meeting and Auction

Mrs. Anton Larson will be hostess Thursday at Swedish Mission Ladies Aid meeting in the church parlors. In the evening the Children's Aid will hold an auction sale at 7:45 o'clock. Come and buy your Christmas gifts. Every one welcome.

#### Surprise Party

Miss Mary Payne was very pleasantly surprised at her home on Delta avenue last Thursday evening the occasion being her eighteenth birthday.

The evening was delightful with various social amusements following which refreshments were served.

#### "Glad Girls" Meet

Miss Alice Biddlecomb was hostess to the "Glad Girls" club of the Presbyterian church at her home on Minnesota avenue. A lovely musical and literary program was immensely enjoyed and in conclusion a delicious lunch was served.

#### Large Initiation

The Women's Catholic Order of Foresters will hold their regular meeting Wednesday night at which time there will be a very large class initiated. Committee No. 1 will serve a dainty lunch following the meeting.

#### Fine Musical Program

An exceptionally fine musical program was carried out at the Methodist church last night. Special anthems were sung and many lovely selections were given by the Sunday school orchestra.

#### Coteries Meet

The Coteries will meet tomorrow afternoon at the home of Mrs. J. Card. Mrs. I. N. Bushong, chairman of the program will be assisted by Mrs. J. T. Fitzpatrick and Mrs. W. L. Marble.

#### Civic League Meet

The Women's Civic League will meet Tuesday evening December 7th at the home of Mrs. August Feldt. After the usual routine of the meetings, refreshments will be served.

#### Swedish Mission Church

The congregation will hold its business meeting Tuesday evening at 7:45.

#### Soft

"I always sleep with my gloves on. That is what makes my hands so soft." "Hm, I suppose you sleep with hat on also?" - Boys' Life.

### Personals

Russell E. Hetrick who has been home for a visit left Saturday for Madison, Wisconsin where he will take a course in drying hard wood lumber at the State University.

Minnesota Avenue. \$8.00 shoes now \$6.00 at the Buckeye store.

The Misses Mildred and Florence Needham of Escanaba Sunday with Mrs. E. R. Carter.

Mrs. Floyd E. Jones left Wednesday night for a two weeks visit with friends in Minneapolis.

Christmas toys now on display at the Buckeye store.

Mrs. A. R. Laascher left this morning for the Soo where she will visit with relatives.

Mrs. George P. Casey is again able to be in the Variety Store after an absence of ten days because of mumps which she contracted from her little son George.

Velvet and plush coats cleaned, and steamed the Neo-way, by Pitt Belaire.

County School Commissioner C. U. Woolpert was looking after school matters in Rock, Thursday and Friday of this week.

Andrew Iversen made a business trip to Rock, Saturday.

#### Attention F. R. A.

You are urgently requested to attend the regular meeting to be held at Wass Hall Thursday evening, Dec. 13. Initiation of a large class, dancing and lunch to be there.

MARY E. HENKE, Sec'y.

105-81-11.

#### A Reasonable Suspicion

"Something mighty funny about this 'hatch of mine'" grumbled a citizen of Straddle Ridge, Ark. "It hadn't kept no decent sort of time since I had the jeweler over at Taminville fix it. First-rate good watch, too!"

"How much did it cost you in the first place?" asked an acquaintance.

"Swapped a dog for it and got a dollar to boot nine years ago. I'll betcha, by cripes, that there cuss stole the jewels out of it. That's what I'll betcha. Judge."

## The Columbia Grafonola is the Phonograph Plus

Here are five reasons why the Columbia Grafonola excels all other phonographs:

1. Exclusive Tone Levers. Give complete and accurate control over tone volume.
2. Straight Tone Arm. Allows the sound waves to develop fully and naturally.
3. Scientifically Correct Acoustic Design. Gives exquisite clearness and purity of tone.
4. Streamline Cabinets. In perfect accord with modern artistic furniture design.

### Plus

5. The Only Non Set Automatic Stop. Never stops before it should. Always stops at the very end. Nothing to move or set or measure. Just start the Columbia Grafonola, and it plays and stops itself.

Come in today and let us demonstrate the stop that needs no setting.

# NOTED PRISONER AT MARQUETTE TRIES ESCAPE

## "SLIPPERY JIM" CUSHWAY FAILS TO BREAK HIS "FAVORITE" PRISON

"Slippery Jim" Cushway, Michigan's best known jailbreaker, who assured officials of the Marquette branch prison that he would never attempt an escape because "I get a square deal at Marquette," has his word more demonstrated that his word is no better than a check marked "N. S. F." This time he used an entirely new ruse by which to gain his freedom, at least it was new for Jim, and that's something, because he has tried many.

A few days ago, just before time for the evening check roll call, Cushway collected a bundle of extra clothes in his cell and managed to rig up a dummy that resembled the familiar extra field dummy. Popped up in a chair, with its back to the door. It looked human enough at a glance from the corridor.

But Jim had "slipped" something moved secretly enough for "Slippery Jim." He arranged his dummy carefully and then made his dash from the cell. In his hurry to get out of sight he forgot to close the cell door tightly.

It was a slight error, but it "spilled the beans" for the man who has five previous escapes from Michigan prisons. The guard of sight he forgot to close the cell door tightly. As a result, the man who has five previous escapes from Michigan prisons. The guard of sight he forgot to close the cell door tightly. As a result, the man who has five previous escapes from Michigan prisons. The guard of sight he forgot to close the cell door tightly.

Freedom had short. A search was started immediately and "Slippery Jim" was found a few minutes later hiding behind a pile of lumber in the box factory. His attempt at the city will give him the first black mark he has ever received in the Marquette prison. He served eight years in the institution, coming here from Jackson with a black record, but he was one of the late Warden Russell's model prisoners and was one of the best workers in the building.

The story of Cushway's troubles after he was paroled from Marquette has been told before. He went to California, where he remained only a few months before he was in trouble and placed in prison for a year. He said there he made a clever attempt to escape, but failed, and was brought back to Marquette to serve the remainder of his term. When his sentence expired, he went to Detroit and was married. Later he was arrested for robbery in Milwaukee, but he sawed his way out of jail and escaped.

His present sentence was imposed by a Detroit judge after Jim had been arrested and charged with a series of robberies in that city. Cushway is a tailor, by profession, but a thief, by choice. He is forty-one years old and has spent twenty-six years of his life behind jail or prison bars.

## Clear Up Mystery As To Marquette Man Missing 17 Years

Discovery of a note and watch in a tree by Archie Beale, of Flint, Mich., while he was hunting in the woods near Hulbert, practically clears up the mysterious disappearance of Arthur Kahler, said to be a former expression of Manistique, who had not been heard from since 1903.

Beale was following a trail in the woods when his attention was arrested by a metal object hanging from a tree. It proved to be the case of an old watch, covered with rust and almost ready to fall apart. He opened it and on the inside was the following note, fairly well preserved:

"I have been lost three days. I have shot three deer and have placed the same kind of a note on every deer."

The story of the finding of the watch case and note was taken to the Soo by a hunter who met Beale in the woods. Several people were found in the Soo who knew Kahler and said he disappeared in November, 1903. They said he was an expression at Marquette.

NOTICE TO WATER CONSUMERS  
City Clerk's Office, Nov. 1st, 1920.  
Under the provisions of ordinance No. 125, your Water Rent is due Nov. 1st. If not paid at the expiration of thirty days your water will be shut off. All water rental is assessed to and payable by the owner of the property.

BOARD OF FIRE AND WATER COMMISSIONERS. 72-st.

# DOELLE ATTENDED LAND CONFERENCE

## REPRESENTED MICHIGAN AT AN IMPORTANT MEETING IN ST. PAUL

Land development in Michigan, Wisconsin and Minnesota and the policies to be pursued by the three states during the next few years in settling out-land lands were discussed at an important conference held this week in St. Paul, Minn.

John A. Doelle, secretary-manager of the Upper Peninsula Development Bureau representing Michigan at the bureau's representative, J. A. Preus, Minnesota's representative, J. A. Preus. Several men of prominence in land development, agricultural progress and land settlement work took part in the conference. Among them were Dean H. L. Russell, of the Wisconsin Agricultural college, and Ben Faust, president of the Wisconsin Colonization company, acknowledged to be one of the leading figures of the nation in this work. Mr. Faust is also vice-president of the federal farm loan bank in St. Paul and representative of the University of Wisconsin.

Other men at the conference were E. Q. Guarnie, president of the federal farm loan bank in St. Paul, and J. H. Hay, assistant state commissioner of agriculture, of Wisconsin. A number of prominent railroad officials from Wisconsin, Minnesota and Michigan who are interested in the business of land colonization, were also present.

Next Five Years Important  
Speakers at the conference declared that the next five years will be most important in farm and land development of the three states. It was predicted that the general letting-down of industry in large cities will attract large numbers of men back to the land. Furnishing homes for men who are out of employment and who have families, and getting them to settle on farms, was one of the problems to be met in the three states, it was asserted.

The conference decided that action ought to be taken, if possible, to scope the federal farm loan bank to grant greater credit to pioneers in the development of out-land lands. The federal farm loan bank will extend the filing of such banks to those that have been given to land colonization activities.

A case now pending before the supreme court will test the status of federal farm loan banks.

Uniform Laws Impertative  
"The policies of developing out-land lands are similar in Michigan, Wisconsin and Minnesota," said Mr. Doelle, upon his return from the St. Paul meeting. "It is plain that a uniformity of laws on land classification, or soil survey, fire protection, land colonization and other related problems, is imperative," he declared.

## Manistique Will Get \$7,500 Appropriation For Harbor Betterment

Manistique will receive a river and harbor appropriation of \$7,500 for the year of 1921 if the next Congress acts favorably upon the recommendations of Major Lansing Beale, chief in charge of the improvements committee.

The recommendations will be in the annual estimate which will be sent to Congress December 6 when they open their annual meeting. The Manistique river from the mouth to Minneapolis will require \$16,100,000 and is included in the committee report; the report also mentioned that shoals would require \$10,000,000. New York harbor and adjacent waterways, \$5,800,000; the Ohio river \$5,555,000; Philadelphia and the Delaware will require \$3,857,000 and the Delaware and Chesapeake \$2,500,000. The Mississippi river \$2,115,000.

Recommendations for appropriations include the Milwaukee district with the following items recommended: Manistique, \$7,500; Minneapolis, \$28,000; Green Bay, \$50,500; Fox River \$36,000; Sturgeon Bay, and Lake Michigan canal, \$35,000; Kewauqua, \$4,000; Two Rivers harbor, \$8,400; Sheboygan, \$13,500; Port Washington, \$83,000; Milwaukee, \$175,000; Racine, \$165,000; Kenosha, \$48,000 and Waukegan, \$116,000.

Anyone who can enjoy a burlesque show will never become a hero worshiper. He sees the saving gleam of humor.

# Water Board Proceedings

Gladstone Mich. December 2, 1920.  
Regular meeting of the Board of Fire and Water Commissioners.

Present - President Klingenberg, Commissioners Harris, DeGross, Nelson (4).  
Absent Commissioner Gormsen. (1).  
Minutes of November 4th 1920, were read and approved.

To the Board of Fire and Water Commissioners - The following is the report of the water disinfecting plant for the month of November 1920.  
24 samples of treated water were tested. 2 samples were found doubtful. The balance were found safe.

Yours very truly,  
A. RADANT, Supt.

No objection being offered, the president ordered the above report accepted and placed on file.

The communication from H. E. Pifer, Rapid River, Mich., relative to self electric line in Brampton Township was taken up, read and discussed. No objections received and placed on file.

The communication from the Department of Health, Lansing, Mich., relative to report of examination made to test the new lot of dehydrated media. It appears that the media before attempting such work. It appears that infiltration galleries are the proper solution for your problem, but the construction of either a well or infiltration galleries cannot be recommended safely without careful studies being made of the subsurface deposits along the shore of the bay was taken up, read and discussed.

Moved by Commissioner DeGross, supported by Commissioner Harris, that we write the State Engineer for the above information regarding flowing wells and get the correct data on same.

Motion carried unanimously.  
The secretary informed the board that the city council had granted the arc lamp petition on the corner of 11th street and Delta avenue.

The communication for Mrs. F. Haber, regarding her water rents was taken up and read.  
No objections it was received and placed on file.

Committee on claims and accounts, made the report.  
To the Board of Fire and Water Commissioners - Your committee on claims and accounts, would respectfully report, that they have had the matter regarding bills under careful consideration, and would respectfully recommend that they be certified to the City Council for payment.

City Clerk.

NOTICE OF SPECIAL ASSESSMENT  
To M. J. Magoun, John Richardson, Forest Miller, Milton Danita, E. H. Rippe estate, C. Tordur, A. W. Wolfe, A. L. Emson, John Cowell, C. W. Lightfoot, F. H. Huber Estate Arthur Berg, and to all other persons interested:

TAKE NOTICE: That the roll of the special assessment heretofore made by the City Assessor for the purpose of defraying that part of the cost which the council decided to be paid and borne by special assessment (the laying of main sewer, laterals to lot lines in Dakota avenue between 10th and 12th streets and Twelfth street) is now on file in my office for public inspection. Notice is also hereby given that the city council and city assessor of the City of Gladstone, will meet at the council chambers in said city, on the Sixth day of December, 1920, at eight o'clock P. M. to review said assessment, at which time and place opportunity will be given to all persons interested to be heard.

Dated November 18, 1920.  
A. L. WILLIAMSON,  
City Clerk.

# FOURTH CLASS POST MASTER EXAMINATION

The United States Civil Service Commission has announced an examination to be held at Gladstone, Mich. on Jan. 8, 1921 as a result of which it is expected to make certification to fill a contemplated vacancy in the position of fourth class postmaster at Kippling and other vacancies as they may occur at that office, unless it shall be decided in the interests of the service to fill any vacancy by reinstatement. The compensation of the postmaster at this office was \$313 for the last fiscal year.

Applicants must have reached their twenty-first birthday on the date of the examination, with the exception that in a state where women are declared by statute to be at full age for all purposes at sixteen years, women eighteen years of age on the date of the examination will be admitted. Applicants must reside within the territory supplied by the post office for which the examination is announced.

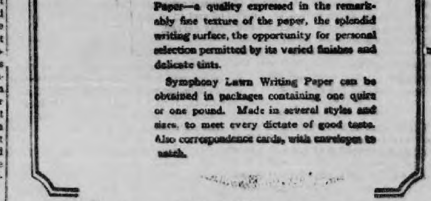

The examination is open to all citizens of the United States who can comply with the requirements. Application blanks, Form 1763, and full information concerning the requirements of the examination can be secured from the postmaster at the place of vacancy or from the United States Civil Service Commission, Washington, D. C.

Applicants should be properly executed and filed with the Commission at Washington, D. C. at the earliest practical date.

Policewomen Walk Like Men.  
London policewomen work in regular police and have adopted the regular policeman's stride—long, slow-measured. As their work is moral station, they carry no weapon, but as a means of self defense they have learned jiu-jitsu tricks.

# FINDS BUSINESS MEN OPTIMISTIC AS TO FUTURE

### HENRY ROSENBLUM RETURNS FROM NATIONAL ZIONIST MEETING IN BUFFALO

Henry Rosenblum, President of the Upper Peninsula Zionist Service Bureau, returned Thursday evening from the national convention which was held in Buffalo. There he met delegates from every state in the union and several from foreign countries. The meeting was one of the most satisfactory and inspirational ever held by the Zionists of this country. Mr. Rosenblum returns to Gladstone filled with the great zeal for the work which has been entrusted to him. He developed at the meeting that the Upper Peninsula had been doing an especially successful and praiseworthy work.

The convention lasted four days but Mr. Rosenblum has been gone for nearly ten days. He spent several days in Detroit where his son Herbert who is attending the university at Ann Arbor, came to meet him and spend a day.

As to business conditions generally in the east and Detroit, Mr. Rosenblum expressed a most optimistic view. He says he found a general inclination among business men to "watch the current" but all of them, and this was particularly so in Detroit, expect business conditions to be much more satisfactory by the first of the new year. In many industries where readjustments are being made, more have been laid off, but there is every reason to believe that these industries will be running with full forces after the first of the year.

As to the meeting of the National Zionist Association Mr. Rosenblum was most enthusiastic. Over 375 delegates were present and the four day session was taken up with a discussion of matters of vital interest to the Jewish people of the United States and the world.

The general sessions of the convention were presided over by Judge Julian Mack. Among the prominent speakers before the convention were Rabbi Wisner, of New York, and Judge Hugo Pan, of Chicago.

Foreign Delegates Present. In addition to the delegates from every section of the United States, a delegate was present from England, one from Hungary and two from Palestine. The reports submitted to the convention by the latter as to conditions in Palestine and the need for immediate action to provide housing there for thousands of Jewish families in the stricken areas of Europe, formed the most appealing features of the convention.

After years of effort the Jewish people of the world have secured possession of Palestine and the greatest colonization project ever to be carried out in the history of the world is planned there. The Promised Land is to be peopled by Jewish families taken from the oppression and privations the race has endured from sections of Europe and placed in Palestine. The need for action is so great it has been decided to move 100,000 Jewish people to Palestine as soon as the movement can be accomplished and the elaborate plans perfected by the Zionist organization contemplates the eventual settling there of 3,000,000 people. The majority of the stricken families are to be placed on farm lands in Palestine and provided with means by which they may earn their own livelihood. Manufacturing plants are to be established that places of employment may be provided for those not placed on farms. Modern improvements are to be installed in the ancient cities of Palestine and extensive irrigation projects are to be carried out.

Start With Ten Million. To start the work it was decided at the Buffalo convention that \$10,000,000 must be spent at once and that sum is to be raised in the earliest possible time. The whole project contemplated in Palestine will cost many more millions of dollars but ten millions is to be raised for immediate use.

In addition to the charitable work to which the Jewish people will contribute, a trust company is being organized that will loan funds to manufacturers who desire to locate in Palestine. A land corporation is being formed that will have for its object the buying up of all of the lands in Palestine and the eventual sale of these lands to the Jewish families settled there. As a practical application of the plan thousands of members of the race will be asked to buy sufficient land in Palestine on which one suffering Jewish family may be placed. For six years the family will remain on the land paying no rent and only a nominal interest rate. At the end of six years the family will be allowed to purchase the land on which they are located at a price but slightly greater than the original cost of the parcel of land.

Quotas Not Yet Fixed. No quota or district quotas for the immediate project have yet been announced by the executive committee of the national organization is to meet

and decide upon the quotas that must be raised to finance the immediate needs of the association.

Mr. Rosenblum as chairman of the upper peninsula organization, will probably call a meeting of the executive committee of the peninsula district as soon as the quotas are announced and the drive in the district will be pushed to completion in the earliest possible time. The upper peninsula is divided into five groups and Mr. Rosenblum, peninsula chairman with the five group chairmen, constitute the peninsula executive board.

## Michigan Farmers Get New Services

Emergency in the farming industry due to a loss of millions of dollars in the drop of farm product prices has caused the State Farm Bureau to organize four new branches of service in the last three months, according to the State Farm Bureau. These new services are grain marketing, purchasing, hay marketing and legislative.

With the country's hay production 3,000,000 tons greater than last year, Michigan hay producers face a particularly difficult problem in disposing of their crop. The State Farm Bureau reports that it expects to find a market among the 100,000 individuals who buy hay in the United States in carload lots. The surplus crop in the Upper Peninsula is estimated at between 3,000 and 5,000 cars and for the Thumb district between 2,000 and 2,500 cars.

Study of legislative problems was found immediately necessary, the Farm Bureau reports, because of the widespread call for the "winnow economy" in state government and the demand on the part of farmers for certain kinds of protective state and national legislation.

Though farm supplies have not and the need of a purchasing department was also imperative. This department is reported to be doing business already in hundreds of cars. Speculation in wheat and the dropping of prices below the cost of production has made it necessary to build a permanent state-wide grain marketing agency which will be able to fall in with the plans of the "Committee of Seventeen" when it adopts a national plan for grain marketing.

## \$700,000 Sale Of Timber Land Made

Ashlund, Wis.—In one of the largest real estate deals in this part of the country, many thousands acres of choice timber land was transferred from F. E. Weyerhaeuser and wife to the Park Falls Lumber company.

The deed which will do with 78,000 acres, carries a revenue stamp for \$775,000, which indicates a consideration of \$700,000. The Weyerhaeuser people had their headquarters in Chipewa Falls, but worked in this territory under contracts with the Hines Lumber company.

The recent deal will mean several years of logging for the Park Falls Lumber company, as much of the land is virgin timber. The largest part of the tract is in the southern part of Ashlund county.

Watered Stock. Jumble (visiting his uncle in the country)—"Oh, Uncle George, your hired man is not honest. He let 'em drink a whole lot of water just before he milked them."

None should loaf, but it is every one's privilege to get out of a little work.

## GROESBECK HAS VACANCIES TO FILL

### NO APPOINTIVE OFFICE TERMS TO EXPIRE BEFORE YEAR 1922

Lansing, Mich.—Virtually no important state appointments await the pleasure of Governor-elect Alex. Groesbeck who in his assumed office January 7. As usual, there will be some vacancies on minor boards and commissions during the two years of Groesbeck's term, but under legislative acts the terms of most of the important appointive state offices have been extended to four years and, barring the unexpected, there will be few vacancies until 1922.

Probably the most important office the new executive will have to fill will be on the state tax commission, the term of Chairman O. F. Barnes expiring January 21. Likewise the term of the state purchasing agent is an indefinite one, "during pleasure of the governor," according to legislative act of 1915. Charles D. Betts, of Lansing, is the incumbent. The term of State Budget Commissioner Charles R. Foote expires in 1922.

The board of control of Marquette prison undoubtedly will select the new warden, to succeed the late James Russell, who has filled that post for 18 years up to his sudden death last week. Several other important appointive offices now are filled by boards rather than by direct appointment of the governor, among them the state game commissioner, who is named by the public domain commission, the executive secretary of the state securities commission, the secretary of the state board of auditors and others.

The term of the present commissioner of insurance, Frank E. Ellsworth, State Labor Commissioner R. H. Fletcher, State Banking Commissioner Frank W. Merrick and Food and Drug Commissioner Fred L. Woodworth, also the five public utility commissioners, regarded as the more important appointive offices, do not expire until 1923, which would leave Mr. Groesbeck out of it, unless there is a second term.

## War History Of 32nd Division Is Out Now

Detroit, Mich.—A history of the Thirty-Second Division, composed of Michigan and Wisconsin men during the world war, is being distributed to former members of the unit and to first kin of those who lost their lives in the war, according to advices received here from Madison, Wis. Several days are expected to be required for the distribution.

The history is a complete record of the division's achievements and the book contains photographs of men of the division in training and in actual warfare.

Nature of the Beast. Neil (of the notions)—Ever notice, Gert, hat mabers are all to the Pollyanna's?

Gert (of the gloves)—Speaking of their glad rags?

Neil—Partly—now if you mention it, but what I had in mind was that in spite of the many cruel cuts and sad blows sustained by mabers, they at ways come up smiling.—Buffalo Express.

Making noise is sometimes the last refuge of those who don't mind imposing on others.

## Proclamation

To The People of Michigan:—War conditions still prevail in the Near East where the new Armenian Republic is striving desperately to end the chaos of the past six years.

The Congress of the United States has granted a charter to Near East Relief to rescue thru the medium of American philanthropy the thousands who are suffering in those ancient Bible lands.

Authoritative reports advise of the activities of the Turk Nationalist forces, and show that thousands of the women and children of Armenia are fleeing as refugees before the Turkish hordes. Extraordinary measures must be taken if they are to be spared the horrors of exposure and starvation.

Their government is unable to provide for them. They cannot negotiate loans. They are entirely dependent upon American philanthropy.

Near East Relief is the agency equipped to handle this unusual situation and has established an enviable record of unselfish devotion to these sufferers, which mingled with efficiency has resulted in the salvaging of one hundred and ten thousand little children.

Two hundred and twenty-nine orphanages have been established, and sixty-three hospitals are in constant operation. Thousands are self-supporting again and are employed in twenty-three industrial establishments making clothing and supplies that are sold for the benefit of those not yet cared for.

This work has all been done with money subscribed by the people of Michigan and the other states of our Union. It must go on.

Withdrawal of our aid at this time would soon plunge those who still survive back into the condition of starvation from which they were rescued so recently, and means the death of those now living again as refugees.

That this great work of humanity may go on until the victory is won, I officially commend this appeal of Near East Relief to the generous heart of Michigan, confident that it will respond as it has in the past to the cries of those in distress, and do its full share towards their relief.

Given under my hand and the Great Seal of the State of Michigan this second day of December, nineteen hundred and twenty.

ALBERT E. SLEEPER, Governor of Michigan.

Such a predatory game as poker can't be called a friendly pastime.

Fish Usable to Swim. It is a fact that there are fish that cannot swim. A Brazilian fish, the malin, can only crawl, hop, or hop. It has a long, upturned snout and resembles to some extent the anterior fins of the malin quite small and are not suitable in the water. They are in real pairs which are of no service to the fish.

# JOHN A. DOELLE OUTLINES HIS PLANS FOR U.P.

## CLEVELAND REPRESENTATION ON STATE AGRICULTURE BOARD WILL BE HELPFUL

Marquette, December 6.—Informed of the fact that he had been placed in the field as candidate for election to the state board of agriculture, John A. Doelle, secretary-manager of the Upper Peninsula Development Bureau, issued a brief statement regarding what he hoped to accomplish, if elected.

"I would aim, first, to give the upper peninsula of Michigan an equal representation with the rest of the state in the Straits of Mackinac in all agricultural matters—particularly those pertaining to the immediate development of up per Michigan's vast acreage of idle agricultural land," Mr. Doelle declared. "I do not believe that upper Michigan has received its just share of consideration in the past, and no doubt to the fact that Cleveland has not been represented on the board.

**Four Chief Considerations**  
"I believe that at this time, there are four chief considerations as regards Michigan's agricultural development—rural credit, soil survey, forest fire protection and the colonization and settlement of idle land.

"As regards rural credit, I would favor an extension of the provisions of the present farm loan act so as to make the benefits of that more liberal for the man who needs help. "And the soil survey—probably Michigan's greatest agricultural need in the present time. Michigan must have the soil survey before it can hope to compete fairly with Wisconsin and other states where the lumbering industry has created the idle-acreage problem, and where the survey is in effect. Wisconsin is going ahead rapidly in the matter of colonization, and the authorities there credit the soil survey with much of the success.

"The forest fire protection problem presents a little or no argument, as far as its need is concerned. That is too obvious. Thousands of dollars of damage is done annually to the forests of upper and lower Michigan through lack of proper protection. The situation calls for increased appropriation, and more adequate facilities for maintaining the logs. This, of course, can be accomplished only through legislation, but the immediate need is an energetic educational campaign which will bring public opinion to bear upon this issue.

**Colonization Called For**  
"Upper Michigan's 7,000,000 of more acres of idle, agricultural land calls for an immediate colonization policy of some sort. I believe that the same results can be accomplished in northern Michigan as have been achieved in northern Wisconsin through organized colonization and settlement. Here, likewise, there is need for an energetic educational campaign, particularly among the lumbermen, other land owners and the business interests, generally, of upper Michigan. I am sure that systematic colonization will be looked upon as the only effective solution of the idle-acreage problem. Wisconsin has no more advantages, geographically, than upper Michigan, and, in fact, conditions maintaining are very similar. Wisconsin is making a success of colonization, through the various agencies operating through the state. Their settlers inquire average 100 to our 900. Their work is systematic—ours is not. I believe that, second only to the soil survey, systematic colonization is upper Michigan's only logical outlet in the matter of idle, cut-over lands.

"It is understood, of course, that if chosen for the board I will aim to serve as energetically for the lower peninsula as the upper, giving my best efforts to both for the general agricultural development of the state." Mr. Doelle is strongly supported by the state press, and the agricultural interests of Michigan. He believed that little or no opposition to his candidacy will be forthcoming.

**Marriage of Marvel**  
Cervia, the baby is certainly bright for a somewhat-old infant.  
**Parish—Is it that?**  
Cervia—Is it that? He is the man who married the other night and he started to cry in the saddest part of the picture.—Film Fun.

**ART KATLER.**  
The story of the finding of the watch case and note was taken to the Soo by a hunter who met Bearie in the woods. Several people were found in the Soo who knew Katler and said he disappeared in November, 1915. They said he was an expressman at Marquette.

**NOTICE TO WATER CONSUMERS**  
City Clerk's Office, Nov. 1st, 1920. Under the provisions of ordinance No. 126, your Water Rent is due Nov. 1st. If not paid at the expiration of thirty days your water will be shut off. All water rental is advanced and payable by the owner of the property.

**BOARD OF FIRE AND WATER COMMISSIONERS.** 72-21.

## SHORT NEWS NOTES

**Recovering Very Nicely**  
Mrs. John Freeman who has been very seriously ill is recovering nicely and is able to be around the house.

**To Undergo Operation**  
Mrs. August Martin will leave the latter part of this week for St. Francis Hospital where she will undergo an operation for gall stones.

**Called by Illness**  
Leonard Squance was called to Ontonagon today by news of the serious illness of his father, Charles Squance who suffered a stroke of paralysis. No details were contained in the message received by Mr. Squance, but he left on the first train to go to his father's bedside.

**Auction Sale Success**  
The auction sale conducted by the Ladies Aid of the Swedish Lutheran Church in the church parlors last Thursday proved a immense success. There were numerous pretty articles disposed of and the ladies realized \$258.90 as a result of their efforts. The aid will give the proceeds to the son's Drug Store Saturday afternoon.

**To Hear Lindsay**  
Quite a number of Gladstone people are making arrangements to attend the lecture to be given in Escanaba Wednesday night by Judge Ben Lindsay. Lindsay is the country over for his methods of handling juvenile court cases. Judge Lindsay is one of the "biggest little men" in the nation and has many admirers here who will take advantage of this opportunity to hear him.

**Al Phillips Ill**  
Al Phillips, local featherweight, who has been expected to appear in some of the local boxing shows this winter, was seized by a sinking spell while at his work at the Marble Arms plant Friday afternoon and was taken to his room, where he was placed under the care of a physician. This is the second semi-coma he has suffered within a month and while his condition is not regarded as serious, he will be compelled to give up his work for several days.

## More Room Needed at Soo Line Round House

Local officials of the Soo Line were gratified this week to learn that plans are now in formation for the enlarging of the round house here so that it will accommodate 22 instead of 12 engines. This means the provision of space for ten new stalls.  
Local men have struggled for months under a handicap of too little room in which to conduct the volume of business that flows in to this point on the line. The importance of Gladstone is increasing to such an extent that new and greater facilities must be provided for handling the business and it is apparent from letters received that the company will soon begin making the necessary changes.

\$2,800,000; the Ohio river \$5,535,000; Philadelphia and the Delaware require \$2,827,000 and the Delaware and Chesapeake \$2,500,000. The Missouri river \$2,150,000.

Recommendations for appropriations include the Milwaukee district with the following items recommended: Manitowish, \$7,500; Menominee, \$25,000; Green Bay, \$55,500; Fox River, \$36,000; Sturgeon Bay, and Lake Michigan canal, \$25,000; Kewaunee, \$4,000; Two Rivers harbor, \$8,400; Sheboygan, \$15,000; Port Washington, \$32,000; Milwaukee, \$15,000; Racine, \$155,000; Kenosha, \$48,000 and Waukegan, \$116,000.

Anyone who can enjoy a burlesque show will ne'er become a hero worshiper. He sees the having gleam of humor.

## VICTORY MEDALS

### A Proclamation By the Governor

I am advised that a considerable number of men entitled to Victory Medals have not made application for them, and I have been requested to urge all county, city and township authorities of the State, to be vigilant in their power to bring this matter to the attention of the men concerned. Applications from Western Michigan should be sent to the Army Recruiting Office at 211 Monroe Avenue, Grand Rapids, and those from Eastern Michigan should go to the corresponding office at 215 Woodward Avenue, Detroit.

Therefore, I, Albert E. Sleeper, Governor of the State of Michigan, do hereby request the officials named above to do what they can to stimulate the placing of applications for Victory Medals. Given under my hand at the Capitol in Lansing, this thirtieth day of November, 1920.

ALBERT E. SLEEPER, Governor.

## Masonic Fraternity Names New Officers

Members of Gladstone lodge No. 183 F. & A. M. held their annual election of officers Friday night. It is indicated that the lodge is to have a busy year. Following is the list of officers chosen:

- Worshipful Master—George C. Ogden
- Senior Warden—Paul E. Hammond
- Secretary—George Sinclair
- Treasurer—Henry Rosenblum
- Delegate to Grand Lodge—C. A. Clark

Appointive officers will be filled later by the worshipful master.

## Water Supply For City Discussed By The Local Board

The board of fire and water commissioners at their meeting of last Thursday evening discussed a communication received from E. D. Rich, state sanitary engineer, who has been asked about the advisability of drilling a number of wells here to supply a supply of pure drinking water. It was estimated that the cost of this work would be about \$20,000.

Here is what Mr. Rich thinks about the proposition: "Replying to your letter of November 8th concerning the proposed improvements to your water collecting system, I would advise that you employ an experienced engineer to make investigations in this connection and prepare designs for these improvements. You will find that this will not only do much to insure the success of the work but will prove to be the most satisfactory way to proceed with this work. Present laws require that any improvements of this kind undertaken by a municipality must be done under the supervision of a registered engineer.

"While a few municipalities in the state have successfully obtained a sufficient quantity of water from wells constructed as indicated by your letter, the large number of failures show conclusively that careful investigation should be made before attempting such work. It appears that infiltration galleries cannot be recommended safely without careful studies being made of the subsurface deposits along the shore of the bay.

"If you do not have the addresses of engineers whom you know to be thoroughly competent, we shall be glad to furnish you with a list of men who have had broad experience in this line of work.

"I wish to again emphasize the absolute necessity of careful investigation and design before attempting this kind of work.

—EDWARD D. RICH  
State Sanitary Engineer.

## AROUND THE U.P.

### Coal Co. Pays Fine of \$80

Kemp Bros' coal company, of the Soo, was charged with sending out a ton of coal which was 175 pounds short weight. A fine of \$80 was imposed in justice court after complaint had been made by Inspector Rowe, of the state department. The Kemp company claims that the driver had delivered a portion of the load to another place without its knowledge, thereby accounting for the short weight.

### First Logs Received

The first carload of logs for the Ford sawmill now under construction at Iron Mountain was received this week. The arrival of the logs was noted with unusual interest by the Ford employes because it was the initial shipment to the Ford plant. The arrival of the logs was hailed with a degree of delight probably proportionate to that which hailed the turning out of the first Ford car years ago at the Ford Motor plant in Detroit. It is understood that ten million feet of logs will be unloaded at the Ford property before the winter is over, and that the sawing of them will be started in the spring. Work at the property is progressing nicely. The power house is now all enclosed, and within two days or so the outside work of the sawmill will be completed, a little stucco work remaining to be done and some glass to be put in.

### Lodge is Praised

That the Ironwood lodge gave more members for service during the world war than any other branch of the organization in the nation is the statement of Walter Willis, supreme secretary of the Sons of St. George, John Nines, who has been a member of the lodge several years, was the first man of the Ironwood lodge to join the British army in the late war. He left Ironwood for England in August, 1915, and was discharged in February 1920.

Connecticut is a derivation of the Indian word "Quinn-tukul", meaning "upon the long river," the Connecticut river.
